To be effective participants in our complex and rapidly changing world, university graduates today need a firm and comprehensive grasp of the sciences concerned with social and behavioral phenomena. These phenomena constitute the most dynamic elements of those environments in which human beings live and work.

The College of Social Science at Michigan State University has primary responsibility for providing undergraduate and graduate education in the various specialized areas of social and behavioral science. The College carries out its educational and other responsibilities through a number of units: the departments of Anthropology, Geography, Political Science, Psychology, and Sociology; the schools of Criminal Justice, Labor and Industrial Relations, and Social Work; the Women’s Studies Program (administered jointly with the College of Arts and Letters); the Center for Integrative Studies in Social Science; the Center for Advanced Study of International Development; the Center for Remote Sensing and Geographic Information Science; and the Institute for Public Policy and Social Research.

The College of Social Science participates with several other components of the University in making a wide array of contributions to knowledge. For example, the College collaborates with the following units in teaching and research activities: the College of Human Medicine, the College of Agriculture and Natural Resources, the College of Arts and Letters, the College of Natural Science, the College of Education, University Outreach, International Studies and Programs, the Institute for Children, Youth, and Families, the Institute for International Health, the Centers for African Studies, Asian Studies, Canadian Studies and Latin American and Caribbean Studies, the Center for Remote Sensing and Geographic Information Science, and the Evening College.

UNDERGRADUATE PROGRAMS

The College of Social Science offers programs of study in the departments, the schools, and the Interdisciplinary Studies in Social Science major. Students should carefully study the catalog descriptions of the majors that the College offers before making a choice. The three general types of majors that are available through the College are described below.

A departmental major consists of not fewer than 24 credits in courses recognized by the department as counting toward the major. The departmental major is designed to provide concentrated study in a specific field and is offered by all departments; the major is complemented by a further selection of courses in other departments to give breadth to a student’s program.

A student majoring in one of the schools is introduced to the principles and techniques which are basic to the subject-matter area and then proceeds with consideration of their application in specified programs of study. The minimum number of credits required varies between the different programs. In each school, the major program consists of courses offered within the school and considerable course work in complementary disciplines.

The Interdisciplinary Studies in Social Science major requires at least 42 credits in courses recognized by the Col-
lege as counting toward the major. This is a broadly based major which provides a well-rounded liberal education. All majors in the College are designed to provide a liberal education, rather than limited technical or vocational training. To this end, the programs of study include academic work in the Colleges of Arts and Letters and Natural Science. Majors in the College provide a useful background for those interested in a wide variety of careers, as well as for those intending to pursue advanced degrees in professional or graduate schools.

The College of Social Science offers programs leading to the Bachelor of Arts, Bachelor of Science, and Bachelor of Landscape Architecture degrees.

Freshmen
Students meeting the general requirements for admission to the University shown in the Undergraduate Education section of this catalog are enrolled in the Undergraduate University Division but may declare a major preference for a program of study in one of the departments or schools of the College of Social Science, or in the Interdisciplinary Studies in Social Science major. Students who declare such major preferences will be assigned an academic adviser in this College.

Admission as a Junior to the College of Social Science
1. Completion of at least 56 credits acceptable to the College.
2. An academic record which at least meets the requirements of Academic Standing of Undergraduate Students.
3. Acceptance as a major in a program of the College. The number of students admitted to the Social Work and Landscape Architecture programs at the junior and senior levels is limited.

Students will find it difficult to complete a degree program in two years after acceptance in the College as a junior unless a minimum of 60 credits, including some of the program requirements, are earned during the first two years.

Graduation Requirements for the Bachelor of Arts and Bachelor of Science Degrees
To ensure an appropriately broad and well-balanced education, all undergraduates enrolled in the College of Social Science must satisfy the following subject matter and credit distribution requirements, in addition to the graduation requirements of the University as described in the Undergraduate Education section of this catalog. Courses approved for Integrative Studies may not be counted toward any of these college graduation requirements. Students may not use independent study, internship, field experience, and practicum courses to fulfill college requirements. Unless otherwise noted, no courses offered by a student's major department or school may be counted toward the college requirements.

I. All Bachelor of Arts candidates must meet the following requirements:
   A. SOCIAL SCIENCE REQUIREMENT
      1. Complete the requirements of a major of no fewer than 24 credits with a minimum 2.00 grade-point average for courses in the major.
      2. Complete a minimum of three courses totaling at least 9 credits in the following departments: Anthropology, Economics, Geography, Political Science, Psychology, and Sociology.

Students with majors in a department or school must meet this requirement with courses outside the major. A department or school may require its majors to complete particular courses to satisfy this college requirement. Courses in the College of Social Science that have been specifically designated by the Curriculum and Academic Policies Committee for the college requirement in Natural Science may not be used to satisfy this requirement.

B. NATURAL SCIENCE, AND ARTS AND LETTERS, REQUIREMENT
   Complete a minimum of six courses totaling at least 18 credits in the College of Arts and Letters and the College of Natural Science. A minimum of two courses must be completed in each of the two colleges. The courses must be in the subject matter areas designated below. A department or school may require its majors to complete particular subject matter areas or specific courses in the two colleges to satisfy this college requirement.
   1. A minimum of two courses (totaling at least 6 credits) in the College of Arts and Letters selected from the following subject matter areas: history, philosophical and religious thought, literature and fine arts, linguistics, and foreign language. If the student selects two courses in a foreign language to meet this requirement, both courses must be in the same language. First-year courses used to fulfill the University language requirement may not be counted toward this requirement.
   2. A minimum of two courses (totaling at least 6 credits) in the College of Natural Science selected from the following subject matter areas: biological and life sciences, physical and earth sciences, and mathematics and statistics. In addition to courses in the College of Natural Science, certain courses in the College of Social Science specifically designated by the Curriculum and Academic Policies Committee may be counted toward this college requirement. Courses used to fulfill the University mathematics requirement may not be counted toward this requirement.

C. DISTRIBUTION REQUIREMENTS
   1. Complete a minimum of 30 credits in courses numbered at the 300 level and above. Courses offered by the student's major department or school may be used to satisfy this requirement.
   2. Complete at least 60 credits outside the major, if the major is in a department or school.
   3. The total of independent study, internship, field experience, and practicum credits applied to the degree may not exceed 20 credits.
   4. A minimum of 12 credits of independent study may be applied to the degree.
   5. The total internship, field experience, and practicum credits applied to the degree may not exceed 12 credits.

II. All Bachelor of Science candidates must meet the following requirements:
   A. SOCIAL SCIENCE REQUIREMENT
      1. Complete the requirements of a major of no fewer than 24 credits with a minimum 2.00 grade-point average for courses in the major.
      2. Complete a minimum of three courses totaling at least 9 credits in the following departments: Anthropology, Economics, Geography, Political Science, Psychology, and Sociology.

Students with majors in a department or school must meet this requirement with courses
outside the major. A department or school may require its majors to complete particular courses to satisfy this college requirement. Courses in the College of Social Science that have been specifically designated by the Curriculum and Academic Policies Committee for the college requirement in Natural Science may not be used to satisfy this requirement.

B. NATURAL SCIENCE REQUIREMENT
Complete a minimum of four courses totalling at least 12 credits in the College of Natural Science in the subject matter areas of biological and life sciences, physical and earth sciences, and mathematics and statistics. A department or school may require its majors to complete particular subject matter areas or specific courses in the College of Natural Science to satisfy this college requirement. In addition to courses in the College of Natural Science, certain courses in the College of Social Science specifically designated by the Curriculum and Academic Policies Committee may be counted toward this college requirement. Courses used to fulfill the University mathematics requirement may not be counted toward this requirement.

C. ARTS AND LETTERS REQUIREMENT
Complete a minimum of two courses totalling at least 6 credits in the College of Arts and Letters in the following subject matter areas: history, philosophical and religious thought, literature and fine arts, linguistics, and foreign language. A department or school may require its majors to complete particular subject matter areas or specific courses in the College of Arts and Letters to satisfy this college requirement. If the student selects two courses in a foreign language to meet this requirement, both courses must be in the same language. First-year courses used to fulfill the University language requirement may not be counted toward this requirement.

D. DISTRIBUTION REQUIREMENTS
1. Complete a minimum of 30 credits in courses numbered at the 300 level and above. Courses offered by the student’s major department or school may be used to satisfy this requirement.
2. Complete at least 60 credits outside the major, if the major is in a department or school.
3. The total of independent study, internship, field experience, and practicum credits applied to the degree may not exceed 20 credits.
4. A maximum of 12 credits of independent study may be applied to the degree.
5. The total of internship, field experience, and practicum credits applied to the degree may not exceed 12 credits.

Graduation Requirements for the Bachelor of Landscape Architecture Degree
See the Department of Geography section for the requirements for the Bachelor of Landscape Architecture degree with a major in landscape architecture.

Preprofessional Programs
At Michigan State University students may select programs of study which meet the admission requirements of the professional college of their choice. Since the admission requirements to professional programs vary among colleges, it is not feasible to establish a single program for each profession that satisfies the admission requirements of all colleges. However, in the field of law, the College of Social Science has suggested programs of study. These programs satisfy the admission requirements of most law schools. It is the student’s responsibility to determine whether or not the proposed program meets the entrance requirements of the chosen professional school or college.

Prelaw. Prelaw programs in the College of Social Science are available through the Department of Political Science, and the Interdisciplinary Studies in Social Science Program. For additional information refer to those sections and to the University statement on prelaw programs in the Undergraduate Education section of this catalog.

Students who are enrolled in bachelor’s degree programs in the College of Social Science may elect a specialization in environmental studies. For additional information, refer to the Specialization in Environmental Studies statement in the College of Natural Science section of this catalog.

Honors Study
The College of Social Science encourages honors students to develop distinctive undergraduate programs in the fields offered by the several programs of the College. Interested students should first consult the College’s Coordinator for Honors Activities (236 Psychology Research Building) to obtain general information about opportunities and programs. A member of the faculty is especially selected to serve as adviser to Honors College students in each major field, and it is the adviser’s responsibility to help the student plan a rigorous and balanced program which will also reflect the student’s special interests and competencies.

The units of the College annually offer a wide range of honors courses and seminars at both introductory and advanced levels. These courses are provided chiefly, but not exclusively, for members of the Honors College and are to be found in the several fields represented by the College. In addition to these formal honors courses, the College offers an opportunity for independent study for Honors College students whose interests reach beyond the topics ordinarily covered by the programs of the College.

SPECIALIZATION IN AFRICAN STUDIES
The specialization in African studies, which is administered by the College of Social Science, is available as an elective to students who are enrolled in bachelor’s degree programs at Michigan State University. Although the specialization complements a number of major fields, students who plan graduate study related to Africa, who wish to pursue careers in international agencies in the United States and other countries, or who wish to work in Africa may find the specialization particularly appealing. With the approval of the department and college that administer the student’s degree program, the courses that are used to satisfy the requirements for the specialization may also be used to satisfy the requirements for the bachelor’s degree.

The specialization in African studies provides a multidisciplinary educational experience for students who are interested in Africa. The specialization is designed to help students to acquire a better understanding of diverse aspects of African environments, economies, politics, societies, and cultures.

The undergraduate adviser for African studies in the College of Social Science, located in Room 100 International Center, coordinates the specialization on behalf of the Dean. That adviser assists the student in planning a program of study
that is tailored to the student’s interests, disciplinary major, and career objectives. The student’s program of study for the specialization must be approved in advance and in writing by the adviser for African studies.

Requirements for the Specialization in African Studies

The student must complete the requirements for one of the three options described below. Each option consists of specified numbers of credits from two or three of the four sections that are described below: General Core Courses; African Language Courses; Thematic Concentrations; and Independent Study, Research, and Fieldwork.

BROAD OPTION (Option A): A minimum of 21 credits to include:

- At least 9 credits from the General Core Courses section.
- At least 9 credits from the Thematic Concentrations section. These 9 credits must be from two of the thematic areas.
- At least 3 credits from the Independent Study, Research, and Fieldwork section.

LANGUAGE EMPHASIS OPTION (Option B): A minimum of 20 credits to include:

- At least 9 credits from the General Core Courses section.
- At least 8 credits from the African Language Courses section.
- At least 3 credits from either the Thematic Concentrations section or the Independent Study, Research, and Fieldwork section.

LANGUAGE PROFICIENCY OPTION (Option C): A minimum of 25 credits to include:

- At least 9 credits from the General Core Courses section.
- At least 16 credits from the African Language Courses section. These 16 credits must be from courses in a single language, and study must extend over two full academic years.

1. General Core Courses

- ANP 436 Anthropology of Southern Africa
- ANP 440 African Archaeology
- EC 414 Economic Analysis of Sub-Saharan Africa
- ENG 453 African Literature
- GEO 338 Geography of Africa
- HST 300 African History to 1900
- HST 301 African History since 1800
- HST 481 Seminar in African History (W)
- HST 211A African Studies and Multicultural Civilizations: Africa (I)
- HST 211C African Studies and Multicultural Civilizations: The Americas (I)
- ISS 330A Africa: Social Science Perspectives (I)
- ISS 330C Latin America: Social Science Perspectives (I)
- MC 324B Regional Policies, Cooperation, and Conflict in Sub-Saharan Africa
- MC 492 Senior Seminar in International Relations
- PLS 331 African Politics

2. African Language Courses

- AFR 101 Elementary Swahili I
- AFR 101B Elementary African Language I
- AFR 102 Elementary Swahili II
- AFR 102B Elementary African Language II
- AFR 151 Beginning Indigenous African Language I
- AFR 152 Beginning Indigenous African Language II
- AFR 201 First-Year Swahili I
- AFR 201B Second-Year African Language I
- AFR 202A Second-Year Swahili I
- AFR 202B Second-Year African Language II
- AFR 231 Intermediate African Language
- AFR 232 Intermediate Individualized African Language II
- AFR 200 Independent Study
- AFR 430B Advanced African Language
- AFR 430D Advanced Indigenous African Language
- AFB 101 Elementary Amharic I
- AFB 102 Elementary Amharic II
- AFB 202 Second-Year Amharic II
- AFB 200 Independent Study

3. Thematic Concentrations

- ANP 430 Language and Culture
- ANP 430 African Archaeology
- ANP 440 African Language
- ANP 491 Topics in Anthropology
- ENG 363 African Literature
- ENG 463 Studies in the Literature of Africa and the African Diaspora
- HST 471 Third World Course
- HST 472 History of Africa
- HST 473 African History since 1800
- HST 474 West Africa since 1950
- HST 475 East Africa since 1950
- HST 476 Southern Africa since 1800
- HST 484 Seminar in African History (W)
- IAH 211A Area Studies and Multicultural Civilizations
- ISS 310 People and Environment (I)
- ISS 330A African Social Science Perspectives (I)
- JRN 445 International Media
- PLS 331 African Politics
- REL 391 Special Topics in Religious Studies

4. Independent Study, Research, and Fieldwork

- ANP 436 Anthropology of Southern Africa
- ANP 440 African Archaeology
- ANP 450 Language and Culture
- ANP 450 African Archaeology
- ANP 491 Topics in Anthropology
- ENG 363 African Literature
- ENG 463 Studies in the Literature of Africa and the African Diaspora
- HST 471 Third World Course
- HST 472 History of Africa
- HST 473 African History since 1800
- HST 474 West Africa since 1950
- HST 475 East Africa since 1950
- HST 476 Southern Africa since 1800
- HST 484 Seminar in African History (W)
- IAH 211A Area Studies and Multicultural Civilizations:
- ISS 310 People and Environment (I)
- ISS 330A African Social Science Perspectives (I)
- JRN 445 International Media
- PLS 331 African Politics
- REL 391 Special Topics in Religious Studies

Ecology, Demography, and Agriculture

- ANP 450 Topics in Anthropology
- ANP 450 Animal Systems in International Development
- FOL 430 Forestry in International Development
- FOL 450 Agricultural Development in Less Developed Countries
- GEO 338 Geography of Africa
- GEO 435 Geography of Health and Disease
- ISS 330 People and Environment (I)
- PIM 200 World Food, Population and Poverty
- PIM 200 World Food, Population and Poverty

Socioeconomic Change and Development

- ANP 430 African Politics
- ISS 330 Latin America: Social Science Perspectives (I)
- SOG 215 Race and Ethnicity

Studies in the African Diaspora

- ANP 463 Studies in the Literature of Africa and the African Diaspora
- FRN 440 Forensic Cultures and Civilizations
- HST 430 African American History to 1870
- HST 431 African American History since 1870
- HST 432 African American Women
- HST 433 History of the Caribbean since 1800
- IAH 211C Area Studies and Multicultural Civilizations:
- ISS 330 Latin America: Social Science Perspectives (I)
- SOG 215 Race and Ethnicity

SOG 215 Race and Ethnicity

4. Independent Study, Research, and Fieldwork

Three to 5 credits in a course that is related to one of the following activities:

a. A research paper based on library research or fieldwork in Africa (3 credits)
b. Community outreach activities on Africa-related projects in Michigan (3 credits)
c. An internship or fieldwork related to Africa, or study in Africa (3 to 5 credits)

1 Identifying the completion of the requirement for the specialization in African studies, a given course shall be counted only once.
2 Only one of the following courses may be used to satisfy the requirements for the specialization in African studies: Integrative Studies in Arts and Humanities 211A, 211B, 211C; Integrative Studies in Social, Behavioral, and Biomedical Sciences 200, 200A, 200C, 200C. That course may also be used to satisfy University requirements.
3 This course may be counted toward the requirements for the specialization in African studies only if the topic is specifically related to or focused on Africa and the undergraduates for Africana studies has approved the the registrar to count it toward one of the requirements for the specialization in African studies.
4 In addition to courses in Swahili and Arabic, courses in Hausa are currently being offered.

Upon completion of the requirements for the specialization in African studies as specified by the undergraduate adviser for African studies, the student should contact that adviser and request certification for the completion of the specialization. After the certification is approved by the Dean of the College of Social Science, the Office of the Registrar will enter on
the student's academic record the name of the specialization and the date that it was completed. This certification will appear on the student's transcript.

**SPECIALIZATION IN ASIAN STUDIES**

The specialization in Asian Studies, which is administered by the College of Social Science, is available as an elective to students who are enrolled in bachelor's degree programs at Michigan State University. Although the specialization complements a number of major fields, students who plan graduate study related to Asia or who wish to pursue careers in government or with corporations in Asia may find the specialization particularly appealing. With the approval of the department and college that administer the student's degree program, the courses that are used to satisfy the requirements for the specialization may also be used to satisfy the requirements for the bachelor's degree. Courses taken in a Michigan State University Study Abroad program in Asia may be counted toward the specialization with the permission of the Director of the Asian Studies Center and the student’s advisor.

The specialization in Asian Studies provides an opportunity for students to create a multidisciplinary specialty with Asia as the focus. The undergraduate advisor for Asian Studies, located in Room 110 International Center, assists the student in planning a program of study that is tailored to the student’s interests, disciplinary major, and career objectives. The student’s program of study for the specialization must be approved in advance and in writing by the advisor for Asian Studies.

**Requirements for the Specialization in Asian Studies**

1. The student must complete one of the following options:
   a. **Option A: Language Emphasis** (32 to 35 credits):
      - Core course: at least one course ............... 3 or 4
      - Chinese or Japanese language fulfilling of second-year language requirement ............... 20
      - Thematic Concentration: at least twelve courses .................................................. 6 to 8
      - Independent study course culminating in a research paper ........................................ 3
   b. **Option B: General Emphasis** (30 to 33 credits):
      - Core course: at least one course ............... 3 or 4
      - Thematic Concentration: select one of the following:
        - (1) at least five courses in the Thematic Concentration selected from two different departments ........................................ 15 to 20
        - (2) at least three courses in the Thematic Concentration selected from two different departments and a minimum of 10 credits in an Asian language ........................................ 15 to 22
      - Independent study course culminating in a research paper ........................................ 3
   2. The courses used to fulfill Option A or Option B are listed below:
      a. Core courses (select one):
         - IAI 211B Asia Studies and Multicultural Civilizations: Asia (4) ........................................ 4
         - IAI 211C Asia Studies and Multicultural Civilizations: The Americas (4) ........................................ 4
         - ISS 210 Society and Individual (4) ........................................ 4
         - ISS 315 Global Diversity and Interdependence (4) ........................................ 4
         - ISS 330B Asia: Social Science Perspectives (4) ........................................ 4
         - TCC 303 Growing Up and Coming of Age: Three Societies (1) ........................................ 3
      b. Language courses (see Option A or Option B for credit requirement):
         - ASN 290 Independent Study ........................................ 1 or 0
         - ASN 291 Special Topics in Asian Languages ........................................ 1 to 4
         - ASN 401 East Asian Cultures (W) ........................................ 3
         - ASN 464 Studies in the Literature of Asia and the Asian Diaspora (W) ........................................ 3
         - ASN 490 Independent Study ........................................ 1 or 0
         - ASN 491 Special Topics in Asian Languages ........................................ 1 or 0
         - CIP 101 Elementary Chinese I ........................................ 5
         - CIP 102 Elementary Chinese II ........................................ 5
         - CIP 103 Introductory Chinese with Business Emphasis ........................................ 5
         - CIP 201 Second-Year Chinese I ........................................ 5
         - CIP 202 Second-Year Chinese II ........................................ 5
         - CIP 301 Third-Year Chinese I ........................................ 5
         - CIP 302 Third-Year Chinese II ........................................ 5
         - CIP 350 Studies in the Chinese Language ........................................ 3
         - CIP 401 Fourth-Year Chinese I ........................................ 5
         - CIP 402 Fourth-Year Chinese II ........................................ 5
         - CIP 499 Senior Thesis Research ........................................ 1 to 4
         - JPN 101 Elementary Japanese I ........................................ 5
         - JPN 111 Elementary Japanese I A ........................................ 3
         - JPN 112 Elementary Japanese II ........................................ 3
         - JPN 113 Elementary Japanese II A ........................................ 3
         - JPN 114 Elementary Japanese II B ........................................ 3
         - JPN 201 Second-Year Japanese I ........................................ 5
         - JPN 202 Second-Year Japanese II ........................................ 5
         - JPN 301 Third-Year Japanese I ........................................ 5
         - JPN 302 Third-Year Japanese II ........................................ 5
         - JPN 310 Studies in the Japanese Language ........................................ 3
         - JPN 401 Fourth-Year Japanese I ........................................ 3
         - JPN 402 Fourth-Year Japanese II ........................................ 3
         - JPN 499 Senior Thesis Research ........................................ 1 to 4

d. **Thematic Concentration courses** (see Option A or Option B for credit requirement):
   - **Department of Anthropology**
     - ANP 201 Social Cultural Diversity ........................................ 3
     - ANP 414 Anthropology in Asia ........................................ 3
     - ANP 415 China: Culture and Society ........................................ 3
   - **Department of Art**
     - HA 280 East Asian Art ........................................ 3
     - HA 462 The Arts of China ........................................ 4
     - HA 463 Japanese Art ........................................ 4
   - **Department of Business**
     - EC 340 Survey of International Economics ........................................ 3
     - EC 385 International Labor Market Policy and Labor Relations ........................................ 3
     - EC 410 Issues in Economics of Developing Countries ........................................ 3
     - EC 413 Economic Analysis of Asia ........................................ 3
   - **Department of English**
     - ENG 352 Asian American Writing ........................................ 3
     - ENG 360 Pastoral Literature and Theory ........................................ 3
     - ENG 361 Asian Literature in English ........................................ 3
     - ENG 456 Understanding Translation ........................................ 3
     - ENG 370 Film and Society ........................................ 4
     - ENG 430B Cognitive Science: View from Western Perspective ........................................ 4
     - ENG 464 Studies in the Literature of Asia and the Asian Diaspora (W) ........................................ 3
     - ENG 471 Third World Cinema ........................................ 3
     - ENG 477C Cognitive Science: The East Asian Tradition ........................................ 3
   - **Department of Geography**
     - GEO 357 Geography of East Asia ........................................ 3

     - WS 403 Women and Change in Developing Countries ........................................ 3
     - WS 491 Special Topics ........................................ 3
   - **Independent Study** (3 credits):
     - At least 3 credits of an independent study course approved in advance by the undergraduate advisor for Asian Studies. When enrolled in this course, the
student must submit a substantial senior research paper on Asia based on primary sources, library research, or field work in Asia.

1. With the approval of the undergraduate adviser for Asian Studies, courses other than those listed below may be counted toward the requirements for the specialization in Asian Studies.
2. This course may also be used to satisfy University requirements.
3. Inscribed in courses in Chinese or Japanese language courses may be used toward the requirements for the specialization in Asian Studies, the student must complete two sequential courses in a language. A minimum of 10 credits is required for the specialization in Asian Studies.
4. Allowing when taught with substantial Asian content.

Upon completion of the requirements for the specialization in Asian studies as specified by the undergraduate adviser for Asian studies, the student should contact the adviser and request certification for the completion of the specialization. After the certification is approved by the Dean of the College of Social Science, the Office of the Registrar will enter on the student's academic record the name of the specialization and the date that it was completed. This certification will appear on the student's transcript.

SPECIALIZATION IN CANADIAN STUDIES

The Specialization in Canadian Studies is designed for students who plan careers with an international orientation focused on inter-American relations involving Canada. The specialization provides an opportunity for students to increase their understanding of:

1. the processes of social, economic, political, and cultural change in Canada and in Canada's international relations.
2. how the structure of the contemporary world system influences Canadian affairs.
3. how culture shapes the process of national development in one of the major world regions.

Multidisciplinary in theory and practice, the specialization is based on the methodological, theories, and literatures of the social sciences and liberal arts. It involves faculty from the social sciences, arts, languages, and applied professional fields.

The specialization is available as an elective to students who are enrolled in bachelor's degree programs at Michigan State University. The specialization is administered by the Office of the Registrar.

With the approval of the department and college that administer the student's degree program, the courses that are used to satisfy the requirements for the specialization may also be used to satisfy the requirements for the bachelor's degree.

Students who elect the specialization are encouraged to study French or another language spoken by a significant minority in Canada.

The academic adviser for Canadian studies in the College of Social Science, located in Room 205 South Kedzie Hall, coordinates the specialization on behalf of the Dean. That adviser assists the student in planning a program of study that is tailored to the student's interests, disciplinary major, and career objectives. The student's program of study for the specialization must be approved in advance and in writing by both the adviser for Canadian studies and the Associate Dean for Academic and Student Affairs in the College of Social Science.

Requirements for the Specialization in Canadian Studies:
The student must complete a minimum of 18 credits at the 200 level or above, distributed as follows:

1. Core courses: .......................................................... 10
   a. The following course:
      ISS 230 Canada: Social Science Perspectives (1) ................................ 4
   b. Six credits from the following courses:

SPECIALIZATION IN INTERNATIONAL DEVELOPMENT

The specialization in international development, which is administered by the College of Social Science, is available as an elective to students who are enrolled in bachelor's degree programs at Michigan State University. The specialization should be attractive to students who plan careers with an international orientation and who, therefore, wish to add a strong international dimension to their disciplinary majors.

With the approval of the department and college that administer the student's degree program, the courses that are used to satisfy the requirements for the specialization may also be used to satisfy the requirements for the bachelor's degree.

The specialization in international development is designed for students who wish to increase their understanding of the processes of continuity and change in various regions of the world, particularly Africa, Asia, Eastern Europe, and Latin America. The specialization provides an opportunity for students to learn how the structure of the contemporary world system influences international relations and national development, as well as how culture shapes the process of national development in one of the major world regions. Multidisciplinary in theory and practice, the specialization is based on the methodological, theories, and literatures of the social sciences and liberal arts and involves faculty from the social sciences, arts, languages, and applied professional fields.

The academic adviser for international development in the College of Social Science assists the student in planning a program of study that is tailored to the student’s interests, disciplinary major, and career objectives. The student's program of study for the specialization must be approved in advance and in writing by the adviser for international development.

Requirements for the Specialization in International Development

The student must meet the requirements specified below:

- Complete a minimum of 15 credits in courses at the 200 level or above excluding any credits in courses that are used to satisfy the Foreign Language Proficiency requirement referenced in item 2 below. Not more than 4 of the 15 credits may be from 200-level courses.

1. Foreign Language Proficiency: Demonstrate proficiency in a modern foreign language equivalent to four semesters of study at the university level. The results of the Michigan State University language placement test will be considered in determining whether or not the student has fulfilled this requirement. The student is encouraged to complete a fifth semester of study in the language that focuses on the culture, history, and literature of a developing region of the world.

3. Conceptual/Descriptive Courses: Complete at least one of the following courses (3 or 4 credits):
   a. ANP 222 Peoples and Social Change in the Developing World ......................................... 3
   b. ANP 470 Food, Hunger, and Society .................................................. 3
   c. EC 120 Principles of Economic Development ............................................... 3
   d. ISS 116 Global Diversity and Interdependence (1) ..................................... 4

   1. Integrative Studies in Social, Behavioral and Economic Sciences (15-20) may be used to satisfy both the requirements for the specialization in Canadian studies and the University requirements.

   Upon completion of the requirements for the specialization in Canadian studies as approved by both the adviser for Canadian studies and the Associate Dean in the College of Social Science, the student should contact the adviser for Canadian studies and request certification for the completion of the specialization. After the certification is approved by the Dean of the College of Social Science, the Office of the Registrar will enter on the student's academic record the name of the specialization and the date that it was completed. This certification will appear on the student's transcript.

   2. Eight additional credits in courses relevant to Canadian studies in a language may be used to satisfy the requirements for Option B.

   a. An internship with a public or private sector agency or organization.
   b. A study abroad experience.
**SPECIALIZATION IN LATIN AMERICAN AND CARIBBEAN STUDIES**

The specialization in Latin American and Caribbean studies, which is administered by the College of Social Science, is available as an elective to students who are enrolled in bachelor's degree programs at Michigan State University. Although the specialization complements a number of major fields, students who plan graduate study related to Latin America and the Caribbean, or who wish to pursue careers in the Foreign Service or with corporations in those geographic areas, may find the specialization particularly appealing. With the approval of the department and college that administer the student's degree program, the courses that are used to satisfy the requirements for the specialization may also be used to satisfy the requirements for the bachelor's degree.

The specialization in Latin American and Caribbean studies provides an opportunity for students to create a multidisciplinary specialty with Latin America and the Caribbean as the focus.

The undergraduate adviser for Latin American and Caribbean studies in the College of Social Science, located in Room 206 International Center, assists the student in planning a program of study that is tailored to the student's interests, disciplinary major, and career objectives. The student's program of study for the specialization must be approved in advance and in writing by the undergraduate adviser for Latin American and Caribbean studies.

**Requirements for the Specialization in Latin American and Caribbean Studies**

The student must meet the requirements specified below:

1. **CREDITS**
   - **1.** Demonstrate proficiency in Spanish or Portuguese equivalent to two years of study at the university level. The results of the MSU foreign language placement test will be considered in determining whether or not the student has fulfilled this requirement.
   - **2.** Complete a minimum of 30 credits from at least three of the departments listed below:
     - **Department of Anthropology**
       - ANP 430 Revolution and Social Change in Latin America
     - **Department of Economics**
       - ANP 432 Peninsa and Social Change in the Developing World
     - **Department of History**
       - HST 381 Latin American History since 1800
     - **Department of Geography**
       - GEO 335 Geography of Latin America
     - **Department of History**
       - HST 383 History of Mexico since 1800
     - **Department of History**
       - HST 385 Modern Spanish Central and South America
     - **James Madison College**
       - MC 324 C Politics, Society and Economy in the Third World
   - **3.** Complete at least 10 additional credits from the courses listed in Item 2 above.

Upon completion of the requirements for the specialization in international development as specified by the undergraduate adviser for international development, the student should contact the Dean of the College of Social Science and request certification for the completion of the specialization. After the certification is approved by the Dean of the College of Social Science, the Office of the Registrar will enter on the student's academic record the name of the specialization and the date that it was completed. This certification will appear on the student's transcript.

**SPECIALIZATION IN LATIN AMERICAN AND CARIBBEAN STUDIES**

The specialization in Latin American and Caribbean studies, which is administered by the College of Social Science, is available as an elective to students who are enrolled in bachelor's degree programs at Michigan State University. Although the specialization complements a number of major fields, students who plan graduate study related to Latin America and the Caribbean, or who wish to pursue careers in the Foreign Service or with corporations in those geographic areas, may find the specialization particularly appealing. With the approval of the department and college that administer the student's degree program, the courses that are used to satisfy the requirements for the specialization may also be used to satisfy the requirements for the bachelor's degree.

The specialization in Latin American and Caribbean studies provides an opportunity for students to create a multidisciplinary specialty with Latin America and the Caribbean as the focus.

The undergraduate adviser for Latin American and Caribbean studies in the College of Social Science, located in Room 206 International Center, assists the student in planning a program of study that is tailored to the student's interests, disciplinary major, and career objectives. The student's program of study for the specialization must be approved in advance and in writing by the undergraduate adviser for Latin American and Caribbean studies.

**Requirements for the Specialization in Latin American and Caribbean Studies**

The student must meet the requirements specified below:
SPECIALIZATION IN CHICANO/LATINO STUDIES

The specialization in Chicano/Latino studies, which is administered by the College of Social Science, is available as an elective to students who are enrolled in bachelor’s degree programs at Michigan State University. Although the specialization complements a number of major fields, students who plan graduate study related to the social sciences or who wish to pursue careers in education, social work, government or businesses that serve mixed ethnic communities may find the specialization particularly appealing. With the approval of the department and college that administer the student’s degree program, the courses that are used to satisfy the requirements for the specialization may also be used to satisfy the requirements for the bachelor’s degree.

The specialization in Chicano/Latino studies is designed to help students to understand the multicultural dimensions of society; to gain a knowledge of Chicano/Latino scholarship and scholars; and to apply that knowledge to the study of Chicano/Latino communities and life. The specialization draws on research, teaching, and community service among Chicanos/Latinos that:

1. Focuses intensively on the histories of different racial and cultural sub—groups of Latinos.
2. Draws larger theoretical lessons from comparisons among these groups and between non—Latino populations.
3. Seeks to articulate general principles that shape racial and ethnic relations.
4. Explores how ethnic identity is constructed and reconstructed over time.
5. Develops methodologies and principles which empower students to enhance leadership and human relations within diverse communities of peoples and conditions.

Students wishing to be advised should consult the (1) Coordinator of the Chicano/Latino specialization (105 Paolucci Building) and (2) the undergraduate adviser for Chicano/Latino studies in the College of Social Science, (202 South Kedzie Hall). The Coordinator, in conjunction with the adviser assist the student in planning a program of study that is tailored to the student’s interests, disciplinary major, and career objectives. The student’s program of study for the specialization must be approved in advance and in writing by both the adviser for Chicano/Latino studies and the Assistant Dean for Academic and Student Affairs in the College of Social Science.

Requirements for the Specialization in Chicano/Latino Studies

CREDITS

1. Both of the following courses:
   - 211C American Studies and Multicultural Civilizations
   - The Americas (B)

2. The following courses:
   - 335 National Diversity and Change: United States (B)
   - 327 History of Mexican Americans in the United States
   - 383 The Caribbean
   - 381 Modern Spanish Central and South America
   - 215 Race and Ethnicity
   - 345 Spanish American Cultures
   - 485 Topics in Hispanic Literature of the Americas

3. One of the following three options:
   a. A supervised internship relevant to Chicano/Latino studies with a public or private agency organization. To satisfy this option, the student must complete one course of at least 3 credits approved in advance by the Coordinator and the adviser for Chicano/Latino studies.
   b. Directed study a broad relevant to Chicano/Latino studies. To satisfy this option, the student must complete one course of at least 3 credits approved in advance by the Coordinator and the adviser for Chicano/Latino studies.
   c. A research experience relevant to Chicano/Latino studies. To satisfy this option, the student must complete one course of at least 3 credits approved in advance by the Assistant Dean in the College of Social Science.

The student must complete a total of 20 credits including:

8

SOCIAL SCIENCE

Teacher Certification Options

The interdisciplinary studies in social science disciplinary major leading to the Bachelor of Arts or Bachelor of Science degree in the College of Social Science is available for teacher certification. The following disciplinary minors in the College of Social Science are also available for teacher certification: anthropology, geography, political science, psychology, and sociology.

Students who elect the interdisciplinary studies in social science disciplinary major must contact the College of Social Science.

Students who elect the anthropology disciplinary minor must contact the Department of Anthropology.

Students who elect the geography disciplinary minor must contact the Department of Geography.

Students who elect the political science disciplinary minor must contact the Department of Political Science.

Students who elect the psychology disciplinary minor must contact the Department of Psychology.
Students who elect the sociology disciplinary minor must contact the Department of Sociology.

For additional information, refer to the statement on the disciplinary major referenced above and to the statement on TEACHER CERTIFICATION in the Department of Teacher Education section of this catalog.

GRADUATE STUDY

The graduate programs of the College of Social Science provide opportunities for advanced study in the social sciences. Master's and doctoral degree programs are offered at the departmental level and the school level, permitting the graduate student to pursue a specialized program within a department or school. A master's degree program and a doctoral degree program are offered at the College level, permitting the graduate student to arrange a broader program working under specialists in several related departments. Each student's program is arranged to suit individual needs, within the restriction that the final program must conform to one of the general patterns approved by the faculties of the College and the University.

The College of Social Science offers programs leading to the degrees of Master of Arts, Master of Labor Relations and Human Resources, Master of Public Administration, Master of Science, Master of Social Work, Master in Urban and Regional Planning, and Doctor of Philosophy.

The following dual Juris Doctor (JD) programs with Michigan State University - Detroit College of Law are available through the College of Social Science:

- MSU MLRHR degree program with a major in Labor Relations and Human Resources and MSU/DCL JD
- MSU MA degree program with a major in Political Science and MSU/DCL JD
- MSU Ph.D. degree program with a major in Political Science and MSU/DCL JD

Requirements for the various degrees are summarized below. For a more complete description of the specific requirements for any given program or degree, contact the appropriate unit in the College. A student must meet the standards of the University, College, and unit.

The departments of Anthropology and Psychology are affiliated with the Doctor of Philosophy degree program with a major in ecology, evolutionary biology and behavior. For information about a Doctor of Philosophy degree program that involves ecology, evolutionary biology and behavior and a major in one of the departments referenced above, refer to the statement on the doctoral program in ecology, evolutionary biology and behavior in the College of Natural Science section of this catalog.

Several colleges and departments within Michigan State University cooperate in offering the interdepartmental Doctor of Philosophy degree program with a major in neuroscience, which is administered by the College of Natural Science. For additional information, refer to the statement on the doctoral program in neuroscience in the College of Natural Science section of this catalog.

Students who are enrolled in master's or doctoral degree programs in the departments of Geography and Psychology may elect an interdepartmental specialization in cognitive science. For additional information, refer to the statement on Interdepartmental Graduate Specializations in Cognitive Science.

Students who are enrolled in Master of Arts degree programs in the departments of Anthropology and Psychology may elect a specialization in ecology, evolutionary biology and behavior. For additional information, refer to the statement on the specialization in the College of Natural Science section of this catalog.

Students who are enrolled in Master of Arts and Doctor of Philosophy degree programs in the departments of Anthropology, Psychology, and Sociology and in Master of Social Work degree programs in the School of Social Work may elect specializations in infant studies. For additional information, refer to the statement on Interdepartmental Graduate Specializations in Infant Studies.

In addition to meeting the requirements of the University as described in the Graduate Education section of this catalog, students must meet the requirements specified below.

Master of Arts

Most students in the College of Social Science pursue the Master of Arts degree, although several other master's degree programs are available through the College.

Requirements for the Degree

A maximum of 8 credits is allowed for thesis research.

Academic Standards

The accumulation of grades below 3.0 (including N grades in the P–N grading system) in more than two courses of three or more credits each removes the student from the degree program; this policy does not apply to courses below the 400 level unless the courses are required for the student's program.

Time Limit

The time limit for completion of the master's degree is six years from the beginning of the first semester in which credit was earned toward the degree.

Other Master's Degrees

Other degrees at the master's level offered by the College are listed below. For a description and summary of the requirements for each degree, consult the section of this catalog devoted to the appropriate department or school. The statements on Academic Standards and Time Limit for the Master of Arts degree also apply to all other master's degrees in the College.

Doctor of Philosophy

The successful completion of the Doctor of Philosophy degree requires scholarly ability of a high order. Ph.D. degree programs, with emphasis on specialization and research, are offered in each of the departments in the College of Social Science. An interdisciplinary Ph.D. degree program at the college level is offered with concentrations in Criminal Justice, Industrial Relations and Human Resources, and Social Work. Students interested in these concentrations should communi-
cate with the director or coordinator of the appropriate program or with the Associate Dean for Academic and Student Affairs, College of Social Science.

**Academic Standards**

A doctoral student may earn grades below 3.0 (including N grades in the P–N grading system) in not more than two of the courses required by the guidance committee.

**CENTER for INTEGRATIVE STUDIES in SOCIAL SCIENCE**

**Gary Manson, Acting Director**

Michigan State University has implemented a new integrative studies program that was recommended by the Council to Review Undergraduate Education. Centers for integrative studies in the colleges of Arts and Letters, Natural Science, and Social Science serve as focal points of convergence and community for the Knowledge and Emphasis Areas.

The three Knowledge Areas are Arts and Humanities; Physical and Biological Sciences; and Social, Economic, and Behavioral Sciences. The four Emphasis Areas are International and Multicultural Experiences and National Diversity, Historical Consciousness, Values and Ethical Judgment, and Modes of Inquiry and Critical Analysis.

The Center for Integrative Studies in Social Science in the College of Social Science has primary responsibility for developing and administering courses in the Knowledge Area of Social, Economic, and Behavioral Sciences. The Center cooperates with the Office of Integrative Studies in the development of transcollegiate courses.

In the College of Social Science, the Center for Integrative Studies also has administrative responsibility for the college’s undergraduate major in Interdisciplinary Studies in Social Science.

**INTERDISCIPLINARY STUDIES IN SOCIAL SCIENCE**

**UNDERGRADUATE PROGRAMS**

The College of Social Science explicitly recognizes that many important and rewarding areas for study do not fit neatly within the boundaries of any single social science discipline, but rather overlap two or more such fields. The College also recognizes that many students do not wish to limit their undergraduate major studies to the specialization of a single disciplinary department or professional school. Many faculty in the College participate in interdisciplinary research focused on scholarly and public concerns shared by several related disciplines. For these reasons, the College offers a broadly based, coherent, multidisciplinary, undergraduate major in interdisciplinary social science.

The interdisciplinary studies in social science major consists of 42 required credits including an 18-credit disciplinary cognate and a 24-credit interdisciplinary concentration. The following disciplinary cognates are available to students in the major: anthropology, economics, geography, political science, psychology, or sociology. The eight interdisciplinary concentrations that are available to students in the major are described below:

1. **Community Relations.** In this concentration, students investigate the organizational, environmental, cultural, public policy, and socioeconomic forces that define, characterize, shape, and reshape contemporary communities. This concentration is designed for students who plan to pursue careers or advanced study in public and municipal administration, human services, social work, and urban planning.

2. **Environmental Policy.** In this concentration, students pursue a wide variety of interests including environmental law, resource ecology, social impact study, policy analysis, geomorphology, and natural resource development and management.

Students in this concentration may elect to participate in MSU’s living–learning environmental studies residential program. Students in this program enroll in numerous courses on the environment. They also participate in a variety of academic enrichment and social activities with faculty who are associated with the program.

3. **Health Studies.** In this concentration, students explore areas of interest such as organizational and institutional analysis of health care providers and delivery systems, social–cultural dimensions of health care, and the economics of health care. This concentration is designed for students who plan to pursue careers or advanced study in medicine, allied health fields, public health, medical industries, health care administration, and public administration.

4. **Human Aging.** In this concentration, students study demographic shifts in the United States that have led to a population growing ever older. As Americans live longer, they often require more health–related services and other kinds of services in contrast to younger people. This concentration is designed for students who plan careers related to the direct care of older persons. Sites for direct care include nursing homes, hospitals, senior citizen community centers, and retirement communities.

5. **Human Resources and Society.** In this concentration, students pursue interests in the dynamics of human resources in, and other social and behavioral factors related to, the study of the workplace and the community. Issues such as inequality, pluralism, race, ethnicity, and gender are addressed.

6. **International Studies.** In this concentration, students pursue interests in international relations, international economic and social development, selected major world areas, or other topical and thematic issues in which the social sciences contribute understanding to concerns involving several nations and the comparative study of societies and cultures around the world.

7. **Law and Society.** In this concentration, students may emphasize preparation for law school, for graduate study, for careers related to law and the justice system, or for careers in the public, private, and nonprofit sectors.

8. **Public Policy Studies.** In this concentration, students examine public policy issues and concerns from several analytical and theoretical perspectives. They also examine policy–making processes in a variety of organizational contexts. This concentration is designed for students who plan to pursue policy-related careers in the public, private, and nonprofit sectors. The concentration is also designed for students who plan to pursue advanced degrees
in public policy, public administration, urban planning, and law. Particular emphasis is placed on analytical, quantitative, and research design skills.

Academic advisers in the College's Interdisciplinary Studies office in South Redzie Hall assist students in developing individualized programs of study, taking into consideration students’ interests and career or educational objectives. Students are required to consult with one of these academic advisers on enrollment in the major and once a year thereafter. Each student’s program of study, and any changes in the program, must be approved in writing by an academic adviser in the Interdisciplinary Studies office.

To meet both the disciplinary cognate requirement and the interdisciplinary concentration requirement, students select courses from extensive lists of courses that are periodically reviewed and revised by College faculty. Those lists are available in the Interdisciplinary Studies office.

Requirements for the Bachelor of Arts or Bachelor of Science Degree in Interdisciplinary Studies in Social Science

1. The graduation requirements of the University as described in the Undergraduate Education section of this catalog: 120 credits, including general elective credits, are required for the Bachelor of Arts or Bachelor of Science degree in Interdisciplinary Studies in Social Science.

The University’s Tier II writing requirement for the Interdisciplinary Studies in Social Science major may be met by completing one of the Tier II writing courses that are identified in item a. below or one of the clusters of courses that are identified in items b. and c. below.

2. The graduation requirements of the College of Social Science for the Bachelor of Arts or Bachelor of Science degree. Credits in certain courses referenced in requirement 3. below may also be counted toward requirement 1, C.1, or requirement 2, P.I.I., under the heading Graduation Requirements for the Bachelor of Arts and Bachelor of Science Degrees in the College’s statement. Students should consult with an academic adviser in the Interdisciplinary Studies office concerning courses that are strongly recommended for completing requirements 1, A. and B. and requirements 2, A. and B. under the heading Graduation Requirements for the Bachelor of Arts and Bachelor of Science Degrees in the College’s statement.

3. The following requirements for the major:

   a. Disciplinary Cognates: 18

      A minimum of 18 credits in courses in one of the following six disciplines: anthropology, economics, geography, political science, psychology, or sociology. The courses that are used to satisfy the Disciplinary Cognate requirement must be selected from a list of approved courses that is available in the Interdisciplinary Studies office. At least one introductory course, one course in methodology, and two 300–400 level courses must be included in the Disciplinary Cognate.

   b. Interdisciplinary Concentrations: 24

      A minimum of 24 credits in one of the eight interdisciplinary concentrations referenced below. At least 12 credits in courses in the College of Social Science, at least two courses in each of two different departments or schools, at least 12 credits in courses in 300–400 level courses, and at least two 400–level courses must be included in the Interdisciplinary Concentration.

   (2) Additional credits in approved courses (18 credits). The additional courses that are used to satisfy the Community Relations Interdisciplinary Concentration must be selected from a list of approved courses that is available in the Interdisciplinary Studies office.

   (1) At least two of the following seven courses (6 credits):

      EC 335 Taxes, Government Spending and Public Policy
      GEO 445 Environmental and Development Policy
      PLIS 313 Public Policy Analysis
      PLIS 324 American Legislative Process
      SOC 320 Resource Management and Environment
      SOC 452 Environment and Society
      UP 233 Land and Environmental Planning

      The additional courses that are used to satisfy the Environmental Policy Interdisciplinary Concentration must be selected from a list of approved courses that is available in the Interdisciplinary Studies office.

   Health Studies (24 credits):

      (1) At least two of the following seven courses (6 credits):

      ANP 300 Culture, Health, and Illness
      EC 335 Taxes, Government Spending and Public Policy
      GEO 498 Economics of Health Care
      GEO 435 Geography of Health and Disease
      PLIS 313 Public Policy Analysis
      PSY 320 Health Psychology
      Socr 475 Sociology of Health Care Systems

      (2) Additional credits in approved courses (18 credits). The additional courses that are used to satisfy the Health Studies Interdisciplinary Concentration must be selected from a list of approved courses that is available in the Interdisciplinary Studies office.

   Human Aging (24 credits):

      (1) The following course (3 credits):

      ANP 400 Sociology of Aging

      (2) At least two of the following eight courses (6 credits):

      FCR 413 Adult Development and the Family: Middle and Later Years
      ISS 310 Society and the Individual
      NUR 311 Aging, Environment, and Health
      NUR 312 Selected Topics
      PSJ 344 Ethical Issues in Health Care
      PSY 345 Developmental Psychology, Adolescence and Aging
      PSY 401 Memory and Skill (W)
      PSY 400 Psychology of the Life Span (W)

      (3) Additional credits in approved courses (18 credits). The additional courses that are used to satisfy the Human Aging Interdisciplinary Concentration must be selected from a list of approved courses that is available in the Interdisciplinary Studies office.

   Human Resources and Society (24 credits):

      (1) At least two of the following six courses (6 credits):

      ANP 300 Social Institutions
      PLIS 310 Public Bureaucracy in the Policy Process
      FIM 453 Women and Work: Issues and Policy Analysis
      PSY 255 Industrial and Organizational Psychology
      SOC 322 Sociology of Work
      SOC 333 Social Stratification

      (2) Additional credits in approved courses (18 credits). The additional courses that are used to satisfy the Human Resources and Society Interdisciplinary Concentration must be selected from a list of approved courses that is available in the Interdisciplinary Studies office.

   International Studies (24 credits):

      (1) At least two of the following six courses (6 credits):

      ANP 201 Sociocultural Diversity
      EC 340 Survey of International Economics
      GEO 113 Introduction to Economic Geography
      PLIS 342 Comparative Political Economy
      PSY 344 Political Psychology
      Socr 362 Developing Societies

      (2) Additional credits in approved courses (18 credits). The additional courses that are used to satisfy the International Studies Interdisciplinary Concentration must be selected from a list of approved courses that is available in the Interdisciplinary Studies office.

   Law and Society (24 credits):

      (1) At least two of the following six courses (6 credits):

      EC 300 Private Enterprise and Public Policy
      FST 318 United States Constitutional History
      FJR 334 Philosophy of Law
      PLIS 330 The American Judicial Process
      PLIS 321 American Constitutional Law
      SOC 361 Contemporary Communities

      (2) Additional credits in approved courses (18 credits). The additional courses that are used to satisfy the Law and Society Interdisciplinary Concentration must be selected from a list of approved courses that is available in the Interdisciplinary Studies office.

   Public Policy Studies (24 credits):

      (1) At least two of the following six courses (6 credits):

      EC 335 Taxes, Government Spending and Public Policy
      PLIS 310 Public Bureaucracy in the Policy Process
      PLIS 313 Public Policy Analysis
and urban and regional planning on student admissions and program requirements. A program coordinator assists students in planning their programs of study.

In addition to meeting the requirements of the University and of the College of Social Science, students must meet the requirements specified below.

Admission

To be considered for admission to the master’s degree program in interdisciplinary studies in social science: global applications, an applicant must:

1. Be employed full-time in the public or private sector as an international mid-level specialist, manager, or executive in a large-scale, national-level organization that involves globalization in multilingual situations.

2. Be nominated by his or her employing organization. The employing organization must submit to the College a statement to the effect that if the applicant is admitted to the program the applicant would be granted a one-year absence from the organization and the organization would sponsor the applicant while he or she is enrolled in the program.

3. Take the Graduate Record Examination (GRE) General Test and have the scores submitted to the College.

4. Submit to the College a statement that addresses the applicant’s:
   a. reasons for applying for admission to the program.
   b. willingness to pursue the program full-time during a one-year absence from his or her employing organization and willingness to meet the residence requirement for the program on MSU’s East Lansing campus during that year, if he or she is admitted to the program.

To be admitted to the master’s degree program in interdisciplinary studies in social science: global applications on regular status, an applicant must have:

1. Completed a bachelor’s degree with an acceptable record from a recognized educational institution. Although the field of undergraduate study is not critical for acceptance, an applicant should have completed at least 12 credits in the social sciences.

2. Professional experience acceptable to the College.

3. Demonstrated to the satisfaction of the College quantitative skills (typically algebra or introductory calculus, and statistics) and computer competence sufficient for completing master’s level methods courses in the social sciences.

4. Demonstrated to the satisfaction of the College advanced competence in a language other than English.

In addition, an international applicant is required to have fulfilled the University’s English language proficiency requirement as described in the Graduate Education section of this catalog by having a total score of 580 (paper version) or 237 (computer version) or above on the Test of English as a Foreign Language and having the approval of the English Language Center.

However, meeting the minimum standards referenced above does not guarantee admission to the program. Admission to the program is determined by a careful case-by-case review of each applicant’s credentials. Particular emphasis is given to the applicant’s grade-point average during the junior and senior years of the undergraduate program, scores on the GRE, and statement of objectives.

A cumulative grade-point average of 3.00 or higher for the undergraduate program of study is preferred for admission on regular status. However, an applicant with a grade-point av-
The College of Social Science administers the specializations. The specializations are supervised by an interdisciplinary faculty coordinating committee representing the graduate programs involved. Students must meet the requirements of both the degree program and the specialization. Students should work closely with their academic advisers to ensure that meaningful experiences that are directly related to applied developmental science are included in their degree programs. With the approval of the department or school and college that administer the student’s degree program, the courses that are used to satisfy the requirements for the specialization may also be used to satisfy the requirements for the student’s degree program.

American society is faced with pervasive and burgeoning problems of individuals, families, and communities. Issues of child and youth development, of economic competitiveness, of environmental quality, and of health and health care require creative research and the design, deployment, and evaluation of innovative public policies and intervention programs. As a consequence, there has been increasing societal pressure for universities, and for the scholars within them, to design and deliver knowledge applications addressing these problems.

One of the most fruitful areas for such knowledge application involves examining the problems of individuals and communities across the life span. These applications require the ability to understand and assist the development of individuals who vary with respect to cultural and ethnic background, economic and social opportunity, physical and cognitive abilities, and conditions of living. Infants at biosocial risk, gifted children or those with developmental disabilities, adolescents considering health-compromising behaviors, single- and dual–worker parents, the frail elderly, ethnic minorities, and impoverished families are just some of the populations requiring applications of knowledge based on the work of scholars in fields such as criminal justice, human nutrition, medicine, and psychology. There is a need within those fields for scholars who adopt a development perspective to their science.

The five components of applied developmental science are described below:

- Developmental systems theory deals with the continuities and discontinuities of development, i.e., with the process of change. There is a temporal component to individual, family, institutional, and community experiences. Some aspects of development remain stable over time; other aspects change. Systems theory provides an approach to modeling stability and change, and to the identification of factors that causally influence organizational processes. The temporality of change has important implications for research design, service provision, and program evaluation because it is dependent upon use of longitudinal methods and keyed by multivariate models of the developmental process.

- Competence in diversity involves issues related to diversity, whether that diversity is generated by culture, gender, age, socioeconomic status, handicapment, race or ethnicity, or community. All of those factors potentially affect individual differences among persons, families, communities, and neighborhoods and potentially contribute to program successes and failures. Competence in diversity refers to a set of academic and interpersonal skills that allow individuals to increase their understanding and appreciation of cultural differences and similarities within, among, and between groups.

- Contextualism involves the centrality of context in terms of individuals, families, and family functioning. Context exists at all levels—biological, physical/ecological, social–cultural, political, economic, etc., and invites systemic approaches to research and program design and implementation. Contextual

---

**REQUIREMENTS FOR THE MASTER OF ARTS DEGREE IN DEVELOPMENTAL SCIENCE: GLOBAL APPLICATIONS**

The student must complete a total of 30 credits under Plan B in a program of study developed in consultation with the program coordinator and approved in advance by the Associate Dean. The student’s program of study must ensure exposure to the concerns of labor and industrial relations, social work, and urban and regional planning and must include:

1. At least 21 credits in courses in the College of Social Science.
2. Core:
   a. The following course:
      - SW 821 Social Welfare Policy and Service Delivery Systems ........................................ 2
   b. One of the following courses:
      - LRR 824 Human Resource Strategies and Decisions .......... 3
      - LRR 858 Collective Bargaining ........................................ 3
   c. One of the following courses:
      - UP 801 Concepts and Issues in Planning and Development ........................................ 4
      - UP 823 Urban Land Management ........................................ 4
3. Concentration: Six to 9 credits in one of the following three concentrations:
   b. Concentration B: Comparative Human Service Programs
   c. Concentration C: Urban and Regional Development
4. Guided Electives: Six to 9 credits in courses from the following depart-ments within the College: Anthropology, Criminal Justice, Geography, Political Science, Psychology, and Sociology.
5. Field Experience: Three credits in an internship, practicum experience, or field experience while enrolled on the East Lansing campus. A policy paper or report based on the field experience is required.
6. Additional Electives: Three credits in a nontraditional internship, practicum, or field experience in independent study; or in an experiential learning opportunity.

---

**ACADEMIC STANDARDS**

Students are expected to maintain a minimum grade-point average of 3.00 each semester, in addition to maintaining a cumulative grade-point average of 3.00.

**INTERDEPARTMENTAL GRADUATE SPECIALIZATIONS IN APPLIED DEVELOPMENTAL SCIENCE**

The interdepartmental graduate specializations in applied developmental science are available as electives to students who are enrolled in the master’s and doctoral degree programs in the departments of Agricultural and Extension Education; Agricultural Economics; Anthropology; Audiology and Speech Sciences; Communication; Counseling, Educational Psychology and Special Education; Crop and Soil Sciences; Educational Administration; Family and Child Ecology; Food Science and Human Nutrition; Geography; History; Kinesiology; Linguistics and Germanic, Slavic, Asian and African Languages; Marketing and Supply Chain Management; Political Science; Psychology; Resource Development; Sociology; Statistics and Probability; Telecommunication; and Zoology, in the master’s and doctoral degree programs in the School of Music; in the Educational Specialist degree program in the Department of Counseling, Educational Psychology and Special Education; in the Master of Social Work degree programs in the School of Social Work; in the Master of Science in Nursing degree program in the College of Nursing; and in the graduate–professional degree program in the College of Human Medicine.
variables such as poverty, family size, birth order, single parenthood, supplemental child care, parental psychopathology, unemployment, and workplace stress all help to set the context within which individuals, families, and social groups behave and develop.

*Asset building* emphasizes identification of assets so that the capacity to act is strengthened at the most basic level possible, whether that level is the individual person, or a local school, human service agency, neighborhood, or community. Applied developmental science stresses normative developmental processes as primary prevention rather than remediation. It rejects deficit model approaches to individual and social preventive interventions. Universities exist to disseminate knowledge through instruction. From an applied developmental science perspective, asset building requires the learner (community) to be implicitly involved in the development of educational programs so that there is an explicit match between educational materials and needs of the consumer.

*University–community partnerships* stresses the principle that models for community intervention must be tested in the community setting in full collaboration with community partners. In short, communities must participate as full partners in the design and evaluation of community programs. From this perspective, application of knowledge generates new questions that demand generation of new knowledge (i.e., new approaches, new strategies, new program designs). The activities of applied developmental science span a continuum of knowledge generation to knowledge application which includes, but is not limited to, research on the applicability of scientific theory to human growth and development in ecologically valid contexts; the study of developmental correlates of phenomena of social import; the construction and utilization of developmentally and contextually sensitive assessment instruments; the design and evaluation of developmental interventions and enhancement programs; and the dissemination of developmental knowledge to individuals, families, communities, practitioners, and policymakers through developmental education, written materials, the mass media, expert testimony, and community collaborations.

All of these five components converge to a research environment that values longitudinal designs by which one can track individuals over time, assess normative trends, evaluate different contextual influences on intrapersonal change as well as normative trends, and assess the dynamic bi-directional processes that regulate organization of individual, dyadic, family, and social systems.

The interdepartmental graduate specializations in applied developmental science are designed to provide a knowledge base that will facilitate the work of graduates who pursue careers in educational, agency, institutional, and governmental organizations that are integral to preventive–intervention programs, longitudinal studies of human development, and developmental evaluation. Specifically, the specializations are designed to:

1. Provide an opportunity for graduate students to obtain a comprehensive and contemporary academic experience in the field of applied developmental science.
2. Help graduate students with an interest in applied developmental science to become sensitive to their professional obligations and responsibilities.
3. Develop an intellectual environment that will foster the growth of research and teaching in the area of applied developmental science, as well as sensitize students to issues related to the rich diversity of human ethnic and racial populations, to social problems and social policy issues related to human development, and to the variety of contexts within which human development occurs.
4. Increase public awareness of the benefits of university–community partnerships to solve problems of social living and human development.

A student who is enrolled in one of the master’s, Educational Specialist, doctoral, or graduate–professional degree programs referenced above and who wishes to complete the requirements for an interdepartmental graduate specialization in applied developmental science must petition the admission committee for the specialization for acceptance. To be considered for acceptance into the specialization, the student should have completed the Graduate Record Examination including the Subject Test in the student’s discipline. To be accepted into the specialization, the student must have had academic preparation in experimental design and statistical analysis. If in the judgment of the coordinating committee the student’s academic preparation is inadequate, the student may be required to complete some courses in addition to the courses that are used to satisfy the requirements for the specialization.

Although separate interdepartmental graduate specializations in applied developmental science have been developed for master’s and doctoral students, a given student may receive certification of completion of either the specialization for master’s students or the specialization for doctoral students, but not for both of the specializations. If a student has completed some of the requirements for the specialization that is available to master’s students, but is subsequently admitted to a doctoral program and plans to complete the requirements for the specialization that is available to doctoral students, the requirements that the student has completed may be counted toward the requirements for the specialization that is available to doctoral students.

The student and the major professor select a guidance committee that will oversee the student’s program of study for the specialization. In the event that a guidance committee has responsibility for overseeing a student’s master’s degree program, that same guidance committee may also oversee the student’s program of study for the specialization, provided that the membership of the committee has been expanded to include at least one additional person who is a member of the applied developmental science faculty and who will represent that faculty on the committee. The same guidance committee that has responsibility for overseeing a student’s Educational Specialist or doctoral degree program may also oversee the student’s program of study for the specialization, provided that the membership of the committee has been expanded to include at least two additional persons who are members of the applied developmental science faculty and who will represent that faculty on the committee. For those students who are enrolled in master’s degree programs that do not require that a guidance committee be established to oversee the student’s program; for students who are enrolled in the graduate–professional degree program in the College of Human Medicine; and for master’s, Educational Specialist, and doctoral students for whom guidance committees will be established for the sole purpose of overseeing programs of study for the specializations, the coordinator for applied developmental science will be responsible for establishing the students’ guidance committees.

Students who are pursuing interdepartmental graduate specializations in applied developmental science are strongly encouraged to participate in twice monthly seminars with members of the applied developmental science faculty and other students who are pursuing the specializations. At those seminars, faculty and invited guests address issues related to design, methodology, statistical analysis of longitudinal data,
evaluation, and techniques for building community—
university research collaborations.

Requirements for the Interdepartmental Graduate Specializations in Applied Developmental Science:

**Master’s Students**

The student must:
1. Complete 18 credits of course work as specified below.
2. Complete a field research experience during at least one semester at an approved applied developmental science—
   community partnership site. This requirement may be met by completing one or more courses that have been ap-
   proved by the student's guidance committee or by completing an alternative experience approved by the
   coordinator for applied developmental science.

In addition to meeting the requirements referenced above, the thesis of a student on Plan A must reflect the integration of
the student's discipline and applied developmental science.

**Doctoral Students**

The student must:
1. Complete 18 credits of course work as specified below.
2. Complete a field research experience during at least one semester at an approved applied developmental science—
   community partnership site. This requirement may be met by completing one or more courses that have been ap-
   proved by the student's guidance committee or by completing an alternative experience approved by the
   coordinator for applied developmental science.
3. Pass a written comprehensive examination in applied de-
   velopmental science.
4. Complete a dissertation that reflects the integration of
   the student's discipline and applied developmental science.

**Required Core Courses**

The courses that are used to satisfy the requirements for an interdepartmental graduate specialization in applied developmental science must be approved by the student’s guidance committee for the specialization. The courses should be selected within the context of the student’s educational and career goals and
with the goal of demonstrating competence in developmental systems theory, re-
search methods, and quantitative and qualitative analytic methods.

**GROUP A: HUMAN DEVELOPMENT EMPHASIS**

The courses listed below treat human development from a multidisciplinary per-
pective. The student must complete a minimum of three courses totaling at
least 9 credits.

Students who are enrolled in the Educational Specialist degree program in the Depart-
ment of Counseling, Educational Psychology, and Social Education and students who
are enrolled in the graduate professional degree program in the College of Human Medicine
must meet the requirements for the specialization that are specified for master's students on Plan B.

**This course may be counted toward the requirements for the specialization only when the topic deals with quantitative research methods.**

Upon completion of the requirements for the degree pro-
gram and of the interdepartmental graduate specialization in
applied developmental science, the student should contact the
administrator of the department, school, or college in which he
or she is enrolled and request certification for the comple-
tion of the specialization. After the certification is approved
by the administrator of the department, school or college in
which the student is enrolled and by the Dean of the College of
Social Science, the Office of the Registrar will enter on the student's
academic record the name of the specialization and the date
that it was completed. This certification will appear on the
student's transcript.
The interdepartmental graduate specializations in infant studies are available as electives for students who are enrolled in the master's and doctoral degree programs in the departments of Anthropology, Audiology and Speech Sciences; Counseling, Educational Psychology and Special Education; Family and Child Ecology; Food Science and Human Nutrition; Kinesiology; Psychology; and Sociology, in the Educational Specialist degree program in the Department of Counseling, Educational Psychology and Special Education; in the Master of Social Work degree programs in the School of Social Work; in the Master of Science in Nursing degree program in the College of Nursing; and in the graduate—professional degree programs in the College of Human Medicine and the College of Osteopathic Medicine. The College of Social Science administers these specializations.

The quality of life during the first three years of human development provides the foundation upon which all subsequent development is built. As a result of advances in biomedical technology, social-cultural conditions, and legislation, increasing attention is being directed toward the optimal development of infants and their families. Research, clinical service, and educational programming directed at children during the first three years of life and their families require knowledge from many disciplines as well as opportunities to integrate this knowledge within a formal educational setting. The specializations are based on the philosophy that a transdisciplinary educational program is the appropriate preparatory experience for personnel who will work with infants and their families. The specializations are designed to provide a knowledge base that will facilitate the work of graduates who pursue careers in agencies, institutions, and government organizations that offer services to infants and their families, and who pursue careers in teaching and research relevant to the needs of infants and their families.

Persons who have been identified by the chairpersons, directors, and deans of the 12 participating academic units are members of the Infant Studies voting core faculty or associated faculty. The Coordinating Committee of the Infant Studies faculty is drawn from the core faculty and is appointed by the Dean of the College of Social Science. The faculty members who comprise the core faculty and associated faculty may change with the mutual consent of the administrators of the participating units upon recommendation of the Coordinating Committee. The chairperson of the Coordinating Committee is appointed by the Dean of the College of Social Science.

The interdepartmental graduate specializations in infant studies are designed to:

1. Provide an opportunity for graduate students to obtain a comprehensive and contemporary academic experience in the field of human infancy.
2. Help graduate students with an interest in human infancy to become sensitive to their professional obligations and responsibilities.
3. Develop an intellectual environment that will foster the growth of research and teaching in the area of human infancy, as well as sensitize students to clinical, educational, and social policy issues related to early human development.
4. Increase public awareness of the critical importance of the early years of human development.

A student who is enrolled in a master's, Educational Specialist, doctoral, or graduate—professional degree program in one of the 12 participating academic units and who wishes to complete the requirements for an interdepartmental graduate specialization in infant studies must petition the Coordinating Committee for acceptance into the specialization. Students who wish to pursue the specialization should have a minimum grade—point average of 3.00 and should have taken the Graduate Record Examination (or its equivalent), including any Subject Test required by the student's academic unit.

To be accepted into the specialization, students must have been admitted to one of the degree programs referenced above and must have had preparation in experimental design and statistical analysis. If in the judgement of the Coordinating Committee additional academic preparation is appropriate, the student may be required to complete some collateral courses.

Although separate interdepartmental graduate specializations in infant studies have been developed for master's and doctoral students, a given student may receive certification of completion of either the specialization for master's students or the specialization for doctoral students, but not for both of the specializations. If a student has completed some of the requirements for the specialization that is available to master's students, but is subsequently admitted to a doctoral program and plans to complete the requirements for the specialization that is available to doctoral students, the requirements that the student has completed may be counted toward the requirements for the specialization that is available to doctoral students.

The student and the major professor select a guidance committee that will oversee the student's program of study for the specialization. In the event that a guidance committee has responsibility for overseeing a student's master's degree program, that same guidance committee may also oversee the student's program of study for the specialization, provided that the membership of the committee has been expanded to include at least one additional person who is a member of the Coordinating Committee of the Infant Studies faculty and who will represent the Infant Studies faculty on the committee. The same guidance committee that has responsibility for overseeing a student's Educational Specialist or doctoral degree program may also oversee the student's program of study for the specialization, provided that the membership of the committee has been expanded to include at least two additional persons who are members of the Coordinating Committee of the Infant Studies faculty and who will represent the Infant Studies faculty on the committee. For those students who are enrolled in master's degree programs that do not require that a guidance committee be established to oversee the student's program; for students who are enrolled in the graduate—professional degree programs in the College of Human Medicine and the College of Osteopathic Medicine; and for master's, Educational Specialist, and doctoral students for whom guidance committees will be established for the sole purpose of overseeing programs of study for the specializations, the Chairperson of the Coordinating Committee will be responsible for establishing the students' guidance committees.

Students should work closely with their advisers within their academic units to develop meaningful experiences that are directly related to infant studies. Credits that are used to meet the requirements for the specialization may also be...
counted toward the requirements for the student’s degree program at the discretion of the academic unit in which the student is enrolled.

Students who are pursuing the interdepartmental graduate specializations in infant studies are strongly encouraged to participate in twice monthly seminars with members of the Coordinating Committee and other students who are pursuing the specializations.

**Master’s Students**

The student must:

1. Complete 18 credits of course work as specified below.
2. Participate in a field experience that involves direct contact with infants. This requirement may be met by completing one or more courses that have been approved by the student’s guidance committee or by completing an alternative experience approved by the Coordinating Committee of the Infant Studies faculty.

In addition to meeting the requirements referenced above, students on Plan A (with thesis) must complete a thesis that reflects the integration of the student’s discipline and infant studies.

**Doctoral Students**

The student must:

1. Complete 18 credits of course work as specified below.
2. Participate in a field experience that involves direct contact with infants. This requirement may be met by completing one or more courses that have been approved by the student’s guidance committee or by completing an alternative experience approved by the Coordinating Committee of the Infant Studies faculty.

3. Pass a written comprehensive examination.

4. Complete a dissertation that reflects the integration of the student’s discipline and infant studies.

Upon completion of the requirements for the degree program and of the interdepartmental graduate specialization in infant studies, the student should contact the administrator of the department, school, or college in which he or she is enrolled and request certification for the completion of the specialization. After the certification is approved by the administrator of the department, school, or college in which the student is enrolled and by the Dean of the College of Social Science, the Office of the Registrar will enter on the student’s academic record the name of the specialization and the date that it was completed. This certification will appear on the student’s transcript.

---

**GRADUATE SPECIALIZATIONS IN INTERNATIONAL DEVELOPMENT**

The graduate specializations in international development are available as electives for students who are enrolled in master’s and doctoral degree programs at Michigan State University. The College of Social Science administers the specializations. The graduate academic adviser for international development, located in the College, coordinates the specializations on behalf of the Dean.

The specializations in international development are designed to:

1. Provide an opportunity for graduate students to obtain a comprehensive and contemporary academic experience in the field of international development studies.
2. Sensitize graduate students with an interest in development studies to their professional obligations and responsibilities.
3. Develop an intellectual environment that will foster the growth of research and teaching in the area of development studies.

The graduate academic adviser for international development in the College of Social Science is responsible for establishing a guidance committee for the specialization for each student. At least one member of the committee must be a member of the international development core faculty who shall serve as the student’s academic adviser for the specialization.

Students who elect the specialization may be required to study the foreign language most relevant to their educational and career objectives, to acquire practical experience in development work, and to complete courses in addition to the courses that are used to satisfy the requirements for the specialization.

Although separate graduate specializations in international development have been established for master’s and doctoral students, a given student may receive certification of completion of either the specialization for master’s students or the specialization for doctoral students, but not for both of the specializations.

With the approval of the department or school and college that administer the student’s degree program, the courses that are used to satisfy the requirements for the specialization may also be used to satisfy the requirements for the degree.

**Requirements for the Graduate Specializations in International Development**

The student must complete a concentration within international development such as gender and health, gender and work, rural development, environment and development, development administration, nongovernmental organizations in development, or politics of development. The student’s program of study
must be approved by the student’s guidance committee for the specialization and must meet the requirements specified below:

Master’s Student: The student must:
1. Complete two of the Core Courses listed below outside the student’s major discipline. Only one of the courses may be at the 400 level. 6
2. Complete at least four additional courses of at least 3 credits each of which are relevant to the student’s concentration within international development. 6

Doctoral Student: The student must:
1. Complete two of the Core Courses listed below outside the student’s major discipline. Only one of the courses may be at the 400 level. 6
2. Complete at least four additional courses of at least 3 credits each which are relevant to the student’s concentration within international development. 12
3. Pass a written comprehensive examination on the student’s concentration within international development. 7

Requirements for the Specializations in Cognitive Science

The specializations in cognitive science are offered at both the master’s and the doctoral level. No student may receive certification at both levels. During the first year of the master’s or doctoral program, the student and the major professor select a guidance committee to assist in planning both the student’s degree program and specialization. At least one member of a master’s student’s guidance committee and two members of a doctoral student’s guidance committee shall be members of the Cognitive Science faculty, with one of the latter from a discipline outside the student’s major department.

Credits that are used to meet the requirements of the specialization may also be used to satisfy the requirements for the student’s major at the discretion of the department or college. Courses that are used to satisfy the requirements for the specialization must be approved by the student’s guidance committee and should demonstrate competence in at least two areas of cognitive science.

Master’s Students must:
1. Complete 18 credits of course work as specified below.
2. Participate in a research project outside their major department, either by completing one semester of work in a laboratory project or by enrolling in an independent study course involving collaborative work with a member of the cognitive science faculty.

Plan A students will also complete a thesis reflecting the integration of the student’s discipline and Cognitive Science.

Doctoral Students must:
1. Complete 18 credits or course work as specified below.
2. Participate in a research project outside their major department, either by completing one semester of work in a laboratory project or by enrolling in an independent study course involving collaborative work with a member of the cognitive science faculty.

Complete a dissertation that reflects the integration of the student’s discipline and Cognitive Science.

SOCIAL SCIENCE
Interdepartmental Graduate Specializations in Cognitive Science

PSY 810 Cognitive Processes ........................................... 3
PSY 814 Psycholinguistics .............................................. 3
PSY 815 Neuropsychology ............................................. 4
ZOL 822 Topics in Ethology and Behavioral Ecology ........... 3
Other course may be substituted with prior approval of the Cognitive Science Graduate Affairs Committee.

Upon completion of the requirements for the degree program and of the interdepartmental graduate specialization in cognitive science, the student should contact the administrator of the department, school, or college in which he or she is enrolled and request certification for the completion of the specialization. After the certification is approved by the Cognitive Science Graduate Affairs Committee, the Director of the program, and the Dean of the College of Social Science, the Office of the Registrar will enter on the student’s academic record the name of the specialization and the date that it was completed. This certification will appear on the student’s transcripts.

DEPARTMENT of ANTHROPOLOGY

Lynne G. Goldstein, Chairperson

Anthropology takes humans and their cultures, throughout the world and through the entirety of human history, as its central object of study. This field gives students a framework for understanding their place in the natural world. It examines humanity’s evolutionary background and development, the organization of social and cultural life, the nature of culture as a system of meaning to organize and interpret experience, the evolution of societies, and the interrelationships between culture and shared ways of thinking and feeling.

Major points of orientation within anthropology include the search for patterning of cultural behavior amidst the immense variation found within and among cultures, the study of principles of cultural dynamics, the analysis of processes of change and stability within social and cultural structures, cross-cultural comparisons of different societies, the study of patterns of development of societies from simple to complex, and the functioning of cultural institutions as parts of overall sociocultural systems.

Anthropology views the world of humanity’s many cultures as a natural laboratory in which a multitude of varied historical adaptations have developed and are continuing to evolve, the study of which can help in the understanding of human behavior and the course of history. Providing an excellent foundation for a diverse, liberal education, the study of anthropology also contributes to the preparation of students for careers in education, medicine, business and industry, government service, and other walks of life in which a broad knowledge of cultural dynamics, ethnic diversity and human relations is important.

UNDERGRADUATE PROGRAM

Requirements for the Bachelor of Arts or Bachelor of Science Degree in Anthropology

1. The University requirements for bachelor’s degrees as described in the Undergraduate Education section of this catalog: 120 credits, including general elective credits, are required for the Bachelor of Arts or Bachelor of Science degree in Anthropology. The University’s Tier II writing requirement for the Anthropology major is met by completing Anthropology 489. That course is referenced in item 3.a. below.

2. The requirements of the College of Social Science for the Bachelor of Arts degree or the Bachelor of Science degree.

3. The following required major courses: 

   a. All of the following courses: 
   ANP 201 Sociocultural Diversity .................................. 3
   ANP 202 Biocultural Evolution ..................................... 3
   ANP 489 Anthropology Capstone Course (W) ................ 3
   b. One area course from Anthropology 410, 411, 412, 414, 415, 416, 430, 451, 452, 453.
   d. Five additional Anthropology courses, at least three of which must be at the 300–400 level. Anthropology 101 may not be used to meet this requirement.

4. Certification Options

   a. An anthropology disciplinary minor is available for teacher certification.
   b. Students who elect the anthropology disciplinary minor must contact the Department of Anthropology.
   c. For additional information, refer to the statement on TEACHER CERTIFICATION in the Department of Teacher Education section of this catalog.

GRADUATE STUDY

The Department of Anthropology offers programs of study leading to the Master of Arts and Doctor of Philosophy degrees.

Students who are accepted into the master’s degree program may, upon successful completion of the degree, apply for admission to the doctoral program. For students in the doctoral program, however, the master’s degree is optional.

Anthropology majors are encouraged, with the consent of their guidance committees, to complete a cognate in a field outside the department. Similarly, the department offers a cognate in anthropology to individuals with majors in other disciplines.

The Department of Anthropology is affiliated with the Doctor of Philosophy degree program in ecology, evolutionary biology and behavior. For information about a Doctor of Philosophy degree program that involves ecology, evolutionary biology and behavior and a major in the Department of Anthropology, refer to the statement on the doctoral program in ecology, evolutionary biology and behavior in the College of Natural Science section of this catalog.

Students who are enrolled in the Master of Arts degree program in the Department of Anthropology may elect a specialization in ecology, evolutionary biology and behavior. For additional information, refer to the statement on the specialization in the College of Natural Science section of this catalog.

Students who are enrolled in Master of Arts and Doctor of Philosophy degree programs in the Department of Anthropology may elect specializations in infant studies. For additional information, refer to the statement on Interdepartmental Graduate Specializations in Infant Studies.

Master of Arts

In addition to meeting the requirements of the University and of the College of Social Science, students must meet the requirements specified below.

Admission

Students applying for admission to the master’s program in anthropology will be considered regardless of the field of their

CREDITS
previous academic training. It is, however, recommended that students have earned at least 12 undergraduate credits in anthropology before entering the program. Admission on other than a provisional status is normally contingent upon the possession of a bachelor’s degree from a recognized college or university, and a junior–senior undergraduate grade-point average of 3.00 or better in academic studies.

Requirements for the Master of Arts Degree for Students Who Are Enrolled in the Master of Arts Degree Program with a Major in Anthropology

Students who are enrolled in the Master of Arts degree program with a major in Anthropology must complete 30 credits under Plan A (with thesis). The Plan B option is available only to students who are enrolled in the Doctor of Philosophy degree program with a major in Anthropology and who wish to meet the requirements for the Master of Arts degree as part of the Doctor of Philosophy degree program. Normally students complete the requirements for the Master of Arts degree in three to four years.

Plan A requirements include:
1. A minimum of four anthropological foundation courses as specified by the department according to the student’s subdiscipline.
2. Anthropology 840.
3. A methods course in anthropology or a substitute approved by the student’s guidance committee.

Plan B requirements include:
1. A minimum of four anthropological foundation courses as specified by the department according to the student’s subdiscipline.
2. Anthropology 840.
3. A methods course in anthropology or a substitute approved by the student’s guidance committee.
4. Completion of all additional required courses to a minimum of 30 credits as specified by the guidance committee.
5. Satisfactorily complete the Ph.D. comprehensive examination administered by the student’s guidance committee and approved by the faculty.

Doctor of Philosophy

In addition to meeting the requirements of the University and of the College of Social Science, students must meet the requirements specified below.

Admission

A master’s degree is not a prerequisite for admission to the doctoral program in anthropology. Students who wish to transfer into the doctoral degree program from the master’s degree program must complete the regular application procedure for admission to the doctoral program.

Requirements for the Doctor of Philosophy Degree in Anthropology

1. Complete five anthropological foundation courses chosen from a departmentally approved list in consultation with the guidance committee. The courses are designed to provide a strong graduate foundation in anthropology’s subdisciplines, as well as to serve students’ individual needs. The courses must be distributed in accordance with the student’s subdisciplinary focus and must be completed before the comprehensive examination.
2. Complete Anthropology 840.
3. Complete at least one methods course as specified by the department in accordance with the student’s subdisciplinary focus.
4. Pass the doctoral evaluation procedure at the end of both the first and second years in residence.
5. Complete a flexible program of effective study related to the student’s specialization of interest.
6. Complete an original field research program as the basis for a dissertation.

Academic Standards

The student’s performance in courses during both the first and second academic years of residence is evaluated to determine the student’s ability to proceed with the doctoral program. Passing the doctoral evaluation procedure at the end of the second year in residence qualifies the student to proceed with the doctoral program.

RESEARCH OPPORTUNITIES

The African, Asian, and Latin American Studies Centers offer unique opportunities for the support of anthropological research. The University Museum, International Studies and Programs, the Center for Advanced Studies in International Development (CASID), the Office of Women in Development (WID), the Agricultural Experiment Station, Urban Affairs Programs, the Hispanic Research Institute, and the Midwest Universities Consortium for International Activities, Incorporated (MUCIA), also support research. A program of study may be developed in cooperation with the College of Human Medicine.

SCHOOL of CRIMINAL JUSTICE

Merry A. Morash, Director

Democratic society requires stability in order to insure justice, equity, and freedom for all. The essential elements of stability are crime prevention, the preservation of peace, and the protection of civil rights. Public and private agencies on various levels provide for security, safety, peace, and freedom through programs designed to prevent crime and delinquency.

The essential significance of the Bachelor of Arts and Master of Science degree programs in the School of Criminal Justice is in these two propositions: (1) The systematic study of crime, criminal behavior, and criminal justice processes constitute an appropriate and highly important function of higher education. Coping more effectively with the issues and problems involved is integral to the maintenance of a democratic society. (2) Because of the complexities of the phenomena attendant to crime in contemporary society, it has become increasingly important for higher education to devote resources to preparing students for careers in criminal justice and related areas.

In addition to bachelor’s and master’s degree programs, the School of Criminal Justice offers a graduate specialization in
FORENSIC SCIENCE and undergraduate and graduate specializations in security management.

UNDERGRADUATE PROGRAMS

Bachelor of Arts

CRIMINAL JUSTICE

The Bachelor of Arts degree program in criminal justice is designed to prepare students for entry level positions in public and private agencies identified with criminal justice administration. Such agencies apprehend offenders, adjudicate alleged offenses, redirect emergent criminal careers, and promote industrial and commercial security. Such agencies also encourage and emphasize community responsibility for the success of their programs.

The bachelor's program in criminal justice provides a basic orientation to the institutions and processes of criminal justice and offers students wide exposure to all of the major disciplines of the criminal justice system. The program promotes general knowledge through core and social science courses. It provides students with the opportunity to pursue interests in the following areas: juvenile justice, police administration, adult corrections, and security.

Requirements for the Bachelor of Arts Degree in Criminal Justice

1. The requirements of the University as described in the Undergraduate Education section of this catalog: 120 credits, including general elective credits, are required for the Bachelor of Arts degree in Criminal Justice.
2. The University's Test Writing requirement for the Criminal Justice major is met by completing one of the following courses: Criminal Justice 34, 456, 466, or 485. These courses are referenced in item 3. a. (3) below.
3. The requirements of the College of Social Science for the Bachelor of Arts degree.
4. The following requirements for the major:

   a. The following courses in the School of Criminal Justice: 40

   (1) All of the following Prerequisite Courses (12 credits):

   - CJ 130 Introduction to Criminal Justice
   - CJ 220 Criminology
   - CJ 220 Methods of Criminal Justice Research

   (2) All of the following Core Courses (15 or 18 credits):

   - CJ 335 Police Process
   - CJ 365 Corrections Process
   - CJ 375 Criminal Law Process
   - One of the following courses:
     - CJ 355 Juvenile Justice Process
     - CJ 385 Introduction to Private Security
   - (3) A minimum of 12 credits from the following courses including 3 credits in Criminal Justice 43, 456, 466, or 485:

   - CJ 230 Introduction to Forensic Science
   - CJ 385 Introduction to Private Security
   - CJ 400 Henson Study
   - CJ 421 Minority, Crime, and Social Policy
   - CJ 422 Comparative and Historical Criminal Justice
   - CJ 425 Women and Criminal Justice
   - CJ 432 Community Policing
   - CJ 433 Law Enforcement Intelligence Operations
   - CJ 434 Police Administration
   - CJ 435 Investigative Procedures
   - CJ 455 Recidivism and Treatment Approaches
   - CJ 460 Criminal Careers and Careers in Criminal Justice
   - CJ 465 Convictional Programming and Analysis
   - CJ 466 Corrections Organizations and Systems
   - CJ 471 Law of Corrections
   - CJ 474 Law and Criminal Justice Policy
   - CJ 485 Asset Protection Management
   - CJ 490 Independent Study
   - CJ 491 Topics in Criminal Justice

   b. A minimum of 6 credits in courses related to the major. The courses must be in one of the following disciplines: An- thropology, Economics, Geography, Political Science, Psychology, Social Work, and Sociology.

UNDERGRADUATE SPECIALIZATION IN SECURITY MANAGEMENT

The complexities of modern society have combined to generate a variety of threats to business organizations, information networks, government installations and operations, and individuals. The undergraduate specialization in security management is designed for students who are interested in private and government security.

The specialization, which is administered by the School of Criminal Justice, is available as an elective to students who are enrolled in bachelor's degree programs at Michigan State University. The specialization should be of particular interest to students who are enrolled in certain programs in the Eli Broad College of Business and the College of Social Science, and to students who are enrolled in the Bachelor of Science degree program in computer science.

The specialization in security management is designed to help students to understand:

1. The business and technical aspects of protecting private and government assets.
2. The administrative, management, technical, and legal problems of asset protection and loss prevention.
3. Concepts related to protecting personal and personnel rights, proprietary information, facilities, and other assets of an organization.
4. Security's relationship to the value of freedom and democratic principles in our society.

With the approval of the department or school and college that administer the student's degree program, the courses that are used to satisfy the requirements for the specialization may also be used to satisfy the requirements for the bachelor's degree.

Requirements for the Undergraduate Specialization in Security Management

The student must complete:

1. All of the following courses (18 credits):

   - ACC 230 Survey of Accounting Concepts
   - CJ 385 Introduction to Private Security
   - CJ 433 Law Enforcement Intelligence Operations
   - CJ 435 Investigation Procedures
   - CJ 445 Asset Protection Management
   - CJ 450 Criminal Justice Practicum

2. One of the following courses (3 or 4 credits):

   - CPS 101 Computing Concepts and Competencies
   - CPS 230 Algorithms and Computing

3. One of the following courses (3 credits):

   - FT 111 Financial Management
   - GBL 395 Law, Public Policy, and Business
   - MGT 392 Management and Organizational Behavior
   - MSC 300 Management Marketing

Upon completion of the requirements for the specialization in security management, the student should contact the Director of the School of Criminal Justice and request certification for the completion of the specialization. After the certification is approved by the Director of the School and the Dean of the College of Social Science, the Office of the Registrar will enter on the student's academic record the name of the specialization and the date that it was completed. This certification will appear on the student's transcript.

GRADUATE STUDY

The School of Criminal Justice is at the forefront of education in the administration of criminal justice. Criminal justice administration, from crime prevention to the release of detain-
ees from legal supervision, is an integrated process, the components of which focus upon prevention and control of illegal behavior.

The School of Criminal Justice offers a professionally and managerially oriented degree program for advanced students, many of whom are established criminal justice practitioners. The program is designed to add new dimensions to the skills of career people in the various branches of criminal justice and to prepare scholars for further work on the doctoral level. Degree candidates divide their course work into complementary parts: all students complete core requirements and one of the following four concentrations: adult corrections, delinquency prevention, police, or general studies. Courses in other disciplines may be included in the student’s program of study.

The school also offers graduate specializations in forensic science and security management.

Master of Science

CRIMINAL JUSTICE

In addition to meeting the requirements of the University and of the College of Social Science, students must meet the requirements specified below.

Admission

While a criminal justice undergraduate major comparable to that offered by this school is not required for admission to the Master of Science degree program, the applicant must have a background of education and occupational experience appropriate to the successful pursuit of graduate work in the concentration elected. Applicants insufficiently prepared for graduate study in criminal justice may have to complete collateral course work or pursue individualized study to satisfy deficiencies. Occupational experience is highly desirable before undertaking graduate study in some fields of criminal justice.

All applicants must have at least 12 credits of undergraduate course work in political science, economics, sociology, psychology, anthropology, history, social work, or any combination thereof. At least 6 of these credits must be in sociology, psychology, social work, or any combination of such courses.

Regular Status

1. A bachelor’s degree from a recognized educational institution.
2. An undergraduate grade-point average of 3.20 or higher.
3. Satisfactory scores on the Graduate Record Examination General Test or a satisfactory score on the Miller Analogies Test (social science professional scores).
4. Evidence of personal traits and characteristics considered important for scholarly performance.
5. Occupational experience is given weight in the selection of master’s degree candidates; whenever such experience is important to the study of a specific concentration or is an important factor in obtaining appropriate employment after completion of the Master of Science degree.

Provisional Status

A limited number of applicants who do not satisfy the school’s regular admission requirements may be accepted provisionally. These students will be judged on the basis of their potential contribution to the field of criminal justice. Students should not be enrolled on a provisional basis for more than one semester. The student must be admitted on a regular basis to be considered a degree candidate. To qualify for admission to regular status, the student must complete a minimum of 10 credits in criminal justice graduate course work with a grade-point average of 3.20 or higher.

Requirements for the Master of Science Degree in Criminal Justice

The program is available under both Plan A (with thesis) and Plan B (without thesis). The student must complete a total of 30 credits distributed as follows:

**Requirements for Both Plan A and Plan B**

<table>

*For a student who completes the requirements for the graduate specialization in forensic science.

1. A course dealing with an aspect of the legal system approved by the School of Criminal Justice may be substituted for Criminal Justice 811.
2. Criminal Justice 815 may be substituted for Criminal Justice 812.
3. Six credits from Criminal Justice 816, 819, and 820 may be substituted for the 6 credits in one of the four concentrations.

CRIMINAL JUSTICE—URBAN STUDIES

The School of Criminal Justice offers an interdepartmental Master of Science degree program in criminal justice—urban studies.

Admission

To be admitted to the major in criminal justice—urban studies, students must meet the requirements for admission to the Master of Science degree program with a major in criminal justice. They must also meet the requirements for admission as specified in the statement on Interdepartmental Graduate Programs in Urban Studies in the Graduate Education section of this catalog.

Requirements for the Master of Science Degree in Criminal Justice—Urban Studies Plan A

Students who are admitted to the major in criminal justice—urban studies and elect Plan A must complete a minimum of 33 credits for the degree including the requirements for the major in criminal justice leading to the Master of Science degree under Plan A as specified above, as well as the requirements for the urban studies component of the program as specified in the statement on Interdepartmental Graduate Programs in Urban Studies.

22
SOCIAL SCIENCE
School of Criminal Justice

The completion of Criminal Justice 887, which is required for the criminal justice component of the program, also satisfies the quantitative social research methods requirement of the urban studies component. The completion of 8 of the 9 credits in the urban studies core courses that are required for the urban studies component of the program also satisfies the 8 credits of electives that are required for the criminal justice component.

Requirements for the Master of Science Degree in Criminal Justice—Urban Studies Plan B

Students who are admitted to the major in criminal justice—urban studies and elect Plan B must complete a minimum of 33 credits for the degree including the requirements for the major in criminal justice leading to the Master of Science degree under Plan B as specified above, as well as the requirements for the urban studies component of the program as specified in the statement on Interdepartmental Graduate Programs in Urban Studies.

Students are required to satisfy the quantitative social research methods requirement of the urban studies component of the program by completing Criminal Justice 887.

Students are required to complete a 6–credit internship for the urban studies component of the program. To satisfy that requirement, students must complete an urban–oriented practicum (3 credits of Criminal Justice 894) and a policy analysis paper that is based on the practicum (3 credits of Criminal Justice 896). The completion of the 9 credits in urban studies core courses and the 3 credits of Criminal Justice 894 that are required for the urban studies component of the program also satisfies the 12 credits of electives that are required for the criminal justice component.

GRADUATE SPECIALIZATION IN FORENSIC SCIENCE

The graduate specialization in forensic science is available as an elective to students who are enrolled in the Master of Science degree program in criminal justice or criminal justice—urban studies under Plan A. The specialization, which is based upon a knowledge of scientific principles and the scientific method, is designed to help students to:

1. Appreciate the role of the criminal investigation process in the criminal justice system.
2. Understand the role of forensic science in the criminal investigation process.
3. Learn techniques that are used in the analysis of physical evidence and their value in the criminal investigation process.
4. Present physical evidence in criminal and civil proceedings.

Admission

To be considered for admission to the specialization, an applicant must:

1. Be admitted to the Master of Science degree program in criminal justice or criminal justice—urban studies under Plan A.
2. Have a Bachelor of Arts or Bachelor of Science degree in a natural or physical science (e.g., chemistry, biochemistry, biology, physiology, or forensic science). As part of the undergraduate program, the applicant must have completed:
   a. One year of general chemistry including laboratories.
   b. One year of organic chemistry with laboratories.
   c. One semester of analytical chemistry (e.g., quantitative analysis or instrumental analysis).
   d. One year of general physics with laboratories.
   e. One year of general biology.

One year of calculus and one semester of statistics are recommended.

Requirements for the Graduate Specialization in Forensic Science:

The student must complete all of the following courses (13 credits):

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CG 815</td>
<td>Forensics in Criminal Investigation</td>
<td>3</td>
</tr>
<tr>
<td>CG 816</td>
<td>Policy and Management Issues in Forensic Science</td>
<td>2</td>
</tr>
<tr>
<td>CG 817</td>
<td>Legal and Investigative Issues in Forensic Science</td>
<td>2</td>
</tr>
<tr>
<td>CG 819</td>
<td>Forensic Science I</td>
<td>3</td>
</tr>
<tr>
<td>CG 820</td>
<td>Forensic Science II</td>
<td>3</td>
</tr>
</tbody>
</table>

1. To meet the requirements for the Master of Science degree in criminal justice, a student who completes the requirements for the graduate specialization in forensic science may substitute:

   2. Criminal Justice 817 for Criminal Justice 812.
   3. Criminal Justice 819 and 820 for 6 credits in one of the concentrations.

Upon completion of the requirements for the Master of Science degree in criminal justice or criminal justice–urban studies under Plan A and the requirements for the graduate specialization in forensic science, the student should contact the Director of the School of Criminal Justice and request certification for the completion of the specialization. After the certification is approved by the Director of the School and the Dean of the College of Social Science, the Office of the Registrar will enter on the student’s academic record the name of the specialization and the date that it was completed. This certification will appear on the student’s transcript.

GRADUATE SPECIALIZATION IN SECURITY MANAGEMENT

The complexities of modern society have combined to generate a variety of threats to business organizations, information networks, government installations and operations, and individuals. The graduate specialization in security management is designed for students who are interested in private and government security.

The specialization, which is administered by the School of Criminal Justice, is available as an elective to students who are enrolled in master’s degree programs at Michigan State University. The specialization should be of particular interest to students who are enrolled in certain programs in the Eli Broad College of Business and the College of Social Science.

The specialization in security management is designed to help students to understand:

1. The business and technical aspects of protecting private and government assets.
2. The administrative, management, technical, and legal problems of asset protection and loss prevention.
3. Concepts related to protecting personal and personnel rights, proprietary information, facilities, and other assets of an organization.
4. Security’s relationship to the value of freedom and democratic principles in our society.

With the approval of the department or school and college that administer the student’s degree program, the courses that are used to satisfy the requirements for the specialization may also be used to satisfy the requirements for the master’s degree.
Requirements for the Graduate Specialization in Security Management:

The student must complete:

1. All of the following courses (18 credits):
   - CJ 810 Parsons in Criminal Justice
   - CJ 811 Design and Analysis in Criminal Justice Research
   - CJ 812 Criminal Justice Management Seminar
   - CJ 814 Seminar in Management Topics
   - CJ 885 Security Management
   - CJ 886 Security Administration

2. One of the following courses (3 credits):
   - LIR 823 Organizational Behavior in Labor and Industrial Relations
   - MAT 806 Management and Organizational Behavior
   - PLS 810 Parsons in Public Administration
   - PSY 800 Industrial and Organizational Psychology

Upon completion of the requirements for the master's degree and the requirements for the specialization in security management, the student should contact the Director of the School of Criminal Justice and request certification for the completion of the specialization. After the certification is approved by the Director of the School and the Dean of the College of Social Science, the Office of the Registrar will enter on the student's academic record the name of the specialization and the date that it was completed. This certification will appear on the student's transcript.

Doctor of Philosophy

In cooperation with the School of Criminal Justice, the College of Social Science offers an interdisciplinary Doctor of Philosophy degree program in social science within which a concentration in criminal justice is available. For information concerning interdisciplinary doctoral studies, students should communicate with the Director of the School of Criminal Justice or with the Associate Dean, College of Social Science.

DEPARTMENT of GEOGRAPHY

Richard Groop, Chairperson

The Department of Geography comprises three main academic areas in which majors are offered to students: (1) geography and geography-urban studies, (2) landscape architecture, and (3) urban and regional planning.

The discipline of geography, as the study of place and space, concerns itself with the analysis and explanation of the occurrence, distribution, and interrelationships of physical and cultural patterns on the earth's surface. The discipline is also interested in how the earth's physical and human landscapes change over time. Geography can be classified both as a social science and a natural science as it examines human beings and their environment and serves as a bridge between the physical and cultural worlds.

The undergraduate program is designed to prepare students for various careers in business, industry, education, and government. Career oriented specializations are available in spatial information processing, geographic information systems, remote sensing, and regional development.

Landscape Architecture is the design profession which applies artistic, cultural, scientific, and technical knowledge and skills to the analysis, design, planning, development, and management of the land. Landscape architects accept certain responsibilities related to the health, safety, and welfare of the public and are concerned with resource conservation and stewardship of the land. The practice of landscape architecture requires an appreciation and understanding of natural and social processes, a creative imagination, technical expertise, and a commitment to preserve or improve the physical environment for optimum human use and enjoyment.

Landscape architects are employed by private professional offices, public planning agencies, land development companies, industrial or commercial firms, educational and research institutions, park and recreation authorities, and a variety of other organizations which require land use planning and site design services. The landscape architect's professional activities include consultations with clients, resource inventories and site analyses, site development programming, development of design concepts and land use proposals, provision of design implementation drawings and specifications, preparation of contracts and reports, and supervision of projects under construction. The landscape architect often collaborates with other professionals, including architects, engineers, naturalists, geographers, and planners, in the design and development of urban and rural land areas.

Urban planning is concerned with the comprehensive development and improvement of the physical structure of cities, metropolitan regions, and other urbanized areas, so that the best environment for residents may be achieved in concord with the objectives of a democratic society. This mission is accomplished through extensive research followed by the preparation of plans for the correction of accumulated problems, and for the adequate accommodation of future change. In order to accomplish this task, the planner must understand how the interrelated needs of the people and economic, social and political forces are translated into physical urban form. Thus, the community's social goals form the basis for the planning of desirable living environments, employment facilities, recreation opportunities, and commercial, cultural and service components of urban development.

UNDERGRADUATE PROGRAMS

The Department of Geography offers programs in geography leading to the Bachelor of Arts and Bachelor of Science degrees. The department also offers a program in landscape architecture leading to the Bachelor of Landscape Architecture degree and a program in urban and regional planning leading to the Bachelor of Science degree.

GEOGRAPHY

Within the discipline of geography, a tracking system permits students pursuing a bachelor's degree to concentrate in various interest areas. The departmental adviser and faculty members are available to discuss program options and career opportunities with interested students.

Requirements for the Bachelor of Arts or Bachelor of Science Degree in Geography

1. The University requirements for bachelor's degrees as described in the Undergraduate Education section of this catalog; 120 credits, including general elective credits, are required for the Bachelor of Arts or Bachelor of Science degree in Geography.

2. The requirements of the College of Social Science for the Bachelor of Arts degree or the Bachelor of Science degree.

CREDITS

3. The following required major courses: 

   a. All of the following courses:
      - GEO 113 Introduction to Economic Geography .......................... 3
      - GEO 131 Cultural Geography ........................................... 3

   b. The following required major courses: 
      - GEO 113 Introduction to Economic Geography .......................... 3
      - GEO 131 Cultural Geography ........................................... 3

24
LANDSCAPE ARCHITECTURE

The undergraduate program in urban and regional planning provides a diverse learning experience which strives for a balance between philosophy, theory, and application of concepts related to past, present, and future problem-solving in landscape architecture and allied environmental planning and design professions.

The program includes professional courses in the areas of design theory and graphic communications, environmental perception, history, and plant materials and their uses; technical aspects of site development, design applications for representative land uses; site planning for typical projects; community planning, housing and recreational development; and urban and regional design and planning.

The program offers meaningful design opportunities and challenges within the classroom and on community projects, which prepare the student to communicate through writing, speech and graphics. These objectives are met in group and in individual assignments where independent study and growth are encouraged.

The program in landscape architecture at Michigan State University has been accredited by the American Society of Landscape Architects.

Upon completion of the undergraduate program, the individual is prepared to participate at the entry level of professional landscape architecture or to pursue graduate study leading to more specialized phases of professional work.

Honors Study

Students interested in honors programs in landscape architecture should consult with an academic advisor.

Admission as a Junior

The number of students who can be admitted as juniors to the landscape architecture major is limited. To be considered for admission as a junior, a student must have completed the core courses referenced in item 2, below. Students who have been admitted as juniors are entitled to enroll in upper level landscape architecture courses required for the Bachelor of Landscape Architecture degree.

Admissions are determined by the faculty on the basis of the relative qualifications of applicants and the enrollment capacity in the program. Admission is competitive.

Detailed information regarding admission requirements and procedures is available from the Director for Landscape Architecture, Department of Geography.

Requirements for the Bachelor of Landscape Architecture Degree in Landscape Architecture

1. The University requirements for bachelor's degrees as described in the Undergraduate Education section of this catalog: 139 credits, including general elective credits, are required for the Bachelor of Landscape Architecture degree in Landscape Architecture.

Students who are enrolled in the Landscape Architecture major leading to the Bachelor of Landscape Architecture degree may complete an alternative track to Integrative Studies in Biological and Physical Sciences that consists of the following courses: Biological Science 110, Chemistry 141 and 142, and Zoology 355 and 355L. The completion of Chemistry 141 and Zoology 355L satisfies the laboratory requirement. Biological Science 110, Chemistry 141 and 142, and Zoology 355 and 355L may be counted toward both the alternative track and the requirements for the major referenced in item 2, below.

The completion of Mathematics 116 referenced in requirement 2, below may also satisfy the University mathematics requirement.

The University’s Tier II writing requirement for the Landscape Architecture major is met by completing Landscape Architecture 480 or 492. These courses are referenced in item 2, d, below.

2. The following requirements for the major:

a. A minimum grade-point average of 2.00 in the 43 credits required in 300-400 level Landscape Architecture courses referenced in requirement 2, below.

b. Collateral Courses: 31 credits

(1) All of the following courses (27 credits):
- PS 220 Organisms and Populations ........................................... 3
- CEM 141 General Chemistry ................................................... 4
- CEM 161 Chemistry Laboratory I .......................................... 1
- HRT 211 Landscape Plants I .................................................. 3
- HRT 212 Landscape Plants II ................................................ 3
- MTH 136 College Algebra and Trigonometry* ......................... 4
- GSP 484 Planning Fundamentals ......................................... 4
(2) One of the following courses (4 credits):
- GEO 221 Introduction to Geographic Information ...................... 3
- HRT 240 Computer Aided Design for Designers ...................... 3
c. Environmental Science Courses: 36 credits

(1) All of the following courses (30 credits):
- CSS 210 Fundamentals of Soil and Landscape Sciences*
- GEO 200 Physical Geography .............................................. 3
- ZOL 355 Ecology ............................................................ 3
- ZOL 355L Ecology Laboratory ............................................. 3
(2) At least 6 additional credits in courses related to the environment approved by the student's academic advisor.

d. Landscape Architecture Courses: All of the following courses: 57 credits

- LA 200 Introduction to Landscape Architecture ....................... 3
- LA 220 Graphic Communication* .......................................... 4
- LA 240 Applied Design Fundamentals* .................................. 4
- LA 270 Landscape Design History* ....................................... 3
- LA 330 Site Construction: Materials and Methods .................... 4
- LA 331 Site Engineering .................................................... 4
- LA 341 Basic Site Design I .................................................. 4
- LA 342 Basic Site Design II .................................................. 5
- LA 437 Design Implementation ............................................. 3
- LA 443 Community Project Design I ...................................... 3
- LA 444 Community Project Design II .................................... 3
- LA 444 Advanced Project Design ........................................... 3
- LA 446 Regional Environmental Design ................................ 3
- LA 480 Professional Practice (W) ......................................... 3
- LA 492 Senior Research Seminar (W) .................................... 3
e. Directed Electives: 12 credits

A minimum of 12 additional credits in courses in the College of Arts and Letters and/or the College of Social Science approved by the student's academic advisor.

1 Courses that must be completed in order for a student to be considered for admission to the major.

2 Courses that are used to satisfy the University Integrative Studies and writing requirement may not be used to satisfy this requirement.

UBER AND REGIONAL PLANNING

The undergraduate program in urban and regional planning is intended to provide students with a basic understanding of the history of urbanism, the theory and principles of urban design, and the relevant legal and administrative procedures. Students study the techniques of survey and research used in the analysis of the structure and growth of urban areas. They are involved in written and graphic communication. They recognize the contributions made by other disciplines concerned with the study of urban development. By developing systematic programs for the orderly and unified arrangement of urban physical structures, students focus their accumulated knowledge and skills on specific urban problems. The undergraduate program, which has been accredited by the Planning
Accreditation Board, is designed to prepare majors to assume the responsibilities encountered in entry level professional planning practice.

Requirements for the Bachelor of Science Degree in Urban and Regional Planning

1. The University requirements for bachelor's degrees as described in the Undergraduate Education section of this catalog; 120 credits, including general elective credits, are required for the Bachelor of Science degree in Urban and Regional Planning.

   The completion of Statistic and Probability 201 referenced in item 3.b. below may also be used to satisfy the University mathematics requirement. However, a course that is used to satisfy the University mathematics requirement may not be counted toward the College of Social Science NATURAL SCIENCE REQUIREMENTS. (referred to in section II.B. under the heading Graduation Requirements for the Bachelor of Arts and Bachelor of Science Degrees in the College section).

   The University's TWI writing requirement for the Urban and Regional Planning major is met by completing Urban Planning 341 or 365. Those courses are referenced in item 3.a., below.

2. The College of Social Science requirements for the Bachelor of Science degree:

   Courses taken as part of the Cognate Areas in the major may, where applicable, be used to satisfy college requirements.

3. The following requirements for the major:

   a. All of the following Urban Planning Core Courses: .......................... 30
      UP 201 The Role of Planning in Urban and Regional Development ....... 4
      UP 314 Methods for Investigation of Urban Systems ......................... 4
      UP 324 Visual Communication and Planning ................................. 4
      UP 343 Planning Theory: Ethics and Policies (W) .......................... 4
      UP 353 Land Use Planning ..................................................... 4
      UP 365 Planning Law (W) ....................................................... 3
      UP 454 Local Economic Planning .............................................. 3
      UP 494 Planning Procedure .................................................... 4

   b. Other Required Courses: ....................................................... 19
      CSE 101 Computing Concepts and Competencies ............................ 3
      (Truck C or D)
      EC 201 Introduction to Microeconomics .................................... 3
      GEO 221 Introduction to Geographic Information .......................... 3
      MTH 103 College Algebra ....................................................... 3
      PLS 100 Introduction to American National Government .................. 3
      STT 201 Statistical Methods .................................................... 4

   c. Cognate Areas: 5 credits must be obtained from the Program adviser 18
      Environment
      Urban Society
      Government

   d. Advanced Guided Elective, One course of at least 3 credits, chosen from a list provided by the student and an advisor.

Spatial Information Processing Specialization

The spatial information processing specialization, which is administered by the Department of Geography, is available as an elective to students who are enrolled in bachelor's degree programs at Michigan State University. With the approval of the department and college that administer the student's degree program, the courses that are used to satisfy the requirements for the specialization may also be used to satisfy the requirements for the bachelor's degree.

The spatial information processing specialization is designed to develop academic expertise and professional competence in collecting, manipulating, analyzing, and displaying spatially-referenced information through the geographic sub-disciplines of cartography, remote sensing, and geographic information systems.

Students who plan to complete the requirements for the spatial information processing specialization should contact the undergraduate advisor for spatial information processing in the Department of Geography.

Requirements for the Spatial Information Processing Specialization

The student must complete a minimum of 21 credits in courses as specified below:

   CREDITS

1. The following course: ......................................................... 3
   GEO 221 Introduction to Geographic Information .......................... 3

2. One of the following courses: .............................................. 3
   GEO 400 Independent Study
   GEO 408 Internship in Geography

3. Four of the following courses: .......................................... 15 or 16
   GEO 224 Remote Sensing of the Environment
   GEO 230 Thematic Cartography
   GEO 421 Map Production and Design
   GEO 424 Advanced Remote Sensing

4. GEO 463 Introduction to Quantitative Methods for Geographers and Planners ........................................ 3

Upon completion of the requirements for the spatial information processing specialization, the student should contact the Chairperson of the Department of Geography and request certification for the completion of the specialization. After the certification is approved by the Chairperson of the Department of Geography and the Dean of the College of Social Science, the Office of the Registrar will enter on the student's academic record the name of the specialization and the date that it was completed. This certification will appear on the student's transcript.

TEACHER CERTIFICATION OPTIONS

A geography disciplinary minor is available for teacher certification.

Students who elect the geography disciplinary minor must contact the Department of Geography to plan their programs of study.

For additional information, refer to the statement on TEACHER CERTIFICATION in the Department of Teacher Education section of this catalog.

GRADUATE STUDY

The Department of Geography offers programs in the discipline of geography leading to the Master of Arts, Master of Science, and Doctor of Philosophy degrees. Additionally, a geography -- urban studies program leads to the Master of Arts degree. The department also offers programs in urban and regional planning and in urban and regional planning -- urban studies leading to the Master in Urban and Regional Planning degree.

Students who are enrolled in master's or doctoral degree programs in the Department of Geography may elect an inter-departmental specialization in cognitive science. For additional information, refer to the statement on Interdepartmental Graduate Specializations in Cognitive Science. For additional information, contact the Department of Geography.

GEOGRAPHY

Master of Arts and Master of Science

Master's programs in geography are designed to enable the student to achieve professional competence in the discipline. These programs are intended to increase substantive and technical proficiency in the general fields of geography.

In addition to meeting the requirements of the University and of the College of Social Science, students must meet the requirements specified below.

Admission

All students seeking the master's degree in the discipline of geography are expected to have completed courses in physical, cultural/human, economic/urban, and regional geography; in
quantitative methods; and in one tool area. Those students seeking a Master of Science degree are also expected to have completed a sequence of mathematics courses through intermediate (second semester) calculus and a one-year sequence of courses in the physical or natural sciences. Applicants who have not completed all of these requirements may be admitted, but must remedy all deficiencies before the degree is granted.

REGULAR STATUS: The requirements for admission to the program include:

1. A bachelor's degree from a recognized college or university preferably with an undergraduate major in geography or at least 14 credits in geography and related fields.
2. A grade-point average of at least 3.40 at the time of application in both (a) all geography courses and (b) all courses completed during the junior and senior years.
3. Satisfactory scores on the Graduate Record Examination General Test.

PROVISIONAL STATUS: Applicants who have met all other admission requirements and have a grade-point average of at least 3.00 but less than 3.40 at the time of application for (a) all geography courses and (b) all courses taken during the junior and senior years may be admitted on a provisional basis. When the student completes 8 credits of graduate course work approved by his or her guidance committee with a grade-point average of 3.00 or better, the student may request to be changed to regular status.

Requirements for the Master of Arts Degree in Geography

The Master of Arts degree program in Geography is available only under Plan A (with thesis). The student must complete a total of 30 credits distributed as follows:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>GEO 886</td>
<td>Research Design in Geography</td>
<td>3</td>
</tr>
<tr>
<td>GEO 890</td>
<td>Master's Thesis Research</td>
<td>6</td>
</tr>
<tr>
<td>One research seminar in geography</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>One advanced level course in each of two tool areas</td>
<td>6 to 8</td>
<td></td>
</tr>
<tr>
<td>A specialization in an area of geography and related coursework</td>
<td>3 to 8</td>
<td></td>
</tr>
<tr>
<td>One 800-400 level course in research methods</td>
<td>3 or 4</td>
<td></td>
</tr>
</tbody>
</table>

1. **With the approval of the student's guidance committee, another course may be substituted for Geography 886.**
2. **The course used to satisfy this requirement must be approved by the student's guidance committee.**
3. **Both the tool area and the related courses must be approved by the student's guidance committee and the chairperson of the Department of Geography.** Additional courses may be used to satisfy this requirement as listed below:
   - GEO 423 Map Production and Design | 4 |
   - GEO 424 Advanced Remote Sensing | 4 |
   - GEO 425 Geographic Information Systems | 4 |
   - One calculus or matrix algebra course.
4. **Both the specialization area and the related courses must be approved by the student's guidance committee and the chairperson of the Department of Geography.**

Requirements for the Master of Science Degree in Geography

The Master of Science degree program in geography is available only under Plan A (with thesis). The student must complete at least 30 credits including:

1. All of the requirements referenced under the heading Requirements for the Master of Arts Degree in Geography above.
2. A minimum of three graduate courses of at least 3 credits each in another department that offers a Master of Science degree program.

Requirements for the Master of Arts Degree in Geography

The Department of Geography offers an interdepartmental Master of Arts degree program in geography–urban studies. A minimum of 36 credits is required for the degree, and only Plan A (with thesis) is available.

Admission

To be admitted to the major in geography–urban studies, students must meet the requirements for admission to the Master of Arts and Master of Science degree programs with majors in geography. They must also meet the requirements for ad-
mission as specified in the statement on Interdepartmental Graduate Programs in Urban Studies in the Graduate Education section of this catalog.

Requirements for the Master of Arts Degree in Geography—Urban Studies

Students who are admitted to the major in geography—urban studies must meet the requirements for the major in geography leading to the Master of Arts degree. Such students are required to complete a minimum of 14 credits in courses in the tool areas and the specialization in an area of geography combined. To satisfy the tool area requirement, students must complete one advanced-level course of at least 3 credits in each of two tool areas.

Students who are admitted to the major in geography—urban studies must also meet the requirements for the urban studies component of the program as specified in the statement on Interdepartmental Graduate Programs in Urban Studies.

The completion of the 800–900 level course in research methods, which is required for the geography component of the program, also satisfies the quantitative social research methods requirement of the urban studies component.

The completion of 3 of the 9 credits in the urban studies core courses that are required for the urban studies component of the program also satisfies 3 of the credits that are required for the specialization in the geography component.

**URBAN AND REGIONAL PLANNING**

**Master in Urban and Regional Planning**

The graduate program leading to a degree of Master in Urban and Regional Planning at Michigan State University is structured to provide students with learning opportunities that enable them to develop mechanical skills and intellectual qualities necessary to address the broad and varied range of problems associated with urban development. It is intended that, upon completion of their studies, they should be able to enter the profession as competent practitioners.

A student entering the graduate program in urban and regional planning is expected to concentrate, under faculty guidance, on studies that provide an optimum learning experience in applying the various principles, theories, techniques, and design skills of planning to specific field problems. Unlike the undergraduate, whose studies are divided between liberal education and technical studies, the graduate student is immersed exclusively in significant planning studies. The graduate program is designed to provide professional competence. The master's program in Urban and Regional Planning has been accredited by the American Planning Association.

After graduation, the student should be capable of assuming responsibilities on an intermediate level of a professional planning operation.

In addition to meeting the requirements of the University and of the College of Social Science, students must meet the requirements specified below.

**Admission**

To be admitted to the master's degree program, the applicant must have a bachelor's degree from a recognized university with an acceptable academic record. The field of undergraduate study is not critical for acceptance, but course requirements for collateral studies will vary according to individual undergraduate backgrounds. Each student's program is composed to fit particular needs in accordance with undergraduate training and any planning experience the applicant may have had.

**Requirements for the Master in Urban and Regional Planning Degree with a Major in Urban and Regional Planning**

The program is available under both Plan A (with thesis) and Plan B (without thesis). The student must complete at least 48 credits, at least 32 of which must be in courses numbered in the 800 and 900 series, and meet the requirements specified below:

**Requirements for Both Plan A and Plan B:**

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>UP 463 Introduction to Quantitative Methods for Geographers and Planners</td>
<td>3</td>
</tr>
<tr>
<td>UP 501 Geosynthesis and Issues in Planning and Development</td>
<td>4</td>
</tr>
<tr>
<td>UP 814 Applied Research Methods for Planning and Development</td>
<td>3</td>
</tr>
<tr>
<td>UP 823 Urban Land Management</td>
<td>4</td>
</tr>
<tr>
<td>UP 834 Urban Design and Project Development</td>
<td>3</td>
</tr>
<tr>
<td>UP 844 Decision Theory for Urban Planning and Development</td>
<td>4</td>
</tr>
<tr>
<td>UP 865 Planning and Development Law</td>
<td>3</td>
</tr>
<tr>
<td>UP 884 Planning Practice</td>
<td>2</td>
</tr>
<tr>
<td>UP 897 Research Writing Seminar</td>
<td>2</td>
</tr>
</tbody>
</table>

**Concentration related to urban and regional planning (42 credits):**

One urban planning course and three other courses in one of the following related fields: economic development, land use and environment, or urban policy and analysis. All four of the courses must be approved by the student's academic advisor.

**Additional Requirements for Plan A:**

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>UP 889 Master's Thesis Research</td>
<td>6</td>
</tr>
</tbody>
</table>

**Additional Requirements for Plan B:**

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>UP 889 Master's Research</td>
<td>6</td>
</tr>
</tbody>
</table>

**Three additional credits in one or more areas approved by the student's academic advisor.**

**Academic Standards**

Academic standards for graduation require that each student maintain an average of 3.00, or better, in all course work, including study undertaken in collateral courses; however, the accumulation of grades below 3.0 in more than two courses of 3 or more credits each removes the student from the degree program.

**Transfer Credits**

A maximum of 10 transfer credits at the 800 level may be accepted toward the Master in Urban and Regional Planning degree.

**Time Limit**

The time limit for completing the degree is six years from the first semester of enrollment in the program.

**URBAN AND REGIONAL PLANNING—URBAN STUDIES**

An interdepartmental Master in Urban and Regional Planning degree program in urban and regional planning—urban studies is available. A minimum of 48 credits is required for the degree, and both Plan A (with thesis) and Plan B (without thesis) are available.

**Admission**

To be admitted to the major in urban and regional planning—urban studies, students must meet the requirements for admission to the Master in Urban and Regional Planning degree program with a major in urban and regional planning.
They must also meet the requirements for admission as specified in the statement on Interdepartmental Graduate Programs in Urban Studies in the Graduate Education section of this catalog.

Requirements for the Master in Urban and Regional Planning Degree in Urban and Regional Planning—Urban Studies

Students who are admitted to the major in urban and regional planning—urban studies must meet the requirements for the major in urban and regional planning leading to the Master in Urban and Regional Planning degree. They must also meet the requirements for the urban studies component of the program as specified in the statement on Interdepartmental Graduate Programs in Urban Studies.

At least two members of the student’s guidance committee, including the chairperson, must be faculty members in the Department of Geography in the area of urban and regional planning.

The completion of Urban Planning 814, which is required for the urban and regional planning component of the program, also satisfies the quantitative social research methods requirement of the urban studies component of the program.

The completion of the 9 credits in urban studies core courses that are required for the urban studies component of the program also satisfies 9 of the 12 credits of the concentration that is required for the urban and regional planning component.

For students on Plan B, the completion of the 6 additional credits required for the Plan B option of the urban and regional planning component of the program also satisfies the requirement for the urban studies component referenced in item (3) under MASTERS DEGREE, Requirements for the Degree.

SCHOOL of LABOR and INDUSTRIAL RELATIONS

Theodore Curry, Director

In recognition of Michigan’s position as one of the foremost industrial states in the nation, Michigan State University has established a School of Labor and Industrial Relations in the College of Social Science. The school’s objective is to serve the needs of students, faculty, labor, management, and the public by offering graduate instruction, conducting research, and making available extension courses, conferences, workshops, and special institutes.

Research and Program Services

RESEARCH PROGRAM. The school’s Research Program is as broad as the field of labor and industrial relations. Specific projects are determined largely by the interests of the research faculty and include such subject–matter areas as economic and social implications of technological change, collective bargaining, union structure and government, human resource decisions, organizational behavior and development, labor economics, industrial and occupational sociology, labor history, and labor legislation. Faculty members are assisted in their research by graduate research assistants.

LABOR EDUCATION PROGRAM. The school’s Labor Education Program offers non–credit courses, institutes, and conferences for workers based upon their needs and interests. The objective of these programs is to provide a greater understanding of the nature and problems of labor relations and citizenship so that workers may play a more intelligent and effective role in their organizations and in their communities. Programs are planned in cooperation with individual groups, as well as with an advisory committee consisting of representatives of the labor movement in Michigan with responsibilities for educational activities.

HUMAN RESOURCES EDUCATION AND TRAINING CENTER (HRETC). The HRETC conducts non–credit courses, conferences, and workshops to meet the needs of management and government in the human resource field. Subject areas include organizational development; human resource administration; wage and salary administration; contract negotiations; recruitment, selection, and placement; and affirmative action. This service works closely with management groups in planning its programs, as well as with an advisory committee made up of prominent representatives of industry and government in Michigan.

GRADUATE STUDY

LABOR RELATIONS and HUMAN RESOURCES

The school offers a professional program of study with two options leading to a Master of Labor Relations and Human Resources (MLRHR) degree. The first option, Industrial Relations and Human Resources, is for students interested in labor–management relations and human resources decisions who plan to pursue careers in business, government, or unions. In industry there are opportunities for men and women in industrial relations or personnel departments. Government agencies at the federal and state levels employ trained specialists to administer laws and programs dealing with labor–management relations, social security, worker’s compensation, and other aspects of labor and industrial relations and human resources decisions. Labor unions seek trained people for staff positions in their education and research departments and in other activities. Community colleges and universities employ MLRHR graduates to teach in labor and management extension programs.

The second option, Employment and Training Programs, is for students seeking careers as specialists dealing with employment and training problems in the work place. The employers for these students will be government agencies at the federal, state, and local levels, and private employers and unions seeking to employ persons with knowledge of the relevant economic and social institutions, who are also well trained in the theoretical framework and research techniques necessary to understand and solve employment and training problems.

Students who meet the undergraduate prerequisites may be able to complete the MLRHR degree in three semesters of full–time study. In order to make it possible for students who are employed during the day to enroll for graduate studies, the school normally offers all courses required for the MLRHR degree and most of its elective courses in the evening, at least once every four years.

In addition to meeting the requirements of the University and of the College of Social Science, students must meet the requirements specified below.

Admission

To be considered for admission to the degree program, a student must have a bachelor’s degree and a grade–point average
of 3.00 or better in the junior and senior years. All applicants must have satisfactory scores on the Graduate Record Examination (GRE) General Test or on the Graduate Management Admission Test (GMAT). Applicants should have completed courses in macroeconomic and microeconomic principles, one semester of statistics, and one introductory course in behavioral science, with grades of 2.0 or better. In addition, applicants will be judged on the quality of their statement of objectives and three letters of reference from faculty members. Admission requirements may be higher when few program vacancies exist. Students with less than the specified prerequisites may be considered for admission to provisional status.

Requirements for the Master of Labor Relations and Human Resources Degree in Labor Relations and Human Resources

The program is available under both Plan A (with thesis) and Plan B (without thesis). The student must complete 36 credits with a grade–point average of at least 3.00 in one of the following two options. Both options are of an interdisciplinary nature, drawing subject matter from all of the social sciences.

**Industrial Relations and Human Resources Option**

**Additional credits in courses approved by the student's academic adviser or guidance committee.**

Depending on the student's interests and career plans, courses in such areas as labor and industrial relations, economics, management, political science, psychology, social work, and sociology may be designated to satisfy this requirement.

1. The topic must be chosen from training or a related area and must be approved by the student's academic adviser or guidance committee.

**LABOR RELATIONS and HUMAN RESOURCES—LAW**

Labor Relations and Human Resources students who are admitted to the dual MLHRJD program with the Michigan State University - Detroit College of Law may transfer a maximum of 9 credits from the MSU/DCL program to the MLHR program. These credits may be used only to satisfy elective credits. Only Plan B (without thesis) is available for election under the dual degree program.

**LABOR RELATIONS and HUMAN RESOURCES—URBAN STUDIES**

The School of Labor and Industrial Relations offers an interdepartmental Master of Labor Relations and Human Resources degree program in labor relations and human resources—urban studies. A minimum of 39 credits is required for the degree under either Plan A (with thesis), and a minimum of 42 credits is required for the degree under Plan B (without thesis).

**Admission**

To be admitted to the major in labor relations and human resources—urban studies, students must meet the requirements for admission to the Master of Labor Relations and Human Resources degree program with a major in labor relations and human resources. They must also meet the requirements for admission as specified in the statement on Interdepartmental Graduate Programs in Urban Studies in the Graduate Education section of this catalog.

**Requirements for the Master of Labor Relations and Human Resources Degree in Labor Relations and Human Resources—Urban Studies**

Students who are admitted to the major in labor relations and human resources—urban studies must meet the requirements for the major in labor relations and human resources leading to the Master of Labor Relations and Human Resources degree. Students who elect Plan A must complete 6 credits of Labor and Industrial Relations 899.

Students who are admitted to the major in labor relations and human resources—urban studies must also meet the requirements for the urban studies component of the program as specified in the statement on Interdepartmental Graduate Programs in Urban Studies.

The completion of Labor and Industrial Relations 832, which is required for the labor relations and human resources component of the program, also satisfies the quantitative social research methods requirement of the urban studies component.

The completion of the 9 credits in the urban studies core courses which are required for the urban studies component of the program also partially satisfies the requirement of additional credits in courses approved by the student's academic adviser or guidance committee for the labor relations and human resources component.

For students on Plan A, the completion of 3 of the 6 credits of Labor and Industrial Relations 899 which are required for the urban studies component of the program also satisfies one of the nine Labor and Industrial Relations courses that are required for the labor relations and human resources component.

At least two faculty members from the School of Labor and Industrial Relations shall serve on the student's guidance committee. At least half of the members of the committee shall be faculty members from the school.

With the concurrence of the other members of the student's guidance committee, a member who is from the urban studies faculty shall have the responsibility of placing a student in an internship, if the student is required to complete an internship for the urban studies component of the program under Plan B. The School of Labor and Industrial Relations offers no course through which the internship requirement can be met. Therefore, the student must meet this requirement by enrolling in a course offered by another academic unit with the prior approval of the guidance committee.

**Doctor of Philosophy**

In cooperation with the School of Labor and Industrial Relations, the College of Social Science offers an interdisciplinary
SOCIAL SCIENCE
School of Labor and Industrial Relations

Doctor of Philosophy degree program in social science within which a concentration in industrial relations and human resources is available. For information concerning interdisciplinary doctoral studies, students should communicate with the Associate Director for the Academic Program of the School of Labor and Industrial Relations or with the Associate Dean, College of Social Science.

DEPARTMENT of
POLITICAL SCIENCE

Jerry Weinberger, Chairperson

UNDERGRADUATE PROGRAMS

The undergraduate majors in political science are designed to provide students not only with a broad education in political and other social sciences but also with the analytical skills essential in many professions. The wide range of career opportunities open to political science graduates includes administrative positions in local, state, and federal government, or in public and private agencies; work with citizen's action groups and voluntary organizations; employment in the foreign service and various governmental and private international agencies; and careers as teachers and policy analysts. Because additional training beyond the bachelor's degree is necessary for some careers, many students in political science plan to attend law or graduate school.

Students in the Department of Political Science may select from three majors:
1. Political Science (General)
2. Political Science—Prelaw
3. Public Administration

POLITICAL SCIENCE (GENERAL)

Requirements for the Bachelor of Arts Degree in Political Science (General)

1. The University requirements for bachelor's degrees as described in the Undergraduate Education section of this catalog: 120 credits, including general elective credits, are required for the Bachelor of Arts degree in Political Science (General).

2. The University's Tier II writing requirement for the Political Science (General) major's met by completing one of the following courses: Political Science 420, 421, 432, 440, 460, 461, 470. These courses are referenced in item 3. a. (3) below.

3. The following requirements for the major:

   a. The following courses in the Department of Political Science: 30
      (1) Two of the following courses (6 credits):

         - POLS 100 Introduction to American National Government:
         - POLS 140 Introduction to Comparative Politics:
         - POLS 150 Introduction to International Relations:
         - POLS 170 Introduction to Political Philosophy:

         (2) Both of the following courses (8 credits):

            - POLS 200 Introduction to Political Science:
            - POLS 201 Introduction to Methodology of Political Analysis:

         (3) One of the Political Science courses referenced in item 1. above and at least four additional Political Science courses at the 300-400 level to total at least 16 credits. Only one of the following courses may be counted toward this requirement:

            - POLS 494 Field Experience in Political Science:
            - POLS 495 Independent Study:

   b. The following courses outside the Department of Political Science:

        12 or 14
        (1) Both of the following courses (6 credits):

            - EC 201 Introduction to Macroeconomics:
            - EC 202 Introduction to Microeconomics:

        (2) One of the following courses (3 or 5 credits):

            - MT H 103 College Algebra:
            - MT H 130 College Algebra and Finite Mathematics:
            - MT H 136 College Algebra and Trigonometry:
            - MT H 134 Survey of Calculus with Applications I:
            - MT H 132 Calculus I:

   c. One History or Philosophy course at the 300-400 level (3 credits).

   A student who satisfies requirement 3.b.2 by completing Mathematics 105 may satisfy the University's mathematics requirement by completing one of the following courses in addition to Mathematics 105: Mathematics 107, 108, 109, 110, 112, 114 or 201. NOTE: A course that is used to satisfy the University's mathematics requirement may not be counted toward the College of Social Science: NATURAL SCIENCE; ARTS AND LETTERS. REQUIREMENT (referenced in section 1.B under the heading Graduation Requirements for the Bachelor of Arts and Bachelor of Science Degrees in the College statement).

POLITICAL SCIENCE—Prelaw

The prelaw major is designed to introduce students to the study of law and the judicial process and at the same time to provide an orientation to the law which is more general than that of most law schools. Students who elect this program may plan careers in (1) government and large businesses, (2) law firms, (3) individual or partnership practice of civil law, (4) trial practice, including criminal law, and (5) teaching. Since very few law schools provide information about the political, economic, societal and psychological environment in which the law exists, this background must generally be acquired prior to or after law school. The prelaw major is intended to give students the analytical skills and substantive background in those courses which will most likely contribute to their development.

Requirements for the Bachelor of Arts Degree in Political Science—Prelaw

1. The University requirements for bachelor's degrees as described in the Undergraduate Education section of this catalog: 120 credits, including general elective credits, are required for the Bachelor of Arts degree in Political Science—Prelaw.

   The University's Tier II writing requirement for the Political Science—Prelaw major's met by completing one of the following courses: Political Science 420, 421, 432. These courses are referenced in item 3. a. (3) below.

   For students who are admitted to Michigan State University as new freshmen and transfer students in the Fall of 1993 and thereafter:

   a. The completion of Mathematics 110 or 116 or 120 or 124 or 132 referenced in item 3.b.2) below may also be used to satisfy the University mathematics requirement. However, a course that is used to satisfy the University mathematics requirement may not be counted toward the College of Social Science: NATURAL SCIENCE; ARTS AND LETTERS. REQUIREMENT (referenced in section I.A under the heading Graduation Requirements for the Bachelor of Arts and Bachelor of Science Degrees in the College statement).

   The completion of the History or Philosophy course referenced in item 3.b.3) below partially satisfies the College of Social Science: NATURAL SCIENCE; ARTS AND LETTERS. REQUIREMENT (referenced in section I.A under the heading Graduation Requirements for the Bachelor of Arts and Bachelor of Science Degrees in the College statement).

   b. The requirements of the College of Social Science for the Bachelor of Arts degree.

   The completion of the History or Philosophy course referenced in item 3.b.3) below partially satisfies the College of Social Science: NATURAL SCIENCE; ARTS AND LETTERS. REQUIREMENT (referenced in section I.A under the heading Graduation Requirements for the Bachelor of Arts and Bachelor of Science Degrees in the College statement).
the following courses in the Department of Political Science: 30

1. All of the following courses (6 credits): PLS 100 Introduction to American National Government: 3
   PLS 170 Introduction to Political Philosophy: 3
   PLS 201 Introduction to Political Science: 4
   PLS 202 Introduction to Methods of Political Analysis: 4
   PLS 320 The American Judicial Process: 3
   PLS 321 American Constitutional Law: 3

2. One of the Political Science courses referenced in item (a) above and an additional Political Science course at the 300–400 level, 15 to 18 credits (only one of the following courses may be counted toward this requirement: PLS 494 Field Experience in Political Science or PLS 495 Independent Study)

3. The following courses outside the Department of Political Science: 18 to 21

1. Both of the following courses (6 credits): EC 201 Introduction to Microeconomics: 3
   EC 202 Introduction to Macroeconomics: 3

2. One of the following courses (4 or 5 credits): MTH 103 College Algebra: 3
   MTH 110 College Algebra and Finite Mathematics I: 5
   MTH 120 College Algebra and Trigonometry: 5
   MTH 124 Survey of Calculus with Applications I: 3
   MTH 132 Calculus I: 3

3. Two of the following courses (6 credits): HST 218 United States Constitutional History: 3
   HST 330 Constitutional and Legal History of Medieval England: 3
   HST 331 Constitutional and Legal History of England since 1400: 3
   PHIL 330 Formal Reasoning I: 4
   PHIL 340 Ethics: 3
   PHIL 354 Philosophy of Law: 3

A student who satisfies the requirement of item (a) above may also be used to satisfy the University mathematics requirement. However, a course that is used to satisfy the University mathematics requirement may not be counted toward the College of Social Science NATURAL SCIENCE, AND ARTS AND LETTERS, REQUIREMENT (referenced in section I.B, under the heading Graduation Requirements for the Bachelor of Arts Degree in the College statement).
social science; American politics, comparative politics, international politics, public policy and public administration, political thought, formal theory, and research methodology.

In addition to meeting the requirements of the University and of the College of Social Science, students must meet the requirements specified below.

Admission

A bachelor's degree from an accredited educational institution is required for admission. Applicants should have the equivalent of an undergraduate major in political science, in a related social science, or in mathematics, statistics, or computer science. Some background in social science research methods, statistics, and/or basic mathematical operations is recommended. Normally, a minimum grade-point average of 3.20 in the last two years of undergraduate work is required for admission.

Applicants must take the Graduate Record Examination (GRE) General Test. Official results from this examination should be sent to the Department of Political Science.

Admission to the doctoral program is limited to fall semester only. For the Master of Public Administration program, most students are admitted for fall semester; applications for the spring semester will be considered on the basis of available openings. Applications for admission and financial aid should be submitted by March 1. Applications for admission alone will be accepted until approximately May 15.

Academic Standards

Graduate students must maintain a cumulative grade-point average of at least 3.00. Only those courses completed with a grade of 2.5 or higher may be counted toward the requirements for the master's or doctoral degree. A student who received two grades of 2.5 or below, or one grade of 2.0 or below, may be withdrawn from the program. A student who received three grades of 2.5 or below, or two grades of 2.0 or below, will be withdrawn from the program.

PUBLIC ADMINISTRATION

Master of Public Administration (MPA)

The master's program offers an interdisciplinary educational experience related to public policy and public administration. The program is designed to provide men and women with theoretical knowledge and specific skills essential for professional achievement in the public and non-profit sectors. The objective of this program is to develop an analytical approach to the decision-making process through a systematic study of policy and administration. The program offers students the opportunity to meet their individual interests and needs by specializing in a wide variety of issue areas.

In addition to meeting the requirements of the University, of the College of Social Science, and of the Department of Political Science, students must meet the requirements specified below.

Requirements for the Master of Public Administration Degree in Public Administration

The program is available only under Plan B (without thesis). The student must complete 39 credits in courses approved by the director of the MPA program and distributed as follows:

<table>
<thead>
<tr>
<th>Requirements</th>
<th>CREDITS</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Eight core courses designed to provide a strong foundation of theoretical knowledge and understanding of political science, public administration, and policy analysis</td>
<td>24</td>
</tr>
<tr>
<td>2. Four courses of at least 3 credits each in a field of specialization within public administration and public policy</td>
<td>12</td>
</tr>
<tr>
<td>3. Policy analysis practicum</td>
<td>3</td>
</tr>
</tbody>
</table>

In addition to the requirements listed above, students who in the judgment of the Director of the MPA degree program have not had sufficient public or non-profit sector work experience will be required to complete a field experience practicum of 3 credit.

Transfer Credits

For MPA students who have been admitted to the dual JD-MPA program with Michigan State University - Detroit College of Law, a maximum of 12 credits from Michigan State University - Detroit College of Law may be transferred to the MPA program. Such courses may not be used to satisfy requirement 1 or 3 under the heading Requirements for the Master of Public Administration Degree in Public Administration.

PUBLIC ADMINISTRATION—URBAN STUDIES

Master of Public Administration (MPA)

The Department of Political Science offers an interdepartmental Master of Public Administration degree program in public administration—urban studies. A minimum of 39 credits is required for the degree, and only Plan B (without thesis) is available.

Admission

To be admitted to the major in public administration—urban studies, students must meet the requirements for admission to the Master of Public Administration degree program with a major in public administration. They must also meet the requirements for admission as specified in the statement on Interdepartmental Graduate Programs in Urban Studies in the Graduate Education section of this catalog.

Students in the public administration-urban studies program are not eligible for the dual JD-MPA program with Michigan State University - Detroit College of Law.

Requirements for the Master of Public Administration Degree in Public Administration—Urban Studies

Students who are admitted to the major in public administration—urban studies must meet the requirements for the major in public administration leading to the Master of Public Administration degree. They must also meet the requirements for the urban studies component of the program as specified in the statement on Interdepartmental Graduate Programs in Urban Studies.

POLITICAL SCIENCE

Master of Arts

The Master of Arts program is designed to prepare students for doctoral studies. Those accepted are judged by the committee on admissions as qualified to enter the doctoral program, and it is anticipated they plan to complete this program at Michigan State University.

In addition to meeting the requirements of the University, of the College of Social Science, and of the Department of Po-
political Science, students must meet the requirements specified below.

Requirements for the Master of Arts Degree in Political Science

The program is available only under Plan B (without thesis). The student must meet the requirements specified below:

1. Complete at least 30 credits distributed as follows:
   a. At least 24 credits in Political Science courses at the 800–200 level including Political Science 800, 801, and 802 24
   b. No fewer than 6 credits in courses at the 400–600 level in related disciplines 6

2. Submit two substantial research papers acceptable to the department. These papers normally will be written under the supervision of political science and will be evaluated by the instructor(s) of the courses.

   1 With the written approval of the department, a student may complete fewer than 24 credits in Political Science courses and more than 6 credits in courses in related disciplines.

Academic Standards

The student must maintain an overall grade–point average of 3.00 or higher.

Transfer Credits

For students who have been admitted to the dual JD-MA program with Michigan State University - Detroit College of Law, a maximum of 12 credits from Michigan State University - Detroit College of Law may be transferred to the MA program with a major in political science.

Doctor of Philosophy

The doctoral degree is generally undertaken by students wishing to teach political science and government at the college level and by those seeking professional careers in political and social research. Special attention is given at the doctoral level to intensive training in political research.

In addition to meeting the requirements of the University, of the College of Social Science, and of the Department of Political Science, students must meet the requirements specified below.

Requirements for the Doctor of Philosophy Degree in Political Science

The doctoral student must:

1. Earn at least 39 credits in political science courses including:
   a. All of the following courses: Political Science 800, 801, and 802.
   b. Courses in each of three of the following political science fields: American politics, comparative politics, international politics, public policy and public administration, political thought, formal theory, and research methodology.
      A minimum of 9 credits in Political Science courses is required in each of two major fields and a minimum of 6 credits is required in a minor field with one exception: A minimum of 9 credits in courses within or outside the Department of Political Science is required for the research methodology major field, in addition to the credits earned in Political Science 800, 801, and 802.

2. Pass a comprehensive examination in each of the two major fields referenced in item 1. b. above. To be eligible to take the comprehensive examination in a field, the student must have completed the courses required in that field. Normally, the student completes the comprehensive examinations by the end of the third year of full–time enrollment in the doctoral program.

3. Present the results of the dissertation research at a departmental colloquium.

Academic Standards

After the first year of graduate study at MSU, the department evaluates the student’s academic record. To be eligible to continue in the Ph.D. program in political science, the student must have:

1. an overall grade–point average of 3.00 or higher.
2. a grade of 2.5 or higher in each Political Science course.
3. no more than two grades of 2.5 or below in Political Science courses.
4. a record of performance in courses that, in the judgment of the faculty, indicates that the student should be capable of completing the Ph.D. degree in Political Science at MSU.

Transfer Credits

For students who have been admitted to the dual JD-Ph.D. program with Michigan State University - Detroit College of Law, a maximum of 12 credits from Michigan State University - Detroit College of Law may be transferred to the Ph.D. program with a major in political science. Such courses may be used to satisfy requirement 1. under the heading Requirements for the Doctor of Philosophy Degree in Political Science.

POLITICAL SCIENCE–URBAN STUDIES

The Department of Political Science offers an interdepartmental Doctor of Philosophy degree program in political science–urban studies. Students in the political science-urban studies program are not eligible for the dual JD-Ph.D. program with Michigan State University - Detroit College of Law.

Admission

To be admitted to the major in political science–urban studies, students must meet the requirements for admission to the Doctor of Philosophy degree program with a major in political science. They must also meet the requirements for admission as specified in the statement on Interdepartmental Graduate Programs in Urban Studies in the Graduate Education section of this catalog.

Requirements for the Doctor of Philosophy Degree in Political Science–Urban Studies

Students who are admitted to the major in political science–urban studies must meet the requirements for the major in political science leading to the Doctor of Philosophy degree. They must also meet the requirements for the urban studies component of the program as specified in the statement on Interdepartmental Graduate Programs in Urban Studies. Students must select one of the following three policy areas to meet Requirement 2 of the urban studies component of the program: Urban Social Services Policy, Urban Economic Development Policy, or Urban Policy in Developing Societies.
INTERDEPARTMENTAL GRADUATE SPECIALIZATION IN NONPROFIT SECTOR POLICY AND ADMINISTRATION

The interdepartmental graduate specialization in nonprofit sector policy and administration, which is administered by the Department of Political Science, is available as an elective to students who are enrolled in master’s and doctoral degree programs at Michigan State University.

The specialization is designed for persons who plan to be employed in service organizations in the nonprofit sector. The educational objectives of the specialization are to:

1. Provide an opportunity for students to obtain a comprehensive and contemporary academic experience in the field of nonprofit sector policy and administration.
2. Help students to understand the historical and policy contexts, management dimensions, and issues, problems, challenges, and needs associated with the nonprofit sector.
3. Help students to function effectively as employees of the nonprofit sector and to be sensitive to their professional obligations and responsibilities.

A student who is interested in completing the requirements for the specialization must submit to the Chairperson of the Department of Political Science his or her academic credentials, a rationale for pursuing the specialization, and a plan for selecting the courses that will be used to satisfy the requirements for the specialization, in addition to the required core courses.

With the approval of the department or school and college that administer the student’s degree program, the courses that are used to satisfy the requirements for the specialization may also be used to satisfy the requirements for the degree.

A given student may receive certification of completion of the interdepartmental graduate specialization in nonprofit sector policy and administration either as a master’s student or as a doctoral student, but not as both a master’s student and a doctoral student.

Requirements for the Interdepartmental Graduate Specialization in Nonprofit Sector Policy and Administration

The student’s program of study must be approved by the Chairperson of the Department of Political Science and must include:

1. Both of the following Required Core Courses: 6 credits
   - P18 817: Executive Nonprofit Sector Policy and Administration
   - RD 974: Management of Nonprofit Organizations
   - At least 6 additional credits in the following three areas of nonprofit sector policy and administration: policy, management, or international. The additional credits must be approved courses. A list of approved courses is available from the Department of Political Science.

Upon completion of the requirements for the interdepartmental graduate specialization in nonprofit sector policy and administration, the student should contact the Chairperson of the Department of Political Science and request certification for the completion of the specialization. After the certification is approved by the Chairperson of the Department and the Dean of the College of Social Science, the Office of the Registrar will enter on the student’s academic record the name of the specialization and the date that it was completed. This certification will appear on the student’s transcript.

DEPARTMENT of PSYCHOLOGY

Gordon Wood, Chairperson

Psychology is a science and a profession concerned with behavior. As a science, psychology is concerned with theories, principles, facts and methods as they relate to understanding, predicting and influencing behavior of both humans and animals: how they perceive; how they learn and forget; how they think, fear, hate, and love; and how they develop their individualities or personalities. Psychology is both a biological and social science; it relates behavior to physiological and environmental conditions including social factors.

As a profession, psychology involves the use of the theories, principles, facts and methods of its science to assist individuals and groups in arriving at better solutions to psychological problems on which they seek consultation.

Courses in psychology provide cultural background, supplement the training of students in many other fields concerned with people, and sometimes become the area of major study for those who plan occupations emphasizing human relations. The student who plans a career in psychology, as such, will find graduate education a necessity. The undergraduate program emphasizes the scientific method and theories of behavior. The student is advised to obtain preparation in supporting subjects such as mathematics, philosophy of science, other biological and social sciences, foreign language, and literature. Graduate program descriptions are available from the department.

UNDERGRADUATE PROGRAM

Requirements for the Bachelor of Arts or Bachelor of Science Degree in Psychology

1. The University requirements for bachelor’s degrees as described in the Undergraduate Education section of this catalog: 120 credits, including general elective credits, are required for the Bachelor of Arts or Bachelor of Science degree in Psychology.

The University’s Tier II writing requirement for the Psychology major is met by completing one of the following courses: Psychology 401, 402, 405, 409, 411, 414, 424, 440, 441, 442, 455, 475, or 476. These courses are referenced in item 3, g. below.

2. The requirements of the College of Social Science for the Bachelor of Arts degree or the Bachelor of Science degree.

CREDITS

3. The following required major courses: 31 credits
   a. Both of the following courses:
      - PSY 101 Introduction to Psychology
      - PSY 295 Data Analysis in Psychological Research
   b. One of the following courses:
      - PSY 200 Cognitive Psychology
      - PSY 209 Human Behavior
   c. One of the following courses:
      - PSY 235 Social Psychology
      - PSY 236 Personality
      - PSY 244 Developmental Psychology: Infancy Through Childhood
   d. One of the following courses:
      - PSY 255 Industrial and Organizational Psychology
      - PSY 270 Community Psychology
      - PSY 280 Abnormal Psychology
   e. One of the following courses:
      - PSY 302 Learning in Cognitive Psychology
      - PSY 303 Research Methods in Community Psychology
      - PSY 304 Psychological Measurement
      - PSY 307 Thinking Critically about Psychological Research
   f. One of the following courses:
      - PSY 308 Behavioral Neuroscience
      - PSY 312 Principles and Applications of Learning
      - PSY 320 Health Psychology
      - PSY 344 Developmental Psychology: Adolescence
Honors Opportunities

Several courses are especially suitable for students pursuing honors programs in psychology. Periodically an honors section of a regularly scheduled course may be offered. Qualified students may also seek to take any course in the department with an H-option by making advance arrangement with the instructor.

TEACHER CERTIFICATION OPTIONS

A psychology disciplinary minor is available for teacher certification.

Students who elect the psychology disciplinary minor must contact the Department of Psychology.

For additional information, refer to the statement on TEACHER CERTIFICATION in the Department of Teacher Education section of this catalog.

GRADUATE STUDY

The primary objective of graduate education in the Department of Psychology is to develop doctoral psychologists who are creative scholars. At the same time, students must develop the basic skills of their particular specialty and be well prepared for job entry duties and responsibilities through carefully supervised experience in research, teaching, and consulting. Relevant learning experiences are arranged in agencies such as industries, clinics, hospitals, schools, and government offices as needed by the individual student.

Every major program of study is designed to develop a purely scientific psychologist, or a scientific and professional psychologist in areas such as: brain–behavior relations, cognition, industrial and organizational psychology, developmental psychology, personality and social psychology, and ecological psychology, and in clinical psychology with specializations in problems of children and families, and of adults.

The doctoral program in clinical psychology has been accredited by the American Psychological Association. The pediatric psychology predoctoral internship program has also been accredited by the American Psychological Association.

The Department of Psychology is affiliated with the Doctor of Philosophy degree program with a major in ecology, evolutionary biology and behavior. For information about a Doctor of Philosophy degree program that involves ecology, evolutionary biology and behavior and a major in the Department of Psychology, refer to the statement on the doctoral program in ecology, evolutionary biology and behavior in the College of Natural Science section of this catalog.

Students who are enrolled in master’s or doctoral degree programs in the Department of Psychology may elect an interdepartmental specialization in cognitive science. For additional information, refer to the statement on Interdepartmental Graduate Specializations in Cognitive Science. For additional information, contact the Department of Psychology.

Students who are enrolled in Master of Arts degree programs in the Department of Psychology may elect a specialization in ecology, evolutionary biology and behavior. For additional information, refer to the statement on the specialization in the College of Natural Science section of this catalog.

Students who are enrolled in Master of Arts and Doctor of Philosophy degree programs in the Department of Psychology may elect specializations in infant studies. For additional information, refer to the statement on Interdepartmental Graduate Specializations in Infant Studies.

PSYCHOLOGY

Master of Arts and Doctor of Philosophy

Students are accepted for graduate study in psychology only if judged by a departmental committee to be qualified to complete a doctoral degree, and programs of study are planned with this goal in mind; the master’s sequence is generally developed as an integral part of the doctoral program with special attention given to the plans and needs of each student. Additional details are given under the doctoral program as outlined below. There is no terminal master’s program.

In addition to meeting the requirements of the University and of the College of Social Science, students must meet the requirements specified below.

Admission

Factors given major consideration for admission to the graduate program at the first–year level include (1) an approved bachelor's degree from a recognized college or university, (2) a junior–senior undergraduate grade–point average of 3.20 or better in academic studies, (3) undergraduate courses in experimental psychology and statistics, (4) satisfactory scores on the Graduate Record Examination General Test and Subject Test in Psychology, and (5) approval by a departmental committee. The same factors are considered for entrance at an advanced level, plus a record of scholarly achievements in the graduate study of psychology. That an applicant has achieved the above is not sufficient for admission. The number of applicants with superior qualifications exceeds the number of students that can be accommodating.

The department is especially interested in quality students and generally accepts them regardless of their undergraduate majors provided that they have adequate background for graduate study in psychology. Students meeting only the requirements for admission to provisional status are not generally accepted.

Students planning to apply for admission to graduate work in psychology should correspond with the department by October in order to meet the January 5 application deadline. This will allow time for tests and other formalities which must be completed before admission. Completed applications must be received by January 5 for consideration for the subsequent fall semester. Only rarely are new students admitted for semesters other than fall semester.

Requirements for the Master of Arts and Doctor of Philosophy Degrees in Psychology

To meet individual needs, every student has a guidance committee with the student’s adviser as chairperson. The committee develops a program of studies in consultation with the
student. In the doctoral program, a comprehensive examination is required.

There is no general language requirement. Where acquaintance with a foreign language is necessary for advancing the special interest of a particular student, the guidance committee may impose foreign language requirements.

**PSYCHOLOGY–URBAN STUDIES**

**Master of Arts and Doctor of Philosophy**

The Department of Psychology offers interdepartmental Master of Arts and Doctor of Philosophy degree programs in psychology–urban studies.

To be admitted to a major in psychology–urban studies, students must meet the requirements for admission to the Master of Arts or Doctor of Philosophy degree program with a major in psychology. They must also meet the requirements for admission as specified in the statement on Interdepartmental Graduate Programs in Urban Studies in the Graduate Education section of this catalog.

Students who are admitted to a major in psychology–urban studies must meet the requirements for the major in psychology leading to the Master of Arts or Doctor of Philosophy degree. They must also meet the requirements for the urban studies component of the program as specified in the statement on Interdepartmental Graduate Programs in Urban Studies. Psychology 815 and 817 satisfy the research methods requirements for both the psychology and urban studies components of the program.

**UNDERGRADUATE PROGRAM**

The program leading to the Bachelor of Arts degree in social work is designed to prepare graduates for entry level positions in social work practice. The undergraduate program is grounded in the liberal arts and social sciences and is structured around courses in social work practice, social work policy, human behavior and the social environment, research, and a practicum experience. The rich resources of the University are used to create programs that are designed to prepare students for general social work practice and for graduate study. The program has been accredited by the Council on Social Work Education.

The faculty of the School of Social Work has adopted diversity and its relationship to social justice as the signature theme of the undergraduate program. Information about diverse populations is incorporated into classroom and field work assignments. The school encourages its majors to study abroad in order to learn more about diverse populations.

The demands of the undergraduate program are substantial, and students with an interest in the field of social work are encouraged to seek academic advising and career counseling as early in their college careers as possible. Freshmen and sophomores who declare social work as their major preference receive academic advising in the school and may enroll in Social Work 200.

**Admission as a Junior**

The number of students who can be admitted as juniors to the bachelor’s degree program in social work is limited. Applications are accepted and reviewed only during the Spring semester of each year.

All persons who are interested in applying for admission as juniors to the bachelor’s degree program in social work must request a special application form and detailed information regarding admission requirements and procedures from the School of Social Work, Room 254 Baker Hall.

Students who are enrolled in colleges and universities other than Michigan State University should contact MSU’s Office of Admissions and Scholarships and the School of Social Work regarding admission to the bachelor’s degree program in social work as transfer students.

To be considered for admission as a junior to the bachelor’s degree program in social work, a student must have:

1. Submitted a completed application form by the deadline specified by the school.
2. Completed Social Work 200, which is a prerequisite for the 300–400 level courses required for the bachelor’s degree.
3. Completed the courses in related areas referenced in items 3. b. (1) and 3. b. (2) under the heading Requirements for the Bachelor of Arts Degree in Social Work, with the exception of Computer Science and Engineering 101.

Admission to the bachelor’s degree program in social work is competitive, and there is no guarantee that students with a major preference in social work will be admitted to the bache-
lor's degree program as juniors. In making admissions decisions, the faculty considers the relative qualifications of applicants, their suitability for the program, and the enrollment capacity of the program. Factors such as the diversity of the student body may also be considered in the selection process.

A student who has been admitted to the bachelor's degree program in social work for a given semester, but then decides not to enroll for that semester, would need to reapply for admission to the program. There is no guarantee that the student would be admitted to the program again.

Honors Study

Students interested in honors study in social work should consult with academic advisers in the school.

Requirements for the Bachelor of Arts Degree in Social Work

1. The University requirements for bachelor's degrees as described in the Undergraduate Education section of this catalog. 120 credits, including general elective credits, are required for the Bachelor of Arts degree in Social Work.

The University's Tier II writing requirement for the Social Work major is met by completing Social Work 460. That course is referenced in item 3.b. 1.

2. The requirements of the College of Social Science for the Bachelor of Arts degree.

The completion of any three of the courses referenced in item 3.b. 1 below satisfies the College requirement of a minimum of three courses totaling at least 9 credits in the following departments: Anthropology, Economics, Geography, Political Science, Psychology, and Sociology.

The completion of Physiology 101 or 230 or Zoology 341 referenced in item 3.b. 1 below partially satisfies the College requirement of a minimum of two courses in the College of Natural Science.

3. The following required major courses:

   a. All of the following Social Work courses: 

      | Course                          | CREDITS |
      |--------------------------------|---------|
      | SW 200 Introduction to Social Work | 3       |
      | SW 310 Human Behavior and Social Environment | 3     |
      | SW 320 Social Work and Social Policy I | 3     |
      | SW 340 Foundations of Social Work Practice | 3 |     |
      | SW 420 Social Work and Social Policy II | 3 |     |
      | SW 430 Research Methods in Social Work | 3 |     |
      | SW 440 Social Work Practice with Individuals, Families, and Groups (W) | 3 |     |
      | SW 441 Social Work Practice with Task Groups, Organizations and Communities | 3 |     |
      | SW 494A Social Work Practice I: Foundations | 3 |     |
      | SW 494B Social Work Practice II: Generalist Practice | 3 |     |

   b. The following courses in related areas: 

      | Course                          | CREDITS |
      |--------------------------------|---------|
      | CSE 101 Computing Concepts and Competence | 3 |     |
      | EC 202 Introduction to Macroeconomics | 3 |     |
      | FIS 100 Introduction to American National Government | 3 |     |
      | PSY 101 Introductory Psychology | 4 |     |
      | PSY 230 Personality | 4 |     |
      | SOC 100 Introduction to Sociology | 4 |     |

(1) All of the following courses (20 credits):

(2) One of the following courses (2 to 4 credits): 

(3) One of the following courses (3 credits):

   a. Applications of Biocultural Science
   b. Fundamental Genetics
   c. Ethnic Minority Families in America
   d. Sex and Gender

   1 Students who pass a written examination will not be required to complete Computer Science and Engineering 101.
   2 Integrative Studies in Biological Science 204 may be used to satisfy either the University Integrative Studies requirement or requirement 3.b. 2, but not both of these requirements.

GRADUATE STUDY

Students who apply for admission to graduate programs in the School of Social Work should be prepared for a rigorous schedule of course work combined with concurrent practicum experiences in diverse settings. The Master of Social Work degree program requires clear thinking, competence in written and oral expression, and emotional stability.

The School of Social Work offers two programs which have been accredited by the Council on Social Work Education (CSWE): a Master of Social Work (MSW) Advanced Standing (One-Year) Program and a MSW Two-Year Program.

The MSW Two-Year Program requires 57 credits for the MSW degree. Students who are admitted to this program after having completed the equivalent of the first year of this program at another university are required to complete a minimum of 31 credits while enrolled in the MSW Two-Year Program at Michigan State University. A maximum of 26 credits of graduate level work in another program accredited by the CSWE may be applied to the credit requirements under the MSW Two-Year Program.

Students who hold a bachelor's degree in social work from a program that is accredited by the CSWE may apply for admission to the MSW Advanced Standing (One-Year) Program. This program requires a minimum of 42 credits for the MSW degree.

Students who are enrolled in Master of Social Work degree programs in the School of Social Work may elect specializations in infant studies. Additional information, refer to the statement on Interdepartmental Graduate Specializations in Infant Studies.

Master of Social Work

The Master of Social Work degree programs include extensive required courses and course sequences in social work. Only Plan B (without thesis) is available.

In addition to meeting the requirements of the University and of the College of Social Science, students must meet the requirements specified below.

Admission to the MSW Two-Year Program

Students begin the master's degree programs in the fall because of the sequencing of required courses. Applicants should therefore seek admission during the previous fall. Students wishing to be considered for admission must file a special application form available from the School of Social Work. Although an undergraduate major or concentration in the social sciences or in social work may be helpful, it is not required.

Specific Requirements for Regular Admission:

1. A bachelor's degree from a recognized institution.
2. Normally a grade-point average of at least 3.00 (on a 4 point scale) during undergraduate study or in 14 or more credits of graduate study.
3. Evidence of personal qualities considered important for the practice of social work.
4. Completion of an undergraduate course in research methods and a course in statistical analysis.
5. Prior academic record including at least 19 semester credits in humanities, social sciences, and natural sciences.
6. A course in human biology in which at least 50% of the content focuses on humans. Students who have not completed such a course may be admitted conditionally, with the expectation that they will do so by the end of their first semester.

Applicants will be judged on a combination of factors:

1. Grade-point average in undergraduate study or in 14 or more credits of graduate study.
2. Judgments by the faculty of the candidate's commitment to social work and suitability for the profession, based on a reading of the application.
3. Length and type of work and volunteer experience.
SCHOOL OF SOCIAL WORK

5. Diversity considerations.

Requirements for the MSW Two-Year Program

The student must complete 57 credits in specific social work instruction.

Required Courses for Both the Clinical Social Work Major and the Organizational and Community Practice Major: 43

1. Required Core Courses (28 credits):
   a. Both of the following courses (6 credits):
      SW 832 Applied Social Work Research: Survey and Field Designs 3
   b. One of the following courses (3 credits):
      SW 822A Social Welfare Policy and Services: Children, Youth and Families 3
      SW 822B Social Welfare Policy and Services: Individuals 3
   c. Six credits of social work or social work related course electives. 3

Additional Required Courses for the Clinical Social Work Major: 14

   SW 831 Clinical Social Work Practice: Individual and Family Systems 3
   SW 831D Clinical Social Work Field Instruction: Clinical Intervention, Individuals and Families 4
   SW 894E Social Work Field Instruction: Clinical Intervention with Groups 4

Additional Required Courses for the Organizational and Community Practice Major: 14

   SW 802 Social Work Practice: Planning and Evaluation of Social Programs 3
   SW 803 Social Work Practice: Community Organization and Community Practice 3
   SW 894F Social Work Field Instruction: Planning and Evaluation of Social Programs 4
   SW 894G Social Work Field Instruction: Organization and Practice 4

1. All of the Required Core Courses must be completed before enrolling in additional courses required for the major.
2. Students must have completed Social Work 400 level or equivalent courses prior to enrolling in Social Work 840.
3. These credits from the School of Social Work Social Work related courses may be used to complete the remaining credits if approved by the student's academic adviser.

Admission to the MSW Advanced Standing (One-Year) Program

Persons who hold a bachelor's degree in social work from a program that is accredited by the Council on Social Work Education (CSWE) may apply for admission to the MSW Advanced Standing (One-Year) Program. Students who are admitted to the MSW Advanced Standing program must be enrolled on a full-time basis throughout the program and must complete the requirements for the program within one calendar year. Students who do not meet these requirements may be dismissed from the program.

Students are admitted only for summer semester. Applicants should therefore seek admission during the previous fall. Students wishing to be considered for admission must file an application available from the School of Social Work, 254 Baker Hall.

To be considered for admission to the MSW Advanced Standing program, a person must have:
   a. A bachelor's degree in social work from a program that is accredited by the CSWE.
   b. A grade-point average of at least 3.25 (on a 4-point scale) during undergraduate study.

Applicants will be judged on a combination of factors:
1. Judgments by the faculty of the candidate's commitment to social work and suitability for the profession, based on a reading of the application.
2. Length and type of work and volunteer experience.
3. Three letters of reference, including an evaluation from the undergraduate faculty or agency practicum instructor or from the most recent social work supervisor.
4. Evidence of personal qualities considered important for the practice of social work.

Persons who are admitted to the MSW Advanced Standing program must have completed SW 430 Research Methods in Social Work I and SW 431 Research Methods in Social Work II, or equivalent courses, at the time of matriculation.

Requirements for the MSW Advanced Standing (One-Year) Program

The student must complete 42 credits in specific social work instruction.

Required Courses for Both the Clinical Social Work Major and the Organizational and Community Practice Major: 28

1. Required Core Courses (Shimler Sequence) (16 credits):
   a. One of the following courses (3 credits):
      SW 812A Human Behavior and the Social Environment I 2
      SW 812B Human Behavior and the Social Environment II 2
   b. Three credits of electives. 3

Additional Required Courses for the Clinical Social Work Major: 14

   SW 831C Clinical Social Work Field Instruction: Clinical Intervention, Groups, and Families 3
   SW 894F Social Work Field Instruction: Planning and Evaluation of Social Programs 4
   SW 894G Social Work Field Instruction: Organization and Practice 4

   a. All of the Required Core Courses must be completed before enrolling in additional courses required for the major.
   b. These courses that are used to satisfy this requirement must be approved by the student's academic adviser. Social Work courses at the 400-460 level are recommended.

ORGANIZATIONAL AND COMMUNITY PRACTICE—URBAN STUDIES

The School of Social Work offers an interdisciplinary Master of Social Work degree program in organizational and community practice—urban studies. A minimum of 57 credits is required for the degree, and only Plan B (without thesis) is available.
Admission
To be admitted to the major in organizational and community practice—urban studies, students must meet the requirements for admission to the MSW Two–Year Program with a major in administration and program evaluation. They must also meet the requirements for admission as specified in the statement on Interdepartmental Graduate Programs in Urban Studies in the Graduate Education section of this catalog.

Requirements for the Master of Social Work Degree in Organizational and Community Practice—Urban Studies
Students who are admitted to the major in organizational and community practice—urban studies must meet the requirements for the MSW Two–Year Program with an organizational and community practice major, as well as the requirements for the urban studies component of the program as specified in the statement on Interdepartmental Graduate Programs in Urban Studies.

The completion of Social Work 830 and 832, which are required for the organizational and community practice component of the program, also satisfies the quantitative social research methods requirement of the urban studies component. The completion of Social Work 894F and 894G, which are required for the organizational and community practice component of the program, also satisfies the requirement for the urban studies component referenced in item (3) under MASTER’S DEGREE, Requirements for the Degree.

The student is required to complete Urban Planning 848 in partial fulfillment of the requirements for the urban studies component of the program. The completion of that course also satisfies the requirement of Social Work 822A or 822B or 822C for organizational and community practice component. The completion of 6 of the 9 credits in the urban studies core courses that are required for the urban studies component of the program also satisfies the requirement of 6 credits of electives for the organizational and community practice component.

Residence
One year of residence consisting of two consecutive semesters and involving at least 7 credits of graduate course work each semester is required. If students attend part–time, the residency requirement must be met in the year that the advanced methods and practicum courses are being completed.

Part–Time Students
Only the MSW Two–Year Program is available on a part–time basis. The MSW Advanced Standing (One–Year) Program is not available on a part–time basis.

At the time of admission to the MSW Two–Year Program, students must apply for either part–time or full–time study. Students may not transfer between part–time and full–time study without approval of the school.

Part–time students must progress through either a three–year or a four–year plan of study as specified by the school. All students must meet their residence requirements during the year in which they are enrolled in the advanced practice and field instruction courses.

Doctor of Philosophy
In cooperation with the School of Social Work, the College of Social Science offers an interdisciplinary Doctor of Philosophy degree program in social science within which a concentration in social work is available. For information concerning interdisciplinary doctoral studies, students should communicate with the Director of the School of Social Work or with the Associate Dean, College of Social Science.

DEPARTMENT of SOCIOLOGY

Thomas L. Conner, Chairperson

Today’s world is rapidly changing. Old values and institutions are being questioned, and new ones are replacing them. New forms of behavior are adopted and suddenly dropped. Agrarian societies have become urbanized and industrialized. As markets are globally restructured, nations which were the centers of industry and wealth are being replaced by other nations. At the same time, the poorest countries attempt to develop. Patterns of racial, ethnic, class, and gender inequality affect the life chances of people in all societies. These social issues and problems of our times are the central questions studied by sociologists.
UNDERGRADUATE PROGRAM

Sociologists study how societies are organized, how they change, and how they interact. The department’s undergraduate program is designed to give students an understanding of societies throughout the world and of the major patterns of social behavior and organization in the United States. Courses deal with the basic institutions of society: economy and industry, education, family, health care and medicine, politics, sciences, and technology. Students examine how change occurs in rural and urban communities, in the environment, and in bureaucracies. They consider how knowledge may be applied to introduce social change.

Courses on international change and development, sex and gender, racial and ethnic inequality, and changes in the lifecycle focus on the rich cultural and social diversity of individual and group behavior. Courses in social psychology and personality enable students to understand how individual behavior is affected by group life. Courses that focus on fundamental methods and techniques of research are important for understanding how to collect and interpret data on individual and group behavior. Opportunities are available for participation in faculty research projects.

Sociology graduates may pursue positions in business, public service, sales research, teaching, and administration. Some students have used their bachelor’s degrees in sociology as a foundation for graduate and professional study in medicine, law, business, urban planning, social work, labor and industrial relations, and public health, or for advanced graduate study in preparation for careers as college teachers and researchers.

Requirements for the Bachelor of Arts or Bachelor of Science Degree in Sociology

1. The University requirements for bachelor’s degrees as described in the Undergraduate Education section of this catalog: 120 credits, including general elective credits, are required for the Bachelor of Arts or Bachelor of Science degree in Sociology.

   The University’s Tier II writing requirement for the Sociology major is met by completing Sociology 388 or 499. Those courses are referenced in item 3a. below.

2. The requirements of the College of Social Science for the Bachelor of Arts degree or the Bachelor of Science degree.

   CREDITS

   3. The following required major courses: 

   a. All of the following courses: 

      SOC 100 Introduction to Sociology .......................... 4
      SOC 241 Social Psychology .................................... 3
      SOC 281 Methods of Social Research I .................... 4
      SOC 282 Methods of Social Research II .................... 4
      SOC 488 Sociological Theory (W) ........................ 3
      SOC 499 Social Issues and Change in Contemporary Society (W) ........................ 3

   b. One of the following courses that are related to diversity: 

      SOC 215 Race and Ethnicity ................................. 3
      SOC 216 Sex and Gender ..................................... 3
      SOC 330 Social Stratification ............................... 3

   c. A minimum of three additional Sociology courses at the 300 level or higher, at least one of which must be at the 400 level ........................ 9

TEACHER CERTIFICATION OPTIONS

A sociology disciplinary minor is available for teacher certification.

Students who elect the sociology disciplinary minor must contact the Department of Sociology.

For additional information, refer to the statement on TEACHER CERTIFICATION in the Department of Teacher Education section of this catalog.

GRADUATE STUDY

Graduate education in the Department of Sociology is intended to develop professional sociologists who will be creative research scholars, teachers, and practitioners.

The department offers three major research areas of concentration:

1. rural and environmental studies. Areas of study include population, agriculture, community, rural family, environment, ecology, and science and technology.

2. structural inequality. Areas of study include conflict and change processes of (a) the intersection of race, ethnicity, class, and gender and (b) the international division of labor.

3. well-being and health. Areas of study include medical sociology with organizational and social psychological perspectives, stress, self-esteem, risk, and epidemiology.

Three areas of emphasis permeate the graduate degree programs: international and cross-cultural studies, social change and development, and social policy application.

Students interested in urban studies may pursue a master’s or doctoral degree in sociology-urban studies.

Students who are enrolled in Master of Arts and Doctor of Philosophy degree programs in the Department of Sociology may elect specializations in infant studies. For additional information, refer to the statement on Interdepartmental Graduate Specializations in Infant Studies.

For further information about graduate study in sociology, consult the department’s Graduate Manual.

SOCIOLOGY

Although the department views the Doctor of Philosophy degree as the terminal degree in sociology, a master’s degree program with a major in sociology is available.

Master of Arts

The master’s program is designed to give the student a general background in sociological theory and methodology, as well as an introduction to a major substantive area of the discipline. Students who complete the program may conduct standard social research projects, teach introductory sociology courses, direct several kinds of social action programs, or apply for admission to a doctoral degree program in sociology.

Students who are not employed full-time should complete all of the requirements for the master’s degree with a major in sociology within two years of initial enrollment in the program.

In addition to meeting the requirements of the University and of the College of Social Science, students must meet the requirements specified below.

Requirements for the Master of Arts Degree in Sociology

The program is available only under Plan A (with thesis). The student must meet the requirements specified below:

1. Complete 36 credits including:

   a. One course in each of the following three areas: theory, methods, and statistics.

   b. At least three courses in one of the department’s three major research theme areas of concentration referenced above.

   2. Present the thesis at a colloquium of the faculty who are associated with the student’s major research theme area of concentration. The presentation must be acceptable to the faculty.
3. Participate in the teaching assistant workshop offered by the department.
4. Participate in the Sociology Graduate Seminar for First-Year Students.

**Doctor of Philosophy**

The doctoral degree program in sociology is designed to give the student a general background in sociological theory and methodology, as well as training in a major substantive area of the discipline. Although the requirements for the Master of Arts degree with a major in sociology are an integral part of the doctoral program, students who are enrolled in the doctoral program are not required to earn a master's degree.

All doctoral students should gain some teaching experience, if possible.

The student's academic adviser serves as the chairperson of the student's guidance committee.

Specific procedures and criteria for the evaluation of comprehensive examinations are presented in the department's Graduate Manual.

In addition to meeting the requirements of the University and of the College of Social Science, students must meet the requirements specified below.

**Requirements for the Doctor of Philosophy Degree in Sociology**

The student must meet the requirements specified below:

1. One course in each of the following three areas: theory, methods, and statistics.
2. At least one additional course in each of two of the following three areas: theory, methods, and statistics.
3. A program of study in one of the department’s three major research theme areas of concentration referenced above that includes:
   a. At least five courses, at least three of which must be MSU Sociology courses.
   b. Additional courses related to the student’s needs and interests.
4. During the second year of study toward the doctoral degree, present an original research paper at a colloquium of the faculty who are associated with the student’s major research theme area of concentration. The presentation must be acceptable to the faculty.
5. Participate in the teaching assistant workshop offered by the department.
6. Participate in the Sociology Graduate Seminar for First-Year Students.

**Academic Standards**

At the end of the second year of study toward the doctoral degree, the faculty evaluates the student's performance in courses, the student's presentation of the original research paper, and the recommendations of the student's guidance committee. On the basis of that evaluation, the faculty decides whether or not the student should continue in the doctoral program.
ened by the participation of scholars from a variety of other colleges. The purpose of the Center is to focus on development in the Third World.

CASID promotes and coordinates the work of faculty and students interested in study of international development from the perspective of the social sciences and liberal arts. Since 1981, CASID has been funded by the U.S. Department of Education to operate as a National Resource Center for Foreign Language and International Studies and to award Foreign Language and International Studies Fellowships under Title VI of the Higher Education Act.

CASID promotes undergraduate and graduate programs in international development, works with academic units to assure continued availability and quality of relevant course offerings, coordinates issue-oriented interest groups, and offers a wide range of scholarly presentations and outreach services.

An undergraduate specialization in international development is available to interested students. For additional information, refer to the statement on Specializations in the Undergraduate Education section of this catalog.

**INSTITUTE FOR PUBLIC POLICY AND SOCIAL RESEARCH**

The Institute for Public Policy and Social Research is a University-wide research institute for which the College of Social Science is the lead college. The Institute provides research and technical assistance programs aimed at state, regional, and local levels of government, and research on national and international comparative issues affecting regional and local developments. Faculty associated with the Institute pursue multidisciplinary research projects. Institute personnel have computer programming, data management, statistical, survey analysis, and methodological expertise. The Institute contains the following programs and support units:

**SURVEY RESEARCH FACILITY.** The Institute specializes in telephone interviews and mailed questionnaires in support both of applied and basic research, and provides consulting in sampling design, statistical analysis, and other technical aspects of survey research.

**MICHIGAN DATABASES.** The Institute contains the largest electronic collection of economic and demographic data for Michigan’s local units of government. These data are used for research and instructional support within MSU, and to provide information to government agencies and non-profit organizations throughout the State.

**POLICY ANALYSIS PROGRAM.** This program conducts policy analysis for units of the State government, local governments, non-profit organizations, and consulting organizations. It emphasizes primarily fiscal and demographic analysis.

**PROGRAM EVALUATION.** Evaluation work for a wide range of public- and grant-funded projects and programs is supported by the presence of the survey facility, Michigan Databases, and Policy Analysis Program within the Institute.

**PUBLIC POLICY/SOCIAL RESEARCH.** The Institute supports faculty research projects that illuminate public policy decisions, particularly those that involve multiple disciplines.

**PUBLIC POLICY FORUMS.** The Institute organizes and carries out regular forums on topics of timely interest for legislators and other governmental decision-makers.
