Courses

958. Seminar in Analytical Chemistry
Fall, Winter, Spring. 0 or 1(1-0)
Discussions of recent advances and reports by graduate students on research problems.

956. Selected Topics in Organic Chemistry
Fall, Winter, Spring. 2(2-0) or 3(3-0)
May re-enroll for a maximum of 12 credits if different topic is taken. Approval of department.
Topics may be selected from heterocyclic chemistry, natural products, free radicals, carbenium ions, organic sulfur or nitrogen compounds, acidity functions, isotopic effects, photochemistry and others.

957. Advances in Organic Chemistry
Fall, Winter, Spring. 2(2-0) or 3(3-0)
May re-enroll for a maximum of 12 credits if different topic is taken. Approval of department.
Lecture of a timely and advanced nature in organic chemistry.

958. Seminar in Organic Chemistry
Fall, Winter, Spring. 0 or 1(1-0)
Discussions of recent advances and reports by graduate students on research problems.

984. Advanced Thermodynamics
Winter of even-numbered years. 3(3-0)
Review of thermodynamic laws and application to one-component systems and transitions in gases, liquids, and solids; multicomponent systems; chemical potential and partial molar properties of one-component systems and transitions in multiphase systems and the surface phase; solutions and their calculation and application to thermodynamic problems; application of spectroscopic measurements to thermodynamic calculations.

985. Statistical Thermodynamics
Fall of odd-numbered years, Winter and Spring of even-numbered years. 3(3-0)
Definition of partition function, translational, rotational, vibrational and electronic partition functions and their calculation and application to thermodynamic problems; application of spectroscopic measurements to thermodynamic calculations.

987. Selected Topics in Physical Chemistry
Winter. 2(2-0) or 3(3-0)
May re-enroll for a maximum of 6 credits if different topic is taken. Approval of department.
Topics may be chosen from analysis and interpretation of the spectra of molecules, advanced molecular structure, magnetic resonance, spectroscopy, X-rays and crystal structure, statistical mechanics.

991. Quantum Chemistry
Fall, Winter, Spring. 3(3-0)
May re-enroll for a maximum of 6 credits if different topic is taken. Approval of department.
Principles of quantum chemistry and their application to chemical problems. Electronic structure of molecules and its correlation with the chemical and physical properties of substances. Emission and absorption of radiation.

998. Seminar in Physical Chemistry
Fall, Winter, Spring. 0 or 1(1-0)
Discussions of recent advances and reports by graduate students on research problems.

999. Research
Fall, Winter, Spring, Summer. Variable credit. Approval of department.
Research in analytical, inorganic, organic, and physical chemistry.

CIVIL AND SANITARY ENGINEERING

College of Engineering

Civil Engineering

C E

251. Elementary Surveying
Fall, Spring. 4(3-2) 4(3-2) Trigonometry, EGR 105 or 207 or LA 120. Not open to majors.
Use of the tape, compass, level, and transit with simple maps; traverse closure and area computations. Profiles, cross section and stadia surveys. U. S. land system.

252. Surveying I
Fall, Spring. 4(4-0) Trigonometry.
Theory of measurements, calculations, error analysis and instruments. Methods and calculations of engineering work.

253. Surveying II
Fall, Spring. 4(3-2) 252. Lead surveys, U.S. land systems, astronomical observations, triangulation and photogrammetry.

305. Structural Mechanics I
Winter. 4(4-0) MAM 211.
Stability and determinacy of structures. Two and three dimensional determinate structures. Indeterminate structural analysis by displacement and force methods based upon equilibrium, compatibility and load-deformation relations.

308. Engineering Materials I
Winter. 4(3-2) MAM 211 or concurrently.
Structure, composition, physical and rheological properties of non-metallic construction materials. Applications to agglomerated, cementitious, polymeric and pavement materials.

311. Urban Utilities
Winter. 3(3-0) 251.
Utilities and improvements necessary for urban populations. Course primarily designed for students in urban planning.

312. Soil Mechanics I
Spring, Summer. 4(3-3) MAM 211.
Properties of soil and particulate materials, physics of clay-water system flow in porous media and consolidation theory. Effective stress theory, pore water pressure and soil strength theories.

321. Hydromechanics
Winter, Spring. 5(4-2) MAM 206.
Fundamentals of flow of real fluid, fluid properties, kinematics, continuity, laminar and turbulent flow, form drag, stream lines, potential flow pipe and open channel flow.

342. Survey of Transportation Systems
Fall. 4(4-0) Juniors, not open to majors.
Survey of engineering aspects of all forms of transportation with emphasis on highway transportation including highway systems, planning, economic and financial aspects, geometries and traffic studies.

372. Engineering Estimating
Winter. 4(4-0) Juniors.
Construction estimates with particular attention to material, labor, and equipment costs, overhead, and profit.

374. Construction Administration
Spring. 4(4-0) Juniors.
Methods used in construction practice and administration. Analysis of equipment and related operations for engineering projects. Use of critical path techniques. Contracts and relationships of engineer, owner and contractor.

382. Environmental Engineering I—Hydrology and Water Supply
Spring, Summer. 4(3-2) 321. CEM 131 or 141.

390. Civil Engineering Analysis
Fall, Winter. 3(3-0) MTH 215.
Analysis of civil engineering problems by numerical and statistical methods. Approximate methods and error analysis. Application to computer use.

400. Structural Mechanics II
Spring, Summer. 4(4-0) 305.
Energy methods in static and dynamic structural analysis, including the principles of virtual displacements and virtual forces. Influence lines. Matrix analysis of structures, influence and stiffness coefficients. Computer facilities are used.

405. Structural Synthesis I
Winter. 4(3-2) 305.

406. Structural Synthesis II
Spring. 4(4-0) 400.
Design and synthesis of reinforced concrete structures by elastic, plastic and ultimate strength concepts. Prestressed and post-tensioning theory and design.

410. Structural Mechanics III
Fall. 4(4-0) 400.
419. Soil Mechanics II
Fall. 4(4-0) 312.
Elastic and plastic equilibrium in soil and rock masses, concepts of stability and soil-structure interaction, Applications to earth structures, bearing capacity and earth pressure problems.

422. Hydraulics
Spring. 4(3-2) 321, 390.
Pipes and pipe networks, open channel flow, flow measurements, hydraulic machinery, surges and water hammer.

446. Transportation
Winter. 4(4-0) MMM 206.
History, development and function of transportation, Operational control and characteristics, System simulation, Geometries of design, traffic flow and patterns.

447. Highway Facilities
Spring. 4(3-2) 308.
Highway and airport engineering, Theory and design of rigid and flexible pavements, Highway construction.

483. Environmental Engineering II— Water Pollution and Pollution Control
Fall. 4(3-2) 321; CEM 121 or 141.
Environmental contamination, Parameters of air and water pollution, Storm and water waste collection systems, Physical, chemical and biological treatment of waste water.

487. Environmental Engineering III— Water and Waste Water Analysis
Winter. 4(3-0) 483.
Theoretical aspects of the water quality, Chemical and physical parameters, Water bacteriology, Qualitative and quantitative measurements of contamination, Biochemical oxygen demand.

502. Structural Dynamics I
Winter. 3(3-0) 405, 406, or approval of department.
Basic concepts in structural dynamics, Dynamic loading on structures due to blasts and earthquakes, dynamic properties of structures, method of analysis, design approach to blast and earthquake resistant structures, dynamic behavior of bridges and other topics.

503. Structural Dynamics II
Spring. 3(3-0) 802.
Dynamics of large scale structural systems, Network formulation and numerical methods, Behavior under random disturbances, Characterization of and response to random disturbances and failure criteria.

504. Advanced Structural Theory I
Winter. 4(4-0) 400; MTH 421; or approval of department.
Extensive treatment of energy theorems, with linear and nonlinear applications, Advanced matrix force and matrix displacement methods, for problems of great complexity, Application to plane and space frames and continuum (e.g. aircraft) structures, Computer facilities are used.

505. Advanced Theory of Reinforced Concrete I
Winter. 3(3-0) 408.
Deflection, torsion, shrinkage, plastic flow, and ultimate strength of concrete structures, Prestressed concrete.

507. Model Analysis
Fall. 3(1-0) 406.
Basic theory of the analysis of structures by means of models, Laboratory work on models, Begg's densiometer and electric resistance type gauges for the measurement of static and dynamic strains.

815. Principles of Highway and Airport Soils
Winter. 4(4-0) 447.
Foundation problems as related to highways and airports, relationship of soil conditions to design and construction, analytical review of laboratory and field results.

817. Mechanical Properties of Soils
Fall. 4(3-2) 410.
Mechanical properties of soil including stress-strain behavior, conditions of failure and shear strength, Consolidation theory and permeability, Laboratory determination of soil properties including interpretation of experimental data for use in practice.

818. Advanced Soil Mechanics
Winter. 4(4-0) 419; 817 recommended.
Elastic and plastic equilibrium in soil masses, earth pressure and bearing capacity theory.

821. Flow of Fluids in Porous Media
Spring. 3(3-0) 422.
Structure and properties of porous media, Fluid flow in saturated and unsaturated media, Two-phase flow, Darcy's and Navier Stokes equations, Two-dimensional sink flow, Multiple sources and sinks, Potential theory and conformal mapping, Permeability in an anisotropic medium.

828. Hydraulic Engineering I
Fall. 3(3-0) 422.
Application of hydromechanics to hydraulic engineering problems, sub-critical flow in channel transitions and controls, spillways, gates, contractions, expansions, culverts, flow measurement, model studies, similitude, construction and instrumentation of models, interpretation and limitations of models.

829. Hydraulic Engineering II
Winter. 3(3-0) 828.
Continuation of application of hydromechanics to hydraulic engineering problems, sub-critical flow in channel transitions and controls, spillways, gates, contractions, expansions, culverts, flow measurement, model studies, similitude, construction and instrumentation of models, interpretation and limitations of models.

843. Advanced Traffic Engineering
Spring. 3(2-0) 447.
Accident record studies, signs and signals, roadway and intersection design, traffic administration, traffic surveys and analysis.

846. Highway Planning
Fall. 3(3-0) 447.
Highway inventory, road use studies and programming, Analysis of highway costs, economic considerations in location and design.

847. Geometric Design of Highways
Winter. 3(3-0) 447.
Design of streets and highways including intersections, grading facilities, capacity, channelization and roadway appurtenances.

871. Advanced Construction Practice
Winter. 3 credits. Approval of department.
Advanced problems involved in construction, Theoretical analysis and practical solutions commonly employed, Emphasis on heavy construction including caissons, piers, foundations, tunnels, dams, and bridge structure.

880. Special Problems in Civil Engineering
Fall, Winter, Spring, Summer. Variable credit. Approval of department.
Research problems of limited scope not pertaining to thesis accomplished under 889 or 896.

899. Research
(EGR 899.) Fall, Winter, Spring. Summer. Variable credit. Approval of department.

904. Advanced Structural Theory II
Spring. 4(4-0) 804; MTH 422 or concurrently.
Energy (variational) approach to deriving and solving equations governing advanced problems in beam-columns, rings, buckling, plates, load distributions, etc. Approximate solutions by Rayleigh-Ritz and related methods.

905. Advanced Theory and Design of Reinforced Concrete II
Spring. 3(2-2) 805.
Continuation of 803 with application of theory to analysis and design of tanks, rigid frames, and shells.

906. Advanced Structural Steel Design
Spring. 3(3-3) 406.
Analysis and design of multiple-story building frames, continuous trusses and rigid-frame girder bridges in structural steel, Plastic design.

908. Numerical Methods in Structural Engineering
Winter. 3(3-2) 406.
Solution of mathematical equations by means of successive numerical approximations and the application of these numerical methods to structural problems.

909. Elastic Thin Shells
Summer. 5(3-0) 804 or MMM 815 or approval of department; MTH 431. Interdepartmental with the Metallurgy, Mechanics and Materials Science Department.
Elements of differential geometry, membrane theory of shells, Euler's stress function, deformation and bending of shells of revolution and shallow shells.

912. Theory of Plates
Winter. 4(4-0) 804 or MMM 815 or approval of department; MTH 432. Interdepartmental with and administered by the Metallurgy, Mechanics and Materials Science Department.
Bending of thin elastic plates with various shapes and boundary conditions, application of energy principles and approximate methods of solutions, thick plates; large deflection theory; sandwich plates.

915. Advanced Soil Mechanics II
Spring. 3(3-0) 817.
Earth structures including natural and cut slopes, embankments and earth dams; mechanisms of flow slides, slope stability analysis and design problems, seepage applications including confined and unconfined flow of water through soils.

916. Advanced Soil Mechanics III
Summer. 3(3-0) 817.
Soil dynamics including design of foundations for machines; effects of ground motion on earth slopes and earth dams; stress-strain behavior of soil during transient and repeated loadings; and relation of soil properties to wave velocity.

999. Research
(EGR 999.) Fall, Winter, Spring, Summer. Variable credit. Approval of department.

Sanitary Engineering
C E 483.
Physical, chemical and biological treatment methods for Industrial wastes.

Civil and Sanitary Engineering — Description of Courses
COMMUNICATION

College of Communication Arts

100. Human Communication I
Fall, Winter, Spring, Summer. 3(3-0)
Process and functions of communication. Principles underlying communication behavior. Practice in analyzing communication situations and in speaking and writing.

101. Human Communication II
(S T 101.) Fall, Winter, Spring, Summer. 3(3-0) 100.
Continuation of 100, with greater emphasis on speaking and writing, and on analyzing increasingly complex communication situations.

199. Methods of Inquiry
Fall, Spring. 3(3-0) Majors and minors only. 191.
Major theoretical orientations toward communication. Primary tools of scholarly inquiry.

205. Persuasion
(305., S T 305.) Fall, Winter, Spring. 4(4-0) 101.
Process of influencing human behavior through persuasive communication. Experience in creating persuasive messages and in evaluating the acceptability of persuasive attempts.

210. Leadership
(116., S T 116.) Winter. 4(4-0) 100.
Principles and practice in the utilization of communication for effective leadership.

299. Individual Projects
Fall, Winter, Spring, Summer. Variable credit. May re-enroll for a maximum of 15 credits. Approval of project proposal by department.
Independent research, experience in communication laboratories, or tutorial work in communication skills.

300. Effects of Communication
Fall, Winter, Summer. 4(4-0) 100.
Examination of the dimensions of communication effects.

315. Organizational Communication
(311., S T 311.) Spring. 4(4-0) 101.
Principles and practice in the management of communication systems, with emphasis on conflict resolution, information exchange, innovativeness, and information management.

350. Signs and Sign- Behavior
Fall, Winter, Summer. 4(4-0) 100.
Theories of man's symbolic behaviors. Semiotics and general semantics.

351. Message Analysis I
(440.) Winter. 4(4-0) 350.
Methods of describing messages and message codes, with emphasis on the concept of information.

352. Message Analysis II
(320.) Spring. 4(4-0) 351.
Continuation of 351, with emphasis on non-verbal codes: gesture, expression, time and space, light.

360. Critical Perspectives on Communication
Winter. 4(4-0) 100.
Interdependence of communication and other societal factors, emphasizing criteria for ethical and social appropriateness.

399. Seminar
(401.) Winter, Spring. 4(4-0) Majors only 360.
Contemporary issues in communication.

405. Research in Communication Strategies and Styles
(5 T 405.) Fall, Spring, Summer. 5(5-0) Seniors. 300.
Research literature in communication strategies and styles.

413. Seminar in Communication Education
(S T 413.) Fall, Winter, Spring, Summer. 4(4-0) ED 327U.
Philosophies of curricular and co-curricular programs in communication education. Internship experience in those programs.

420. Message Design
Winter. 4(4-0) 101.
Principles and practice in message-media construction and selection.

499. Special Projects
Fall, Winter, Spring, Summer. Variable credit. May re-enroll for a maximum of 15 credits. Approval of project proposal by department.
Independent research, group research, student-directed group projects.

805. Communication Research
Fall. 5(4-2) Majors.
Communication research strategy and methodology. Scientific process, bases for derivation and verification of hypotheses, and basic methods of designing research in communication.

806. Communication Research
Winter. 5(4-0) 805.
Continuation of 805.

820. Communication Theory and Processes
Fall, Winter, Summer. 3(3-0)
Theoretic models of communication, with emphasis on the applications of communication theory to various professional communication areas.

821. Mass Communication Theory and Research
(921.) Spring. 4(3-0)
Current theories and research in mass communication.

822. Interpersonal Communication
(920.) Winter. 4(3-0)
Current theories and research in interpersonal communication, with emphasis on persuasion.

829. Cross-cultural Communication
(429.) Winter. 4(4-0)
Role of communication in the economic, social and political development of less developed countries. Problems in communicating across cultural boundaries.

850. Seminar in Research Utilization
(950.) Summer. 4(3-0) May re-enroll for a maximum of 8 credits. Approval of department.
Applications of communication research to professional practice in such areas as teaching, change agencies, information system management, etc.

870. Communication and Change: The Diffusion of Ideas and Information
(470.) Fall, Spring. 4(4-0)
Research traditions underlying the diffusion of ideas and information, and acceptance of innovation and change. Strategic principles for introduction of change through the use of communication.

890. Special Problems
Fall, Winter, Spring, Summer. 1 to 6 credits. Approval of department.
Special problems as arranged with instructor.

899. Research
Fall, Winter, Spring, Summer. Variable credit. Approval of department.

905. Communication Research Design
Spring. 4(4-0) 808.
Methods of data collection and analysis in communication research. Designing exploratory studies of the communication process. Interviewer training and bias. Content analysis of the mass media. Writing and critiquing research reports.

940. Seminar in Communication Theory and Research
Fall, Winter, Spring, Summer. Variable credit. May re-enroll for a maximum of 45 credits. Approval of department.
Theoretic and research issues in communication.

990. Special Problems
Fall, Winter, Spring, Summer. 1 to 6 credits. Approval of department.

999. Research
Fall, Winter, Spring, Summer. Variable credit. Approval of department.

COMPUTER SCIENCE

College of Engineering

110. FORTRAN Programming
Fall, Winter, Spring. Summer. 3(3-0)
Students may not receive credit in both 110 and 150.
Introduction to FORTRAN programming; use of library programs; applications from various areas.
