854. Seminar in Social Stratification
Spring. 3(3-0) Approval of department.
Theory and research in societal systems of stratification. The articulation of stratification orders to institutional structures. Research design in stratification studies.

855. Field Research Methods
Spring. 4 credits. 492: approval of department.
An overview of the design and execution of social research.

856. Theory of Sociological Inquiry
Spring. 4(4-0) 492.
Critical review of some of the procedures followed by sociologists and social psychologists in their attempts to achieve reliable knowledge.

857. Research Problems and Literature in Social Psychology
Fall. 4(4-0) Fifteen graduate credits in sociology or approval of department.
Central points of view and concepts of contemporary social psychology with emphasis upon symbolic interaction, collective behavior, small groups, attitudes and behavior, and culture and personality.

894. Seminar in Small Group Research
Fall. 3 to 5 credits. Thirty graduate credits including 982, or approval of department.
The experimental and theoretical investigation of organizational processes in small groups.

896. Social Structure and Personality
Winter. 3 credits. 963 or approval of department.
Theoretical and research problems in analysis of influence of social positions on personality, and influence of personality and social factors in allocating persons to different social positions. Stress will be placed upon quantitative research and contemporary theories of social structure and personality.

967. Introduction to Formal Theory in Sociology
Spring. Variable credit. 986.
Analysis of the structure of formal theory in sociology and of the problems of interpretation and verification of deterministic and probabilistic theories. Examination of specific practices of theory construction.

985. Symbolic Interactionism: Theory and Research
Spring. 1 to 4 credits. 985; social psychology concentration.
Theoretical and research problems within the framework of symbolic interaction. The socialization process and the development, maintenance, and enhancement of the self. Critique of the literature and proposals for new research directions.

976. Contemporary Social Systems
Winter. 4 credits. 494 or approval of department.
Comparison and analyses of concepts, conceptual schemes and theories of outstanding social theorists in relation to modern research.

898. General Social Organization
Fall. 4 credits.
Research and literature on the structure and function of social organizations ranging from societies to small groups.

899. Comparative Rural Social Organization
Spring. 4 credits.
Structure and function of social organizations ranging from societies to small groups. The comparative approach will be used in studying phenomena involved in the transitions from agrarian to industrial societies.

981. Comparative Sociology
Fall. 3 or 4 credits. Doctoral student in sociology, completion of core courses. Macro-sociological studies of societies. The relationship of the whole to the varied parts of societies, the connection between societies, and the patterns of change in different societies. The development of research with respect to the cross-cultural study of social structures, social institutions, and social systems.

982. Comparative Social Psychology
Winter. 3 or 4 credits. 981.
Social psychological research problems involving a comparative methodology. Social psychological functions of education, mobility, mass media use, etc. Comparative study of the social psychology of modernization.

983. Comparative Research Methods
(980.) Spring. 3 or 4 credits. 981.
Sampling problems, data collection strategies, problems of translation and concept equivalence. Management, analysis and interpretation of cross-cultural data.

999. Research
Fall, Winter, Spring. Summer. Variable credits. Approval of department.

SOIL SCIENCE

College of Agriculture and Natural Resources

210. Fundamentals of Soil Science
Fall. Spring. 5 credits. CEM 131 or 141.
Principles of the origin and development of soils. Relationship of properties to utilization and soil fertility to plant composition and animal health. Emphasis is placed on changing soils to serve man.

331. Soil Management
Winter. 4(4-0) 210.
Management of soils, drainage and irrigation, organic matter, tillage, crop and livestock conservation, soil reaction, lime, fertilizers, and micronutrients. Soil management vs. soil conservation. Special study in general crops, horticultural crops, greenhouse crops, turf and organic soils.

390. Soil Conservation and Land Use
Spring. 3(3-0) 210.
Soil resources of the United States and methods and plans for soil conservation including control of erosion. Interpretation of soil survey maps and land evaluation for farm crops, fruits, forestry, engineering and wildlife. Soil judging.

410. Special Soil Problems
Fall, Winter, Spring. Summer. 1 to 3 credits. May re-enroll for a maximum of 5 credits. Approval of department.

420. Seminar
Winter. 1(1-0) May re-enroll for a maximum of 4 credits. Interdepartmental and administered jointly with the Crop Science Department.

424. Forest Soils
Spring. 4(3-3) 210; FOR 210. Interdepartmental with and administered by the Forestry Department.
Interrelationships of forest site and the growth of forests. Classification and productivity of forest soils. Effects of silvicultural and forest management practices on the soil. Two-day field trip required.
430. Soil Fertility and Fertilizers  
Winter. Summer of even-numbered years. 5(4-1) 210.  
Assessment of the fertility of soils and alteration of fertility by the use of fertilizers, lime, manure, and cropping systems. The role of colloids in ion fixation and exchange. Soil and tissue tests. The history, technology, and use of fertilizers.

442. Soil Microbiology  
FALL, SPRING. 3(2-4) MPH 390 or 401. Interdepartmental with and administered by the Microbiology and Public Health Department.  
Major groups of microorganisms of importance in soils are studied with emphasis on ecological, biochemical, and physical aspects.

470. Soil Classification and Mapping  
FALL, SPRING. Summer of odd-numbered years. 4(0-8) 210 or approval of department.  
Classification of soils. Interpretation of profiles in relation to land utilization for farm crops, fruits, forestry, highway-airfield engineering, country and township planning, urban development and wildlife. Preparation of land use reports based upon soil maps of assigned areas.

480. Soil Geography and Land Use of the World  
Winter. 4(4-0) 210 or approval of department.  
Survey of the great soil groups and their use throughout the world, their location, significant characteristics, how they are and can be utilized, and the relation of each to food and population increase.

810. Advanced Studies in Soil Science  
Fall, Winter, Spring. Summer. 1 to 5 credits. May re-enroll for a maximum of 6 credits. Approval of department.  
Areas of study include chemistry, fertility, geography, management, microbiology, micropedology, organic soils, physics, and physical chemistry.

820. Seminar  
Fall, Winter, Spring. 1(1-0) May re-enroll for a maximum of 3 credits.  

840. Soil Physics  
Fall. 5(3-8) 430; CEM 162 or approval of department.  
Physical properties of soils (texture, structure, consistency, aeration, water, temperature, etc.), their quantitative measurement, and relation to plant growth, and agronomic and engineering practices.

850. Soil Chemistry  
Winter. 5(3-8) 430; CEM 162, 383; or approval of department.  
Chemistry of mineral weathering and soil formation, soil activities, ion exchange and equilibrium reactions, soil pH, specific elements and their chemical analysis, and availability of nutrients to plants.

860. Soil Biochemistry  
Spring of even-numbered years. 4 credits. MPH 442.  
Biochemical transformations of mineral nutrients and of natural and exotic organic materials in soils, considered in relation to chemical, physical and ecological systems in the complex soil environment.

870. Origin and Classification of Soils  
Winter. 4(3-2) 470, 540, or approval of department.  

880. Soil Geography and Land Use in the United States  
Winter. 4(4-0) 470 or approval of department.  
Study of representative soils of the United States—their character, environmental relationships, present and potential utilization.

899. Research  
Fall, Winter, Spring, Summer. Variable credit. Approval of department.

930. Soil Fertility  
Spring. 4(4-0) 850 or approval of department.  
Fundamental concepts in soil fertility and nutrient uptake by plants; history and development of field plot and greenhouse techniques; research methods in soil fertility; and origin, utilization and management of organic soils.

945. Structure and Identification of Clays  
Winter of odd-numbered years. 4(3-4) 840, 850 or approval of department.  
Structures and properties of clays and their interpretation. Methods of studying clays including X-ray diffraction, differential thermal analysis, infrared absorption and other chemical and physical techniques.

999. Research  
Fall, Winter, Spring, Summer. Variable credit. Approval of department.

STATISTICS AND PROBABILITY  
STT  
College of Natural Science  
Courses are classified as follows:  
Courses with the last two digits less than 40 require minimum prerequisites of MTH 215.  
Courses with the last two digits less than 40 require fewer mathematics prerequisites. Introductory courses are further classified as follows:  
121, 123—sequence for Business Administration students.  
201—survey course.  
421, 422, 423—minimal sequence for students planning to use statistical methods in their research.  
441, 442, 443—minimal sequence in theory of statistics. Qualified students should take the 861, 862, 863 sequence instead.  
861, 862, 863—sequence for students preparing to do advanced work in statistics.  
883, 882, 881—sequence in analytic probability theory and stochastic processes at graduate mathematics level.

121. Introduction to Probability  
FALL, WINTER, SPRING. Summer. 4(3-2) MTH 111. Credit may not be earned in more than one of the following: 121, 201, 421.  
Set and algebra of sets. Chance experiments, outcomes and events, probability of events. Conditional probability, independent trials, Bayes' theorem. Introduction to statistical inference relevant to business decision problems.

123. Statistics in Business  
DEcision-Making  
(233.) Fall, Winter, Spring. 4(2-2)  
Statistical inferences and decision-making under uncertainty. Summarization of information and statistical tests. Statistical decision rules and their evaluation in terms of expected cost. Risk.

201. Statistical Methods  
Fall, Winter, Spring, Summer. 4(4-0) MTH 108 or 111. Primarily for students in psychology, sociology, anthropology, political science, economics, agriculture and forestry. Credit may not be earned in more than one of the following: 121, 201, 421.

Probability and statistical inference, discrete models, the binomial and hyper-geometric distributions. The central limit theorem, principles of testing of hypotheses and estimation. Applications to problems involving discrete distributions.

316. Fundamentals of Statistical Inference  
Fall, Winter, Spring, Summer. 4(3-2)  
Primarily for students in the College of Business. Interdepartmental with the Marketing and Transportation Administration Department.  
Description of sample data, applications of probability theory, sampling, estimation, tests of hypotheses.

317. Quantitative Business Research Methods  
Fall, Winter, Spring, Summer. 4(3-2)  
Interdepartmental with the Marketing and Transportation Administration Department.  
Application of statistical techniques to business decision-making. Topics covered include applications of linear regression and correlation, analysis of variance, selected non-parametric tests, time series, and index numbers.

351. Introduction to Statistics  
Spring. 4(4-0) MTH 214.  
Probability models, discrete random variables, the binomial, hyper-geometric and Poisson distributions, statistical inference based on the binomial distribution, continuous random variables, test of hypothesis and confidence intervals based on the normal distribution.

421. Statistics I  
Fall, Winter, Spring, Summer. 4(4-0) MTH 106. Credit may not be earned in more than one of the following: 121, 201, 421. This course and 422, 423 form a one year sequence in statistics for those without a calculus background; 421 provides an introduction to a few of the main ideas of probability and statistics. The course sequences 421-2-3 or 861-2-3 form one year sequences in statistics for those with a calculus background. These expecting to use statistics in their graduate research should complete one of the full year sequences. Descriptive statistics, elementary probability and combinatorics. The binomial distribution. Random variables, their expectations and variances. The Central Limit Theorem, Estimation and inference. Simple tests based on the binomial, normal, t, chi-square and F distributions.
