820. Advanced Police Administration
Fall, Winter. 3(3-0) or 5(3-0) Approval of department.
Depth analysis of the line and staff functions within a law enforcement agency. Problems of program development, execution, and evaluation.

822. Comparative Law Enforcement Administration
Spring. 3(3-0) or 5(3-0) Approval of department.
Comparative study of police organization and administration in various governmental and social systems. Evaluation of government’s role, its limitations, the selection and training of leaders.

823. Community Relations in the Administration of Justice
Fall. 4(4-0) or 8(4-0) Approval of department.
Seminar in the field of community relations, encompassing the spectrum of the administration of justice and community responsibility, utilizing the interdisciplinary approach in case and situational analysis.

840. Seminar in Highway Traffic Administration
Winter. 3(3-0) or 5(3-0) Approval of department.
Traffic problems in their broad social setting. Inventory and critical review of the traffic safety movement as a role of various professions therein. Future problems and developments.

868. Principles of Weed Control
Fall. 3(2-2) Sophomores. Interdepartmental and administered jointly with the Horticulture Department.
Comprehensive study of principles underlying weed control practices, and factors involved in both mechanical and chemical control.

406. Crop Improvement and Seed Production
Winter. 4(3-2) N S 193.
Practical methods of crop improvement, seed production, storing, cleaning, packaging, and distribution, seed certification of small grains, legumes, corn, beans, potatoes, visits to seed agencies and seed farms.

407. Special Crop Problems
Fall, Winter, Spring, Summer. 1 to 3 credits. May re-enroll for a maximum of 8 credits. Approval of department.
Independent comprehensive study of some area of crop science.

408. Principles of Plant Breeding
Spring. 3(3-0) 402; 5(3-0) 402; 5(3-0) 402. Approval of department.
One course in genetics or breeding, and one course in morphology, management principles and physiology.

415. Turfgrass Management
Spring. 4(3-2)
Adaptation characteristics and utilization of turf grasses, management principles and physiological bases for the establishment and maintenance of turf for lawns, athletic fields, golf courses, cemeteries, parks, highways, and airfields.

420. Seminar
Winter. 3(1-0). May re-enroll for a maximum of 4 credits. Interdepartmental and administered jointly with Soil Science.

485. Seed Science
Spring. 3(3-2) Approval of department.
Morphological and physiological changes during seed formation, development, maturation and germination. Physiological and biological aspects of seed drying, storage, deterioration, dormancy and quality. Current problems and research in seed science.

Winter. 3(4-0)
For course description, see Interdisciplinary Courses.

801. Crop Ecology
Fall. 3(3-0) Approval of department.
Environmenet within the crop community and the environmental stresses limiting crop survival. Temperature, light, water and atmospheric stresses and variations in the crop canopy will be discussed.

803. Crop Physiology
Spring. 3(3-0) Approval of department.
Role of physiological factors determining maximum crop yields and quality.

814. Advanced Field Crop Studies
Fall, Winter, Spring, Summer. 3-5 credits. Approval of department.
Opportunity for students to prepare graduate level reports on specific fields.

831. World Grain Adaptation
Winter. 3(3-0) Approval of department.
Interdepartmental and administered by the Forestry Department.

851. Quantitative Genetics in Plant Breeding
Fall of odd-numbered years. 4(3-1)
One course in genetics or breeding, and one course in biometry, or approval of department.

899. Research
Fall, Winter, Spring, Summer. Variable credit.

904. Seminar
Fall, Winter, Spring. 1(1-0) Required of majors; others: approval of department.
Studies and presentation of research in crop science.

920. Design and Analysis of Agronomic Experiments
Spring. 3(3-0) S 405 or approval of department.
Constructing and analyzing designs for experimental investigations in the biological sciences.

923. Preservation and Storage of Field Crops
Spring of even-numbered years. 3(2-2)
Effects of equilibrium moisture contents, rapidity of establishment of equilibrium, relative humidity, chemical composition, rapidity of fermentation, molding or heating, pressure, temperature, etc. upon the quality of stored crops.
951. Cytogenetics in Plant Breeding
Winter of odd-numbered years. 3(3-0)
BOT 863, 916, or approval of department. Interdepartmental with the Horticulture Department.
Application of cytogenetic principles to plant breeding. Significance of recombination, role of induced mutations, polyploid, chromosome substitution, and aneuploid analyses as they apply to the field of plant breeding.

952. Plant Breeding Biometrics
Winter of even-numbered years. 4(3-2)
Approval of department.
Biometrical genetics as it applies to plant breeding. Includes studies of path coefficients, partitioning of variance, and the principles of selection in a changing environment.

953. Cytogenetics in Plant Breeding Laboratory
Winter of odd-numbered years. 3(0-6)
951 or concurrently. Interdepartmental with and administered by the Horticulture Department.
Laboratory course to accompany 951.

999. Research
Fall, Winter, Spring, Summer. Variable credit.

DAIRY SCIENCE

College of Agriculture and Natural Resources

214. Dairy Production
Fall, Spring. 4(3-2)

323. Dairy Cattle Judging
Spring. 3(0-6)
Desired type in dairy cattle. Judging and showing procedures. Competitive judging. Teams selected to represent Michigan State University in national competition.

413. Dairy Farm Management
Spring. 3(2-2)
Analysis of dairy farm organization and operations. Dairy herd management practices. Dairy cattle housing with emphasis on economical and efficient usage. Use of dairy records in the farm operation.

424. Dairy Cattle Breeding
Spring. 4(2-4) ANS 461.
Application of population genetics to improving dairy cattle. Use of selection, aids to selection, and systems of mating to formulate breeding plans. Inheritance of economic traits. Breeding improvement programs.

433. Dairy Cattle Nutrition
Winter. 4(3-2) ANS 325.
Principles of ruminant nutrition and application to actual feeding practices in commercial dairy herds. Rumen fermentation as related to food utilization, milk production and milk composition.

444. Milk Secretion
Winter. 4(3-2) Interdepartmental and administered jointly with the Physiology Department.

445. Endocrinology and Reproduction of Farm Animals
Fall. 4(3-2) FSI 240. Interdepartmental and administered jointly with the Physiology Department.
Endocrine and reproductive systems are presented with emphasis upon characteristics which can be altered for economic benefit and upon causes, prevention, and treatment of endocrine abnormalities.

460. Special Problems
Fall, Winter, Spring, Summer. Variable credit. May re-enroll for a maximum of 10 credits. Approval of department.

471. Dairy Seminar
Spring. 1(1-0) Seniors.
Review and interpretation of information leading to successful operation of the dairy enterprise. Present day trends and problems. Introduction to evaluation and interpretation of scientific reports.

Winter. 3(4-0)
For course description, see Interdisciplinary Courses.

540. Topics in Dairy Science
Fall, Winter. Variable credit. May re-enroll for credit. Approval of department.
Topics from breeding, management, nutrition, or physiology, changing from term to term to include recent technical advances.

999. Research
Fall, Winter, Spring. Summer. Variable credit. Approval of department.

EARTH SCIENCE

See Geology.

ECONOMICS

College of Business

Courses are classified as follows:
Labor Economics and Industrial Relations—
305, 435, 456, 457.
Money and Banking—318, 322, 330.
International Economics—427.
Public Finance—406, 407, 408.
Price and Value Theory—324, 325, 426.
Income and Employment Theory—320, 322,
451, 452.
History of Economic Thought—421, 422.
Industrial Organization and Control—444, 445, 446, 448.

200. Introduction to Economics
Fall, Winter, Spring, Summer. 4(4-0)
Open to freshmen. Students may begin sequence with either 200 or 201.
Problem of unemployment; meaning and determination of national income; the multiplier; the accelerator; fiscal policy; deficit spending; monetary policy; banks creation of money; international aspects of the employment problems.

201. Introduction to Economics
Fall, Winter, Spring, Summer. 4(4-0)
Open to freshmen. Students may begin sequence with either 200 or 201.
Problem of resource allocation; price determination (demand, supply); applications to agricultural policy, diminishing returns; behavior of the firm (determination of quantity of output, hiring of factors); aspects of international trade.

210. Fundamentals of Economics
Fall, Winter. 4(2-0) MTH 215 or 228, or concurrently. Students may not earn credit in 210 if they have credit in either 200 or 201.
Introductory course in economic theory, employing mathematics, when useful, as a tool analysis. Covers consumer and business behavior, markets and the price system, income distribution, and elements of employment theory.

251I. Households, Firms and Markets
Fall. 5(4-0) Honors College students. Microeconomic theory and its applications to analysis and policy. Substitutes for 201, 324 and 355.

252I. Aggregative Economics and Public Policy

305. Industrial Relations and Trade Unionism
Fall, Winter, Spring, Summer. 5(5-0)
Development, aims, structure, and functions of labor and employer organizations. Their relation to economic, political, and legal institutions and their impact on society. Primary issues in collective bargaining.

318. Money, Credit and Banking
Fall, Winter, Spring. Summer. 4(4-0)
200 or 210.
Commercial banking and the money supply. The Federal Reserve System, the Treasury, and other financial institutions. Sources and uses of funds in the financial market.

320. Macroeconomics I
Fall, Winter, Spring. Summer. 3(3-0) 200 and 201 or 210.

321. Macroeconomics II
Fall, Winter, Spring. Summer. 3(3-0)
320.
Expansion of role of monetary factors in macroeconomic theory. Theories of economic growth and cycles. Study of macroeconomic problems of inflation, unemployment, and other current policy problems.

324. Microeconomics I
Fall, Winter, Spring. Summer. 3(3-0)
200 and 201 or 210.
Theory of production and cost. Theory of the firm under varying market structures.

325. Microeconomics II
Fall, Winter, Spring. Summer. 3(3-0) 200 and 201, or 210, and 324.

A-33
