483. Theatre Organization and Management
(433.) Fall. 3(3-1) 203, or approval of department. Administration, organization and philosophy of theatre.

485. Contemporary Scene Design
Winter. 4(3-0)
A survey of 20th Century design and designers.

499. Tour
Winter. 3(0-2) May re-enroll for a maximum of 8 credits. Approval of department. Limited to students participating in the touring program of the Department of Theatre.

499A. Readings in Special Theatre
Variable credit. May re-enroll for a maximum of 6 credits. Approval of department.

499B. Design Tutorial
Variable credit. May re-enroll for a maximum of 12 credits. Approval of department.

499C. Directing Tutorial
Variable credit. May re-enroll for a maximum of 12 credits. Approval of department.

500. Special Problems in Theatre History
Fall, Summer. 3(3-0) May re-enroll for a maximum of 12 credits. Approval of department. In-depth study in selected periods and topics in theatre history with primary emphasis upon research and scholarship.

501A. Dramatic Theory and Criticism: Pre-Aristotle to Neoclassic France
Fall. 4(4-0) Approval of department. Dramatic history, theory and criticism from Pre-Aristotle to Neoclassic France and an examination of the ideas about theatrical drama—how they have developed and how they have changed.

501B. Dramatic Theory and Criticism: Hobbes to Meredith
Winter. 4(4-0) Approval of department. A survey from Thomas Hobbes to George Meredith.

501C. Dramatic Theory and Criticism: Contemporary
Spring. 4(4-0) 801A, 801B, or approval of department. Contemporary theory and criticism including the application of critical theories and principles to the evaluation and analysis of dramatic literature.

503. Practicum in Theatre Arts
A. Acting
Fall, Winter, Spring, Summer. 3(0-4) May re-enroll for a maximum of 18 credits. Approval of department. Graduate practicum in acting.

B. Architecture and Design
Spring. 4(2-2) May re-enroll for a maximum of 8 credits. Graduate practicum in costume, scenery, lighting and architectural design.

C. Directing
Winter, Summer. 4(2-2) May re-enroll for a maximum of 12 credits. Approval of department. Graduate practicum in directing.

810. Introduction to Research Methods
Fall, Summer. 4(3-0)
Nature of graduate study and of research in the several areas of speech.

899. Research
Fall, Winter, Spring, Summer. Variable credit. Approval of department.

921. Readings in Theatre
Fall, Winter, Spring, Summer. Variable credit. May re-enroll for a maximum of 12 credits. Approval of department.

930. Seminar in Theatre
Fall, Winter, Spring, Summer. 3 credits. May re-enroll for a maximum of 12 credits.

999. Research
Fall, Winter, Spring, Summer. Variable credit. Approval of department.

UNIVERSITY COLLEGE

UC

499. Great Issues
Fall, Winter, Spring, Summer. 4(3-0) May re-enroll for a maximum of 12 credits if different topic is taken. Senior. Analysis and discussion of selected problems challenging the modern world. Those chosen for discussion are profound and persistent issues which cross conventional academic disciplines. A faculty team selected from the various colleges of the University gives the lectures and supervises discussions, readings and reports.

URBAN PLANNING AND LANDSCAPE ARCHITECTURE

College of Social Science

Urban Planning

UP

103. Design of Cities
Fall, Winter, Spring. 3(3-0)
Definition of planning, objectives and accomplishments of the urban designer; basic design principles of space, scale and circulation applied to the physical pattern of cities.

231. Evolution of Urban Communities
Fall, Spring. 3(3-0)
Basis for particular urban forms in urban settlements. Interrelationships of various cultural influences and theoretical urban concepts to contemporary communities in the United States and foreign areas.

232. Contemporary Urban Development
Winter. 3(3-0) 231 recommended. Current patterns, trends and problems indicated in the development and renewal of established urban centers and new urban growth.

233. The Role of Planning in Urban Development
Spring. 3(3-0) 231 recommended. Influence upon urban and regional development created by various types of governmental and private organizations.

243. Planning Communication
Fall, Spring. 3(2-2)
Development of planning materials using basic skills of graphic presentation, writing, and oral reporting. Methods of graphic analysis and reproduction will be emphasized.

311. Site Planning and Construction I
Winter. 5(3-6)
Elementary problems emphasizing physical development of specific sites involving population densities, architectural forms, grading, public utilities, traffic and parking, and functioning street patterns.

342. Research Methods in Planning
Winter. 5(5-0) 3T201.
Methods for investigation and analysis of urban phenomena; models, data and techniques used in mathematical, graphical and logical analysis.

351. Spatial Design
Fall. 5(3-4) 253, 243.
Urban community functional physical elements at various scales. Laboratory work on planning problems related to human activity flow, terrain and structures, including land subdivision design.

352. Urban Design Problems
Winter. 5(0-9) 351.
Application of the physical design processes from the scale of individual elements to complete community units in a two and three dimensional context.

363. Comprehensive Planning Process
Spring. 3(3-0) 233, 342.
Theory and application of coordinated planning for urban development, including policies and development plan formulation, programming, evaluation, review and revision of policies and plans.

400. Urban Development and Planning
Fall, Spring. 3(3-0)
Planning concepts and powers used to guide contemporary urban growth and alleviate common problems. Major topics will be the planning commission, comprehensive plan, zoning, land development, parks, school location.

431. International Housing Developments
Fall. 3(0-9)
Importance and types of governmental housing programs in reference to urban design, financial policies and land issues. Projects and programs selected primarily from underdeveloped countries.
433. Man and His Shelter
Fall, Spring. 3(3-0) Interdepartmental with the Human Environment and Design Department.
Interdisciplinary approach to man and his shelter; role of shelter in the community, housing as a cultural, economic, and institutional force; future developments and needs.

461A. Comprehensive Planning
Fall. 4(0-8) 461A.
Collection, synthesis and analysis of planning information in a developed urban area and region. Formulation of comprehensive physical development policies and plans and implementation programs.

461B. Comprehensive Planning
Winter. 4(0-8) 461B.
Continuation of 461A.

461C. Comprehensive Planning
Spring. 4(0-8) 461B, 471.
Continuation of 461B.

471. Ecological Basis for Planning
Fall. 3(3-0) Seniors.
Ecological principles, relationships and interaction between natural and man-made elements of the environment; critical review of environmental planning projects at local, state and national levels.

472. Urban Development Regulation
Winter. 3(3-0) Seniors.
Public and private regulations basic to regulations influencing urban development; state enabling legislation and regulations, local ordinances, especially for zoning and subdivision regulations.

473. Urban Development Programs
Spring. 3(3-0) 472.
Governmental programs influencing urban development, including direct development projects, technical and financial assistance, administrative regulations by federal and state agencies. National, state and regional programs.

800. Special Problems
Fall, Winter, Spring, Summer. Variable credit. May re-enroll for a maximum of 15 credits. Approval of school.

801. City and Regional Design
Practical application of city and regional planning theory and principles to specific and representative case studies. Work will include field research, design analysis, and presentation of workable recommendations as to appropriate objectives and actions for solutions.
A. Urban Design
Winter. 6 credits. Approval of school.
Design projects for functions relating to selected community activities. Commercial, industrial, residential, institutional, and transportation land uses will be utilized for design study in appropriate dimensions.
B. Metropolitan Regions
Spring. 6 credits. 471 and approval of school.
Selected problems of metropolitan functions of present and future significance. Intra and inter-regional relationships of primary functional import, such as, open spaces, economic development, community patterns, transportation, and associated land uses.
C. Urban Renewal and Development
Summer. 6 credits. 422 or 433 and approval of school.
Measurement of urban obsolescence and deterioration with accompanying analysis of symptoms and causes for a selected community. Comprehensive plan for urban renewal and development objectives will be developed and one or more project areas will be studied and processed in planning practice. Focus on the development of effective techniques and administrative procedures. Emphasis to be placed on the objective of unified, revitalized community development.

582. Urban Planning Methods
Fall. 4(4-0)
Basic research and survey methods, and procedures used by the professional planner in developing a comprehensive plan.

583. Spatial Design
Fall. 4(0-8)
Studio course emphasizing the role of planning in shaping the process of urban growth and development, and the role of physical form and structure in influencing man's cultural patterns.

810. Planning Theory
A. Theory of the Planning Process
Winter. 3(3-0) Approval of school.
Influence of schools of thought, planning as a decision-making process, methods for defining goals in public and private programs, and the role of planning in formulating public policies.
B. Theories of Urban Forms and Functions
Spring. 3(3-0) Approval of school.
Idealized urban forms, theories and models in urban form as it relates to function and location of urban activities.

812. Application of the Social Sciences in Urban Planning
Spring. 3(3-0) Non-majors: approval of school.
Evaluation of social science concepts, methods, and knowledge on the basis of their implications in shaping the process of urban growth and development. Participation by faculty and graduate students from appropriate Social Sciences and Urban Planning.

813. An International Comparative Study of Urban Planning
Winter. Spring. 3(3-0)
Urban growth patterns; types, roles and design theory of new cities; techniques and organization for urban growth, selection of selected areas will be made according to the class composition.

820. Research Methods
Fall. 3(3-0) 340 or 400 and approval of school.
Examination of research methods useful in application to components of urbanization as population, land use, housing, business facilities, industrial development, traffic, recreation, and critical aspects of community structure.

223. Graphic Communication
Fall, Winter, Spring. 3(1-4)
Development of basic graphic skills as used on drawings in the professional practice of landscape architecture including design, lettering, and graphic presentation techniques.

242. Introduction to Site Design
Fall. Spring. 4(1-6) 101, 123, 124.
Basic considerations in site development including topography and ground form design, orientation, circulation, the design process, environmental design vocabulary, site analysis components, and projects incorporating these factors. Field trips required.
254. Architectural Design  
Fall, Winter. 4(1-6) 101, 123, 124, 141.
Lectures, discussion, assigned readings and studio projects in architectural design, with emphasis on elementary structures and their sites.

255. Architectural Design  
Spring. 4(1-6) 242, 254.
Continuation of 254 emphasizing more complex structural systems and grouping of buildings.

317. Planting Design  
Fall, Winter. 3(1-4) 242. II 211, 219.
Planting design emphasizing plants as elements in landscape design, their ecological requirements, their arrangement in the landscape, and the basic requirements of a planting plan.

330. Design Implementation I  
Fall, 3(1-4) 242, MTH 169, C 125.
Basic principles and computation methods involved in site construction and the preparation of contract drawings pertinent thereto with emphasis on ground forms, slopes and grade cuts, run-off, road alignment, walls and earth work.

331. Design Implementation II  
Winter. 4(1-6) 330, 343.
Continuation of 330 with the further study of contractual documents including bidding procedures, the preparation of a set of construction drawings for the development of a small site, specifications and the construction process.

332. Design Implementation III  
Spring. 3(3-2) 331, 344.
Construction materials, their proper use, job supervision and office practice.

Environmental Design Concepts  
434.
Basic concepts in landscape design emphasizing the design process and conceptual thinking toward improving the quality of man's physical environment.

344. Site Design for Housing  
Winter. 4(1-6) 347.
Low, medium and high-density developments for housing shelter including the design of subdivisions and related facilities, and developments for apartments, townhouses, condominiums, and mass-produced units.

345. Site Planning for Recreational Facilities  
Spring. 4(1-6) 331, 344.
Techniques of analysis and design for outdoor recreational facilities such as playgrounds, parks and parks, golf courses, waterways and facilities for athletics. Field trips required.

402. History of Environmental Development  
Winter. 4(1-6) 347.
Analysis of man's attempts to organize and design outdoor space, emphasis on major influences, people and historical landscape styles and movements.

421. Bibliographic Research and Methods in Environmental Design  
(417). Fall. 4(2-2) Senior majors.
Research into published information in environmental design: abstraction of data; synthesis into oral and written presentations.

430. Special Projects in Environmental Design  
480. Summer. 5(2-6) 318, 332, 345.
The improvement of man's physical environment as taught by a sequence of highly regarded professional practitioners and educators in the environmental design profession.

440. Graphic Communication  
Fall. 3(0-6) Bachelor of Science in Landscape Architecture.
Development and perfection of individual delineation techniques as applied to landscape design projects.

445. Design Theory and Implementation—Natural Materials  
Fall. 3(0-6) Bachelor of Science in Landscape Architecture.
Designs, working drawings and specifications related to the use of vegetation and other natural materials on various projects in a wide range of scales.

466. Site Planning for Urban Areas  
Fall. 5(2-6) 318, 332, 345.
Lectures, readings, and laboratory projects concerning site planning for public and quasi-public urban buildings and spaces, including central business districts, malls, plazas, and college and university campuses. Field trips required.

477. Advanced Landscape Design  
Winter. 5(2-6) 448.
Lectures, readings and laboratory assignment on a variety of landscape design projects. A personal biographical dossier and portfolio, based on previous landscape architectural courses, is required from each student as collateral.

488. Terminal Project in Design  
Spring. 5(2-6) 332, 447.
Completion of a design project, selected by the student and approved by the School, with report, simulation of professional office practice, and demonstrating proficiency in beginning levels of professional landscape architecture. This involves the preparation of a set of drawings, including site design, planting design, construction, rendering and sketching.

450. Architectural Design  
Winter. 4(0-6) Bachelor of Science in Landscape Architecture.
Lectures, discussions, assigned readings, written reports, and studio projects in architectural design, emphasizing complex architectural planning, form structure and site relationships.

455. History of Landscape Design  
Winter. 3(0-6) Bachelor of Science in Landscape Architecture.
Significant movements, personalities, and projects in landscape design, from ancient to contemporary times, with emphasis on the development of the current practice of landscape architecture.

460. Research Methods  
Winter. 3(0-6) Bachelor of Science in Landscape Architecture.
Review of traditional and proven research methods in the physical and social sciences utilizing representative case studies as applied to environmental considerations.

485. Seminar  
Spring. 3(3-6) Bachelor of Science in Landscape Architecture.
Professional philosophy of landscape architecture; the social responsibility of the landscape architect; administrative processes and methods essential for effective professional practice.

470. Design Theory and Implementation—Construction  
Spring. 3(2-0) Bachelor of Science in Landscape Architecture.
Comprehensive site projects involving construction plans, working drawings, contract documents, cost estimates and office practice.

475. Comprehensive Design  
Fall, Winter, Spring. 4(0-8) Must be repeated for a total of twelve credits. Bachelor of Science in Landscape Architecture.
Studio projects and discussions emphasizing the synthesis of landscape architectural principles and related disciplines as applied to a wide range of design scales and sites in both urban and regional contexts.

490. Special Problems  
Fall, Winter, Summer. 2 to 5 credits. May re-enroll for a maximum of 8 credits. Approval of school.
Investigation for advanced undergraduate students in landscape architecture, developed from special interest areas.

801. Graduate Landscape Architecture I  
Fall, Winter, Spring, Summer. 5 to 12 credits.
A series of complex problems of variable subject matter adjusted to the interests and needs of each individual student and designed to emphasize the various phases of landscape architecture such as plant materials and planting design, drafting and delineation, surveying and construction, contracts, specifications and reports, architecture and city planning and landscape design.

802. Graduate Landscape Architecture II  
Fall, Winter, Spring. 3(5-2) 5 to 12 credits. 801.
Continuation of 801.

803. Graduate Landscape Architecture III  
Fall, Winter, Spring. 5 to 12 credits. 802.
Continuation of 802.

804. Comprehensive Problem  
Fall, Winter, Spring. 801. May re-enroll for a maximum of 15 credits. 803.
Development of a terminal, creative project of subject matter selected by the student and approved by the department, involving the various phases of landscape architecture and submitted to the faculty as evidence of his mastery of the principles of his profession.
