475. Introduction to Operations Research
Winter. 4(4-0) MTH 215, CFS 120.
Interdepartmental with Systems Science.
Methodology and basic concepts of operations research, formulation and analysis of probabilistic models of inventory, waiting line, and reliability processes; random process simulation and network planning models.

476. Food Process Engineering
Spring of odd-numbered years. 4(3-2)
Description and analysis of systems utilized in processing of foods for human consumption.

481. Soil and Water Engineering
Spring of even-numbered years. 4(3-2) M E 332 or E E 321.
Engineering analysis, design and construction of drainage, irrigation and erosion control systems.

493. Energy Conversion Systems
Spring. 4(3-2) M E 311.
Principles of energy conversion with emphasis on the internal combustion engine. Thermodynamic analysis, performance characteristics, and power transmission.

494. Systems of Agricultural Machines
Spring of even-numbered years. 4(3-2) M E 355.
Systems of machines used in field and farmstead operations. Engineering principles for machines dealing with biological materials.

804. Agricultural Mechanization in Developing Countries
Spring. 3(3-0) Approval of department.

805. Environmental Measurements
Fall. 3(2-2)
Methods and techniques for accurate measurement and interpretation of environmental parameters. Temperature, humidity, wind and air flow characteristics, radiation, light intensity, gaseous and particulate concentrations in atmospheric micrometeorologists will be discussed.

811. Technical Problems
Fall, Winter, Spring, Summer. 1 to 4 credits. May re-enroll for a maximum of 9 credits.

812. Bio-Processing Engineering
Winter. 3(3-0) Approval of department.
Topics will be presented pertaining to thermodynamics, heat and mass transfer, thermal processing, fluid flow, dehydrogenation and freeze drying of biological products or biological processes.

814. Physical Properties of Agricultural Products
Winter. 3(3-0) Approval of department.
Physical and mechanical behavior of fruits and vegetables, forages, grains and other agricultural products under constant and dynamic loading. Relative to design parameters for production, handling and processing machinery.

815. Instrumentation for Agricultural Engineering Research
Fall. 3(3-0)
Theory, method and techniques of measuring temperature, pressure, flow, humidity, and moisture for biological materials. Associated recording and indicating equipment.

820. Research Methods in Agricultural Engineering
Fall. 1(1-0)
Discussion of procedures for initiating, developing, carrying out, and completing research projects.

822. Seminar
Spring. 1(1-0)

840. Advanced Power and Machinery
Spring. 3(2-2) 493, 494.
Analysis of agricultural machine components and systems. Emphasis on hydraulic power transmission, controls, and management of machinery systems.

899. Research
Fall, Winter, Spring, Summer. Variable credit. Approval of department.

990. Advanced Topics in Agricultural Engineering Seminar
Fall, Winter, Spring. 3(3-0) May re-enroll for a maximum of 8 credits. Approval of department.
New developments in agricultural engineering. Subjects to be covered include atmospheric turbulence, optimization of agricultural systems, measurement systems, food engineering, and agricultural technology.

999. Research
Fall, Winter, Spring, Summer. Variable credit. Approval of department.

AGRICULTURE AG

College of Agriculture and Natural Resources

275. Exploring International Agriculture
Spring. 3(3-0) Interdepartmental with Natural Resources.
Exploration of overseas assignments with international agencies; potential world food actualities and potentialities; special problems of the tropics compared with those in temperate regions.

401. Agriculture and Natural Resources Communications Internship
Fall, Winter, Spring. Summer. 1 to 6 credits. May re-enroll for a maximum of 6 credits. 401, approval of college.
Internship with professionals in communications field with emphasis on student's area of interest—writing, radio, TV, publications, etc.

402. Agriculture and Natural Resources Communications Internship
Fall. 3(3-0) Advanced undergraduate or graduate students from countries other than the United States or Canada.
Orientation courses for overseas students. Development of United States agriculture. Institutions serving agriculture with emphasis on Land Grant University system. Scientific developments and their impact on agriculture. Field trips.

462. Rural Transformation in Developing Societies
Fall. 3(3-0) FAM 201 or EC 201; FAM 250 recommended. Interdepartmental with Public Affairs Management and Food System Economics and Management and administered by the Department of Agricultural Economics.
Traditional agricultural systems and the incentive environment for economic growth in rural areas. Adjustment to technological, institutional and human change. Strategies for rapid agricultural transformation.

475. International Studies in Agriculture and Natural Resources
Summer. 3 to 9 credits. Approval of the college. Interdepartmental with Natural Resources.
Study-travel experience emphasizing contemporary problems affecting agriculture in the world, national, and local communities. Field trips, case studies, interviews with leading experts, government officials, community leaders. Supervised individual study.

Winter. 3(4-0)
For course description, see Interdisciplinary Courses.

585. Rural Development Administration I
(802.) Winter. 3(2-2) Approval of department. Interdepartmental with and administered by the Department of Agricultural Economics.
Administrative concepts and their application in the analysis of the processes and structures through which agricultural and rural development activities are formulated and implemented in less developed countries.

880. Soils and Land Use in Tropical and Subtropical Regions
Spring. 3(3-0) Approval of department. Interdepartmental with and administered by Soil Science.
Problem oriented studies of soils and land use in the tropics and subtropics in relation to their genetic, morphology, taxonomy, and management.

AMERICAN STUDIES AMS

College of Arts and Letters

301. Issues in American Civilization
Fall, Winter, Spring. 3(3-0) May re-enroll for a maximum of 6 credits. Not applicable to major requirements.
Selected issues in American life past and present. Materials drawn from such disciplines as history, social sciences, philosophy, literature and the arts. Topics vary.
