803. Historiography
Fall, Winter, Spring. 3 credits.
Readings, discussions and written exercises designed to introduce the beginning graduate student to the problems, methods, and techniques of historical research. Examination of the major approaches to history. Discussion of student to the problems, methods, and literary style. A section of the course will be arranged for the study of European history materials and a section for the study of American history materials.

804. Readings in American Civilization
Fall, Winter, Spring. 3 credits.
Readings, discussions and written projects designed to improve the competence of the high school teacher in the major themes of American history. Intensive teaching approaches. Students will read widely in major themes and prepare an essay on a significant problem or topic.

806. Readings in Non-Western Civilizations
Fall, Winter, Spring. 3 credits.
Readings, discussions and written projects designed to introduce the student to the major approaches to history. Discussion of student to the problems, methods, and techniques of historical research. Examination of the major approaches to history. Discussion of student to the problems, methods, and literary style. A section of the course will be arranged for the study of European history materials and a section for the study of American history materials.

819. Readings in Latin-American History
Fall, Winter, Spring. 4 credits.

821. Readings in Seventeenth and Eighteenth Century American History
Fall, Winter, Spring. 4 credits.

822. Readings in Nineteenth Century American History
Fall, Winter, Spring. 4 credits.

823. Readings in Twentieth Century American History
Fall, Winter, Spring. 4 credits.

824. Interdisciplinary Seminar on Africa
For course description, see Interdisciplinary Courses.

848. Readings in English History
Fall, Winter, Spring. 4 credits.

852. Readings in Ancient History
Fall, Winter, Spring. 4 credits.

853. Readings in Medieval History
Fall, Winter, Spring. 4 credits.

854. The Emergence of Commercial Capitalism
Winter of odd-numbered years. 3 credits. EC 318, 324. Interdepartmental with and administered by the Economics Department. The rise of the mercantilist economies of Europe with stress on the growth of internal and international trade and finance during the 16th and 17th century.

855. The Industrial Revolution in Europe
Winter of even-numbered years. 3 credits. EC 319, 324. Interdepartmental with and administered by the Economics Department. The preconditions that led to the momentous changes in agriculture and industry in Europe from 1700-1914.

857. Readings in Renaissance and Reformation
Fall, Winter, Spring. 4 credits.

863. Readings in Early Modern European History
Fall, Winter, Spring. 4 credits.

864. Readings in Recent European History
Fall, Winter, Spring. 4 credits.

867. Readings in Russian History
Fall, Winter, Spring. 4 credits.

873. Readings in the History of International Relations
Fall, Winter, Spring. 4 credits.

894. Readings in African History
Fall, Winter, Spring. 4 credits.

897. Readings in Asian History
Fall, Winter, Spring. 4 credits.

996. The Teaching of History in College
Fall, Winter, Spring. 1 credit. May re-enroll for a maximum of 3 credits. Approval of department. Open only to teaching assistants in history. Supervised direction in the preparation and conduct of teaching assignments.

999. Research
Fall, Winter, Spring. Variable credit. Approval of department.

HISTORY OF ART
See Art

HORTICULTURE

College of Agriculture and Natural Resources

201. Fruits, Vegetables, and Ornamental Plants for Outdoor Home Plantings
Spring. 3(2-2)
Principles and practices used in producing fruits, vegetables, flowers, trees, shrubs and vines in small gardens, containers, and the home landscape. Indices for edible quality of home grown fruits and vegetables.

211. Landscape Plants I
Fall. 4(1-6)
Adaptation, identification, and evaluation of narrow-leaved evergreens, deciduous shrubs and trees, and woody vines, as they are used in the landscape. Emphasis is placed on the seasonal interest of the plants studied.

212. Landscape Plants II
Spring. 4(1-6)
Continuation of 211. Additional emphasis on the flowering characteristics of both deciduous and broad-leaved evergreen shrubs, trees and vines.

320. Commercial Fruit Production
Fall. 4(3-2-1) Juniors.
Commercial production of principal tree fruit crops of Michigan with emphasis on planting, soil management, fertilization, pruning, thinning, and grafting.

323. Indoor Plants and Flowers
Fall, Winter, Spring. 3(1-4) Not open to horticulture majors. Identification, culture, propagation and sale of plants for homes, schools, offices and public buildings; principles of flower arrangement, construction of dish gardens and hanging baskets, and the forcing of bulbs.

324. Mass Merchandising Ornamental Plants
Spring. 3(1-3) 211 or 212.
History of merchandising ornamental plants; types of garden centers, impact of cultural information and labeling on consumer. The manager, advertiser, and buyer decision making process. One day field trip required.
325. Ornamental Plant Management
Spring. 4(3-2) 211 or 212.
Transplanting and maintenance of landscape plants subject to stresses of urban environment. Development of annual maintenance specifications. Identification and evaluation of herbaceous annuals, biennials and perennials for landscape.

330. Special Topics in Horticulture
Fall, Winter, Spring, Summer. 1 to 9 credits. May re-enroll for a maximum of 18 credits. Approval of department. Special study: independent research, floral design, retail flower store and greenhouse management, and horticultural therapy.

350. Floral Design
Spring. 2(0-4) Junior majors and approval of department. Principles of floral design and the care and handling of materials. Creation of corsages, terraria, tropical planters, and home, hospital and society arrangements.

402. Principles of Weed Control
Fall. 3(3-2) Juniors. Interdepartmental and administered jointly with Crop Science. Comprehensive study of principles underlying weed control practices, and factors involved in both mechanical and chemical control.

405. Principles of Plant Breeding
Spring. 4(3-2) CSC 250. Interdepartmental and administered jointly with Crop Science. Application of genetics and other sciences to breeding and improvement of agronomic and horticultural crops.

411. Fruit and Landscape Crop Physiology I
Fall. 4(3-3) Juniors. Physiological effects of moisture and nutritional environments related to fruit crops and woody perennial plants.

412. Fruit and Landscape Crop Physiology II
Winter. 4(3-3) Juniors. Physiology of flowering and fruit development in woody plants.

416. Handling and Storage of Horticultural Crops
Winter. 4(4-9) Juniors. Biological principles involving physical movement of fresh products from farm to consumer; physiological processes affecting maturity, quality and condition; selection and use of handling, storage, and transport facilities.

417. Controlled Plant Environment
Fall. 3(3-0) BOT 301 or 414. Control of greenhouse environment and its effect on growth and production of horticultural crops.

418. Controlled Plant Environment Laboratory
Fall. 1(0-3) 417 or concurrently. Experiments in the morphology and physiology of greenhouse crops. Crop production and the use of greenhouse equipment.

419. Small Fruits
Winter. 3(3-3) Juniors. Production, culture, utilization and physiology of strawberries, grapes, blueberries and raspberries.

421. Principles of Plant Propagation
Winter. 4(3-2) Juniors. Principles of plant propagation by seed, cutting, layering, and grafting; scion and stock relationship; stocks for fruit and ornamental plants; practices employed by nurseries in propagation of plants.

424. Pesticide and Growth Regulating Chemicals for Horticultural Crops
Spring. 3(2-2) Juniors. Spray and dust equipment and application; pesticide and growth regulating chemicals, their use in the growing of horticultural crops, and influence on the physiology of the plant.

432. Vegetable Crop Physiology
Spring. 4(3-2) Juniors. Physiological principles involved in and related to the production of high quality vegetables.

433. Greenhouse Cut Flower Production
Winter of even-numbered years. 4(3-2) May re-enroll for a maximum of 8 credits. Principles of flower crop physiology; includes control of environmental conditions; and emphasizes the management of cut flower production.

434. Greenhouse Container-Grown Plant Production
Winter of odd-numbered years. 4(3-2) or approval of department. Principles of flower crop physiology; includes control of environmental conditions and emphasizes the management of container-grown plant production.

440. Nursery Management
Fall. 3(3-2) Management practices employed by wholesale, retail and landscape nurseries. Field trips to nurseries required.

507. Physiology of Horticultural Crops I
Fall. 4(3-2) BOT 415. Physiology of plant organs and tissue development, sexual reproduction, rooting, bulb growth and development and grafting of horticultural crops.

508. Physiology of Horticultural Crops II
Winter. 4(3-2) BOT 415. Physiology of juvenility, flowering and fruiting of herbaceous and woody plants, senescence and bulb and seed dormancy as related to horticultural crops.

509. Physiology of Horticultural Crops III
Spring. 4(3-2) BOT 415. Physiology of abscission, winter hardiness, water and nutrient relations, crop productivity and problems concerned with crop production.

825. Post Harvest Physiology
Spring. 4(3-2) Biochemical and biophysical changes associated with the maturation, ripening and senescence of harvested horticultural plants.

830. Advanced Horticultural Studies
Fall, Winter, Spring, Summer. Variable credit. Approval of department.

999. Research
Fall, Winter, Spring, Summer. Variable credit. Approval of department.

HOTEL, RESTAURANT AND INSTITUTIONAL MANAGEMENT

College of Business

102. Introduction to the Service Industries
Fall. 3(3-0) Management careers and opportunities in hotel, motel, food service, health facilities, club, recreational centers, tourism and other public hospitality businesses. Includes front office practice. Local field trip required.

235. Service Industries Equipment and Utilities
(335.) Fall, Winter. Summer of even-numbered years. 4(4-0) MTH 108. Engineering in food and lodging industry, emphasizing utilities, machinery characteristics and environment.

245. Food Production Science
Fall, Spring. 4(4-0) HNF 100 Interrelationships of the physical, biological and chemical principles relevant to the food service industry.

261. Dimensions of Tourism
Fall, Winter. Summer of odd-numbered years. 4(4-0) EC 301. Forces which influence the international and domestic hospitality, leisure, travel and recreation industries. Socio-economic models and measurement of regional impact, demand and supply.

265. Food Production Standards
Fall, Spring. 4(4-0) 245. HSF 100. Interrelationships of the environmental, microbiological and physiological principles relevant to the food service industry.
