POULTRY SCIENCE P S

College of Agriculture and Natural Resources

224. Poultry Science and Practice
Winter, Spring. 4(3-2)
Poultry in the agricultural economy, fundamental principles of anatomy, physiology and body systems, diseases, their prevention and control, management practices and procedures in producing poultry meat and eggs.

301. Special Problems
Fall, Winter, Spring, Summer. Variable credit. Approval of department. Studies in any of the following: avian genetics, management, physiology, other areas of poultry science.

413. Avian Nutrition
Fall. 4(3-3) ANS 325.

424. Poultry Breeding and Incubation
Winter of even-numbered years. 4(3-2) ANS 461.
Genetic and biological factors affecting economic characteristics including egg production, egg size, hatchability, growth and viability and factors involved in the hatching of eggs.

435. Poultry Industry-Management and Marketing
Spring of even-numbered years. 5(4-2)
Approval of department. Practical application of economic and management principles to commercial poultry enterprises.

440. Avian Physiology
Spring of odd-numbered years. 4(3-3) Approval of department. Interdepartmental and administered jointly with the Physiology Department. A survey of the systemic physiology of birds emphasizing digestion, metabolism, the endocrines, and reproduction.

454. Avian Disease Prevention and Treatment
Winter of even-numbered years. 4(3-2) MPR 200 or B S 312 or approval of department. Microbiological concepts; causes, preventive and therapeutic methods for poultry diseases, laboratory diagnosis and experiments.

ICD. The Impact of Animal Resource Management Upon the World's Developing Nations
For course description, see Interdisciplinary Courses.

800. Advanced Poultry Special Problems
Fall, Winter, Spring, Summer. Variable credit. Approval of department. Studies in any of the following: avian genetics, management, nutrition, physiology, other areas of poultry science.

899. Research
Fall, Winter, Spring, Summer. Variable credit. Approval of department.

160. Introductory Psychology: Social-Personality
Fall, Winter, Spring, Summer. 3(3-0)
The complex functioning of the individual in his social environment will be considered. Topics include: socialization, interpersonal perception, group processes, motives, emotions, attitudes, and values. Students may participate in psychological experiments outside of class.

161. Topics in Introductory Psychology: Social-Personality
Fall, Winter, Spring, Summer. 2(2-0)
A small enrollment discussion class for students enrolled in 160 who are interested in discussing a particular psychological topic in depth. A number of different sections will be offered, each discussing a different topic.

170. Introductory Psychology: General
Fall, Winter, Spring, Summer. 4(4-0)
Principles underlying the behavior of humans and animals. Topics include sensation, emotion, motivation, learning, sensation, and perception. Students may participate in psychological experiments outside of class.

215. Introduction to Psychological Measurement
Fall, Winter, Spring, Summer. 4(3-2)
160 or 170. Psychology as a quantitative discipline; graphical presentation and interpretation; psychological data in various content fields; methods of summarizing behavioral data; samples, populations and probability in psychological research; hypothesis testing.

225. Psychology of Personality
Fall, Winter, Spring, Summer. 3(3-0)
160 or ED 200 or Sophomores with approval of department. Application of psychological principles to an introductory understanding of personality and interpersonal adjustments; social motivation, frustration, conflicts, and adjustment mechanisms; theories of adjustment, the assessment of personality, problems of mental hygiene and some theories of psychotherapy.

245. Introduction to Child Psychology
Fall. Winter, Spring. Summer. 4(4-0)
160 or ED 200 or Sophomores with approval of department. Psychological development of the child; genetic, prenatal and postnatal influences; infancy, prescholl and school age periods; relations with parents and peers; social, emotional and intellectual development.

246. Sensitivity to Children I
Fall. 3(3-1) Sophomores and three credits in psychology. Three-term sequence emphasizes supervised weekly play with a child and an analysis of taped recordings. Readings and discussions cover problems faced by child therapists, teachers, and parents.

247. Sensitivity to Children II
Winter. 3(3-1) 246. Continuation of 246.

248. Sensitivity to Children III
Spring. 2(2-1) 247. Continuation of 247.

255. Organizational and Personnel Psychology
Fall, Winter, Spring, Summer. 3(3-0)
Introductory course in psychology. The psychology of managing and leading, personnel operations, and the humanizing of work organizations.
301. Human Learning and Memory
Winter, Spring, Summer. 4(4-0) 170 or 215.
Concepts, procedures, issues, and principles involved in the acquisition, retention, and execution of verbal learning, identification learning, and perceptual-motor skills.

302. Human Learning and Performance
Winter, Spring, Summer. 2(2-0) 170, 215; 201 concurrently.
Representative demonstrations, exercises, and experiments concerned with the acquisition, retention, transfer, and execution of verbal learning, identification learning, and perceptual-motor skills.

304. Physiological Psychology
Fall, Spring. 3(3-0) One course in experimental psychology and one elementary course in zoology, biology or physiology.
Physiological mechanisms underlying basic behavioral processes, including sensation, emotion, motivation, and learning.

308. Psychology of Thinking
Winter, 3(3-0) 170, or ED 200. 215; one additional course in experimental psychology recommended.
Principal concepts, theories and research on cognitive process and thinking, including problem solving, creative and critical thinking, reasoning, and concept formation. Experimental analysis, individual differences and information-processing approaches.

310. Sensation and Perception
Fall, Winter, Spring. Summer of even-numbered years. 3(3-0) 170; 215; 311 concurrently.
Concepts, issues and principles in the areas of sensation and perception.

311. Experimental Psychology: Sensation and Perception
Fall, Winter, Spring. Summer of even-numbered years. 3(3-0) 170; 215; 310 concurrently.
Representative experiments and demonstrations in the areas of sensation and perception.

312. Learning and Motivation
Fall, Winter, Spring. Summer of odd-numbered years. 3(3-0) 170, 215; 313 concurrently.
Detailed analysis of basic conditioning processes such as reinforcement, discrimination, generalization, punishment, aversive behavior, and theories of learning. Emphasis on infrahuman data, but applications to human behavioral modification are considered.

313. Experimental Psychology: Learning and Motivation
Fall, Winter, Spring. Summer of odd-numbered years. 3(3-0) 170, 215; 312 concurrently.
Representative experiments in operant behavior, including an individual project selected by the student, using the pigeon as the laboratory animal.

315. Psychometric Methods
Fall, Winter, Spring, Summer. 3(3-2) 215 or approval of department.
Applications of statistical methods and techniques to psychological data in relation to theories, hypotheses, assumptions and interpretation.

325. Traits and Abilities
Spring. 3(3-0) 215.
Ways in which individuals differ in personality, theories, methods, and techniques for understanding and studying personality organization and structure in relation to causation and prediction.

335. Principles of Social Psychology
Fall, Winter, Spring, Summer. 4(4-0) 160.
Special topics not to earn credit in both 335 and SOC 251.
A critical survey of social psychology with emphasis on psychological principles underlying social behavior. Topics include social perception; motivation; attitudes and attitude change; social interaction in small groups and in large-scale organizations.

336. Psychology of Social Movements
Fall, Spring. 3(3-0).
Psychology of political, religious, and other social movements; group identifications and affiliation, socialization, conversion, and defection; the perception of social movements by members; influences of motivation and personality on ideologies and social movements.

337. Legal and Criminal Psychology
Fall, Winter, Spring. 3(3-0) 160 or ED 200.
Application of psychological principles, methods and techniques to legal and criminal problems and procedures, including the formation, detection, prevention, and rehabilitation of criminal behavior, testimony, legal arguments, trial tactics and the other courtroom procedures.

348. Adolescent Psychology
Winter, Spring, Summer. 3(3-0) 245.
Continuation of 245 covering development and maturation during adolescence, with emphasis on problems of the adolescent's adjustment to his personal and social environment.

356. Psychology of Human Relations in Work Setting
Fall, Winter, Spring. 3(3-0) 255.
Preventing and solving problems among individuals and groups in work organizations; psychological and legalistic approaches compared; illustrations mainly from United States but also from other cultures at appropriate.

357. Psychology of Advertising and Selling
Winter, Spring. 3(3-0) An introductory course in psychology.
Psychology underlying techniques of effective advertising, selling, and marketing and, at the same time, psychology relevant to living in a marketing-oriented culture.

370. Psychology and Social Innovation
Winter. 3(3-0) A social science research methods course or approval of department.
Planning, implementing and evaluating experimental approaches to social problems. Topics include: adoption of innovations; field research problems; science and policy formulation; parameters of program evaluations.

390H. Honors Seminar
Fall. 3(3-0) Juniors or approval of department.
Review of research areas in psychology to focus students' interests. Preparation for the senior project.

400H. Honors Work
Fall, Winter, Spring, Summer. 3 to 5 credits. May re-enroll for 4 terms. Approval of department.
Seminars in advanced psychological topics, including both factual data and theoretical concepts. Topics include perception, learning, motivation and personality.

401. Experimental Psychology: Perception
Winter. 4(3-4) 215, 310, 311.
Critical examination of problems, principles, methods, techniques, materials, results and conclusions in relation to theory in studies of perception, including experimentation and demonstrations.

403. Experimental Psychology: Human Learning
Fall, Winter, Spring. 4(3-2) 215; 302 or approval of department.
Critical examination of problems, principles, methods, techniques, materials, results and conclusions in relation to theory in studies of human learning, including experimentation and demonstrations.

404. Experimental Psychology: Problem Solving
Spring. 4(4-0) 215 and 308, or approval of department.
Investigations of problem solving, concept formation and judgement; class and individual experiments.

405. Modern Viewpoints in Psychology
Fall, Winter, Spring. 4(4-0) 310 or 312.
Survey of psychological systems in the modern era including behaviorism, Gestalt psychology, psychoanalysis, neo-behaviorism in relation to other selected disciplines.

406. Psycho-ethology
Spring. 4(4-0) Six credits of psychology or ZOOL 412 or 413.
Comparative and ethnological methods and their application to behavior with emphasis on animals other than humans. Review of research on innate behavior, early experiences, learning, motivation, and physiological processes.

409. Advanced Concepts in Physiological Psychology
Fall, Winter, Spring. 4(4-0) 304 or approval of department.
Detailed analysis of advanced concepts in physiological psychology, such as vision, audition, somatic sensation, chemical senses, motivation, emotion, perception, arousal, learning, and the influence of hormones on behavior.

414. Psycholinguistics
Fall, Spring. 4(4-0) 310 or 312.
Psychological processes underlying meaning, control of verbal behavior, language learning in children and adults, bilingualism, verbal aptitude, and verbal habits in learning and perception.
415. Psychological Tests and Measurements
Fall, Winter, Spring. 3(3-0) 215.
Survey of methods, techniques and instruments for measuring individual differences in behavior; some representative methods of test construction, a critical analysis of representative test criteria for evaluating and selecting tests, values and limitations of tests, laboratory experience with tests.

425. Abnormal Psychology
Fall, Winter, Spring, Summer. 4(4-0) 225.
Nature of abnormal behavior and its social significance; description of symptoms and dynamics of psychological disorders; the neuroses and psychosomatic reactions; sociopathic behavior and character disorders; functional and somatogenic psychoses; some consideration of stress and anxiety, response set, cognitive styles, aggression. Emphasizes experimental techniques.

426. Survey of Clinical Psychology
Fall, Winter, Spring, Summer. 3(3-0) 226.
Clinical psychology, types of problems; diagnostic instruments, methods and techniques; individual and group therapeutic theories, methods and techniques; professional roles for clinical psychologist.

427. Personality: Dynamic Theories
Fall, Winter, Spring. 3(3-0) 425.
Survey of personality theories of development, structure, and dynamics related to learning, determinants, cultural influences, behavioral disorders and assessment methods.

428. Psychology of Physical Disability
Spring. 3(3-0) 425.
Psychological problems, principles and practices in physical disabilities and handicaps; psychological assessment and diagnosis; counseling and placement; re-education and retraining; attitudes, motivations, and emotion; psychological rehabilitation and adjustment.

430. Experimental Psychology: Personality
Fall, Winter, Spring. 3(3-0) 215; 310 or 312.
Critical survey of experimental investigations of personality dynamics and the effects of individual differences on social interaction; consideration of stress and anxiety, response set, cognitive styles, risk taking and subjective probabilities, and aggression. Emphasize experimental techniques most relevant for those with clinical and social psychological interests.

431. Experimental Psychology: Personality
Fall, Winter, Spring. 2(0-4) 315; 311 or 313; 430 concurrently.
A laboratory course coordinated with FSY 430, with laboratory demonstration and experiments, conducted by the students, designed to clarify issues in the Winter study of personality, and to provide experience with a variety of investigatory techniques.

436. Psychology of Communication and Persuasion
Fall, Spring. 3(3-0) 355 or SOC 251.
Psychological processes underlying communication and persuasion; learning and using communication in interpersonal relations; effects of communication themes, techniques, symbols, and formats on thought, attitude, and personality of audiences.

437. Psychology of Political Behavior
Fall, Winter, Spring. 3(3-0) 355 or SOC 251. Study in sociology or political science. Interdepartmental with the Department of Political Science.
Psychological theories, principles, methods and techniques applied to political behavior; belief systems; personality influences; decision making, psychological patterns in legitimate voting; political leadership; interpersonal and international relations and tensions.

438. Research Methods in Social Psychology
Fall, Winter, Spring. 4(2-4) 215; 355 or SOC 251; 1 course in experimental psychology.
Critical examination of problems, principles, methods, techniques, materials, results and conclusions in relation to theory in social psychology, including experimentation and demonstration.

439. Selected Topics in the Psychology of Women
Fall, Spring. 3(3-0) May re-enroll for a maximum of 9 credits when different topics are offered. Nine credits in psychology or approval of department.
Selected topics: e.g., achievement and affiliation behavior; work and identity; political socialization of women; personality perspectives; psychodynamics of women; professional and traditional orientations; third world women.

441. Developmental Psychology: Research Methods
Fall, Spring. 4(0-6) May re-enroll for a maximum of 12 credits when different topics are taken. 160, 170, 215, 245 or approval of department.
Selected topics in developmental psychology: e.g., perceptual-cognitive development, language development, moral development, attention and learning, socialization, play, peer relations.

445. Psychology of Exceptional Children
Fall, Summer. 3(3-0) Nine credits in psychology and/or education including at least 2 courses in child behavior.
Psychological problems of children having superior or inferior intellectual ability; examination of research studies. Identifying such persons, assessing their potentials and limitations, planning their education and social adjustment.

446. Developmental Psychology: Research Methods
Fall, Spring. 4(2-4) 311 or 313; 348.
Methods of research in developmental psychology including methods used with both human and infrahuman organisms.

447. Personality Research Techniques
Fall, Spring. 4(2-4) 215, 255.
Quantitative psychological research techniques applied to typical personnel problems in industry and government.

456. Personnel Training and Development
Spring. 3(3-0) 356.
Each student develops skills called for in training work-level employees, supervisors and managers in industry, business, and government—all in an organization development frame of reference. Relevant research reviewed.

457. Personnel Interviewing
Winter. 3(3-0) 356.
Each student develops skills called for in interviewing in industry, business, and government. The training and management of interviewers. Relevant research reviewed.

458. Psychology of Ethics and Love
Fall, Winter. 4(4-0) Juniors, PHL 101 and three courses in Psychology.
Love and ethics as specifically human attributes, their function in the growth of the person. Varieties of love. Cultural and universal dimensions in ethics. Levels of maturity. Perspectives on ethics from code-centered to case-centered.

459. Psychology of Music
Winter, Summer. 3(2-0) 486. Interdepartmental with the Music Department.
Basic research concepts and experimental methods in psychology of music research. Practical training in conducting experimental research of musical behavior.

460. Humanistic Psychology
Fall, Spring. 4(4-0) 485.
Subject matter is drawn from the psychology of personality in its various forms. The usual approaches of the behavioral sciences are subject to critical analysis. One goal is to derive some elements of a philosophy of life for man as a potentially rational and ethical being.

490. Special Problems in Psychology
Fall, Winter, Spring, Summer. 1 to 6 credits. May re-enroll for a maximum of 12 credits. Approval of department.
Each student will work under direction of a staff member on an experimental, theoretical, or applied problem.

499II. Senior Project
Fall, Winter, Spring. 3(0-0) May re-enroll for a maximum of 8 credits. 390H or approval of department.
Independent research involving literature survey, naturalistic observation, or experimental investigation with staff supervision. Preparation of the Senior paper.

801. Perception
Fall. 4(3-0) Majors or approval of department.
Consideration in depth of selected topics in perception. Integration of theoretical and empirical material.
802. Advanced Experimental Psychology: Comparative
Spring. 4(2-4) One course in experimental psychology and 315.
Critical examination of theories and data relating particularly to behaviors of sub-humans.
Experimentation on selected topics in the area.

IDC. Seminar in Industrial Relations
Critical survey of theories and research in the department.

806. Advanced Comparative Psychology
Fall. 4(3-0) Majors or approval of department.
Behavior of infrahuman organisms with emphasis on general behavior processes as seen in a variety of animal forms. The comparative methods as applied to innate behavior and behavior modification.

808. Cognitive Processes
Fall. Spring. 4(3-0) A course in experimental psychology.
Critical survey of theories and research on such topics as problem solving, creative thinking, reasoning, judgment, decision making, formation and use of concepts and principles.

810. Human Learning and Performance
Spring. 4(3-0) Majors or approval of department.
Experimental findings and theoretical analyses of the acquisition, retention, transfer and execution of verbal materials and perceptual-motor skills. Selected demonstrations of major phenomena.

811. Advanced Physiological Psychology
Spring. 4(3-0) Majors or approval of department.
Psychology as a biological science. Consideration of physiological events underlying organism-environment interaction.

814. Psychology of Language
Spring. 4(3-0) Critical survey of research on language acquisition, utilization, and modification; psycholinguistic considerations in study of learning, perception, motivation, and cognitive processes.

815. Advanced Psychometrics
Fall, Winter. 4(4-0) 315.
Theory and practice in analysis and interpretation of psychological data.

816. Advanced Psychometrics
Winter. Spring. 4(4-0) 815.
Continuation of 815.

817. Advanced Psychometrics
Spring. 4(4-0) 816.
Multivariate methods of test analysis: multiple and partial correlation, factor and pattern analysis.

818. Test Construction
Winter. 4(4-0) 816.
Theory, methods, and techniques in the preparation and development of psychological test items and tests.

820. Mathematical Models in Psychology I
Fall. 4(4-0) MTH III and STT 201 or approval of department.
Discussion of the relationship between mathematics and psychological theory. Examination of the concepts of structure and change in qualitative psychological systems. Application of algebraic techniques to psychological theory.

821. Mathematical Models in Psychology II
Winter. 4(4-0) 520 or approval of department.
Representative mathematical models in psychology, attending particularly to stochastic models and the relationship between models and data. Advantages and disadvantages of models for different psychological problems.

822. Computer Models in Psychology
Spring. 4(3-2) An undergraduate mathematics course and approval of department.
Use of an electronic computer as a tool in theory construction. Simulation of complex psychological processes. Computer-based models in several psychological content areas.

826. Advanced Personality Research
Fall, Winter. 4(4-0) May re-enroll for a maximum of 8 credits if different topics are taken. Majors or approval of department.
Review of current research in selected areas. A minimum of four topics will be covered each term.

827. Personality Theory I
Fall. 4(3-0) Majors or approval of department.
Freudian and neo-Freudian conceptualizations of personality and psychopathology. Examination of basic constructs: theory of psychosexual development, psychotherapeutic implications.

828. Clinical Assessment I
Fall. 2(0-4) Majors or approval of department.
Assessment of psychodynamics and psychopathology. Individual case studies based on interviews and psychological tests. Behavioral correlates of psychodynamic problems.

829. Personality Theory II
Winter. 4(3-0) Majors or approval of department.
Developmental and social-learning approaches to personality and psychopathology; social learning and psychodynamics, socialization, maturation theories, applications of classical and operant conditioning. Psychotherapeutic implications.

830. Clinical Assessment II
Winter. 2(0-4) 520 or approval of department.
Clinical assessment of children. Individual case studies making systematic use of behavioral observations, interviews, and standardized tests. Integration of data and principles of development of new assessment procedures.

831. Personality Theory III
Spring. 4(3-0) Majors or approval of department.
Interpersonal and phenomenological approaches to personality theory. Survey of major conceptualizations and principles relating to the presentation of self in individual and group settings. Psychotherapeutic implications.

832. Clinical Assessment III
Spring. 2(0-4) 830 or approval of department.
Self-appraisal and investigation of interpersonal transactions in two-person and larger groups. Standardized techniques, individual case studies, and principles of development of new methods.

835. Experimental Psychology: Social
Fall. 4(2-4) One course in experimental psychology and 315.
Intensive experience in designing, executing, reporting and evaluating research in social psychology, including an individual research project.

837. Psychological Aspects of Politics
Fall, Winter, Spring. 4(3-0) Interdepartmental and administered by the Political Science Department.
Relevance of psychological concepts, theories and methods for the study of political institutions, organizations and behavior.

840. Advanced Social Psychology: Cognitive Approaches
Winter. 4(3-0) 815; 20 credits in the social sciences.
Contemporary theory and research in social psychology dealing with attitude organization and cognition, values, attitudes and behavior, attitude change and balance theories.

841. Advanced Social Psychology: Group Processes
Spring. 4(4-0) 815; 20 credits in social sciences.
Contemporary theory and research dealing with the individual in a group context.

845. Infancy and Early Childhood
Spring. 4(3-1) Majors or approval of department.
Human infancy: conception to three years. Developmental study of: prenatal life, personality, learning, perception, sensory stimulation and deprivation, neurophysiology, psychophysiology, language and cognition.

846. Advanced Child Psychology
Fall, Spring. 4(3-0) Psychological theories and research methods and findings related to the intellectual, emotional, perceptual, social and personality development of the child.

855. Engineering Psychology: Individual Man-Machine Interactions
Winter. 4(2-0)
Behavior of individuals operating equipment; effects of control and display design, cockpit layout, legibility, physical dimensions; principles for reducing errors; applications to aerospace, military, highway, industrial, and other problems.

859. Personnel Development
Spring. 4(2-2) Fifteen graduate credits.
Psychological principles and methods in the training and development of personnel at all levels of supervision and leadership.

860. Advanced Industrial Psychology
Fall. 4(3-0) A course in statistics and 20 credits in the social sciences.
Industrial psychology, including such sub-areas as personnel psychology, human factors, and industrial social psychology.
862. Organizational Psychology
Winter. 4(3-0) Fifteen graduate credits.
Survey of current theories of individual behavior in complex organizations. Examples from research in industry, government, and other complex organizations.

865. Advanced Neurobiology
Winter of odd-numbered years. 3(6-0) BYF 825. Interdepartmental with the departments of Biophysics, Biomechanics, Physiology and Zoology and administered by the Department of Biomechanics. Basic organization, structure and function of neural networks comprising sensory, motor, and autonomic systems including examples from invertebrates and vertebrates.

866. Personality Selection and Evaluation
Fall. 4(2-0) Fifteen graduate credits.
Critical treatment of research methods and instruments in personnel selection and evaluation as applied to governmental, business and industrial situations.

867. Field Training in Industrial Psychology
Fall, Winter, Spring. Variable credit.
Provides field experience in selected companies to familiarize students with problems and to give training in consulting and research.

868. Psychological Theory and Research in Advertising
Winter. 4(2-0) Ten graduate credits.
Survey and integration of psychological theory and research in advertising in such areas as motivation, perception, psychophysiology.

70. Introduction to Research Methods in Ecological Psychology
Spring. 4(4-0) 815, 816, 817 or approval of department.
What and why of experimental ecological psychology; planning, action, evaluation, dissemination of information. Researchable problems, funding, dynamics of research teams, identifying ecological variables. Class work and community research.

71. Advanced Research Methods in Ecological Psychology
Fall. 4(4-0) 870.
Applications of ecological psychology: measurement; hypotheses and research plans; initiating, maintaining, terminating naturalistic psychological research, evaluating and publishing results. Review of selected experiments. Class work plus research in community.

872. Experimental Production of Social Change
Winter. 4(4-0) 870, 871.
Use of psychological research to produce social change. Creation of acceptance of social change. Examination of effectiveness of experimental intervention into social systems. Class work plus community research.

885. Vertebrate Neural Systems I
Fall of odd-numbered years. 5(3-4) Approval of department and one of ANT 815 and BYF 825 recommended. Interdepartmental with the Zoology, Biophysics, and Physiology Departments.
Structure and function of major component systems of vertebrate brains, their evolution, ontogeny and comparative analysis in mammals, birds, reptiles, amphibians and fish. Interrelation of behavioral, anatomical and physiological studies.

886. Vertebrate Neural Systems II
Winter of even-numbered years. 5(3-4)
Continuation of 885. Major component systems of vertebrate brains, their evolution, ontogeny, and comparative analysis in mammals, birds, reptiles, amphibians and fish. Interrelation of behavioral, anatomical, and physiological studies.

902. Special Research Techniques
Fall, Winter, Spring. 4(3-0) May re-enroll for a maximum of 12 credits. Graduates and approval of department.

902A. Laboratory in Advanced Physiological Psychology I
Fall. 5(2-4) Graduate students and approval of department.
Physiological mechanisms underlying behavior. Development of skills in the methods, techniques, and instrumentation necessary for research in a variety of areas concerned with physiology and behavior with special emphasis on ablative procedures.

902B. Laboratory in Advanced Physiological Psychology II
Winter. 5(2-4) 960A.
Detailed examination of the physiological mechanisms underlying behavior. Development of skills in the methods, techniques, and instrumentation necessary for research in a variety of areas concerned with physiology and behavior with special emphasis on electrical stimulation and recording.

905. History and Systems
Winter. 4(3-0) Thirty graduate credits in psychology.
Major scientific, cultural, philosophical, and personal influences in the development of psychology. Analysis of persisting issues.

914. Seminar in Advanced General Psychology
Fall, Winter, Spring. 1 to 4 credits.
May re-enroll for a maximum of 24 credits. Thirty graduate credits in psychology or approval of department.
Critical study of a selected area such as sensation, perception, motivation, emotions, learning, physiological, comparative, thought and language.

924. Seminar in Measurement
Fall, Winter, Spring. 1 to 4 credits.
May re-enroll for a maximum of 16 credits. Thirty graduate credits with 15 of them in psychology.
Critical study of a selected area such as factor analysis, pattern analysis, partial and multiple correlational analysis, psychophysical methods, scaling, reliability and validity, and factorial designs.

926. Personality Measurement I: Free Response Techniques
Fall. 4(3-1) Thirty graduate credits in psychology, including 815 and 826.
Development, validation, and other characteristics of selected free response measures; use in current personality research.

927. Personality Measurement II: Structured Measures and Measures of Overt Behavior
Spring. 4(3-1) Thirty graduate credits in psychology, including 815 and 826.
Structured questionnaires and behavioral measures as tools in personality research. Development and characteristics of existing and new instruments.

928. Practicum: Psychological Clinic I
Fall. 3(2-2) Approval of department.
Introduction to clinical evaluation and treatment. Supervised experience in psychodiagnosis and psychotherapy of adults and children in the Psychological Clinic. Focus on work with families. Didactic seminar in related theory and research.

930. Practicum: Psychological Clinic II
Winter. 3(2-2) 928.
Continuation of 928.

932. Practicum: Psychological Clinic III
Spring. 3(0-6) 930.
Continuation of 930.

934. Seminar in Personality
Fall, Winter, Spring. 1 to 4 credits.
May re-enroll in different areas for a maximum of 16 credits. Thirty graduate credits with 15 of them in psychology.
Clinical study of a selected area such as theory, assessments, dynamics, structure, the self and determinants.

935. Contemporary Theory and Research in Social Psychology
Fall. 3(2-0) Thirty graduate credits in psychology
An intensive analysis of contemporary social psychological research monographs illustrating theoretical and methodological positions.

936. Attitudes and Personality
Winter. 3(0-3) Thirty graduate credits.
Review and analysis of research on sentiments, beliefs and opinions, authoritarianism, pseudo-authoritarianism, and democratic personality; functions, resistance to change and relations to value systems and ideology.

937. Individual Behavior and Complex Groups
Spring. 3(3-0) Thirty graduate credits.
Problems of research design and experimental methods in the study of the relationship of the individual to the complex organization.
944. Seminar in Social Psychology
Fall, Winter, Spring. 1 to 4 credits. May re-enroll in different areas for a maximum of 16 credits. Thirty graduate credits or approval of department. Critical study of a selected area such as roles, communication and persuasion, individual interaction within small and large groups, behavior in relation to norms and interpersonal distances.

954. Seminar in Developmental Psychology
Fall, Winter, Spring. 1 to 4 credits. May re-enroll in different areas for a maximum of 16 credits. Thirty graduate credits or approval of department. Critical study of a selected area such as theory, techniques and methods of observation, parental attitudes and practices, intellectual, personal and social development, motivational, emotional, perceptual, and intellectual issues.

956. Engineering Psychology: Systems Approach
Spring. 4(2-0) Human factors in "system" operation; subsystems, analysis methods, criteria, information processing, communication, trade-offs, application to aerospace, military, highway, industrial, and other problems.

969. Seminar in Industrial Psychology
