485. Environmental Conservation Program Design
Winter. 3(3-0) Seniors or approval of department.
Materials and methods for integrating environmental conservation into educational programs in schools, nature centers, youth groups and communities.

486. Field Techniques in Environmental Conservation Education
Spring. 4(1-6) 494.
Field skills for secondary and environmental education majors, including photography, orienteering, and population investigations of flora and fauna. Field trips required.

490. Quantitative Wildlife Ecology
Spring. 3(3-0) Approval of department.
Fundamentals of population demographics. Rates of increase, dynamic and static life tables, logistic theory, the Leslie matrix model, age-specific survival and fecundity matrices, spatial and temporal changes; continuous and discrete models. Current hypothesis on mechanisms promoting population stability.

999. Research
Fall, Winter, Spring, Summer. Variable credit. Approval of department.

FOOD SCIENCE AND HUMAN NUTRITION

College of Agriculture and Natural Resources
College of Human Ecology

Food Science

101. Food and Society
Fall, Winter. 3(3-0) Interdepartmental with Human Nutrition and Foods. Analysis of the scientific, social and environmental aspects of food with an emphasis on food's role in determining the quality of man's life. Introduction into the principles of food preservation and safety.

211. Introduction to Food Science
Spring. 3(0-3) Modern food science, nutrition and world food problems, and the basic characteristics of processed foods.

215. World Food Issues
Spring. 3(0-3) Interdepartmental with Geography. Food resources in relation to world distribution of population, soil, water, fuel and minerals. Special attention to urbanization, irrigation, and future food needs and global constraints.

223. Commercial Food Processing Systems
Fall. 3(2-2) Interdepartmental with and administered by the Department of Geography. Processes and systems used in handling, processing, and distribution of food; the need for processing systems and their influence on food quality.

243. Meats, Poultry and Fishery Products I
Fall. 3(2-2) Interdepartmental with the Animal Husbandry Department. Principles of evaluation and nutritive value. Identification of cuts of beef, pork, lamb and poultry products.

300. Dairy Products
Spring. 3(2-2) Composition, use, classification and market grades, methods of storage and factors affecting keeping quality of dairy products.

311. Food Processing and Preservation
Winter, Summer. 3(3-0) CEM 133 or HRI 245 or approval of department; not open to majors in Food Science. Development of a working knowledge of processing, packaging, and preservation of foods. Topics include effects of processing, storage and preparation on nutrient content and food quality.

312. Food Processing and Preservation Laboratory
Winter, Summer. 1(0-3) 311 or concurrently.
Effects of processing, packaging and food preparation on flavor, color, texture, functionality and storage quality of foods. Role of proteins, fat and carbohydrates in food systems. Techniques of preserving foods.

331. Physical Principles of Food Processing
Fall. Winter. 4(3-3) 211; PHY 239 or approval of department.
Food preservation by heat, low temperature, dehydration and radiation.

332. Biological Principles of Food Processing
Fall. 4(3-3) MPH 200 or approval of department.
Biological problems related to food processing including waste disposal, sanitizing and bactericidal compounds, plant and animal growth regulators, radioactive elements, preservatives and technology of additives.

333. Chemical Principles of Food Processing
Fall. 4(3-3) CEM 133 or approval of department.
Chemical changes in foods that affect the texture, color, flavor, odor, stability, and nutritive quality during processing and storage.

400. Milk Processing Technology
Fall. 4(3-3) CEM 133 or approval of department.
The fluid milk industry. Composition, quality, sanitation, nutritive value, processing, packaging and distribution of milk and milk products.

401. Industrial Food Fermentations
Fall. 3(3-6) 440 and organic chemistry or approval of department.
Physical, microbiological and chemical procedures in utilizing microbial cultures in controlled fermentations of foods and food constituents.

402. Chemistry and Technology of Lipids

404. Dehydrated Foods
Spring. 3(3-3) 331, 333 concurrently or approval of department.
Concentration and dehydration of foods by roller, spray, freeze, tunnel and foam, puff and vacuum drying. Stability and nutritional aspects of dehydrated foods.

405. Chemistry and Technology of Dairy Products Manufacturing
Winter. 3(2-3) May re-enroll for a maximum of 6 credits if a different topic is taken. 400 or approval of department.
Physical, chemical and microbiological factors in the processing of dairy products. Ice cream, sherberts, ice milk and special frozen desserts are studied in odd-numbered years; cheese, and related dairy products in even-numbered years.

421. Food Plant Management
Spring. 3(2-3) Seniors or approval of department.
Efficiency concepts, merchandising, personnel utilization and organization.
440. Food Microbiology  
Fall. Dictiotia majors only. Spring, 3(3-0)  
CHE 302 or 401, or approval of department. Interdepartmental with the Department of Microbiology and Public Health  
Major groups of microorganisms of importance to the food industry are studied with emphasis on ecological, physiological, and public health aspects.

445. Meat, Poultry and Fishery Products III  
Spring. 3(1-0)  
Approval of department.  
Processing, formulation and quality control.

446. Fruit, Vegetable and Cereal Products I  
Fall. 3(3-0)  
Approval of department.  
Quality factors involved in canning, sugar and salt preservation and milling.

449. Fruit, Vegetable and Cereal Products II  
Winter. 3(3-0)  
Approval of department.  
Quality factors involved in cooling, freezing and other preservation procedures.

455. Food Analysis I  
Fall, 3(2-4)  
CHE 132 and 160, or approval of department.  
Modern methods of analysis for fat, protein, moisture and other macroconstituents of food. Application of spectrophotometry in determina-  
tion of microconstituents; use of dye-binding, complexometric and isometric techniques in food analysis.

456. Food Analysis II  
Winter. 3(2-4)  
CHE 162 and 241, or approval of department.  
Use of colorimetry and spectrophotometry, chromatographic methods and other techniques for the analysis of food constituents and additives.

457. Quality Control in the Food Industry  
Winter of even-numbered years. 3(3-0)  
STT 201 or approval of department.  
Organization of quality control within the food industry by case study. Use of control charts, sampling plans, flavor panel analysis.

460. Special Problems in Food Science  
Fall, Winter, Spring, Summer. 3 credits. May be re-enrolled for a maximum of 3 credits.  
Advanced undergraduates may select research work in food chemistry, food microbiology, food engineering, food plant management, processing dairy products, meat, poultry and fishery products, fruits and vegetables, cereals or beverages.

469. Seminar  
Fall. 1(1-0)  
Approval of department.  
Preparation and presentation of reports on a specialized aspect of food science.

489. Food Processing Concepts, Systems and Selected New Processes  
Winter. 3(3-0)  
Approval of department.  
Concepts and requirements for processing systems and continuous processes. Use of computers in food processing; microwave heating of foods; radiation preservation of foods and related processing methods.

830. Thermal Processing of Food Products  
Winter. 3(3-0)  
331; 332 or 440, or approval of department.  
Heating and cooling characteristics of foods in containers, thermal resistance of microorganisms, and derivation of process times and temperatures for pasteurization and sterilization.

832. Microbiology of Food Processing  
Fall. 3(3-0)  
440 or approval of department.  
Control of food spoilage and food poisoning microorganisms in food processing and the role of bacterial spores in process selection.

833. Advanced Food Plant Management  
Fall of even-numbered years. 3(3-0)  
421 or approval of department.  
Advanced concepts and strategy of policies and practices in the management of food plants.

834. Flavor Quality Control  
Spring of odd-numbered years. 3(3-0)  
Approval of department.  
Sensory methods used for food evaluation and panel analysis. Flavor chemistry and analytical methods. Sampling plans, control charts, and acceptance sampling for statistical quality control.

835. Carbohydrates in Foods  
Fall of odd-numbered year. 3(3-0)  
The chemistry and food technology of mono-, oligo-, and poly-saccharides.

850. Selected Topics in Food Science  
Fall, Winter, Spring. 3(3-0)  
May be re-enrolled for a maximum of 6 credits.  
Approval of department.  
Advanced studio; food utilization, textures, additives, toxicants, food proteins, ingredient safety, nutrient stability, new processing techniques, flavors, quality control, storage stability, and federal food regulations.

851. Muscle Chemistry  
Spring of odd-numbered years. 3(3-0)  
CHE 451 or approval of department.  
The structure and function of living muscle. Emphasis is placed upon the chemical and energy changes of muscle in contraction. Changes occurring after death during rigor develop-  
ment are also discussed.

852. Advanced Lipids  
Winter of even-numbered years. 3(3-0)  
402 or approval of department.  
A course relating composition, structure, and physical and chemical properties of lipids to processing requirements of fats and oils to their function in food systems.

853. Enzyme Reactions  
Spring of even-numbered years. 3(3-0)  
CHE 451, or approval of department.  
Comprehensive discussion of parameters which affect enzyme activity. Properties of enzymes important in food processing.

854. Chemistry of Plant Products  
Fall of even-numbered years. 3(3-0)  
333, CHE 451, or approval of instructor.  
Chemistry and biochemistry of plant pigments, tannins, toxins and proteins.

900. Food Science Seminar  
Fall, Winter, Spring. 1(1-0)  
May be re-enrolled for a maximum of 3 credits toward M.S. and 6 credits toward the Ph.D.  
Approval of department.  
Preparation and presentation of reports on a specialized aspect of research findings in food science.

Human Nutrition and Foods*  

100. Elementary Food Preparation  
Fall, Winter, Spring. 4(2-4)  
Composition and properties of food related to quality characteristics; methods of preparation, evaluation of quality and use of selected foods.

101. Food and Society  
Fall, Winter. 3(3-0)  
331, or approval of department.  
Interdepartmental with Food Science. Analysis of the scientific, social and environ-  
mental aspects of food in determining the quality of man's life. Introduction into the principles of food preservation and safety.

102. Nutrition for Man  
Fall, Winter, Spring. 3(3-0)  
Fundamentals of nutrition with reference to diverse ways man provides for and attaches meaning to his food.

221. Food and the Consumer  
Fall, Winter, Spring. 3(3-0)  
Sopho- 
more approval of department.  
Factors affecting the food supply, consumer pro-  
tection, food buying and management of hu- 
man and material resources in feeding the family.

222. Laboratory for Food Management  
Fall, Winter, Spring. 2(0-4)  
Concurrent.  
Planning, organizing, preparing and serving meals with consideration of human and mate- 
rial resources as well as nutritional needs.

*Name changed July 1, 1970. Formerly Foods and Nutrition and Institution Administration.
301. **Dynamics in Dietetics I**  
Fall. (2-0-4) Approval of department. 461 concurrently.  
Basic knowledge and experience in the functions and responsibilities of the professionally qualified dietitian. Local field trips required.

302. **Dynamics in Dietetics II**  
Winter. (2-0-4) Approval of department. 301, 320 or concurrently and 465 concurrently.  
Principles and practices in the duties of professionally qualified dietitians with focus on providing food service for groups and nutritional care for patients and/or clients. Local field trips required.

303. **Dynamics in Dietetics III**  
Spring. (2-0-4) 309; 470 concurrently.  
Principles and practice of instructional design and instruction applied to problems in dietetics. Local field trips required.

320. **Food Service Systems**  
Fall. Winter. (3-3-4) 291, Juniors.  
Management of food service systems with varying organizational patterns and objectives. Emphasis on human and material resources and their interrelationships in quality food production and service.

340. **Experimental Foods**  
Fall. (4-3-4) CEM 132; MPH 200 or concurrently.  
Physical and chemical changes occurring in foods during storage, preservation and preparation in terms of palatability, microbial safety and nutritive value. Emphasis on carbohydrates and fats.

341. **Experimental Foods**  
Winter. (4-3-4) 340.  
Continuation of 340. Emphasis on proteins.

400H. **Honors Work**  
Fall, Winter, Spring, Summer. Variable credit. May re-enroll for a maximum of 18 credits. Seniors, approval of department.

403. **Fats and Carbohydrates in Food Systems**  
Fall. (4-3-3) 341 or approval of department.  
Chemical and physical reactions in fat and carbohydrate food systems, including oil, gels, emulsions, etc. Food evaluation techniques will be introduced.

404. **Role of Proteins in Food Systems**  
Winter. (4-3-3) 312 or approval of department.  
Physical and chemical reactions with protein foods, meats, eggs, cheese, seeds. Emphasis on time-temperature data in relation to quality.

406. **Cultural Aspects of Food**  
Spring. Summer of odd-numbered years. 3(0-0) Juniors.  
A cross cultural investigation of food and its consumption. Factors such as history, religion, food sources and socio-economic status are considered.

408L. **Laboratory—Cultural Aspects of Food**  
Spring. 1(0-3) 100 or 340 or approval of department; 400 or concurrently.  
Art and science of cooking in relation to historical, national, regional, racial and religious customs.

407. **Patterns of Food Selection**  
Fall. Summer of even-numbered years. 3(3-0) 461.  
Sociological and psychological factors influencing food choices. Evaluation of dietary habits in relation to nutritional needs of individuals.

409. **Presentations in Foods and Nutrition**  
Winter. (4-2-4) 340; 461.  
Principles and techniques of presenting foods and nutrition information as applied to teaching or promotional work.

411. **Principles of Human Nutrition**  
Winter, Summer. (4-3-2) BCH 200.  
Identification, function and food sources of nutrients required by man. Metabolism as affected by deficiency or excess of specific nutrients.

453. **Readings in Nutrition**  
Winter. Summer of odd-numbered years. 3(3-0) 462 or approval of department.  
A study of recent developments in research in human nutrition.

454. **Readings in Foods**  
Fall. Summer of even-numbered years. 3(2-0) 461 or approval of department.  
Selected topics in foods research. Emphasis on experimental data and basic scientific principles related to food quality.

461. **Energy Nutrients and Proteins for Human Nutrition**  
Fall. (4-4-0) BCH 200; PSL 332 or 241.  
Metabolism of protein, fats and carbohydrates, as applied to nutritional requirements and food supplies of people.

462. **Vitamins and Minerals for Human Nutrition**  
Winter. (3-3-0) 461.  
Metabolism of vitamins and minerals as applied to the nutritional requirements and food supplies of people.

463. **Nutrition and Human Development**  
Winter. (3-3-0) 461.  
The role of nutrients in physiological systems and biochemical processes as related to the perspective of human growth and development.

469. **Physical and Physiological Growth of Children**  
Winter, Spring. 4(4-0) 102.  
Three terms of natural science. Interdepartmental with and administered by the Family and Child Sciences Department.  
Physical and physiological growth patterns. Experimental evidence for nutritional requirements. Applications to feeding practices, and physical activity of children.

470. **Clinical Nutrition**  
Spring. 4(4-0) 462.  
Changes in physiological and/or biochemical functions or processes due to illness and uses of modified diets as an essential part of treatment.

475. **Community Nutrition**  
Spring. (3-3-0) 462 or approval of department.  
Identification of nutritional needs of population groups and available resources in communities.

480. **Practice of Dietetics**  
Fall, Winter, Spring, Summer. (2-3-0) May re-enroll for a maximum of 24 credits. 303, 470.  
Application and integration of nutritional and managerial concepts related to the practice of dietetics.

495. **Independent Study**  
(1 A 400) Fall, Winter, Spring. Summer. 1 to 3 credits. May re-enroll for a maximum of 9 credits. Seniors; approval of department.  
Individual study of selected topics in foods, nutrition and food service management under staff guidance.

498. **Field Study**  
Fall, Winter, Spring, Summer. 4 to 12 credits. May re-enroll for a maximum of 12 credits. Approval of department.  
Preparation program of research, observation, study or work in selected organizations under staff guidance.

500. **Seminar in Foods and Nutrition**  
Fall, Winter, Spring. (1-1-0) 403 or 463.

502. **Seminar in Food Service Management**  
Winter, Summer. 1 to 3 credits. May re-enroll for a maximum of 6 credits. Approval of department.

503. **Problems in Food Service Management**  
Fall, Winter, Spring. Variable credit. Approval of department.

505. **Experimental Foods III**  
Spring. 4(1-9) 404 or approval of department.  
Planning, executing, and reporting individual research project. Data collection, evaluation and interpretation to demonstrate understanding of research techniques and attitudes, and an awareness of significant problems in the field.

513A. **Special Studies in Nutrition**  
Fall, Winter, Spring, Summer. Variable credit. 461.

513B. **Special Studies in Experimental Foods**  
Fall, Winter, Spring. Summer of odd-numbered years. Variable credit. 494; BCH 200 or 451 and 504.

513C. **Special Studies in Food Service Management**  
Fall, Winter, Spring. Variable credit. Approval of department.  
Special studies in facility management, manpower coordination and tools and methods of operational control.

516. **Applied Human Nutrition**  
Spring. 3(3-0) 462.

525. **Techniques in Nutrition Research**  
Winter of odd-numbered years. 1 to 3 credits. BCH 333; approval of department. Interdepartmental with and administered by the Animal Husbandry Department.  
Use of specialized instruments and techniques. Laboratory safety. Management of laboratory animals. Development of abilities in areas of particular interest to individual students.

599. **Research**  
Fall, Winter, Spring, Summer. Variable credit. Approval of department.

920. **Comparative Nutrition—Lipids and Carbohydrates**  
Winter of odd-numbered years. 4(4-0) BCH 452. Interdepartmental with the Animal Husbandry Department.  
Comparative aspects of carbohydrate and lipid metabolism as influenced by nutrition in mammals. Emphasis on normal and abnormal physiological states such as obesity, ketosis and diabetes.
Comparative Nutrition — Protein Metabolism and Developmental Biology

Winter of even-numbered years. 4(4-0) BCH 452, PSL 502 or concurrently. Interdepartmental with Animal Husbandry Department.

Protein quality assessment, protein status, protein calorie malnutrition, amino acid metabolism, protein turnover, digestion and absorption, hormonal control of protein metabolism, developmental aspects of protein metabolism and growth.

Comparative Nutrition — Minerals

Spring of even-numbered years. 3 credits. BCH 452, PSL 502. Interdepartmental with and administered by the Animal Husbandry Department.

Forms and location in body, metabolic roles, deficiency and toxicity signs, interrelationships, requirements and biological availability of sources.

Comparative Nutrition — Vitamins

Spring of odd-numbered years. 3(3-0) BCH 453, PSL 592. Interdepartmental with and administered by the Animal Husbandry Department.

Chemical and physical properties, standards of activity, occurrence, metabolic roles, antivitaminals, deficiency and toxicity signs, requirements and factors affecting requirements.

Research

(8 N 999.) Fall, Winter, Spring, Summer. Variable credits. Approval of department.

FOOD SYSTEMS ECONOMICS AND MANAGEMENT

See Agricultural Economics

FOREIGN LANGUAGES

See German and Russian, Linguistics and Oriental and African Languages, and Romance Languages.

FORESTRY FOR

College of Agriculture and Natural Resources

IDC. Resource Ecology and Management

For course description, see Interdisciplinary Courses.

Introduction to Forestry

Fall. 3(3-0)

Forestry, in its broadest sense, including: historic development, forest growth, protection and management, products, national and world economy and policy. Emphasis on use concepts. One-day field trip required.

Forest Vegetation

Fall, Spring. 5(3-4) BOT 205 or approval of department.

Nomenclature, classification, and identification of important trees, shrubs, and herbaceous plants of forest and field.

Plants and Their Environment

Winter, 3(3-0) Interdepartmental with Natural Resources.

Fundamental ecological relationships between various climatic, edaphic and biotic environmental factors of the ecosystem and plant response, including structure, function and evaluation of species.

Quantitative Methods for Natural Resources

Fall. 4(3-2) BCH 109 or 111.

Collection and analysis of information pertaining to natural resources. Survey design, field procedures, equipment, and analytical techniques.

Silviculture

Fall. 4(3-3) 304.

Interrelationships of trees of the forest community and the environment; natural and artificial forest reproduction methods, intermediate cuttings; field studies of silvicultural conditions.

Forest Fire Protection and Use

Winter. 3(3-0) Juniors or approval of department.

Causess and effects of forest fires. Combustion, fire behavior, and fire weather. Prevention and control planning and techniques. Use of fire in forest land management. One-day field trip required.

Wood Technology

Fall. 4(3-3)

Structure of wood. Mechanical and physical properties of wood. Wood anatomy and relation to growth.

Forestry Today

Winter. 3(3-0) Not open to majors.

For the non-forestry student, emphasizing multiple use of forests, scope and practice of forestry, environmental roles of forests, influences, products, non-timber uses of forests and current forest policy.

Forest Inventory

Fall. 3(2-3) 301 or approval of department.

Field and office techniques of forest inventory, with primary emphasis on timber resources.

Forest Hydrology

Fall. 3(3-0) SLS 210.

Hydrologic cycle, with emphasis on soil, water and ground water regimes; instrumentation and measurement of the various components. Effects of forest management on watersheds and water yields.

Forest Tree Improvement

Fall. 3(2-0)

Distribution of genetic variation in natural tree populations. Introduction, selection, progeny testing, species hybridization, and polyploidy to obtain superior tree populations.

Tree Physiology

Fall. 3(3-0) BOT 301.

The fundamental principles of plant physiology with particular reference to the growth and development of woody plants, and consideration of the influence of genetic and environmental factors on physiological processes in trees.

Forest Soil Science

Spring. 4(3-3) 320; SLS 210. Interdepartmental with Soil Science.

Interrelationships of forest site and the growth of forestland productivity of forest soils. Effects of silvicultural and forest management practices on the soil. Two-day field trip required.

Manufacture of Lumber and Composite Wood Products

Spring. 3 credits.

Log and lumber grades, sawmill equipment and practices. Wood working machinery. Gluing of wood. Manufacture of pulp, plywood and other board products.

Law and Resources

Spring. 3(3-0) PLS 449 or BIO 449. Interdepartmental with and administered by the Department of Resource Development.

Legal theories, cases, statutes and constitutional considerations are applied to natural resource utilization. Private and public property interests in natural resources are illustrated through case studies of use conflicts.

Methods in Wood Science

Spring. 3(3-2) 309.

Application of standard laboratory testing procedures to the evaluation of basic properties of solid wood and wood products. Laboratory exercises in wood microtechnique and wood finishing.

Range Management

Winter. 4(3-3) 220 or approval of department.

Development of range industry; grazing regions and reconnaissance; planning multiple-use management on forest range and watershed.

Field Studies in Forestry

Fall. 3 credits. 410, 305.

Multiple use forest resource management in various forest regions. Two-week field trip required, prior to the full term of the senior year.

Natural Resource Administration

Fall, Spring. 4(4-0) Seniors. Interdepartmental with the departments of Fisheries and Wildlife, Parks and Recreation Resources and Resource Development and Natural Resources.

World Forestry

Winter. 3(3-0)

Forest resources, forestry practices, and the forest economy throughout the world.

Forestry Economics

Winter. 4(3-2) 450 or approval of department.

Basic economic and political principles and techniques that govern the production and consumption of forest land products, including basic forest valuation procedures.

Forest Management and Utilization Planning

Spring. 4(4-2) 375.

Integrative planning for forest management, including multiple-use aspects and timber harvest systems. Two-day field trip required.

Forest and Wood Science Problems

Fall, Winter, Spring, Summer. 1 to 3 credits. Seniors with a 2.80 average, or approval of department.

Special problems course for students qualified for advanced study in some phase of forestry or wood science.
