909. Elastic Thin Shells
Spring, 4(4-0) 815 or C E 804 or approval of department; MTH 421. Interdepartmental with and administered by Civil Engineering.

Elements of differential geometry, membrane theory of shells, Pucher's stress function, deformation and bending of shells of revolution and shallow shells.

910. Nonlinear Continua
Winter of even-numbered years. 4(4-0)

Modern nonlinear theory of continua. Equations of balance and constitutive equations. Topics selected from finite elasticity, nonlinear theory of shells, Pucher's solutions of balance and constitutive equations. General tensors are introduced and used throughout.

911. Theory of Elastic Stability
Fall of odd-numbered years. 4(4-0) 815 or approval of department.

Theory and methods of determining buckling strength and post-buckling behavior of bars, plate and shell elements and of elastic systems.

912. Theory of Plates
Winter. 4(4-0) 815 or C E 804 or approval of department; MTH 422. Interdepartmental with Civil Engineering.

Bending of thin elastic plates with various shapes and boundary conditions; application of energy principles and approximate methods of solution; thick plates; large deflection theory; sandwich plates.

913. Theory of Elasticity II
Spring. 3(3-0) 813 or approval of department.

Saint-Venant bending and torsion. Problems in three-dimensional linear elasticity using the Galerkin vector and Nelder-Pupkovich functions.

914. Theory of Viscoelasticity
Fall of even-numbered years. 3(3-0) 810; MTI 422 or approval of department.

915. Theory of Viscoplasticity
Winter of odd-numbered years. 4(4-0) MTI 423, M E 533 or approval of department.

Interdepartmental with the Mechanical Engineering Department. Viscoplasticity of one, two, and three-dimensional models of elastic and inelastic continua. Interaction phenomena. Stability. Variational methods. Applications to aerodynamics, space, and underwater technology.

916. Theory of Viscoplasticity II
Winter of odd-numbered years. 4(4-0) MTI 423; M E 583 or approval of department. Interdepartmental with the Mechanical Engineering Department. Viscoplasticity of one, two, and three-dimensional models of elastic and inelastic continua. Interaction phenomena. Stability. Variational methods. Applications to aerodynamics, space, and underwater technology.

917. Theory of Viscoplasticity III
Spring of odd-numbered years, Summer, 4(4-0) 820 or approval of department. Interdepartmental with the Mechanical Engineering Department. Nonlinear oscillations. Resonance; subharmonics; self-sustained motion; stability. Methods of Polanski, van der Pol, etc. Random vibrations. Parametric excitations; stochastic processes; power spectra. Applications.

918. Advanced Topics in Mechanical Metallurgy
Fall of odd-numbered years; Winter and Spring of odd-numbered years. 3(3-0) May re-enroll for a maximum of 9 credits.

Various aspects of dislocation theory and its application to the mechanical and physical properties of solids.

919. Advanced Topics in the Kinetics of Phase Transformation
Fall of odd-numbered years; Winter and Spring of even-numbered years. 3(3-0) May re-enroll for a maximum of 9 credits.

920. Research
(EGR 999) Fall, Winter, Spring. Variable credit. Approval of department.

921. Microbiology and Public Health

College of Human Medicine
College of Natural Science
College of Osteopathic Medicine
College of Veterinary Medicine

100. Preview of Microbiology
Winter. 2(2-0) Freshmen and Sophomores only.

Science and scientifics of microbiology, presented in historical perspective and carried to the forefront of current research. A rigorous preview for students seriously curious about microbiology.

200. Elementary Microbiology
Fall, Winter. 4(3-2) Three terms of Natural Science. Primarily for majors outside the College of Natural Science.

Description of bacteria and related forms of microorganisms, their growth and nature, their application in industry, and their control in public health.

234. Elementary Medical Microbiology
Fall, Winter. 4(3-2) Three terms of Natural Science. Primarily for Nursing students.

Survey of immunology and microbiology with emphasis on pathogenic microorganisms, antimicrobial agents, and laboratory diagnosis.

301. Introductory Microbiology Laboratory
Fall, Spring. 3(3-0) B S 212; BCH 212.

Fundamentals of microbiology with emphasis on the comparative nature of the groups of microorganisms, their distribution and activities.

302. Introductory Microbiology Laboratory
Fall, Spring. 2(1-4) 301 or concurrently.

Laboratory based on the subject matter of 301.

400. Bacteriology for High School Science
Summer. 4(4-4) Bachelor's degree and teaching certificate.

Fundamental concepts, experiments, and projects useful in secondary school science courses.

400H. Honors Research
Fall, Winter, Spring. Summer. 2 credits. May re-enroll for a maximum of 8 credits. Approval of department.

A four-term research project with thesis.

401. General Microbiology
Fall. 8(8-0) BCH 401 or 451 concurrently.

Comparative biology of microorganisms: viruses, rickettsiae, bacteria, fungi, algae, and protozoa.

402. General Microbiology Laboratory
Fall. 3(1-6) 401 or concurrently.

Laboratory based on the subject matter of 401.

406. Medical Mycology
Fall, Spring. 4(3-6) BOT 402 or approval of department. Interdepartmental with and administered by the Botany and Plant Pathology Department.

Characteristics, habits, and laboratory identification of fungus diseases infecting humans. Emphasis on laboratory techniques and morphological characteristics of the various mycoses.

413. General Virology
Winter. 3(3-0) 427 or concurrently.

Physical, chemical, and biological properties of the viruses.

414. General Virology Laboratory
Winter. 1(0-4) 413 or concurrently.

Laboratory procedures employed for cultivation and identification of viruses.

416. General Parasitology
Winter. Summer at W. K. Kellogg Biological Station. 3(3-0) B S 212.

Life history, host-parasite relationships (including physiology, immunology, immunopathology and pathology) and epidemiology of selected groups and species of protozoa, trematodes, cestode and nematode parasites.

417. General Parasitology Laboratory
Winter. 2(0-4) B S 212, or L B C 410. M H 416 or concurrently or approval of department.

Identification and life histories of representative species of major groups of animal parasites. Selected concepts of host-parasite associations will be tested experimentally.

420. Ecology of Animal Parasites
(436). Summer. 6 credits. B S 212 or approval of department. Given at W. K. Kellogg Biological Station. Interdepartmental with the departments of Fisheries and Wildlife, and Zoology.

Parasitism of animals by protozoa, helminths and arthropods with emphasis on the inter-relationships of host-parasite associations with the natural environments.

421. Microbial Physiology
Winter. 3(3-0) 401, 402.

Cell structure and function, growth and death, and metabolism of microorganisms.

422. Microbial Physiology Laboratory
Winter. 2(0-6) BCH 401; ZOL 441 recommended. Fundamental genetic concepts as exemplified in microorganisms.

423. Microbial Genetics
Spring. 3(3-0) BCH 401; ZOL 441 recommended. Fundamental genetic concepts as exemplified in microorganisms.

424. Microbial Genetics Laboratory
Spring. 2(0-6) 423 or concurrently.

Laboratory work based upon the subject matter in 423.
425. Microbial Ecology
Summer. 6(3-9) A microbiology course or approval of department. Given at W. K. Kellogg Biologic Station. Lecture emphasizes the biological properties and diversity of naturally occurring microorganisms. The laboratory treats the analytical techniques involved in study of their metabolic activity.

427. Immunobiology
Winter. 3(3-0) B S 312; BCH 200 or 401. Biological and biochemical mechanisms of the immune response. Emphasis is on concepts of immunity.

428. Immunobiology Laboratory
Winter. 2(0-6) 427 or concurrently. Basic laboratory techniques in immunobiology.

429. Microbiology of Infectious Diseases
Spring. 3(2-8) 301 or 402 and 427. Basic laboratory techniques in immunobiology. Methods of isolation and identification are emphasized in the laboratory.

436. Introductory Medical Parasitology
Fall. 3(3-0) Primarily for Medical Technology students. Biology of protozoan, helminth, and arthropod infections of man.

437. Introductory Medical Parasitology Laboratory
Fall. 2(1-4) 436 or concurrently. Laboratory diagnosis of protozoan, helminth, and arthropod infections of man.

440. Food Microbiology
Fall. Dietetics majors only. Spring. 3(3-4) 300 or 301 or 401 or approval of department. Interdepartmental with and administered by Food Science. Major groups of microorganisms of importance to the food industry are studied with emphasis on ecological, physiological, and public health aspects.

442. Soil Microbiology
Spring. 3(3-0) 300 or 301 or 401. Interdepartmental with the Department of Crop and Soil Sciences. Major groups of microorganisms of importance in soils are studied with emphasis on ecological, biochemical, and physical aspects.

444. Environmental Microbiology
Spring. 3(2-4) 300 or 301 or 401. Flora: methods of testing, and purification of environmental air and water. Treatment and disposal of sewage.

IDC. Biological Membranes
For course description, see Interdisciplinary Courses.

490. Special Problems in Microbiology
Fall, Winter, Spring, Summer. 1 to 6 credits. May re-enroll for a maximum of 12 credits. Approval of department. Tutorial instruction in laboratory or library research for advanced undergraduates.

511. Medical Microbiology and Immunology
Spring. 1 to 6 credits. May re-enroll for a maximum of 6 credits. A biochemistry course. Enrollment in College of Human Medicine or approval of department. Basic principles of microbiology (bacteriology, virology, mycology, and parasitology) and immunology. Selected type-infections relate these principles to disease in man.

512. Infectious Diseases
Fall. 4(3-3) 511, or approval of department. Interdepartmental with the Department of Medicine. Infectious diseases of man, including biology of the causative microorganism, epidemiology, pathogenesis, host-parasite relationships, clinical and laboratory diagnosis, and clinical management.

521. Medical Microbiology and Immunology
Winter. Variable credit. May re-enroll for a maximum of 6 credits. A biochemistry course. Enrollment in College of Osteopathic Medicine or approval of department. Basic principles of microbiology (bacteriology, virology, mycology and parasitology) and immunology. Selected type-infections relate these principles to disease in man.

531A. Medical Microbiology: Immunology
Winter. 3(1-2) A course in biochemistry and admission to the veterinary professional program, or approval of department. Basic principles of immunology (immunobiology and immunohistochemistry) and their relation to disease in animals.

531B. Medical Microbiology: Bacteriology and Mycology
Winter. 3(2-4) A course in biochemistry and admission to the veterinary professional program, or approval of department. Basic principles of bacteriology and mycology and their relation to disease in animals.

531C. Medical Microbiology: Virology
Spring. 2(1-2) A course in biochemistry and admission to the veterinary professional program, or approval of department. Basic principles of virology and their relation to disease in animals.

531D. Medical Microbiology: Parasitology
Spring. 3(2-4) Admission to the veterinary professional program, or approval of department. Basic principles of parasitology (protozoology, helminthology, and entomology) and their relation to disease in animals.

532. Veterinary Microbiology and Public Health
Winter. 8(5-11) Winter. Summer. 531 or approval of department. Microbiology, immunology, pathogenicity, and medical aspects of microorganisms associated with infectious diseases of animals. Epidemiology of animal diseases significant to human health.

536. Veterinary Parasitology I
Winter, Summer. 4(3-4) Veterinary Medicine students approved of department. Distribution, biology, and control of parasitic animals of importance to veterinary medicine.
MILITARY SCIENCE

All University

041. General Military Science
Application of leadership techniques, the decision making process and staff planning. Military customs and traditions. Students will concurrently enroll in a selected non-Military Science course to fulfill military professional requirements.

A. Military Traditions—MS I
   Winter. 0(0-1) Approval of department.

B. Evolution of Military Leadership—MS II
   Fall. 0(0-1) Approval of department or MS II standing. HST 235 concurrently.

C. Military Career Preparation—MS II
   Spring. 0(0-1) Approval of department or MS II standing.

D. Advanced Career Preparation—MS III
   Winter. 0(0-1) Approval of department or MS III standing.

E. Military Staff Organization—MS IV
   Fall. 0(0-1) Approval of department or MS IV standing.

121. Preview of Military Science
   Fall, Winter. 1(0-1) Approval of department.

   Role of the ROTC officer in the Army. Assists the student in planning a curriculum to satisfy requirements for a commission.

122. Marksmanship and Hunter Safety
   Fall, Spring. 1(0-2) 121 or approval of department.

   Small arms marksmanship and safety. Practical exercises on local firing ranges. Individual basic military marksmanship and the skills necessary to participate in a competitive or recreational shooting program.

223. Terrain Analysis and Land Navigation
   Winter, Spring. 3(3-0) 121 and approval of department.

   Military maps, map construction, specifications and uses. Includes both study of aerial photographs and an introduction to remote energy sensors employed by defense agencies as they relate to tactical operations.

234. Military Teaching
   Fall, Winter. 4(4-2) Basic course, approval of department.

   Methods of teaching manipulative skills to groups with varying educational backgrounds. Emphasis on determination of entry behavior, progress analysis, testing and test construction. Introduction to current teaching aids. Practical experience in simulated field situations is stressed during laboratory.

235. Military Management
   Spring. 4(3-2) 324 or approval of department.

   Task analysis approach to missions. The subject of tactics is used as a teaching vehicle for the managerial approach to the preparation and execution phases of military operations. Emphasis is placed on physical and moral leadership during the laboratory sections.

428. Military Law
   Winter. 4(4-0) Approval of department.

   Jurisdiction and responsibility of the Army commander and junior leader in the application of military justice. Implications of Army operations as related to the rules of land warfare.

427. Seminar
   Spring. 1(1-0) Approval of department.

   Precommissioning orientation stressing current military policies, procedures, customs and trends.

499. Independent Study in Military Science
   Fall, Winter, Spring, Summer. 1 to 3 credits. May re-enroll for a maximum of 3 credits. Approval of department and Juniors.

   Individual research and study in an area related to military science as approved and directed by the Department of Military Science.

133. Orchestra
   Fall, Winter, Spring. 1(0-5) May re-enroll for a maximum of 18 credits. Membership determined by audition.

   Standard overtures and symphonies studied and publicly performed. Attendance at all rehearsals and public concerts obligatory.

135. Music in Elementary Education
   Fall, Winter, Spring. 4(3-3) Elementary education majors.

   Basis, scope and sequence of music instruction in the elementary schools with an introduction to basic knowledge and skills used in elementary school music.

141. Class Instruments and Voice
   Fall. 1(0-1) 499. Independent Study in Military Science.

   Music majors, or approval of department.

   Class instruction in piano, voice, violin, cello, clarinet, and cornet.

142. Class Instruments and Voice
   Winter. 1(0-2) 141.

   Continuation of 141.

143. Class Instruments and Voice
   Spring. 1(0-2) 142.

   Continuation of 142.

145. Music Foundations I
   Fall, Winter, Spring. 3(3-0) 135 and approval of department.

   Development of understanding and knowledge of music fundamentals, ear training, music reading, rhythm, and other basic music perceptions. Designed specifically for elementary classroom teachers who elect a strong concentration in music.

147. Elementary Piano
   Fall, Winter, Spring. 5(2-2) 145 or approval of department. Elementary Education and Physical Education and Recreation majors.

   Beginning class piano instruction. Development of ability to play the three principal chords in all keys and to harmonize simple melodies using these chords. Transposition of simple melodies. Ability to play melodies and rhythms suitable for use in lower intermediate grades or in recreation work.

148. Elementary Piano
   Winter, Spring. 2(2-2) 147. Elementary Education majors.

   Continuation of 147.

150. Keyboard Instruments and Harp
   Fall, Winter, Spring. 1 to 4 credits. May re-enroll for a maximum of 24 credits. Audition required.

   Instruction in piano, organ and harp.

151. Voice
   Fall, Winter, Spring. 1 to 4 credits. May re-enroll for a maximum of 24 credits. Audition required.

152. Stringed Instruments
   Fall, Winter, Spring. 1 to 4 credits. May re-enroll for a maximum of 24 credits. Audition required.

153. Woodwind Instruments
   Fall, Winter, Spring. 1 to 4 credits. May re-enroll for a maximum of 24 credits. Audition required.

154. Brass Instruments
   Fall, Winter, Spring. 1 to 4 credits. May re-enroll for a maximum of 24 credits. Audition required.
