Natural Resource Administration 450.

Fall, Spring. 4(4-0) Seniors. Interdepartmental with the departments of Forestry, Park and Recreation Resources and Resource Development and Agriculture and Natural Resources. Administered by the Department of

Concepts and methods of administering wildland properties. The legal, economic and social environment. Benefit-cost analysis of management changes. Unit organization, personnel management and accounting. Presents a systems view of administration.

455. Natural Resource Economics

Winter, 4(4-0) FOR 450 or approval of department. Interdepartmental with the departments of Forestry, Park and Recreation Resources, and Resource Development, and Agriculture and Natural Resources. Administered by the Department of Forestry.

Basic economic and political principles and techniques that govern the production and consumption of forest land products, including basic forest valuation procedures.

471. Ichthuologu

Spring. 3(2-3) FW 301 or ZOL 320 or ZOL 428. Interdepartmental with the Department of Zoology.

Classification and natural history of fishes. Emphasis on food, game, and forage fishes.

473. Fishery Biology and Management

Fall. 5(3-3) ZOL 471.

Biology of fishes with special reference to distribution and natural history, and application of this knowledge to problems of obtaining maximum return from fishery resources.

475 Fish Culture

Spring. 3(3-0) F W 473.

Artificial propagation of freshwater fish including hatchery management, nutritional and environmental requirements, disease and parasite control and intensive fishery management. Utilization of hatchery stock in fisheries management.

476. Limnology

Winter. 3(3-0) CEM 131 and CEM 161; BOT 450 or ZOL 389. Students may not receive credit for both FW 376 and FW 476. Interdepartmental with the Department of Zoology. Ecology of lakes and streams with special reference to physical, chemical and biological factors affecting their productivity.

Limnological Methods 477.

Winter. 3(0-9) FW 476 concurrently; ZOL 481; ENT 301, ENT 302 recommended. Interdepartmental with the Department of Zool-

Methods and instruments of limnological field investigation on lakes and streams.

Outdoor Environmental 484. Education

Fall. 4(3-2) Juniors or approval of de-

partment.

Using the outdoors as a teaching laboratory for ecological studies of plant and animal com-munities. Designed primarily for secondary teachers.

485. **Environmental Conservation** Program Design

Winter, 3(3-0) Seniors or approval of department.

Materials and methods for integrating environmental conservation into educational programs in schools, nature centers, youth groups and communities.

801. Seminar in Fisheries and Wildlife

Fall, Winter, Spring. 1(1-0)

Graduate problems and current developments of importance.

Advanced Topics

Fall, Winter, Spring Summer. 1 to 6 credits. May reenroll for a maximum of 15 credits. Approval of department.

Study of selected advanced topics in detail and denth.

Advanced Stream Ecology

Summer. 3 credits. ENT 421 or approval of instructor. Given at W. K. Kellogg Biological Station. Interdepartmental with and administered by the Department of Entomol-

Stream ecosystem energy budget models with emphasis on individual projects involving both laboratory and field experiments. Particular use will be made of artificial streams and locally abundant species of aquatic insects.

830. Environmental Requirements of Fish

Winter. 3(3-0) Approval of depart-

ment.

Adaptations and responses of fish to environmental changes; research methods for evaluating environmental limitations and effects of pollutants on fish growth, reproduction and survival. Applications for developing water quality criteria.

871. **Ecology of Fishes**

Summer. 3(1-6) Approval of instructor 389 or FW 473. Given at the W. K. or ZOL Kellogg Biological Station. Interdepartmental with and administered by the Department of

Exploration of ecological problems with particular emphasis on growth, food and habitat selection, population biology and niche relations. Field and experimental investigations of fish

873.Ecology and Management of Stream Fish

Winter. 3(4-0) FW 376, ZOL 389 or BOT 450: or FW 476 or concurrently.

Flowing water habitat as it affects fish, with influences of climate, vegetation, land use, water withdrawal; damming, channel alteraion and fishery management.

Advanced Biological Limnology Fall of odd-numbered years. 3(4-0)

FW 477, or approval of department. Historical and current contributions to concepts

of community structure, energy flow and materials cycling in aquatic eco-systems.

Chemical Limnology

Winter. 4(3-3) F W 476, F W 477 or approval of department.

Application of analytical chemistry concepts and technologies to fundamental chemical mechanisms in natural and polluted water systems. Special consideration given to selected heterogeneous equilibria.

876. Applied Limnology

Spring, 3(3-0) FW 874 or FW 875 or approval of department.

Aquatic ecology: quantitative relationship between physical, chemical and biological parameters in polluted and unpolluted lakes and streams.

Master's Thesis Research 899.

Fall, Winter, Spring, Summer. Variable credit. Approval of department.

940.Quantitative Wildlife Ecology

Fall. 3(3-0) Approval of department.

Fundamentals of population demographics. Rates of increase, dynamic and static life tables, logistic theory, the Leslie matrix model, age specific and time specific parameters. Current hypotheses on mechanisms promoting population stabilty.

Doctoral Dissertation Research

Fall, Winter, Spring, Summer. Variable credit. Approval of department.

FOOD SCIENCE AND HUMAN NUTRITION

College of Agriculture and Natural Resources College of Human Ecology

Food Science

FSC

101. Food and Society (N)

Fall, Winter. 3(3-0) Interdepartmental with Human Nutrition and Foods.

Analysis of the scientific, social and environmental aspects of food in determining the quality of man's life. Introduction into the principles of food preservation and safety.

205.Food Laws and Regulations

Winter, 3(3-0) Interdepartmental with Human Nutrition and Foods.

Food laws and regulations that govern food processing and food service systems; procedures involved in adopting and enforcing food laws and regulations.

Introduction to Food Science 211. Spring. 3(3-0)

Modern food processing, world food problems, and the basic characteristics of processed foods.

World Food Issues

Spring, 3(3-0) Interdepartmental with and administered by the Department of Geography.

Food resources as related to world distributions of population, soil, water, fuel and minerals. Special attention to urbanization, irrigation, and future food needs and global constraints.

223.Commercial Food Processing Sustems

Fall. 3(3-0) Interdepartmental with and administered by Physical Systems in Agriculture and Natural Resources.

Processes and systems used in handling, processing and distribution of food; the need for processing systems and their influence on food

242. Meats, Poultry and Fishery Products I

Fall. 3(2-2) Interdepartmental with the Department of Animal Husbandry.

Principles of evaluation and nutritive value. Identification of grades and cuts of beef, pork, lamb and poultry products.

Courses

300. Dairy Products

Spring. 3(2-2) CEM 132 or approval of department.

Chemical and physical properties of milk and milk products. Survey of dairy products and the technologies involved in their manufacture.

310. Food Safety and Microbiology

Fall. 4(3-3) Juniors; CEM 132 or concurrently or approval of department. Not open to students with credit in FSC 440. Interdepartmental with the Department of Microbiology and Public Health.

Effects of food handling, preparation and service on food safety. Microorganisms in foods, sanitation, food borne disease and food service regulations.

311. Food Processing and Preservation

Winter, 4(4-0) CEM 132

Effects of processing, packaging and preservation on the quality of foods. Demonstrations of use of ingredients, evaluation of products and results of various processing methods.

331. Physical Principles of Food Processing

Fall, Winter. 4(3-2) FSC 211, MTH 109; PHY 229 or approval of department.

Food preservation by heat, low temperature, dehydration and radiation.

332. Biological Principles of Food Processing

Winter. 4(3-3) MPH 200 or approval of department.

Biological problems related to food processing including waste disposal, sanitizing and bactericidal compounds, pesticides and residues, plant and animal growth regulators, radioactive elements, preservatives and toxicology of additives.

333. Chemical Principles of Food Processing

Spring, 4(3-3) FSC 211 and CEM 241 or approval of department.

Chemical changes in foods that affect the texture, color, flavor, odor, stability, and nutritive quality during processing and storage.

400. Milk Processing Technology

Fall. 4(3-3) CEM 132 or approval of department.

The fluid milk industry. Composition, quality, sanitation, nutritive value, processing, packaging and distribution of milk and milk products.

401. Industrial Food Fermentations

Fall. 3(3-0) FSC 440 and organic chemistry or approval of department.

Physical, microbiological and chemical procedures in utilizing microbial cultures in controlled fermentations of foods and food constituents.

402. Chemistry and Technology of Lipids

Winter. 3(3-0) One term organic chemistry.

Chemical and physical properties of edible fats and oils. Refining and processing of lipids into margarine, butter, shortening and salad oils. Chemical methods for analysis of lipids.

404. Dehydrated Foods

Spring. 3(2-3) FSC 331; FSC 333 concurrently or approval of department.

Concentration and dehydration of foods by roller, spray, and freeze drying and foam, puff and tunnel drying. Stability and nutritional aspects of dehydrated foods.

405. Technology of Manufactured Dairy Products

Winter, 4(3-3) FSC 400 or approval of department.

Manufacturing technology of fermented dairy foods, frozen dairy desserts, and imitation dairy products.

421. Food Plant Management

Spring. 3(3-0) Seniors or approval of department.

Business and technical management concepts associated with food plants. Efficiency factors, regulatory obligations, and administrative aspects.

440. Food Microbiology

Spring. 5(3-4) MPH 200 or MPH 301 or approval of department. Interdepartmental with the Department of Microbiology and Public Health.

Major groups of microorganisms of importance to the food industry are studied with emphasis on ecological, physiological, and public health aspects.

445. Meat, Poultry and Fishery Products III

Spring. 3(1-6) FSC 333 or approval of department.

Processing, formulation and quality control.

448. Fruit, Vegetable and Cereal Products I

Fall. 4(3-3) FSC 331 or approval of department.

Quality factors involved in canning, sugar and salt preservation and milling.

449. Fruit, Vegetable and Cereal Products II

Winter, 4(3-3) FSC 331 or approval of department.

Quality factors involved in cooling, freezing and other preservation procedures.

455. Food Analysis I

Fall. 4(2-4) CEM 132 and CEM 162 or approval of department.

Modern methods of analysis for fat, protein, moisture and other macroconstituents of food. Application of spectrophotometry in determination of microconstituents; use of dye-binding, complexometric and iodimetric techniques in food analysis.

456. Food Analysis II

Winter. 4(2-6) CEM 162 and CEM 241 or approval of department.

Use of colorimetry and spectrophotometry, chromatographic methods and other techniques for the analysis of food constituents and additives.

457. Quality Control in the Food Industry

Winter of even-numbered years. 3(3-0) STT 201 or approval of department.

Organization of and tools used for quality control: control charts, acceptance and auditing inspections, critical control points, reliability, safety, recall and liability.

480. Special Problems in Food Science

Fall, Winter, Spring, Summer. 1 to 3 credits. May reenroll for a maximum of 9 credits.

Advanced undergraduates may select research work in food chemistry, food microbiology, food engineering, food plant management, processing dairy products, meat, poultry and fishery products, fruits and vegetables, cereals or beverages.

490. Seminar

Fall. 1(1-0) Approval of department. Preparation and presentation of reports on a specialized aspect of food science.

828. Food Processing Concepts, Systems and Selected New Processes

Winter. 3(3-0) FSC 331, FSC 332, or FSC 440 or approval of department.

Concepts of and requirements for processing systems and continuous processes. Use of computers in food processing, microwave heating of foods; radiation preservation of foods and related processing methods.

830. Thermal Processing of Food Products

Winter. 4(3-3) FSC 331; FSC 332 or FSC 440 or approval of department.

Heating and cooling characteristics of foods in containers, thermal resistance of microorganisms, and derivation of process times and temperatures for pasteurization and sterilization.

832. Microbiology of Food Processing Winter, 3(2-3) FSC 440 or approval of department.

Control of food spoilage and food poisoning microorganisms in food processing and the role of bacterial spores in process selection.

833. Advanced Food Plant Management

Fall of even-numbered years. 3(3-0) FSC 421 or approval of department.

Advanced concepts and strategy of policies and practices in the management of food plants.

834. Flavor Quality Control

Spring of odd-numbered years. 4(3-3) Approval of department.

Sensory methods used for food evaluation and panel analyses. Flavor chemistry and analytical methods. Sampling plans, control charts, and acceptance sampling for statistical quality control.

835. Carbohydrates in Foods

Fall of odd-numbered years. 3(3-0) FSC 333.

The chemistry and food technology of mono-, oligo-, and poly-saccharides.

850. Selected Topics in Food Science

Fall, Winter, Spring, Summer. 2 to 4 credits. May reenroll for a maximum of 12 credits. Approval of department.

Advanced studies; food utilization, texture, additives, toxicants, food proteins, ingredient safety, nutrient stability, new processing techniques, flavors, quality control, storage stability, state and federal food regulations.

880. Special Problems in Food Science

Fall, Winter, Spring, Summer. 1 to 4 credits. May reenroll for a maximum of 12 credits. Approval of department.

Investigation of food science areas of special interest to individual graduate students.

899. Master's Thesis Research

Fall, Winter, Spring, Summer. Variable credit. Approval of department.

932. Histological and Chemical Techniques

Winter. 3(1-6) Approval of department.

Research techniques in thin-layer and gas chromatography, differential thermal analysis, isoelectric focusing, histology, histochemistry, biological testing, polarography and pH stat measurements.

933. Instrumental Methods of Analysis

Spring, 3(2-3) FSC 455 or FSC 456 or approval of department.

Spectoscopy (ultraviolet, visible, infrared, flame, atomic absorption, fluoresence), manometry, ion exchange, countercurrent distribution, radioisotopic tracers.

934. Research Techniques with Proteins

Fall. 3(2-3) BCH 401 or BCH 451.

Physical and chemical techniques applicable to protein characterization (including-electrophoretic techniques, thin-layer chromatography, geffiltration, ultracentrifugation and amino acid analysis).

951. Muscle Biochemistry

Spring. 3(3-0) BCH 451 or approval of department.

The structure and function of living muscle. Emphasis is placed upon the chemical and energy changes of muscle in contraction. Changes occurring after death during rigor development are also discussed.

952. Advanced Lipids

Winter of even-numbered years, 3(3-0) FSC 402 or approval of department.

A course relating composition, structure, and physical and chemical properties of lipids to processing requirements of fats and oils to their function in food systems.

953. Enzyme Reactions

Spring of even-numbered years. 4(3-3) BCH 451, or approval of department.

Comprehensive discussion of parameters which affect enzyme activity. Properties of enzymes important in food processing.

954. Chemistry of Plant Products

Fall of even-numbered years. 3(3-0) FSC 333, BCH 451, or approval of instructor. Chemistry and biochemistry of plant pigments, tannins, toxins and proteins.

990. Food Science Seminar

Fall, Winter, Spring. 1(1-0) May reenroll for a maximum of 3 credits toward M.S. and 6 credits toward the Ph.D. Approval of department.

Preparation and presentation of reports on a specialized aspect of research findings in food science.

999. Doctoral Dissertation Research

Fall, Winter, Spring, Summer. Variable credit. Approval of department.

Human Nutrition and Foods

HNF

100. Elementary Food Preparation Fall, Winter, Spring. 4(2-4)

Composition and properties of food related to quality characteristics; methods of preparation, evaluation of quality and use of selected foods.

101. Food and Society

Fall, Winter. 3(3-0) Interdepartmental with and administered by Food Science.

Analysis of the scientific, social and environmental aspects of food in determining the quality of man's life. Introduction into the principles of food preservation and safety.

102. Nutrition for Man (N) Fall, Winter, Spring. 3(3-0)

Fundamentals of nutrition with reference to diverse ways man provides for and attaches meaning to his food.

200. Physical and Chemical Properties of Foods

Fall, Winter. 4(2-4) CEM 131.

Interrelationships between basic physical and chemical principles and food preparation: composition, methods of preparation, evaluation, quality standards and comparative analysis.

205. Food Laws and Regulations

Winter. 3(3-0) Interdepartmental with and administered by Food Science.

Food laws and regulations that govern food processing and food service systems; foodures involved in adopting and enforcined aws and regulations.

221. Food and the Consumer

Fall, Winter, Spring. 3(3-0) Sophomores or approval of department.

Factors affecting the food supply, consumer protection, food buying and management of human and material resources in feeding the family.

222. Food and the Consumer Laboratory

Fall, Winter, Spring. 2(0-4) HNF 221 or concurrently.

Decision making in Foods and Nutrition with emphasis on food choices in the marketplace. Management of human and nonhuman resources in food consumerism activities.

290. Professional Literature I

Fall, Winter. 2(2-0) HNF 102 or HNF 100 or HNF 200 or FSC 101, Sophomores; departmental majors.

Identification of factors and development of analytical skills involved in evaluating and communicating scientific information.

300. Experimental Foods

Winter, Spring. 4(2-6) HNF 200, CEM 132; FSC 310 or concurrently.

Experimental approach to the study of foods, relating chemical and physical properties to reactions and processes occurring in food in reponse to various treatments.

310. Sensory Assessment of Foods Winter 2(1-2) HNE 290 HNE 300

Winter, 2(1-2) HNF 290, HNF 300 or concurrently.

Sensory perception, chemistry of food flavors, and methods used in organoleptic evaluation of foods.

312. Nutrient Composition of Foods

Winter, Summer. 1(0-2) HNF 102 or FSC 101.

Sources of nutrient composition information and their use in menu planning. Choosing foods to meet nutrient needs of various groups.

315. Consumer Aspects of Food Consumption

Fall. 3(3-0) HNF 102 or FSC 101; EC 200.

Economic issues of concern to consumers in the food marketplace; human resource allocation to consumer food consumption activities; federal food programs affecting consumers' nutritional status.

319. Food Service Systems: General Survey

Fall, Winter, Spring. 3(3-0) HNF 222 or concurrently; or approval of department.

Factors which influence the design of food service systems. Comparison of systems as related to organizational objectives and responsibilities, operational resources (material, human) and consumer acceptance factors.

321. Food Service Management: Material Resources

Fall, Winter, Spring. 3(2-2) HNF 319 or approval of department.

Principles, processes and operational control strategies in materials management in food service systems. Menu planning, procurement, onpremise storage and issue, production, consumer distribution, safety, sanitation, and material cost analysis.

330. Nutrition in the Life Cycle: Children

Winter. 3(3-0) HNF 102; FCS 262A, three terms of natural science or approval of department.

Functions and importance of nutrients to physical growth, development and health of the child. Eating behavior of children. Feeding in child care centers.

375. Community Nutrition

(475.) Spring. 3(3-0) HNF 102 or approval of department.

Identification of nutritional needs of population groups and available resources in communities.

400H. Honors Work

Fall, Winter, Spring, Summer. Variable credit. May reenroll for a maximum of 16 credits. Seniors, approval of department.

403. Fats and Carbohydrates in Food Sutems

Fall. 4(3-3) HNF 300 or approval of department.

Chemical and physical reactions in fat and carbohydrate food systems, including sols, gels, emulsions, etc. Food evaluation techniques will be introduced.

404. Role of Proteins in Food Systems Winter. 4(3-3) HNF 300 or approval of department.

Physical and chemical reactions with protein foods, meats, eggs, cheese, seeds. Emphasis on time-temperature data in relation to quality.

406. Cultural Aspects of Food

Spring, Summer of odd-numbered years. 3(3-0) Juniors.

A cross cultural investigation of food and its consumption. Factors such as history, religion, food sources and socio-economic status are considered.

Courses

406L. Laboratory--Cultural Aspects of Food

Spring. 1(0-3) HNF 100 or HNF 200 or approval of department; HNF 406 concurrently.

Art and science of cookery in relation to historical, national, regional, racial and religious customs.

407. Interactions of Culture and Nutrition

Fall. 3(3-0) Juniors; HNF 102 or ANP 171 or approval of instructor. Interdepartmental with the Department of Anthropology.

World and U.S. food behavior focusing on conflicts between behavior and nutritional needs at various stages of life cycle. Anthropological, psychological and social influences affecting food behavior are analyzed.

411. Principles of Human Nutrition

Winter, Summer. 4(3-2) BCH 200.

Identification, function and food sources of nutrients required by man. Metabolism as affected by deficiency or excess of specific nutrients.

420. Food Service Management: Human Resources

Fall, Winter. Summer of oddnumbered years. 3(2-2) HNF 321 and PSY 356 or approval of department.

Principles, processes and operational control strategies in personnel management in food service systems. Hiring, training, and dismissal procedures; labor-management relations; task analysis and distribution; productivity assessment; and labor cost analysis.

421. Food Service Management: Problem Analysis and Decision Making

Winter, Spring. Summer of evennumbered years. 3(1-4) HNF 420 or approval of department.

Analysis of selected food service problem situations. Application of problem-solving techniques, identification of cause and effect factors, analysis of situational components and development of remedial alternatives for administrative action.

461. Energy Nutrients and Proteins for Human Nutrition

Fall. 4(4-0) BCH 200; PSL 432 or PSL

241.

Metabolism of protein, fats and carbohydrates as applied to the nutritional requirements and food supplies of people.

462. Vitamins and Minerals for Human Nutrition

Winter. 3(3-0) HNF 461.

Metabolism of vitamins and minerals as applied to the nutritional requirements and food supplies of people.

463. Nutrition and Human Development

Spring, 4(3-2) HNF 462 or approval of department.

The role of nutrients in physiological systems and biochemical processes as related to the perspective of human growth and development.

470. Clinical Nutrition

Fall. 3(3-0) HNF 462; PHM 350 or approval of department.

Changes in physiological and/or biochemical functions or processes due to illness and uses of modified diets as an essential part of treatment.

470P. Clinical Nurition Practicum Fall. 1(0-2) 470 concurrently.

Assessment of nutritional status. Modification of the hospital general menu for implementation of diets prescribed for treatment of disease.

473. Interpretation of Clinical Laboratory Tests in Dietetics

Winter. 4(3-2) HNF 470 or concur-

rently.

Principles, procedures and interpretation of clinical laboratory methods with particular emphasis on their interpretation relative to nutritional status and therapeutic nutrition.

475P. Community Nutrition Fieldwork Fall, Winter, Spring, Summer. 1(0-3)

Seniors; HNF 375 or concurrently.

Application of community nutrition principles in field settings. Instructor arranged projects in nutrition survey techniques or delivery of nutrition education services.

478. Dietetics: Theory-Practice Interrelationships I

Winter. 3(2-3) HNF 321, HNF 470, ED 414 or F E 340.

Introduction and practice of competencies required of the professional dietitian. Skills in communication, interviewing, problem solving and planning for nutritional care will be developed using simulated and real life situations.

479. Dietetics: Theory-Practice Interrelationships II

Spring. 3(2-3) HNF 478.

Continuation of HNF 478. Skills in nutritional and employee counseling, resource management and professional behavior will be developed using simulated and real life situations.

480. Practice of Dietetics

Fall, Winter, Spring, Summer. 12(2-30) May reenroll for a maximum of 24 credits. HNF 303, HNF 470.

Application and integration of nutritional and managerial concepts related to the practice of dietetics.

490A. Professional Literature II: Foods Fall. 2(2-0) HNF 290, HNF 300 or HNF

Fall. 2(2-0) HNF 290, HNF 300 or HNI 403 or approval of department.

Selected topics in foods research. Emphasis on experimental data and basic scientific principles related to food quality, nutritive stability and food safety.

490B. Professional Literature II: Nutrition

Spring. Summer of even-numbered years. 2(2-0) HNF 290, HNF 462 or approval of department.

Emphasis on experimental data and scientific principles related to basic nutrition research. Focus on current developments in nutrient requirements, metabolism and interactions

490C. Professional Literature II: Clinical Nutrition

Winter. 2(2-0) HNF 290, HNF 470 or approval of department.

Selected topics in clinical nutrition research. Emphasis on human investigative data and scientific principles related to nutritional care of patients/clients including pathophysiologic correlations, nutritional assessment, diet planning, nutrition counseling.

490D. Professional Literature II: Food Service Management

Spring, Summer. 2(2-0) HNF 290, HNF 420 or concurrently or approval of department. Examination of trends, problems and research in food service systems operation. Focus on current issues and developments relating to materials handling, manpower needs, operational accountability and public responsibility.

490E. Professional Literature II: Foods and Nutrition Information

Spring. Summer of odd-numbered years. 2(2-0) HNF 290, HNF 411 or HNF 462 or approval of department.

Selected topics in foods and nutrition information. Emphasis on research related to method and effectiveness of nutrition education.

495. Independent Study

Fall, Winter, Spring, Summer. 1 to 3 credits. May reenroll for a maximum of 9 credits. Seniors; approval of department.

Individual study of selected topics in foods, nutrition and food service management under staff guidance.

498. Field Study

Fall, Winter, Spring, Summer. 4 to 12 credits. May reenroll for a maxaimum of 12 credits. Approval of department.

Planned program of research, observation, study or work in selected organizations under staff guidance.

800. Seminar in Foods and Nutrition Fall, Winter, Spring. 1(1-0) HNF 403 or HNF 463.

802. Seminar in Food Service Management

Spring. 2 to 4 credits. May reenroll for a maximum of 4 credits. Approval of department.

803. Problems in Food Service Management

Fall, Winter, Spring, Summer. Variable credit. Approval of department.

805. Experimental Foods III

Spring. 4(1-9) HNF 404 or approval of department.

Planning, executing, and reporting individual research project. Data collection, evaluation and interpretation to demonstrate understanding of research techniques and attitudes, and an awareness of significant problems in the field.

813A. Special Studies in Nutrition

Fall, Winter, Spring, Summer. Variable credit. HNF 461.

813B. Special Studies in Experimental Foods

Fall, Winter, Spring. Summer of oddnumbered years. Variable credit. HNF 404; BCH 200 or BCH 451 and BCH 804.

813C. Special Studies in Food Service Management

Fall, Winter, Spring, Summer. Variable credit. Approval of department.

Special studies in facility management, manpower coordination and tools and methods of operational control.

816. Applied Human Nutrition Spring, 3(3-0) HNF 462.

840. Topics in Nutrition

Fall, Winter, Spring, Summer. 2 to 3 credits. HNF 462, PSL 432, BCH 401.

Advanced studies in nutrition: assessment and surveilance, community, clinical, growth and development, behavior, infectious disease and environment, oral health, obesity, aging, diet.

899. Master's Thesis Research

Fall, Winter, Spring, Summer. Variable credit. Approval of department.

921. Pathology of Nutritional and Metabolic Deseases

Summer of even-numbered years. 4(3-2) Approval of department; PTH 404 or ANT 420. ANS 525, BCH 452, HNF 462 recommended. Interdepartmental with the departments of Large Animal Surgery and Medicine, Animal Husbandry and Pathology.

Development, physiopathology and morphologic pathology of nutritional and metabolic diseases including carbohydrate, protein, fatty acid, vitamin and mineral deficiencies, their experimental induction and their medical or economic significance.

926. Comparative Nutrition--Lipids and Carbohydrates

Winter of odd-numbered years. 4(4-0) BCH 452 and a previous course on principles of nutrition. Interdepartmental with the Department of Animal Husbandry.

Regulatory aspects of carbohydrate and lipid metabolism as influenced by nutrition in mammals. Emphasis on normal and abnormal physiological states such as obesity, ketosis and diabetes.

927. Comparative Nutrition--Protein Metabolism and Developmental Biology

Winter of even-numbered years. 4(4-0) BCH 452, PSL 802 or concurrently. Interdepartmental with the Department of Animal Husbandry.

Protein quality assessment, protein status, protein calorie malnutrition, amino acid metabolism, protein turnover, digestion and absorption, hormonal control of protein metabolism, developmental aspects of protein metabolism and growth.

928. Comparative Nutrition-Minerals

Spring of even-numbered years. 3 credits. BCH 452, PSL 802. Interdepartmental with and administered by the Department of Animal Husbandry.

Forms and location in body, metabolic roles, deficiency and toxicity signs, interrelationships, requirements and biological availability of sources.

929. Comparative Nutrition--Vitamins

Spring of odd-numbered years. 3(3-0) BCH 452 and a previous course on principles of nutrition. Interdepartmental with and administered by the Department of Animal Husbandry. Chemical and physical properties, standards of activity, occurrence, metabolic roles, antivitamins, deficiency and toxicity signs, requirements and factors affecting requirements.

999. Doctoral Dissertation Research

Fall, Winter, Spring, Summer. Variable credit. Approval of department.

FOOD SYSTEMS ECONOMICS AND MANAGEMENT

FOREIGN LANGUAGES

See German and Russian, Linguistics and Oriental and African Languages, and Romance and Classical Languages.

FORESTRY

College of Agriculture and Natural Resources

In 305, 306, 402 and 430, field trips are scheduled for several consecutive days away from the campus for integrated field experience, primarily in the second half of spring term of the junior year, so that these courses must be taken concurrently. This precludes enrollment in other courses during that term. The approximate cost of these field trips is \$200.

IDC. Resource Ecology and Man

For course description, see Interdisciplinary Courses.

202. Introduction to Forestry Fall, Spring. 3(3-0)

Forestry in its broadest sense, including: historic development, forest growth, protection and management, products, national and world economy and policy. Emphasis on multiple use concepts. One-day field trip required.

204. Forest Vegetation

Fall, Spring. 5(3-4)

Nomenclature, classification, and identification of important trees, shrubs, and herbaceous plants of forest and field.

220. Plants and Their Environment

Winter. 3(3-0) Intedepartmental with Agriculture and Natural Resources.

Fundamental ecological relationships between various climatic, edaphic and biotic environmental factors of the ecosystem and plant response, including structure, function and evalutation of species.

301. Quantitative Methods for Natural Resources

Winter, 4(3-2) MTH 109 or MTH 111.

Collection and analysis of information pertaining to natural resources. Survey design, field procedures, equipment, and analytical techniques.

304. Forest Ecology

Fall. 4(3-3) FOR 204; BOT 205; CSS 210 or concurrently.

The forest is viewed as a biological community. Forest site relationships are quantified by examining the existing physical environment and relating it to the forest species occupying that community.

305. Silviculture

Spring. 4(3-3) FOR 204, FOR 304. Must be taken concurrently with FOR 306, FOR 402 and FOR 430.

Natural and artificial forest reproduction methods; intermediate stand treatments; nontimber aspects of silviculture; field studies of silvicultural methods. Extended field trips required.

306. Forest Fire Protection and Use

Spring. 3(2-3) Juniors or approval of department. Must be taken concurrently with FOR 305, FOR 402 and FOR 430.

Causes and effects of forest fires. Combustion, fire behavior and fire weather. Prevention and control planning and techniques. Fire in forest land management. Extended field trips required.

309. Wood Technology

Fall. 4(3-3)

Structure of wood. Mechanical and physical properties of wood. Wood anatomy and relation to growth.

402. Forest Inventory

FOR

(302.) Spring. 4(2-4) FOR 301. Must be taken concurrently with FOR 305, FOR 306 and FOR 430.

Field and office techniques of forest inventory, with primary emphasis on timber resources. Extended field trips required.

409. Forest Hydrology

Fall. 3(3-0) CSS 210.

Hydrologic cycle, with emphasis on soil, water and ground water regimes; instrumentation and measurement of the various components. Effects of forest management on watersheds and water yields.

410. Forest Tree Improvement

Distribution of genetic variation in natural tree populations. Introduction, selection, progeny testing, species hybridization, and polyploidy to obtain superior tree populations.

411. Tree Physiology

Winter. 3(3-0) BOT 301.

The fundamental principles of plant physiology with particular reference to the growth and development of woody plants, and consideration of the influence of genetic and environmental factors on physiological processes in trees.

424. Forest Soils

Spring. 4(3-3) FOR 220 or FOR 304, CSS 210. Interdepartmental with the Department of Crop and Soil Sciences.

Interrelationships of forest site and the growth of forests. Classification and productivity of forest soils. Effects of silvicultural and forest management practices on the soil. Two-day field trip required.

430. Timber Harvesting and Utilization

Spring. 4(3-3) FOR 309. Must be taken concurrently with FOR 305, FOR 306 and FOR 402.

Felling and bucking trees. Log transportation. Log and lumber grades. Sawmill practices. Wood working machinery. Gluing wood, manufacture of pulp, plywood and other board products. Extended field trips required.
