GENETICS

College of Natural Science

800. Genetics Seminar
Fall, Winter, Spring. 11(0) May reenroll for a maximum of 12 credits. Approval of director.
Student seminar to cover genetics subjects not considered in formal courses. Course is also intended to give students experience in reviewing and organizing literature in a subject, and orally presenting and defending the analysis.

804. Gene Transmission
(801.) Fall, Winter, Spring. 3(3-0) ZOL 441 or approval of instructor.
Molecular and formal genetic studies of the replication, recombination, repair and segregation of genetic information in procaryotes and eucaryotes. Experimental design and methodology will be emphasized.

805. Genetic Organization, Action and Regulation
(803.) Winter. 3(3-0) GEN 804.
Molecular and formal genetic studies of the organization, expression and regulation of gene activity in procaryotes and eucaryotes. Experimental design and methodology will be emphasized.

806. Population and Quantitative Genetics
(802.) Spring. 3(3-0) ZOL 441 or approval of instructor.
Genetics of quantitative characteristics in populations with special reference to polygenic variation and its interactions with environment, gene action and its measurement, mating systems, and selection.

850. Special Problems
Fall, Winter, Spring, Summer. 1 to 4 credits. May reenroll for a maximum of 12 credits. Approval of instructor.
Students with special interests and abilities may study published literature in a selected genetics topic or they may carry on research in the laboratory on a selected subject in collaboration with genetics faculty.

900. Selected Topics in Genetics
Fall, Winter, Spring. 2 to 5 credits. May reenroll for a maximum of 9 credits. ZOL 441 and approval of instructor.
Topics will be selected from molecular genetics, physiological genetics, quantitative genetics, evolution, radiology and mutagenesis, microbial genetics, somatic cell genetics, behavioral genetics, and human genetics.

999. Doctoral Dissertation Research
Fall, Winter, Spring, Summer. 3 to 12 credits. Major.
Research for the doctoral dissertation in genetics.

GEOGRAPHY

College of Social Science

100. Man, Location and Environment
Fall, Winter, Spring. 3(0)
Concepts, theory, and methods of modern Geography.

122. The World of Maps
Fall, Spring. 3(0)
Discussion of types, practical applications, and sources of maps.

150. Geography of Selected Current Problems
Fall, Winter, Spring. 2(0)
The geographic perspective is used to examine U.S. and world problems of major concern such as international conflicts, environment quality, spatial change, and economic development.

170. Future Worlds (S)
Fall, Spring, Summer. 3(0)
Geographical approach to environmental, biological, economic, social and political problems facing mankind between now and year 2000.

180. Population and Quantitative Analysis and Linear Programming in Forestry Research
Fall of odd-numbered years. 4(4-0)
MTT 112, SFT 423, CPS 110 or CPS 120.
Application of least squares analysis and linear programming to problems in forestry research. Include both linear and nonlinear least squares models. Case studies from several forestry disciplines.

190. Multivariate Methods in Forestry Research
Winter of even-numbered years. 4(4-0)
FOR 975 or approval of department.
Application of multivariate techniques such as principal components, canonical analysis, factor analysis, and clustering to problems in forestry research. Case studies drawn from several forestry disciplines.

909. Doctoral Dissertation Research
Fall, Winter, Spring, Summer. Variable credit. Approval of department.
Research for the doctoral dissertation in genetics.

190. Resource Ecology and Man
For course description, see Interdisciplinary Courses.

211. Geography of Culture
Fall, Winter, Spring. 4(3-0)
A systematic discussion of cultural geography, stressing cultural processes and relationships.

204. World Regional Geography (S)
Fall, Winter, Spring. 4(4-0)
Man's relationship with natural and cultural environments.

206. Physical Geography Laboratory
Fall, Winter, Spring. 4(4-0)
Analysis of weather, climate, landforms, soils, water and biotic factors of man's environment, including their spatial, genetic, and functional interrelationships.

207. Physical Geography Laboratory
Fall, Winter, Spring. (10-2) GEO 206 or concurrently.
Laboratory study of geographic aspects of map interpretation, aerial photographs, weather, climate, soils, landforms, and vegetation.

123. World Economic Geography
Fall, Winter, Spring. 4(4-0)
Emphasis on distribution of natural resources, industries and service activities, stressing factors of location and economic concepts of locational change.

215. World Food Issues
Spring. 3(3-0) Interdepartmental with Food Science.
Food resources as related to world distributions of population, soil, water, fuel and minerals. Special attention to urbanization, irrigation, and future food needs and global constraints.

223. Introduction to Cartography
Fall, Winter, Spring. 4(2-4)
Principles and techniques of constructing maps and other graphic devices. Types of map reproduction.

224. Remote Sensing: Airphoto Interpretation
Fall, Winter. 4(2-4)
Sophomore.
Use of aerial photographs in the identification and interpretation of physical and cultural features of the terrestrial environment. Includes principles of photogrammetry, and stresses application and practice.

124. Continuing Revolution in China: Problems and Approaches
For course description, see Interdisciplinary Courses.

308. Perspectives on Geography
Spring. 2(2-0)
Introduction to the profession of geography for majors.

300. North America
Fall, Winter, Spring. 4(3-0)
Human and physical geography of North America, north of the Mexican border.
