512. Infectious Diseases
Fall: 4-3-3 MPH 511, or approval of department. Interdepartmental with and administered by the Department of Microbiology and Public Health.
Infectious diseases of man, including biology of the causative microorganism, epidemiology, pathogenesis, host-parasite relationships, clinical and laboratory diagnosis, and clinical management.

520. Biology of Blood Diseases
Spring: 2(2-0) Enrollment in a college of medicine or a graduate program in a biological science.
Correlates basic science and clinical concepts of hematology.

590. Special Problems in Medicine
Fall, Winter, Spring, Summer: 1 to 6 credits. May reenroll for a maximum of 12 credits. Human Medicine students or approval of department.
Each student will work under direction of a staff member on an experimental, theoretical or applied problem.

608. Senior Medical Clerkship
Fall, Winter, Spring, Summer: 1 to 17 credits. May reenroll for a maximum of 43 credits. Primary clerkship, third year Human Medicine students.
Based in community hospitals, this clerkship will stress interviewing skills, history, physical examination, along with problem solving and therapy, and care of the whole patient leading to independence in patient management.

609. Hematology Clerkship
Fall, Winter, Spring, Summer: 1 to 17 credits. May reenroll for a maximum of 34 credits. MED 608.
Development of skills in data collection, problem solving and management related to common hematologic disorders of children and adults.

610. Oncology Clerkship
Fall, Winter, Spring, Summer: 1 to 17 credits. May reenroll for a maximum of 34 credits. MED 608.
Development of skills in data collection, problem solving and management of the more prevalent cancers in children and adults.

611. Cardiology Clerkship
Fall, Winter, Spring, Summer: 1 to 17 credits. May reenroll for a maximum of 34 credits. H M 602.
A clinical clerkship in which students evaluate in depth patients with cardiac diseases. This includes experiences with special diagnostic procedures including cardiac catheterization, phonocardiography, echocardiography and electocardiography.

612. Nephrology/Urology Clerkship
Fall, Winter, Spring, Summer: 1 to 17 credits. May reenroll for a maximum of 34 credits. H M 602.

613. Dermatology Clerkship
Fall, Winter, Spring, Summer: 1 to 17 credits. May reenroll for a maximum of 34 credits. H M 602.
Office based experience with a dermatologist to learn clinical skills in dermatology and develop observational and diagnostic skills in skin disease.

614. Medical Chest Clerkship
Fall, Winter, Spring, Summer: 1 to 17 credits. May reenroll for a maximum of 34 credits. H M 602.
A clerkship covering four aspects of chest diseases: tuberculosis, diagnostic, pulmonary function, and physiology. The student works with medical residents, utilizing outpatient and hospital facilities.

615. Gastroenterology Clerkship
Fall, Winter, Spring, Summer: 1 to 17 credits. May reenroll for a maximum of 34 credits. H M 602.
Referred patients with gastrointestinal problems are seen as either inpatients or outpatients. Many long term problems are followed. Patients with psychosocial problems are seen conjointly with Social Service.

616. Allergy Clerkship
Fall, Winter, Spring, Summer: 1 to 17 credits. May reenroll for a maximum of 34 credits. MED 608 and H M 602 or H D 608.
Office and hospital based experience to learn and develop diagnostic skills in allergy with a review of basic therapeutics as they relate to allergic diseases.

617. Neurology Clerkship
Fall, Winter, Spring, Summer: 1 to 17 credits. May reenroll for a maximum of 34 credits. H M 602.
A combined office and inpatient experience that will provide the student with an opportunity to learn the concepts of evaluation and management of neurological disease.

618. Infectious Disease Clerkship
Fall, Winter, Spring, Summer: 1 to 17 credits. May reenroll for a maximum of 34 credits. H M 602 and MED 608.
Interdepartmental with the Department of Microbiology and Public Health.
The clerkship emphasizes acquisition in depth of knowledge and skills essential in solution of clinical problems in infectious and immunologic diseases. Integrated basic science input is afforded through relevant seminars.

619. Clinical Pharmacology Clerkship
Fall, Spring: 4 credits. H M 602, MED 608 and H D 609.
Understanding and use of drugs: adverse effects, and misuse of drugs.

620. Endocrinology and Metabolism Clerkship
Fall, Winter, Spring, Summer: 4 to 8 credits. May reenroll for a maximum of 16 credits. H M 602.
Clinical and/or clinical-research clerkship to allow the student to work closely with patients having endocrine diseases, electrolyte abnormalities, endocrine hypertension or diabetes mellitus.

621. Computer Medicine Clerkship
Fall, Winter, Spring, Summer: 4 to 16 credits. May reenroll for a maximum of 16 credits. H M 602.
Learning BASIC computer language, preparing flow chart for elementary management of medical problem.

622. Diabetes and Metabolism Clerkship
Fall, Winter, Spring, Summer: 4 credits. MED 606 and H D 606.
Clinical experience with diabetic patients and other related endocrine disorders.

624. Geriatrics Clerkship
Fall, Winter, Spring, Summer: 16 credits. H M 602; MED 608 and H D 608.
Exposure to a wide variety of geriatric medical problems.

626. Physical Medicine and Rehabilitation Clerkship
Fall, Winter, Spring, Summer: 4 credits. May reenroll for a maximum of 8 credits. H M 602; MED 608 and H D 608.
Experience in prescription writing for physical medicine procedures, occupational therapy and rehabilitation skills.

627. Rheumatology Clerkship
Fall, Winter, Spring, Summer: 4 credits. H M 602; MED 608 and H D 608.
Combined office and hospital consultative clerkship which develops diagnostic skills in areas of rheumatic diseases.

628. Internal Medicine Clerkship
Fall, Winter, Spring, Summer: 4 to 16 credits. May reenroll for a maximum of 16 credits. H M 602; MED 608 and H D 608.
Elective experiences in internal medicine.

637. Emergency Medicine Clerkship
Fall, Winter, Spring, Summer: 4 to 20 credits. May reenroll for a maximum of 20 credits. MED 608, H D 608 or SUR 608; H M 602.
Combined office and hospital emergency experiences designed to provide life-saving skills. Pathophysiology and other basic concepts will be used to explain the development of emergent conditions. Clinical diagnosis and treatment of emergencies seen in community emergency departments will be discussed.
Descriptions – Metallurgy, Mechanics and Materials Science
of Courses

211. Mechanics of Deformable Solids
Fall, Winter, Spring, Summer. 4(4-0)
MMM 205; MTH 215, MCM 215 concurrently, for A, E, C, M, E majors.
Deformable solids, stress and strain, principal axes, material behavior (elastic, plastic, viscoelastic, temperature dependent). Boundary value problems, torsion, beams. Instability, columns.

215. Solid Mechanics Laboratory
Fall, Winter, Summer. 1(0-2)
MMM 211 concurrently.
Instrumentation, physical properties of materials, comparison of experiment and theory.

230. Introduction to Materials Science
Spring. 4(4-0) Sophomores.
A qualitative survey of metals, ceramics, and polymers, and the relationship of electronic, molecular, and crystal structure to the physical, mechanical, thermal, electrical and magnetic properties.

260. Manufacturing Processes
(M E 290) Fall, Winter, Spring. 3(2-3)
An introduction to the materials and processes used in manufacturing, to convert ideas into products, machines, and structures for the use of people. Extensive use is made of audiovisual techniques. Field trips required.

306. Mechanics II
Fall, Winter, Spring. 4(4-0) MCM 205, MTH 215.
Dynamics of particles and particle systems. Energy and momentum principles. Two and three dimensional rigid body dynamics.

341. Materials Chemistry II
Winter. 4(4-0) CEM 301 or MCM 311.
An integrated treatment of the physical chemistry of metals and engineering materials is presented, with some important metals and alloys. Thermodynamics, solutions, phase equilibrium, electrochemistry, corrosion, reaction kinetics in liquids and solids, diffusion, surface phenomena.

342. Materials Chemistry III
Spring. 4(4-0) MCM 341.
Continuation of MCM 341.

360. Physical Metallurgy I
Fall. 4(4-0) CEM 153 or approval of department.
Relationship of properties to microstructure as affected by solidification transformations in heterogeneous systems, cold work, recrystallization, and grain growth. Emphasis on the important commercial metals and alloys.

361. Physical Metallurgy II
Winter. 4(4-0) MCM 360.
Continuation of MCM 360.

370. Metals and Alloys I
Fall. Winter. 4(3-3)
Principles of physical metallurgy applied to engineering metals and alloys.

371. Metals and Alloys II
Winter. 3(3-0) MCM 370.
Continuation of MCM 370.

372. Metals and Alloys III
Spring. 3(3-0) MCM 371.
Continuation of MCM 371.

380. Physical Metallurgy Laboratory I
Fall. 1(0-3) MCM 360 or concurrently.
First of an integrated sequence of laboratory courses designed to illustrate the parallel theory courses. Introduction to metallography, pyrometry, and testing of metals.

381. Physical Metallurgy Laboratory II
Winter. 1(0-3) MCM 360, MCM 361 concurrently.
Continuation of MCM 360.

382. Physical Metallurgy Laboratory III
Spring. 1(0-3) MCM 381.
Continuation of MCM 381.

400. Special Problems
Fall, Winter, Spring. 1 to 3 credits. May be repeated for a maximum of 6 credits. Approval of department.
Individualized reading and research.

404. Dynamics of Mechanical Systems
Fall. 3(2-0) MCM 306.

411. Mechanics of Deformable Solids II
Spring. 3(3-0) MCM 411.
Continuation of MCM 411. Unsymmetrical bending, curved beams, torsion of non-circular shapes, shear center, beam columns. Introduction to energy theorems with applications to determine and indeterminate beams, and rings.

414. Principles and Techniques of Experimental Solid Mechanics
Spring. 3(3-0) MCM 414.
Fundamental concepts and current technology for static and dynamic measurement of strain and acceleration. Main topics discussed are resistance strain gauges, photoelasticity, potentiometers, brittle coatings, Moire patterns, and holography.

430. X-Ray Crystallography
Fall. 4(3-3) MCM 342 or approval of department.
Symmetry, elementary crystallography, general properties of X-rays, introduction to radiation safety, interaction of X-rays with matter, application of X-ray diffraction to materials problems.

440. Color and Appearance of Materials
Spring. 3(3-0) Approval of department.
Color in art and technology; light and its interaction with colored materials; light sources and illuminants; color notation and classification; colored materials.

455. Advanced Physical Metallurgy I
Winter. 3(3-4) PHY 364 or approval of department.

456. Advanced Physical Metallurgy II
Spring. 3(3-0) MCM 455.

460. Metallurgical Engineering I
Fall. 4(3-2) Approval of department.

461. Metallurgical Engineering II
Winter. 4(3-2) MCM 460 or approval of department.

462. Metallurgical Engineering III
Spring. 4(3-2) MCM 461 or approval of department.

465. Mechanical Failure Analysis
Spring. 3(3-0) MCM 311, MCM 315, MCM 320 or MCM 370 or approval of department.
Modes and causes of failures of mechanical components. Analysis illustrated through student projects requiring integration of knowledge from several areas.

470. The Cast Alloys
Winter. 4(4-0) MCM 372.
Physical metallurgy of the cast alloys. Solidification and transformation, Nucleation and inoculation, Mode of solidification as influencing foundry properties in ferrous and nonferrous alloys. Casting design as related to foundry practice.

475. Alloy Development and Application
Fall. 4(4-0) MCM 361, or approval of department.
Physical metallurgy, development, and applications of special steels and alloys: the high-strength steel, steels, ultra-high-strength steels, managing steels, corrosion-resistant steels and alloys, high-temperature alloys.

800. Special Problems
Fall, Winter, Spring. 1 to 6 credits. May be repeated for a maximum of 6 credits. Approval of department.
Individualized reading and research compatible with the student's interest and ability.

801. Advanced Engineering Mechanics I
Fall, Summer. 3(3-3) MCM 306.
Principles of classical dynamics. Lagrangian equations for electromechanical systems; Hamiltonian formulation; matrix treatment of vibrations.
802. Advanced Engineering Mechanics II
Winter. 3(3-0) MMM 801.
Rigid-body mechanics; the gyroscope; canonical transformations; Hamilton-Jacobi theory; engineering applications of advanced mechanics.

805. Strain and Motion Measurement
Spring, Summer. 4(3-3) Approval of department.
Resistance strain gages and accelerometers are examined in detail with particular regard to the analysis and design of the whole measuring system. Student project involving transducer design. Other motion measurement techniques.

806. Optical Strain Measurement
Winter of even-numbered years. 4(3-3) Approval of department.
Whole-field techniques such as photoelasticity, photoelastic coatings, Moiré techniques, and brittle coating. Interferometers and model analysis. Necessary theory of optics is presented.

809. Finite Element Method
Fall. 4(4-0) Approval of department.
Interdepartmental with the department of Agricultural Engineering and Civil Engineering. Theory and application of the finite element method to the solution of continuum type problems in heat transfer, fluid mechanics and stress analysis.

810. Introduction to the Mechanics of a Continuous Medium
Fall, Summer. 4(4-0) MMM 211; MTH 421 concurrently or approval of department.

813. Theory of Elasticity I
Winter. 4(4-0) MMM 810; MTH 422 or approval of department.

815. Advanced Strength of Materials I
Fall. Summer. 3(3-0) MMM 211.
Elasticity, energy methods, general bending of straight bars, curved beams, shaft center, torsion.

818. Advanced Strength of Materials II
Winter. 3(3-0) MMM 815, MTH 215.
Beams on elastic support, beam columns, axially symmetric stress distribution, symmetrical bending of circular plates, introduction to theory of elasticity.

817. Plasticity
Spring. 4(4-0) MMM 810; MTH 422 or approval of department.
Torsion load conditions, stress-strain relations, plastic potential, hardening theories; torsion, bending, thick-walled spherical and cylindrical shells under internal pressure, plane strain of perfectly plastic material.

823. Theory of Vibrations I
Fall. 4(4-0) M E 455. Interdepartmental with and administered by the Department of Mechanical Engineering.
Discrete and continuous parameter systems with linear and nonlinear characteristics. Variational principles; equations of motion. Matrices, quadratic forms; self-adjoint operators; eigenvalues. Transient and random excitations. Theory developed through physical problems.

831. Advanced X-Ray Metallography
Winter. 3(3-0) Approval of department.
Development of crystallographic space groups, theory of the intensity of diffracted X-rays; Wadsenbergh method, crystal structure analysis.

840. Symmetry and the Properties of Crystals
Winter. 3(3-0)
Point-group theory and symmetry in tensor properties of crystals; systematic treatment of properties, e.g., electrical polarization, magnetic induction, gyro- and piezo-electricity, elasticity, transport properties and birefringence.

851. Modern Ceramic Materials II
Winter. 3(3-0) MMM 850.
Properties of ceramic materials with specific reference to mechanical, optical, electrical, magnetic and thermal properties.

876. Nonferrous Process Metallurgy
Winter. 3(3-0) MMM 462.
Stoichiometric material and heat balance calculation in nonferrous extractive metallurgy.

880. Metals and Alloys I
Fall. 3(3-0) MMM 372.
Topics in engineering properties and application of wrought steels for engineers other than metallurgical.

881. Metals and Alloys II
Winter. 3(3-0) MMM 372.
Similar to MMM 845, but with reference to nonferrous alloys.

882. Metals and Alloys III
Spring. 3(3-0) MMM 372.
Similar to MMM 845 but with reference to cast alloys.

885. Seminar
Fall, Winter, Spring. 1 credit. MMM 899 concurrently.

890. Selected Topics
Fall, Winter, Spring, Summer. 3(3-0) May reenroll for a maximum of 12 credits if a different topic is taken. Approval of department.
A newly developing area in metallurgy, mechanics, or materials science selected by the department for offering each term. Information on the specific topic to be covered should be obtained from the department office before registration.

899. Master's Thesis Research
Fall, Winter, Spring. Variable credit. Approval of department.

900. Special Problems
Fall, Winter, Spring. 1 to 6 credits. May reenroll for a maximum of 5 credits. Approval of department.
Individualized reading and research compatible with the student's interest and ability.

909. Elastic Thin Shells
Spring. 4(4-0) MMM 815 or C E 604 or approval of department. MTH 421. Interdepartmental with and administered by Civil Engineering.
Elements of differential geometry, membrane theory of shells, Puch's stress function, deformation and bending of shells of revolution and shallow shells.

910. Nonlinear Continua
Winter of even-numbered years. 4(4-0) MMM 810.
Modern nonlinear theories of continua. Equations of balance and constitutive equations. Topics selected from finite elasticity, nonlinear viscosity and viscoelasticity, electroelasticity. General tensors are introduced and used throughout.

911. Theory of Elastic Stability
Fall of odd-numbered years. 4(4-0) MMM 815 or approval of department.
Theory and methods of determining buckling strength and post-buckling behavior of bar, plate and shell elements and of elastic systems.
912. Theory of Plates
Winter 4(4-4) MPH 415 or concurrent approval of department. Interdepartmental with Civil Engineering.
Bending of thin elastic plates with various shapes and boundary conditions; applications of energy principles and approximate methods of solution; thick plates; large deflection theory; sandwich plates.

915. Theory of Elasticity II
Spring 3(3-0) MPH 413 or approval of department.
Saint-Venant bending and torsion. Problems in three-dimensional linear elasticity using the Galerkin vector and Neuber-Papkovitch functions.

918. Theory of Viscoplasticity
Fall of even-numbered years. 3(3-0) MPH 418 or approval of department.

920. Theory of Vibrations II
Winter of odd-numbered years. 4(4-0) MPH 422 or approval of department. Interdepartmental with the Department of Mechanical Engineering.
Vibrations of one, two, and three dimensional models of elastic and inelastic continua. Interaction phenomena. Stability. Variational methods. Applications to aeronautics, aerospace, and underwater technology.

921. Theory of Vibrations III
Spring of odd-numbered years. Summer 4(4-0) MPH 420 or approval of department. Interdepartmental with the Department of Mechanical Engineering.

942. Advanced Topics in the Kinetics of Phase Transformation
Fall of odd-numbered years; Winter and Spring of even-numbered years. 3(3-0) May enroll for a maximum of 9 credits.

999. Doctoral Dissertation Research
Fall, Winter, Spring, Summer. Variable credit. Approval of department.

234. Elementary Medical Microbiology
Fall. 5(4-4) CEM 130, B S 211, approval of department.
Survey of immunology and microbiology with emphasis on pathogenic microorganisms, antimicrobial agents, and laboratory diagnosis.

301. Introductory Microbiology
Fall, Winter, Spring. 3(3-0) CEM 242, CEM 244 or BCH 200.
Fundamentals of microbiology. Range of cell structure and activities, nutrition, growth, and importance of major microbial groups.

302. Introductory Microbiology Laboratory
Fall, Winter, Spring. 2(0-4) MPH 301 or concurrently.
Methodology of microbiology including microscopy, staining, asepsis, cultural media and quantification.

310. Food Safety and Microbiology
Fall. 4(3-0) Junior, CEM 132 or concurrently or approval of department. Not open to students with credit in FSC 440. Interdepartmental with and administered by the Department of Food Science and Human Nutrition.
Effects of food handling, preparation and service on food safety. Microorganisms in foods, sanitation, foodborne disease and food service regulations.

400. Bacteriology for High School Science
Summer. 4(4-4) Bachelor's degree and teaching certificate.
Fundamental concepts, experiments, and projects useful in secondary school science courses.

400H. Honors Research
Fall, Winter, Spring, Summer. 2 credits. May enroll for a maximum of 8 credits. Approval of department.
A four- term research project with thesis.

406. Medical Mycology
Fall. Spring. 4(2-6) BOT 402 or approval of department. Interdepartmental with and administered by the Department of Botany and Plant Pathology.
Characteristics, habits, and laboratory identification of fungus diseases infecting humans. Emphasis on laboratory techniques and morphological characteristics of the various mycoses.

413. General Virology
Winter. 3(3-0) MPH 427 or concurrently.
Physical, chemical, and biological properties of the viruses.

414. General Virology Laboratory
Winter. 1(0-4) MPH 413 or concurrently. Laboratory procedures employed for cultivation and identification of viruses.

416. General Parasitology
Fall. 3(3-0) BS 210, BS 211, BS 212 or LBC 141.
Life history, host-parasite relationships (including physiology, immunology, immunopathology and pathology) and epidemiology of selected groups and species of protozoan, nematode, cestode and hematode parasites.

417. General Parasitology Laboratory
Fall. 2(0-4) MPH 416 or concurrently or approval of department.
Identification and life histories of representative species of major groups of animal parasites. Selected coursework on host-parasite associations will be tested experimentally.

420. Ecology of Animal Parasites
Summer. 6 credits. BS 212 or approval of department. Given at W. K. Kellogg Biological Station. Interdepartmental with the departments of Fisheries and Wildlife, and Zoology.
Parasites of terrestrial, freshwater and marine animals by protozoa, helminths and arthropods with emphasis on the interrelationships of host-parasite associations with the natural environments.

421. Microbial Physiology and Genetics
Winter. 4(4-0) MPH 417, MPH 420; BCH 401 or BCH 452 or concurrently.
Cell structure and function, macromolecular synthesis and control, genetic capabilities of microorganisms.

422. Microbial Physiology Laboratory
Winter. 2(0-6) MPH 421 or concurrently.
Laboratory work based upon the subject matter in MPH 421.

424. Microbial Genetics Laboratory
Spring 2(0-6) Laboratory work in microbial genetics.

425. Microbial Ecology
Spring. 4(4-0) MPH 430 or approval of department.
Fundamental concepts of microbial ecology. Emphasis will be placed on aquatic and soil habitats.

427. Immunobiology
Winter. 3(3-4) BS 212, BCH 300 or BCH 401.
Biological and biochemical mechanisms of the immune response. Emphasis is on concepts of immunity.

428. Immunobiology Laboratory
Winter. 2(0-6) MPH 427 or concurrently.
Basic laboratory techniques in immunobiology.

429. Microbiology of Infectious Diseases
Spring. 3(2-8) MPH 392, MPH 427.
Biological, immunological, pathogenicity, and medical aspects of microorganisms associated with infectious diseases of man. Methods of isolation and identification are emphasized in the laboratory.

431. Bacterial Diversity
Spring. 3(3-4) MPH 421.
Morphological and physiological properties of diverse groups of bacteria, and how these properties relate to their ecological niche and importance. Representative groups will be isolated and characterized.

437. Introductory Medical Parasitology Laboratory
Fall. Winter 2(1-4) MPH 416 or concurrently or approval of department. Primarily for Medical Technology students.
Laboratory diagnosis of protozoan, helminth, and arthropod infections of man.
