396. **Personal Risks and Insurance**  
   (AFA 396.) Fall, Summer. 3(5-0) F I 350 or Seniors in business administration.  

397. **Social Insurance Topics**  
   (AFA 387.) Fall. 4(4-0) EC 200.  
   Systematic study of the legal, actuarial, social and political aspects of social insurance. Federal and State programs. Problems, solutions and potential alternatives.

486. **Business Risks and Insurance**  
   (AFA 486.) Winter. 3(3-0) F I 350 or Seniors in business administration.  
   Business insurance as it relates to business risks and decision making. Emphasis on business exposures, coverages and problems of the risk manager.

457. **Management of Insurance Enterprise**  
   (AFA 487.) Spring. 3(3-0) F I 350 or approval of department.  
   Organizational structures and functional operations of insurance enterprise with emphasis on methods of ratemaking, reserves, financial statements and loss adjustment, underwriting, and marketing. Statutory limitations on management freedom.

491. **Financial Markets**  
   (AFA 491.) Fall. 4(4-0) F I 351.  
   Introduction to theories and models concerning financial markets. An analysis of financial instruments and major financial market participants. Governmental and legal influences on financial markets.

492. **Management of Financial Institutions**  
   (AFA 492.) Winter. 4(4-0) F I 351.  
   Emphasis is on the asset and liability management of commercial banks, savings and loan associations, credit unions, private and public pension funds, and other financial institutions. Financial strategies are examined in light of legal and managerial constraints as well as fiduciary responsibility. Related issues include regulation and the concept of prudence.

493. **Advanced Business Finance**  
   (AFA 493.) Spring. 4(4-0) F I 391, Seniors.  
   Advanced study of the financial management of business firms. Special emphasis is placed on areas of major interest from both applied and theoretical points of view. Areas covered include capital budgeting, valuation, financial structure, mergers, and working capital management as well as other financial topics. Cases are used.

495. **Special Problems**  
   Fall, Winter, Spring. 1 to 4 credits, Senior F I major, approval of department.  
   Independent study of special topics in finance or insurance.

817. **Quantitative Applications in Accounting and Finance**  
   (AFA 817.) Winter. 4(4-0) MGT 833. Interdepartmental with the Department of Accounting.  
   Application of quantitative techniques to accounting, finance, and control activities, especially involving the data requirements of managerial decision models.

818. **Research Techniques in Accounting and Finance**  
   (AFA 818.) Spring. 4(4-0) MTH 1133, ED 969C, Interdepartmental with and administered by the Department of Accounting.  
   Properties of time series in accounting and finance with emphasis on ARIMA model and transfer function model development. Applications and potential research areas.

850. **Risk Management and Insurance Concepts**  
   (AFA 850.) Winter, Summer. 4(4-0)  
   Analysis of business exposures and risk management to achieve superior selection and management of securities. Review and evaluation of significant literature in security analysis and investment.

855. **Market Cost-Revenue Analysis**  
   (AFA 855.) Winter. 4(4-0) F I 350 or approval of department.  
   Analytical tools for use in planning and controlling marketing activities. Emphasis on the determination of factors causing marketing cost differences and the assignment of costs to these factors. Application of tools to determination of expenditure-revenue patterns and market potentials.

870. **Financial Markets**  
   Fall. 4(4-0) F I 888.  
   Financial markets, rates, and flows. Major theoretical explanation and empirical evidence concerning financial market behavior.

871. **Portfolio Theory and Capital Markets**  
   (AFA 871.) Fall, Spring. 4(4-0) ACC 826, F I 885.  
   Theoretical and empirical development in portfolio analysis and capital markets. Included topics are implementation of the Markowitz and Sharpe portfolio models, development and implications of the capital asset pricing model, and empirical studies of capital markets.

872. **Management and Financing of Corporate Assets**  
   (AFA 872.) Fall. 4(4-0) F I 871 or concurrently.  
   Principles of decision analysis in management of current assets, estimation of requirements for short term funds, and valuation of capital budgeting and merger proposals. Analysis of actual business cases is supplemented by selected readings.

873. **Long Term Financial Policies**  
   (AFA 873.) Winter, Spring. 4(4-0) F I 872 or F I 871.  
   Planning capital structure and the cost of capital. Examines fundamental considerations of raising capital, debt management, dividend policy and price stability of public issues. Analysis of actual business cases is supplemented by selected readings.

874. **Investment Strategy**  
   (AFA 874.) Spring. 4(4-0) F I 871 or concurrently, F I 872 or F I 873.  
   Analysis of various theories and techniques available to business managers in the investment of corporate cash reserves. Review and evaluation of significant literature in security analysis and investment.

878. **Bank Management**  
   (AFA 878.) Spring. 4(4-0) F I 888.  
   Provides a comprehensive working knowledge of commercial bank management. Topics include capital adequacy, liquidity, public policy, bank failures, regulation, consumer protection, and other internal and external banking industry issues.

888. **Financial Concepts and Analysis**  
   (AFA 888.) Fall, Winter. 4(4-0) ACC 899.  
   Principles of managerial finance. Working capital management, capital budgeting and methods of finance aimed at maintaining liquidity and profitability are considered. Emphasis is on decision making.

899. **Financial Decision Making**  
   (AFA 899.) Fall, Winter, Spring, Summer. 4(4-0) F I 888, ACC 540 or concurrently; MGT 855.  
   Financial planning and control at corporate officer level. Investment decisions, growth and expansion strategies, dividend policy, interactions with other corporate functions, and of the firm with the financial community.

991. **Seminar in Financial Management**  
   (AFA 991.) Fall, Winter. 5(5-0)  
   Seminar dealing with current unresolved problems in the field of financial management. Both micro and macro aspects of the field are investigated, including such areas as models for financial decision making, money and capital markets, and international finance.

999. **Doctoral Dissertation Research**  
   Fall, Winter, Spring. 1 to 5 credits. May be repeated for a maximum of 36 credits. Approval of department.

---

**FISHERIES AND WILDLIFE**

**College of Agriculture and Natural Resources**

100. **Introduction to Fisheries and Wildlife**  
    Fall. 3(1-0) Freshmen Fisheries and Wildlife Majors.  
    Fisheries and wildlife as a profession. Academic and nonacademic needs to meet professional objectives, using current management problems as a focus for discussion.

IDC. **Introduction to Resource Ecology**  
    For course description, see Interdisciplinary Courses.

301. **Fish and Wildlife of North America**  
    Winter. 3(3-0) B S 212 or approval of department.  
    Comparative study of fish and wildlife groups in North America, their significant life history stages, morphology, migrations, habitats and populations. Common species are identified in the laboratory.
302. Ecosystem Processes
Spring, 3(3-0) CEM 132, PHY 228, B S 212, CSS 210, GLG 201; MTH 106, MTH 109 or MTH 111.

Concepts of ecosystem structure and function developed from basic scientific laws and relationships.

305. Principles of Fisheries and Wildlife Management
Winter, 3(3-0) IDC 200 or approval of department. Not open to majors in fisheries-limnology or wildlife-ecology option.

Ecological concepts in management. Effects of regulations, refuges, stocking, species introductions, habitat manipulation, artificial feeding, genetic improvement, land use and control of predators, diseases and competition on the production of fish and game.

328. Vertebrate Pest Control
Fall, 3(3-0) B S 212 or approval of department. Rule of wild vertebrate animals as agents damaging to man's interests; the concepts of damage and control; damage control techniques. Field trip.

340. Wildlife Biometry
Winter, 4(3-2) MTH 111, six credits in fisheries and wildlife.

Survey of statistical formulas, methods and applications of statistics to problems in fisheries and wildlife.

374. Biological Oceanography
Winter, 3(3-0) B S 212 or approval of department.

Biological of marine animals, with emphasis on physical, chemical and biological factors affecting their abundance and distribution.

376. Introductory Limnology
Winter, 3(3-0) B S 212, students may not receive credit for both FW 376 and FW 476.

Lake and stream ecology including effects of natural and man-induced perturbations on freshwater ecosystems.

402. Environmental Conservation Education
Spring, Summer. 4(3-2) Education majors or approval of department.

Nature, distribution and interrelationships of natural resources dictating the quality of man's environment. Principles of resource use, study of natural objects and techniques of teaching in and about the environment.

404. Fisheries and Wildlife Problems
Fall, Winter, Spring, Summer. 1 to 5 credits. May enroll for a maximum of 12 credits. B S 212; 6 credits in fisheries and wildlife; approval of department.

To give undergraduate majors an opportunity to study special topics in fisheries and wildlife.

410. Upland Wildlife Management
Fall, 3(3-0) FW 302, FW 340, BOT.

Wildlife management based on upland ecological processes. Assessment and management of habitat. Mitigation of human impact.

412. Wetland Ecosystem Management
Fall, 3(3-0) FW 302, FW 340.

Ecosystem components and processes applied to wetland management. Mitigation of human impact.

413. Upland and Wetland Ecosystem Laboratory
Fall, 2(0-6) FW 410 or FW 412 or concurrently.

Wildlife habitat analysis and management in upland and wetland ecosystems. Field trips required.

420. Biology of Animal Parasites
Summer, 6 credits. B S 212 or approval of department. Given at W. K. Kellogg Biological Station. Interdepartmental with the departments of Microbiology and Public Health, and Zoology. Administered by the Department of Microbiology and Public Health.

Parasites of animals by protozoa, helminths and arthropods with emphasis on the interrelationships of host-parasite associations with the natural environments.

424. Wildlife Population Analyses
Spring, 4(3-2) BOT 450 or ZOL 389, or concurrently.

Population measurement; reproductive and survival rates; sex and age determination; handling and marking methods. Field trips.

434. Wildlife Resource Policy and Management
Winter, 4(3-2) FW 410, FW 412, FW 424.

The impact of public policy on wildlife management. Objectives of and approaches to wildlife management. Planning, implementing, and evaluating wildlife management programs.

450. Natural Resource Administration
Fall, 4(4-0) Seniors, not open to forestry majors. Interdepartmental with Agriculture and Natural Resources and the departments of Forestry, Park and Recreation Resources, and Resource Development. Administered by the Department of Forestry.

455. Natural Resource Economics
Fall, 4(4-0) Approval of department. Interdepartmental with Agriculture and Natural Resources and the departments of Forestry, Park and Recreation Resources, and Resource Development. Administered by the Department of Forestry.

Basic economic and political principles and techniques that govern the production and consumption of forest land products, including basic forest valuation procedures.

471. Ichthyology
Spring, 3(2-3) FW 301 or ZOL 320 or ZOL 428. Interdepartmental with the Department of Zoology.

Classification and natural history of fishes. Emphasis on food, game, and forage fishes.

473. Fishery Biology and Management
Fall, 3(3-3) ZOL 471.

Biological of fishes with special reference to distribution, natural history, and application of this knowledge to problems of obtaining maximum return from fishery resources.

475. Fish Culture
Spring, 3(3-0) FW 473.

Artificial propagation of freshwater fish including hatchery management, nutritional and environmental requirements, disease and parasite control and intensive fishery management. Utilization of hatchery stock in fisheries management.

476. Limnology
Winter, 3(3-0) CEM 131 and CEM 151; BOT 450 or ZOL 389. Students may not receive credit for both FW 376 and FW 476. Interdepartmental with the Department of Zoology.

Ecology of lakes and streams with special reference to physical, chemical and biological factors affecting their productivity.

477. Limnological Methods
Winter, 3(0-9) FW 476 concurrently; ZOL 451, ENT 301, ENT 302 recommended. Interdepartmental with the Department of Zoology.

Methods and instruments of limnological field investigation on lakes and streams.

478. Stream Ecology
Spring, 3(0-9) ENT 420, ZOL 389 or BOT 450 or FW 332 or approval of department. Students may not receive credit in both FW 473 and ENT 421. Interdepartmental with the departments of Entomology and Zoology.

 Biological, chemical, physical, and geological processes which determine the structure and function of stream ecosystems.

484. Outdoor Environmental Education
Fall, 4(3-2) Juniors or approval of department.

Using the outdoors as a teaching laboratory for ecological studies of plant and animal communities. Designed primarily for secondary teachers.

485. Environmental Conservation Program Design
Winter, 3(3-0) Seniors or approval of department.

Materials and methods for integrating environmental conservation into educational programs in schools, nature centers, youth groups and communities.

501. Seminar in Fisheries and Wildlife
Fall, Winter, Spring. 1(1-0) May enroll for a maximum of 3 credits. Approval of department.

Graduate problems and current developments of importance.

502. Advanced Topics
Fall, Winter, Spring. Summer. 1 to 6 credits. May enroll for a maximum of 15 credits. Approval of department.

Study of selected advanced topics in detail and depth.

580. Environmental Requirements of Fish
Winter of odd-numbered years. 3(3-0)

Approval of department.

Adaptations and responses of fish to environmental changes; research methods for evaluating environmental limitations and effects of pollutants on fish growth, reproduction and survival. Applications for developing water quality criteria.

680. Wildlife Nutrition
Winter of odd-numbered years. 4(3-2)

Approval of department.

Application of nutritional concepts to wildlife management. Design of nutritional investigations including methods of sampling and analysis. Improvement of the nutritional status of wildlife habitat.
871. Ecology of Fishes  
Summer of even-numbered years. 3 credits. Approval of department. Given at the W. K. Kellogg Biological Station. Interdepartmental with and administered by the Department of Zoology. Exploration of ecological problems with particular emphasis on growth, food and habitat selection, population biology and niche relations. Field and experimental investigations of fish communities.

872. Fish Communities and Aquatic Ecosystems  
Winter of odd-numbered years. 3(3-0) Approval of department. Processes by which fish influence the structure and function of aquatic ecosystems.

873. Ecology and Management of Stream Fish  
Winter of odd-numbered years. 3(4-0) F W 376, ZOL 389 or BOT 450; or F W 476 or concurrently. Flowing water habitat as it affects fish, with influence of climate, vegetation, land use, water withdrawal, damming, channel alteration and fishery management.

874. Advanced Biological Limnology  
Fall of odd-numbered years. 3(4-0) F W 477, or approval of department. Historical and current contributions to concepts of community structure, energy flow and materials cycling in aquatic ecosytems.

875. Chemical Limnology  
Winter. 4(3-3) F W 476, F W 477 or approval of department. Application of analytical chemistry concepts and technologies to fundamental chemical mechanisms in natural and polluted water systems. Special consideration given to selected heterogeneous equilibria.

876. Applied Limnology  
Spring. 3(3-0) F W 874 or F W 875 or approval of department. Aquatic ecology: quantitative relationship between physical, chemical and biological parameters in polluted and unpolluted lakes and streams.

877. Fish Population Dynamics  
Winter of odd-numbered years. 3(3-0) Approval of department. Quantitative analysis of fish populations, rates of change and their underlying causes.

897. Ecosystem Ecology  
Fall. 3(3-0) ZOL 389 or BOT 450. Interdepartmental with and administered by the Department of Zoology. Concepts of ecosystem structure, energy flow, and nutrient cycling in representative terrestrial and aquatic ecosystems.

899. Master's Thesis Research  
Fall, Winter, Spring, Summer. Variable credit. Approval of department.

940. Quantitative Wildlife Ecology  
Fall of even-numbered years. 3(3-0) Approval of department. Fundamentals of population demographics. Rates of increase, dynamic and static life tables, logistic theory, the Leslie matrix model, age-specific and time specific parameters. Current hypotheses on mechanisms promoting population stability.

999. Doctoral Dissertation Research  
Fall, Winter, Spring, Summer. Variable credit. Approval of department.

---

**FOOD SCIENCE AND HUMAN NUTRITION**

**College of Agriculture and Natural Resources**

**College of Human Ecology**

**Food Science**

**FSC**

101. Food and Society (N)  
Fall, Winter. 3(3-0) Interdepartmental with Human Nutrition and Foods. Analysis of the scientific, social and environmental aspects of food in determining the quality of human life. Introduction into the principles of food preservation and safety.

205. Food Laws and Regulations  
Spring. 3(3-0) Interdepartmental with Human Nutrition and Foods. Food laws and regulations that govern food processing and food service systems; procedures involved in adopting and enforcing food laws and regulations.

211. Introduction to Food Science  
Spring. 3(3-0) Modern food processing, world food problems, and the basic characteristics of processed foods.

256. Meats, Poultry and Fishery Products I  
(242) Fall. 3(3-3) Interdepartmental with the Department of Animal Science. Principles of evaluation and nutritive value. Identification of grades and cuts of beef, pork, lamb and poultry products.

300. Dairy Products  
Spring. 3(2-2) CEM 132 or approval of department. Chemical and physical properties of milk and milk products. Survey of dairy products and the technologies involved in their manufacture.

310. Food Safety and Microbiology  
Fall. 4(3-3) Juniors; CEM 132 or concurrently or approval of department. Not open to students with credit in FSC 440. Interdepartmental with the Department of Microbiology and Public Health. Effects of food handling, preparation and service on food safety. Microorganisms in foods, sanitation, food borne disease and food service regulations.

311. Food Processing and Preservation  
Winter. 3(3-6) CEM 132. Not open to majors in Food Science. Effects of processing, packaging and preservation on the quality of foods. Demonstrations of use of ingredients, evaluation of products and results of various processing methods.

329. Unit Operation and Food Processing I  
Fall. 4(3-2) PHY 237, MTH 109. Interdepartmental with and administered by Agricultural Engineering Technology. Engineering concepts related to the unit operations found in the food industry. Fluid mechanics, heat transfer and state processes including psychrometrics and refrigeration.

331. Physical Principles of Food Processing  
Fall, Winter. 4(3-2) FSC 211, MTH 109; PHY 239 or approval of department. Food preservation by heat, low temperature, dehydration and radiation.

332. Biological Principles of Food Processing  
Winter. 4(3-3) MPH 260 or approval of department. Biological problems related to food processing including waste disposal, sanitizing and bactericidal compounds, pesticides and residues, plant and animal growth regulators, radioactive elements, preservatives and toxicology of additives.

333. Chemical Principles of Food Processing  
Spring. 4(3-3) FSC 211 and CEM 241 or approval of department. Chemical changes in foods that affect the texture, color, flavor, odor, stability, and nutritive quality during processing and storage.

400. Milk Processing Technology  
Fall. 4(3-3) CEM 132 or approval of department. The fluid milk industry. Composition, quality, sanitation, nutritive values, processing, packaging and distribution of milk and milk products.

401. Industrial Food Fermentations  
Fall. 3(3-0) FSC 440 and organic chemistry or approval of department. Physical, microbiological and chemical procedures in utilizing microbial cultures in controlled fermentations of foods and food constituents.

402. Chemistry and Technology of Lipids  
Winter. 3(3-0) One term organic chemistry. Chemical and physical properties of edible fats and oils. Refining and processing of lipids into margarine, butter, shortening and salad oils. Chemical methods for analysis of lipids.

404. Dehydrated Foods  
Spring. 3(3-0) FSC 331; FSC 333 concurrently or approval of department. Concentration and dehydration of foods by roller, spray, and freeze drying and foam, puff and tunnel drying. Stability and nutritional aspects of dehydrated foods.

405. Technology of Manufactured Dairy Products  
Winter. 4(3-3) FSC 400 or approval of department. Manufacturing technology of fermented dairy foods, frozen dairy desserts, and imitation dairy products.

421. Food Plant Management  
Spring. 3(3-0) Seniors or approval of department. Business and technical management concepts associated with food plants. Efficiency factors, regulatory obligations, and administrative aspects.

440. Food Microbiology  
Spring. 5(3-4) MPH 200 or MPH 301 or approval of department. Interdepartmental with the Department of Microbiology and Public Health. Major groups of microorganisms of importance to the food industry are studied with emphasis on ecological, physiological, and public health aspects.
