BIOCHEMISTRY BCH

College of Agriculture and Natural Resources
College of Human Medicine
College of Natural Science
College of Osteopathic Medicine

100. Lectures in Biochemistry
Spring. 1(1-0) Biochemistry majors; others by approval of department.
An introduction to modern biochemistry using an historical approach.

200. Introduction to Biochemistry
Winter, Summer. 5(5-0) Credit may not be earned in both BCH 200 and BCH 401. General chemistry; one term organic chemistry. Not acceptable for a B.S. degree in biochemistry.
Survey of biochemistry emphasizing the major metabolic activities of living organisms.

400H. Honors Work
Fall, Winter, Spring. 1 to 4 credits. May reenroll for a maximum of 12 credits. Approval of department. Assigned reading and experimentation.

401. Basic Biochemistry
Fall, Spring. 5(5-0) Credit may not be earned in both BCH 300 and BCH 401. One year organic chemistry or CEM 542; not open to biochemistry majors.
A one-term presentation of biochemistry emphasizing structure and function of major biomolecules, metabolism and regulation. Examples used for illustrative purposes will emphasize the mammalian organism.

404. General Biochemistry Laboratory
Winter. 3(1-6) Analytical chemistry; BCH 401 or BCH 451. Experimental aspects of biochemistry.

405. Biochemistry Laboratory
Fall, Spring. 3(0-0) BCH 453 or concurrently; BCH 404; undergraduate biochemistry majors or approval of department. Advanced undergraduate laboratory to illustrate modern biochemical methods and techniques.

412. Clinical Biochemistry

451. Biochemistry I
Fall. 3(3-0) Credit may not be earned in both BCH 401 and BCH 451. One year organic chemistry or CEM 242.
A comprehensive survey of biochemistry, with emphasis on protein structure and function, enzymology, and bioenergetics.

452. Biochemistry II
Winter. 3(3-0) BCH 451. Continuation of BCH 451, with emphasis on intermediary metabolism.

453. Biochemistry III
Spring. 3(3-0) BCH 452. Continuation of BCH 452, with emphasis on the replication and expression of genetic information.

460. Principles of Biochemical Methods
Spring. 3(0-0) One year physical chemistry or CEM 384 concurrently; BCH 453 or concurrently, or BCH 401. Principles of biochemical methods with emphasis on electrophoresis, chromatography, immunochemical techniques, sedimentation, diffusion, viscosity, radiochemistry, and absorption and emission spectroscopy.

IDC. Biological Membranes
For course description, see Interdisciplinary Courses.

499. Research
Fall, Winter, Spring, Summer. 1 to 4 credits. May reenroll for a maximum of 12 credits. Undergraduates; approval of department. Participation in research projects.

501. Medical Biochemistry
Fall. 3(3-0) Open only to students in the professional programs in the College of Human Medicine and the College of Osteopathic Medicine.
Basic biochemical principles and terminology of importance in medical biology.

502. Medical Biochemistry
Winter. 3(3-0) BCH 501 or approval of department.
A continuation of BCH 501.

503. Introduction to Medical Biology
Fall. 5(5-0) Admission to the College of Human Medicine. Interdepartmental with the departments of Microbiology and Public Health, Pharmacology and Toxicology, and Physiology. Administered by the Department of Microbiology and Public Health.
Principles of medical biology for medical students.

511. Medical Biochemistry I
Winter. 3(3-0) One year organic chemistry. Open only to students in the professional programs in the College of Human Medicine and the College of Osteopathic Medicine.
Basic biochemical principles and terminology with emphasis on metabolism and function of biomolecules of importance in medical biology.

512. Medical Biochemistry II
Spring. 4(4-0) BCH 511. Basic biochemical principles and processes pertinent to specific areas of human pathophysiology.

851. Nucleic Acid Structure and Function
Fall. 4(4-0) One year of organic chemistry, one year of physical chemistry, one term of introductory biochemistry, or approval of department. Limited to graduate students in biochemistry or other students needing a similar professional preparation.

812. Protein Structure and Function
Winter. 4(4-0) BCH 811. Protein structure and function relationships, macromolecule-ligand interactions, enzyme kinetics and principles of methods used in enzymology.

BIOCHEMISTRY — Descriptions of Courses

813. Metabolism and Its Regulation
Spring. 4(4-0) BCH 812. Molecular basis of metabolic regulation, compartmentation and interrelationships of metabolic cycles involving carbohydrates, proteins and lipids.

821. Biochemical Mechanism and Structure I
Fall. 3(3-0) BCH 401, one year of organic chemistry and physical chemistry or concurrently, or approval of department. Structures, methods of structural analysis, synthesis, and reaction mechanisms of biological substances including proteins, carbohydrates, lipids, porphyrins, phosphate esters, enzymes and coenzymes.

822. Biochemical Mechanism and Structure II
Winter. 2(2-0) BCH 821 or approval of department. Continuation of BCH 821.

831. Physiological Biochemistry I
Winter. 3(3-0) BCH 401. Physiological biochemistry, with emphasis on metabolic interpretation of normal and altered physiological states of the human organism and appropriate animal models.

832. Physiological Biochemistry II
Spring. 3(3-0) BCH 831. Continuation of BCH 831.

855. Special Problems
Fall, Winter, Spring. 1 to 6 credits. May reenroll for a maximum of 15 credits. Approval of department. Consideration of current problems.

856. Plant Genetics and Molecular Biology
Spring of even-numbered years. 3(3-0) Approval of department and a course in introductory genetics. Interdepartmental with Genetics and the Department of Botany and Plant Pathology. Administered by the Department of Botany and Plant Pathology. Recent advances in genetics and molecular biology of higher plants.

864. Plant Biochemistry
Spring. 4(4-0) BCH 401, BOT 301 or approval of department. Interdepartmental with the Department of Botany and Plant Pathology. Metabolism of nitrogen-compounds, carbohydrates, and lipids unique to plants' cell organelles; photosynthesis; respiration; cell walls; lectin; nitrogen cycle including nitrogen fixation; sulfur cycle.

888. Laboratory Rotation
Fall, Winter, Spring. Summer. 1 to 6 credits. May reenroll for a maximum of 15 credits. Graduate student majors; approval of department. Participation in research laboratories to learn experimental techniques and research approaches, broaden research experience, and assess research interests prior to selecting a thesis adviser.

899. Master's Thesis Research
Fall, Winter, Spring. Variable credit. Approval of department.
Descriptions — Biochemistry of Courses

960. Selected Topics in Biochemistry
Fall, Winter, Spring. 1 to 3 credits. May reenroll for a maximum of 10 credits if different topics are taken. Approval of department. Topics will be selected from the areas of biochemical genetics, biochemistry of development, biochemistry of the aging process, complex proteins, lipid metabolism, immunology, hormones and their structure and function. A course in service teaching, topics will be selected from actual classroom problems of the participants. Stress will be placed on field, laboratory and inquiry teaching.

961. Selected Topics in Biochemistry
Fall, Winter, Spring. 1 to 3 credits. May reenroll for a maximum of 10 credits if different topics are taken. Approval of department. Topics will be selected from the areas of biochemical genetics, bioinstrumentation, complex carbohydrates, mechanisms of enzyme action, natural products, carbohydrate metabolism, mass spectrometry, and biochemistry of isoprenoid compounds.

978. Seminar in Biochemistry
Fall, Winter, Spring. 1(1-0). May reenroll for a maximum of 8 credits. Approval of department.

999. Doctoral Dissertation Research
Fall, Winter, Spring. Summer. Variable credit. Approval of department.

BIOLOGICAL SCIENCE B S

College of Natural Science
The content of courses 400, 405, and 420, as well as the research and problems courses 490, 800 and 890, may vary from term to term. Brochures giving detailed information about individual courses are available in the Office of the Assistant Dean for Lifelong Education in the College of Natural Science. These courses are primarily designed for in-service teachers and interested adults and are offered in off-campus locations.

202. Introductory Biology for Non-Science Majors
Fall, Winter, Spring. 4(3-1) credits in general education natural science courses. Concepts, processes, and perspectives appropriate to developing a basic literacy in biology with emphasis on fundamental biological principles and their relation to world society. Appropriate preparation for pre-service elementary teachers.

210. General Biology
Fall, Spring. 4(4-2) Not open to students with credit in LBS 141. Principles of biological organization: scientific method, biochemistry, cell biology, and evolution.

211. General Biology
Fall, Winter. 4(4-2) CEM 140 or high school chemistry. Not open to students with credit in LBS 242. Principles of biological regulation and integration; genetics, development, and selected physiological topics.

212. General Biology
Winter, Spring. 4(4-2) Not open to students with credit in LBS 140. Principles of biological regulation and integration; taxonomy and systematics, comparative physiology, and ecology.

400. Biological Science for Teachers
Fall, Winter, Spring. Summer. 3 to 4 credits. May reenroll for a maximum of 12 credits. Teacher certification with science major or minor. A course for in-service teachers, topics will be selected from actual classroom problems of the participants. Stress will be placed on field, laboratory, and inquiry teaching.

405. Topics in Biological Science
Fall, Winter, Spring. Summer. 1 to 2 credits. May reenroll for a maximum of 6 credits if different topic is taken. Approval of department. Presentation of single topics from the biological sciences by senior faculty and guest lecturers. Topics are selected to facilitate development of strong biological science programs in schools.

408. Freshwater Ecology
Fall, Winter, Spring, Summer. 2 S 212 or approval of department. Given at W. K. Kellogg Biological Station. Interdepartmental with the departments of Zoology, and Botany and Plant Pathology. The ecology of freshwater ecosystems, their biotic structure, and the functional interrelationships of environmental variables regulating population dynamics, productivity and community structure. Extensive field investigations. Approved through Spring 1985.

410. Terrestrial Ecology
Fall, Winter, Spring. 2 S 212 or approval of department. Given at W. K. Kellogg Biological Station. Interdepartmental with the departments of Botany and Plant Pathology, and Zoology. Extensive field investigations of several types of terrestrial communities. Interrelationship of plants, animals, and environment. Factors determining distribution and abundance. Approved through Spring 1985.

415. Field Biology for Teachers
Fall, Winter, Summer. 0(0-2) Biology course or approval of department. Given at W. K. Kellogg Biological Station. Field investigation and interpretation of prairie, dune, forest and wetland communities. An ecosystem approach to ecological concepts. Natural history and identification of key species. Field trips and laboratories.

420. Seminar in Recent Advances in Biological Science
Fall, Winter, Spring. Summer. 1(1-0). Not open to students with credit in LBS 140. Principles of biological organization: scientific method, biochemistry, cell biology, and evolution.

460. Ornithology for Teachers
Summer. 3 credits. A course in biology of birds. Not open to Zoology majors. Given at W. K. Kellogg Biological Station. Interdepartmental with and administered by the Department of Zoology. Distribution, breeding cycles, migration, food and feeding habits, voice and other important areas of avian biology. Emphasis on field identification and natural history.

499. Research
Fall, Winter, Spring. 2 to 4 credits. May reenroll for a maximum of 12 credits. Approval of director of biological science program and student's adviser. Undergraduates are invited on an individual basis into research laboratories of faculty in biological departments of the college. After three terms of research, a presentation in thesis form is produced and defended.

800. Problems in Biological Science
Fall, Winter, Spring. 1 to 6 credits. May reenroll for a maximum of 18 credits. B.S. degree in biological science.

805. Outdoor Environmental Studies
Fall, Winter, Summer. Given at W. K. Kellogg Biological Station. Emphasis on environmental understanding. Development of educational materials through team research and testing. Interaction with elementary and middle school children in two-week outdoor oriented workshop.

899. Master's Thesis Research
Fall, Winter, Spring. Variable credit. Approval of department.

BIOMECHANICS BIM

College of Osteopathic Medicine

500. Basic Concepts in Biomechanics
Fall, Winter. 2(2-0). Admission to a college of medicine or approval of department. Interdepartmental with and administered by the College of Osteopathic Medicine. Basic concepts of biomechanics and their relationship to functional anatomy and osteopathic manipulative therapy.

560. Acupuncture and Other Peripheral Stimulation Therapies
Fall, Winter. 1 to 3 credits. Approval of department. Clinical application of traditional Chinese acupuncture and related peripheral stimulation therapies.

561. Clinical Craniosacral Manipulative Therapy
Fall, Winter. 1 to 3 credits. Approval of department. Basic concepts of the craniosacral system, clinical applications.

590. Special Problems in Biomechanics
Fall, Winter. 1 to 3 credits. May reenroll for a maximum of 32 credits. Approval of department. Each student will work under direction of a faculty member on an experimental, theoretical or applied problem.

601. Osteopathic Manipulative Medicine Clerkship
Fall, Winter, Spring. 8 credits. May reenroll for a maximum of 12 credits. Credit in all courses offered in terms 1 through 8. Advanced training in the diagnosis of musculoskeletal dysfunctions and application of osteopathic manipulative techniques in patient care.
