Courses

119. General Astronomy (N)

Fall. Winter, Spring, Summer. 4(4-0) Intended primarily for nonscience majors. Not open to engineering or physical science majors. Students may not receive credit in more than one of the following: AST 119, AST 217, AST 229, N S 135, N S 155.

A qualitative presentation of the current view of the universe including birth and death of stars, cosmology, comparisons of planets, and life in the universe.

120. Topics in Astronomy

Winter, Spring. 4(4-0) AST 119.

Detailed qualitative discussion of currently interesting topics in astronomy. May include such topics as quasars, pulsars, black holes, planetary exploration, cosmology, concepts of relativity.

217. General Astronomy (N)

Fall, Winter, Spring. 4(4-0) MTH 109 or MTH 111. High school physics recommended. Students without the necessary science or math background are directed to AST 119. Intended primarily for physical science majors. Students may not receive credit in more than one of the following: AST 119, AST 217, AST 229, N S 135, N S 155.

A semiquantitative presentation of current views of the universe including birth and death of stars, cosmology, comparisons of planets, and life in the universe, and their interpretation through physical laws.

229. General Astronomy

Fall. 4(4-0) PHY 287 or PHY 291H or concurrently; MTH 113. Intended for physical science majors and recommended for astrophysics majors. Students may not receive credit in more than one of the following: AST 119, AST 217, AST 229, N S 135, N S 155.

Fundamental observations in astronomy and their interpretation through physical laws. Quantitative discussions of orbital motion, time, telescopes, solar system, stars, galaxies, and cosmology.

237. Introductory Observatory Laboratory

Fall. 1(0-3) AST 217 or AST 229 or concurrently.

Photographic and spectroscopic telescopic observations. Darkroom processing.

327. Practical Astronomy

Winter. 3(3-0) AST 217 or AST 229, MTH 113.

Celestial coordinate systems. Time conversion and sidereal time. Atmospheric refraction, parallax, proper motion, aberration, and precession. Star catalogs and ephemerides. Finding charts and setting of equatorial telescopes.

378. Contemporary Astronomy

Winter. 3(3-0) AST 217 or AST 229.

A continuation of General Astronomy with particular emphasis on modern developments. May include such topics as planetary exploration, interstellar matter, star formation, stellar evolution through final stages, supernovae, pulsars, neutron stars, black holes, galaxies, and cosmology.

437. Observatory Practice

Spring. 3(1-4) AST 327 and approval of department.

Stellar photography. Photographic photometry. Photoelectric photometry and corrections for atmospheric extinction. Multicolor photometric systems. Astronomical spectroscopy and radial velocity determinations.

451. Solar System Astrophysics

Fall. 3(3-0) PHY 427 or concurrently or approval of department.

Application of physical principles to the study of the planets, satellites, asteroids, comets, and interplanetary dust and gas. Mechanics of solar system objects.

452. Stellar and Interstellar Astrophysics

Winter. 3(3-0) PHY 364 or PHY 294 and PHY 395 or approval of department.

Emission, absorption and transfer of radiation in stars and the interstellar medium. Application of physical principles to the study of the interstellar medium and stellar interiors. Evolution of stars.

453. Galactic and Extragalactic Astrophysics

Spring. 3(3-0) PHY 364 or PHY 294 and PHY 395 or approval of department.

The large scale structure of stellar systems, clusters and galaxies. Stellar kinematics, spiral structures, interstellar and intergalactic medium, evolution of galaxies. Theoretical models will be compared with observation.

490. Special Problems

Fall, Winter, Spring, Summer. 1 to 5 credits. May reenroll for a maximum of 10 credits. Approval of department.

Individual study or project under the direction of a faculty member. An oral report on the work may be required in department seminar.

800. Research Methods

Fall, Winter, Spring, Summer. 2(0-6) May reenroll for a maximum of 6 credits. Beginning graduate students. Interdepartmental with and administered by Physics.

Problems and techniques of current research by taking part in the design and setup of experiments, data taking and reduction; study and practice of theoretical methods. Areas of study: solid state and molecular structure, nuclear, elementary particles, astronomy, astrophysics.

801. Seminar

Winter. 1(1-0) May reenroll for a maximum of 2 credits. Graduate students or approval of department.

Seminars to be presented by both faculty and students to review papers in the current astronomical research literature.

820. Advanced Topics in Astrophysics

Winter. 3(3-0) May reenroll for a maximum of 15 credits. AST 452 or PHY 395 or PHY 429 or approval of department.

Possible topics include dynamics of stars in galaxies, astrophysical fluid dynamics, quasar theory, stellar atmospheres, stellar interiors, stellar spectroscopy, and stellar photometry.

850. Electrodynamics of Plasmas I

Fall. 3(3-0) E E 835 or PHY 448; E E 874. Interdepartmental with Electrical Enginging and Physics. Administered by Electrical Engineering.

Boltzmann equation; moment equations; two-fluid theory of plasma, waves in cold, warm and anisotropic infinite plasma; waves in bounded plasma structures, energy flow in anisotropic plasmas.

860. General Relativity and Cosmology I

Fall of even-numbered years. 3(3-0) PHY 858 or approval of department. Interdepartmental with and administered by Physics.

Conceptual foundations of general relativity theory; elements of tensor calculus; Riemann-Christoffel curvature tensor; the field equations; experimental tests; special solutions; the extension to cosmology.

861. General Relativity and Cosmology II

Winter of odd-numbered years. 3(3-0) PHY 860. Interdepartmental with and administered by Physics.

Relativistic cosmology: the model universes; stead-state theory; observational evidence and possibilities for decision among models; current problems.

984. Advanced Readings in Physics or Astronomy

Fall, Winter, Spring, Summer. 1 to 3 credits. May reenroll for a maximum of 6 credits. Interdepartmental with and administered by Physics.

989. Electrodynamics of Plasmas II

Winter of odd-numbered years. 3(3-0) E E 850. Interdepartmental with Electrical Engineering, and Physics. Administered by Electrical Engineering.

One fluid plasma model, magnetohydrodynamics, Maxwell's stress tensor, low frequency waves, transport phenomena, Landau damping, collision and rate coefficients. Diffusions in a magnetic field; investigation of dc, rf and microwave discharges.

PHYSIOLOGY

PSL

College of Human Medicine College of Natural Science College of Osteopathic Medicine College of Veterinary Medicine

240. Introductory Physiology

Fall, Spring. 4(4-0) Sophomores or approval of department.

Physiology of the cell, nerve and reflex activity, skeletal muscle, brain, and cardiovascular system emphasizing environmental influences such as disease and exercise.

241. Introductory Physiology

Winter. Summer of even-numbered years. 4(4-0) PSL 240 or approval of department.

Continuation of PLS 240. Physiology of respiration, digestion, metabolism, kidney, endocrinology, and reproduction.

323. Physiology, Anatomy, and Hygiene of the Eye

Fall. Summer of even-numbered years. 3(2-2) PSL 240; Elementary Education or Special Education major, or approval of depart-

Basic course in anatomy, physiology, and hygiene of the visual system; includes discussion of normal visual functioning and abnormal visual functioning, with methods of correction and education implications.

Courses

401. Comparative Physiology I

Fall. 4(3-4) PSL 240 or B S 212; CEM 131 or CEM 141. Interdepartmental with the Department of Zoology.

A comparison of osmoregulation, digestion, respiration, and other physiological processes in a wide range of organisms.

402. Comparative Physiology II

Winter. 4(4-0) PSL 401 or approval of department. Interdepartmental with and administered by the Department of Zoology.

A comparison of sensory, motor, endocrine and other integrative mechanisms in animals.

416. Physiology of the Cell

Fall. Summer of odd-numbered years. 3(3-0) BCH 401 or BCH 451.

Physiologic mechanisms common to all living cells with emphasis on those of the vertebrates. The functions of the cell membrane and cyto-plasm are studied as the basis for the physiologic behavior of vetebrate organs and systems.

Introductory Biophysics: 418. Membranes and Electrical

(BPY 403.) Spring. 3(3-0) One year organic chemistry or biochemistry, PHY 239, PHY 259; MTH 113 or approval of department.

Salient features of biophysics, principles and methods; radiation biophysics; membrane biophysics; bioelectric phenomena; neurobiology; and psychophysics.

431. Human Physiology

Winter. 4(4-0) One year of biological science or ANT 316; CEM 131 or CEM 141. Physiology of the digestive, endocrine, nervous, and reproductive systems.

432. Human Physiology

Spring. 4(4-0) PSL 431 or approval of department.

Physiology of the autonomic nervous, cardiovascular, renal, and respiratory systems.

435. Mammary Physiology

(444.) Fall. 4(3-2) PSL 241, BCH 200 or BCH 401. Interdepartmental with and administered by the Department of Animal Sci-

Anatomy of mammary gland. Hormonal and nervous control of mammary growth, initiation and maintenance of lactation. Biochemistry of milk secretion. Physiology of milking; physiological, pathological and management factors affecting lactation.

455. Principles of Animal Reproduction

(445.) Winter. 4(5-0) PSL 241, BCH 200 or BCH 401. Interdepartmental with and administered by the Department of Animal Sci-

Processes of reproduction and endocrinology with special emphasis on anatomy of reproduc-tive systems, folliculogenesis, gametogenesis, reproductive cycle, fertilization, sex determination, gestation and artificial regulation of these reproductive events for economic benefit.

465. Avian Physiology

(440.) Spring. 4(3-3) Approval of department. Interdepartmental with and administered by the Department of Animal Science. Systemic physiology of birds emphasizing respi-

ration, circulation, temperature regulation, the endocrines, and reproduction.

Biological Membranes

For course description, see Interdisciplinary Courses.

480. Special Problems

Fall, Winter, Spring, Summer. 1 to 5 credits. Approval of department.

481. Honors Research Paper

Fall, Winter, Spring, Summer. 2 credits. PSL 480 and approval of department. Oral and written presentation of undergraduate research project initiated and carried forward under PSL 480.

497. Principles of Endocrinology

Winter. 4(4-0) One year organic chemistry; ZOL 317. Inter-departmental with and administered by the Department of Zoology.

Hormonal principles, illustrated by experimental observations, in vertebrates and invertibrates. Emphasis on cellular endocrinology. Group discussion, background in organic chemistry and cell biology strongly recommended. Term paper required.

500A. Introductory Physiology for

Spring. 5(5-0) Admission to the professional program in a college of medicine.

Concepts and problems in physiology to be fol-lowed by supplemental physiology instruction during subsequent phases of medical training.

500B. Introductory Physiology for Medicine

Fall. 4(4-0) Admission to the professional program in a college of medicine. Principles of systemic physiology germaine to the

practice of medicine with introduction to clinical physiopathology,

500C. Introductory Physiology for Medicine

Winter. 5(5-0) Admission to the professional program in a college of medicine. Continuation of PSL 500B.

500D. Introductory Physiology for

Winter. 4(4-0) Admission to a college of medicine or approval of department.

Concepts and problems in physiology germane to the practice of medicine.

Introductory Physiology for 500E.

Spring. 4(4-0) Admission to a college of medicine or approval of department. Continuation of PSL 500D.

503. Introduction to Medical Biology

Fall. 5(5-0) Admission to the College of Human Medicine. Interdepartmental with the departments of Biochemistry, Microbiology and Public Health, and Pharmacology and Toxicology. Administered by the Department of Micro-biology and Public Health.

Principles of medical biology for medical students.

801. Advanced Cell Physiology

Fall. 5(6-0) PSL 431, PSL 432 or PSL 401, PSL 402; BCH 451, BCH 452, BCH 453 or concurrently; or approval of department; calculus recommended.

Concepts in advanced cellular physiology, including bioenergetics, transport, regulation of metabolic reactions, and specialized cell functions including nerve, muscle, secretory, epithelial and lymphocyte.

803. Advanced Systemic Physiology II

Spring, 5(6-0) PSL 802 or approval of department.

Physiology of the renal, gastrointestinal, endocrine, and reproductive systems. Approved through Winter 1985.

804A. Neuroscience Laboratory I

Winter, 4(2-4) ZOL 827 and approval of instructor. Interdepartmental with the de-partments of Psychology and Zoology. Administered by the Department of Psychology.

Development of skills in the methods, techniques and instrumentation necessary for research in a variety of areas concerned with neuroscience.

804B. Neuroscience Laboratory II

Spring. 4(2-4) PSY 804A. Inderdepartmental with the departments of Psychology and Zoology. Administered by the Department of Psychology.

Continuation of PSL 804A.

Advanced Mammalian 805. Physiology I

Winter. 1(2-0) PSL 500D, PSL 801 or concurrently or approval of department.

Readings and discussions to supplement PSI. 500D on basic research principles of neural, cardiovascular and respiratory physiology.

806. Advanced Mammalian Physiology II

Spring. 1(2-0) PSL 500E, PSL 801 or concurrently or approval of department.

Readings and discussions to supplement PSL 500E on basic research principles of renal, gastrointestinal and endocrine physiology.

808. Neuroendocrinology

Winter of even-numbered years. 3(3-0) Approval of department.

Anatomical, biochemical and physiological aspects of neuroendocrinology. Control systems and interaction among endocrine glands will be emphasized.

809. Physiology of Aging

Winter of odd-numbered years. 3(3-0) Basic course on elements of physiology.

Theories of aging; vital statistics; changes in cellular, tissue and organ functions; pathology; integrative mechanisms; longevity and life prolongation; neuroendocrines; immunology; brain function; chronological versus individual aging.

824. Membrane Biophysics

(BPY 824.) Winter of odd-numbered years. 4(3-2) Approval of department.

Interfacial phenomena in biology and chemistry; structure and function, theoretical and ex-perimental models for biological membranes; membrane biochemistry. Labs will emphasize biomolecular lipid membrane techniques.

Physical Principles of Biological 836.

Winter of even-numbered years. 3(3-0) Application of laws and methods of physics to measurement and description of physiological phenomena.

837. Radiobiology

Fall of even-numbered years. 3(3-0) Approval of department.

Application of radioactive tracer techniques to study of biological functions. Determination of turnover rates and tissue constituents by isotope dilution. Control of radiation hazards.

Courses

839. Systems Neuroscience

Winter, 5(4-2) PSL 801 or approval of course coordinator. Interdepartmental with the departments of Anatomy, and Pharmacology and Toxicology.

Physiology, anatomy and pharmacology of sensory, somatomotor and autonomic neural systems.

859. Analysis of Hormone Action

Spring. 4(4-0) ZOL 317, or approval of department. Interdepartmental with and administered by the Department of Zoology.

Discussion of recent work on the molecular and developmental aspects of hormone action in vertebrates and invertebrates. Selected topics to vary from year to year.

865. Advanced Neurobiology

(BIM 865.) Spring. 4(4-0) ZOL 827. Interdepartmental with the departments of Anatomy, Psychology, and Zoology. Administered by the Department of Anatomy.

Basic organization, structure and function of neural networks comprising sensory, motor and autonomic systems including examples from invertebrates and vertebrates. Attendance at neuroscience seminar is required.

875. Advanced Physiology Laboratory

Summer of odd-numbered years. 4(2-5) PSL 801, PSL 802, PSL 803 and approval of department.

Experiments in animal and human physiology; data collection, analysis and interpretation.

885. Vertebrate Neural Systems I

(PSY 885.) Winter of even-numbered years. 5(3-4) ANT 815, ANT 865 recommended. Interdepartmental with the departments of Anatomy, Psychology and Zoology. Administered by the Department of Anatomy.

Structure and function of major component systems of vertebrate brains, their evolution, ontogeny and comparative analysis in mammals, birds, reptiles, amphibians and fish. Interrelation of behavioral, anatomical and physiological studies

886. Vertebrate Neural Systems II

(ZOL 886.) Spring of even-numbered years. 5(3-4) ANT 885. Interdepartmental with the departments of Anatomy, Psychology, and Zoology. Administered by the Department of Anatomy.

Continuation of PSL 885. Major component systems of vertebrate brains, their evolution, ontogeny, and comparative analysis in mammals, birds, reptiles, amphibians and fish. Interrelation of behavioral, anatomical, and physiological studies.

890. Readings in Biophysics

(BPY 890.) Fall, Winter, Spring, Summer. 3 to 6 credits. Approval of department.

Reading course in special topics adapted to the individual preparation and needs of the student.

899. Master's Thesis Research

Fall, Winter, Spring, Summer. Variable credit. Approval of department.

919. Cardiovascular System

Fall. 4(3-3) May reenroll for a maximum of 12 credits if different topics are taken. PSI. 802.

Classical and current literature on physiology of heart, circulation, and microcirculation. Each fall a different one of these three topics will be discussed. Laboratory work illustrates methodology and special procedures.

950. Topics in Physiology

Fall, Winter, Spring, Summer. 1 to 3 credits. May reenroll for a maximum of 9 credits. Approval of department.

Classical and modern concepts in selected areas of physiology.

980. Problems

Fall, Winter, Spring, Summer. 1 to 3 credits. May reenroll for a maximum of 9 credits. Approval of department.

Limited amounts of individual work on selected research problems.

999. Doctoral Dissertation Research

Fall, Winter, Spring, Summer. Variable credit. Approval of department.

POLITICAL SCIENCE PLS

College of Social Science

100. American National Government

Fall, Winter, Spring, Summer. 3(3-0) Major aspects of national government with emphasis on the policy-making process.

140. Comparative Politics

Fall, Winter, Spring. 3(3-0)

Comparison of political systems in western and non-western nations.

160. International Relations

Fall, Winter, Spring, Summer. 3(3-0) Contemporary world affairs surveyed. The struggle for power, the nation-state system; factors creating harmony and hostility among nations. War and peace in our time.

170. The Isms

Fall, Winter, Spring, Summer. 3(3-0) Introduction to basic contemporary political ideologies; theoretical foundations of democracy, socialism, communism, political elitism, and nationalism. Special attention to ideology underlying contemporary political problems.

200. Introduction to Political Science

Fall, Winter, Spring, Summer. 3(3-0)

Acquaints the student with the theories, methods and concepts of political science. Emphasis is on ideology and interests in the political process.

251. Human Values and Politics: On Liberty (S)

Fall. 4(4-0)

Liberty as a basic value underlying public issues of life or death; right to live; rights of women and children; slavery; justification of war and terrorism; capitol punishment; biological planning.

252. Human Values and Politics: Equality and Justice (S)

Winter. 4(4-0)

Equality and justice as basic values underlying major public issues in areas such as crime and punishment, education, family and employment. Effect of public policy on equal opportunity.

253. Human Values and Politics: Authority and the Individual (S)

Spring. 4(4-0)

Individualism and authority as basic values underlying public issues; free speech; rights of minorities; right of privacy; community norms and individual preferences.

IDC. Introduction to Contemporary China

For course description, see Interdisciplinary Courses.

290. Methods of Political Research

Fall, Winter, Spring, Summer. 3(3-0)

Design and execution of research in political behavior and institutions. Major emphasis on logic underlying various types of political research, on identification of appropriate data sources and field methods.

291. Methods of Political Research

Fall, Winter, Spring. 4(4-0) PLS 290.

Analysis of political data, with major emphasis on quantitative techniques.

301. American State Government

Fall, Winter, Spring, Summer. 3(3-0)

Major aspects of policy-making process at the state government level. Comparison of state political systems.

302. American Urban Government

Fall, Winter, Spring, Summer. 3(3-0)

Urban political process in America. Politics of policymaking for urban functions; politics of intergovernmental relations.

303. Michigan Government

Spring, 3(3-0)

How Michigan government is organized and conducted and how policies are made; sources of executive-legislative conflict; politics of taxation; role of the state in local affairs; balance of political forces in the state.

310. Public Bureaucracy in the Policy Process

Fall, Winter, Spring, Summer. 3(3-0) Introduces student to following major areas of public administration: development of administration in the U.S.; theories of administrative organization; principles and methods of administrative management; executive leadership; interpersonal and intergroup relationships; levels of decision making, ethics and responsibility.

313. Public Policy Analysis

Fall, Winter, Spring. 3(3-0)

Problems and methods in perception of public problems, determination of goals, generation and evaluation of alternatives, policy choice. Planning and program budgeting, political and analytical methods of policymaking compared.

320. The American Judicial Process

Fall, Winter, Spring, Summer. 3(3-0) Analysis of the structure and functions of judicial systems. Organization, administration, and politics of judicial bureaucracies. Roles of judges, juries, counsel, litigants, and interest groups in adjudication processes.

321. Judicial Policymaking

Fall, Winter, Spring. 3(3-0)

Consideration of political behavior of judges (especially Justices of Supreme Court) and their policymaking. Focus on policy questions currently important, including civil liberties, national economic policy and interrelationships among governmental units.

324. The American Legislative Process Fall, Winter. 3(3-0)

Nature of legislative process in the United States; organization and procedure of legislative bodies; direct legislation; relationship of legislative branch to other branches of government.
