853. Advanced Topics in Oxidation and Corrosion
Winter of even-numbered years. 3(3-0)
MMM 431 or approval of department.
Effects of metallurgical and environmental factors on the kinetics of aqueous and solution of electrochemical corrosion and solvent less metal redox reactions.

861. Theory of Metals
Fall of odd-numbered years. 3(3-0)
MMM 825.

863. Advanced Rate Theory and Diffusion
Fall of even-numbered years. 3(3-0)
MMM 825 or approval of department.

871. Advanced Physical Metallurgy
Spring of even-numbered years. 3(3-0)
MMM 825 or approval of department.
Quasichemical theory of alloy phases, crystal defects, ordering and second order transitions, thermal effects, surface tension, solid state reactions, nucleation, recovery, recrystallization, grain growth, crystallographic transformations, solidification, interfaces.

872. Advanced Mechanical Metallurgy
Spring of odd-numbered years. 3(3-0)
MMM 825 or approval of department.
Dislocation-obstacle interactions, thermally activated dislocation motion, recovery and recrystallization, deformation of polycrystals, Taylor theory, deformation and recrystallization textures, dynamic effects, high-temperature deformation, radiation effects.

885. Seminar
Spring. 1(1-0) May reenroll for a maximum of 3 credits. MMM graduate student. Detailed laboratory investigation of a specialized aspect of materials science or presentation of own research projects. Participation generally required each term of residence.

890. Selected Topics
Fall, Winter, Spring, Summer. 3(3-0)
May reenroll for a maximum of 18 credits if a different topic is taken. Approval of department.
A newly developing area in metallurgy, mechanics, or materials science selected by the department for offering each term. Information on the specific topic to be covered should be obtained from the department office before registration.

899. Master's Thesis Research
Fall, Winter, Spring, Summer. Variable credits. Approval of department.

900. Special Problems
Fall, Winter, Spring, Summer. 1 to 6 credits. May reenroll for a maximum of 6 credits. Approval of department.
Individualized reading and research compatible with the student's interest and ability.

Microbiology and Public Health — Descriptions of Courses

909. Elastic Thin Shells
Spring. 4(4-0) MMM 815 or C E 804 or approval of department. MTH 421: Interdepartmental with and administered by Civil Engineering.
Elements of differential geometry, membrane theory of shells, Pucker's stress function, deformation and bending of shells of revolution and shallow shells.

911. Theory of Elastic Stability
Winter of odd-numbered years. 4(4-0)
MMM 815 or approval of department. MTH 422: Interdepartmental with Civil Engineering.
Theory and methods of determining buckling strength and post-buckling behavior of bar, plate and shell elements and of elastic systems.

912. Theory of Plates
Winter. 4(4-0) MMM 815 or C E 804 or approval of department. MTH 422: Interdepartmental with Civil Engineering.
Bending of thin elastic plates with various shapes and boundary conditions; application of energy principles and approximate methods of solution; thick plates: large deflection theory; sandwich plates.

914. Theory of Elasticity II
Spring of odd-numbered years. 3(3-0)
MMM 815 or approval of department.
Further topics in linear elasticity including complex variable solutions, elastodynamics, variational principles, St Venant's principle, anistotropic material behavior.

915. Theory of Elasticity III
Spring of even-numbered years. 3(3-0)
MMM 815 or approval of department.

916. Fracture Mechanics
Fall of even-numbered years. 3(3-0)
MMM 813.

917. Fatigue of Engineering Structures
Spring of even-numbered years. 3(3-0)
MMM 411 or approval of department.

918. Theory of Viscoelasticity
Fall of even-numbered years. 3(3-0)
MMM 810; MTH 422 or approval of department.

940. Modern Problems in Materials Science
Fall, Spring. 3(3-0) May reenroll for a maximum of 9 credits. Approval of department. Current field of research in ceramics, martensitic transformations, oxidation and corrosion, electron microscopy, recrystallization and textures.

941. Crystal Defects
Winter of even-numbered years. 3(3-0)
MMM 835 or approval of department.
Defects in thermodynamic equilibrium. Vacancies, Interstitals, color centers. Role of defects in diffusion, radiation damage. Geometrical and elastic properties of dislocations, dislocation reactions, grain boundary structures and kinetics.

942. Advanced Topics in Phase Transformations
Winter of odd-numbered years. 3(3-0)
MMM 835 or approval of department.
Precipitation and ripening, gradient energy term, spinodal decomposition, surface and strain effects, allotropic and polytropic transformations, martensitic transformations, electronic effects, charge density waves, thermoelastic and shape memory alloys.

990. Doctoral Dissertation Research
Fall, Winter, Spring, Summer. Variable credit. Approval of department.

M I C R O B I O L O G Y A N D P U B L I C H E A L T H

MPH

College of Human Medicine
College of Natural Science
College of Osteopathic Medicine
College of Veterinary Medicine

200. Elementary Microbiology
Fall, Winter. 4(3-2) Three terms of Natural Science. Primarily for majors outside the College of Natural Science.
Description of bacteria and related forms of microorganisms, their growth and nature, their application in industry, and their control in public health.

234. Elementary Medical Microbiology
Fall. 5(4-1) C E M 130, B S 211; approval of department.
Survey of immunology and microbiology with emphasis on pathogenic microorganisms, antimicrobial agents, and laboratory diagnosis.

301. Introductory Microbiology
Fall, Spring, Summer. Given at W. K. Kellogg Biological Station Summer term. Fall, Spring; 3(3-0) Summer: 3 credits. C E M 244, C E M 245 or B C H 500.
Fundamentals of microbiology. Ranges of cell structure and activities; nutrition, growth, and importance of major microbial groups.

302. Introductory Microbiology Laboratory
Fall, Spring, Summer. Given at W. K. Kellogg Biological Station Summer term. Fall, Spring; 2(0-4) Summer: 2 credits. M P H 301 or concurrently.
Methodology of microbiology including microscopy, staining, aspesis, cultural media and quantification.

303. Microbiology I: General
Fall. 4(4-0) B C H 451 or concurrently.
Principles of microbiology emphasizing cell structure and function, metabolism, growth and death, differentiation, diversity, and microbial interaction.
304. General Microbiology Laboratory I
Fall. 3(1-5) MPH 303 or concurrently. Techniques and procedures of general microbiology emphasizing the isolation and identification of bacteria, the qualitative aspects of growth and death, and bacterial interactions. (In laboratory with Department of Botany and Plant Pathology.)

306. General Microbiology Laboratory II
Spring. 3(1-5) MPH 304. Continuation of MPH 304 with emphasis on immunologic and genetic techniques and procedures.

310. Food Safety and Microbiology
Fall. 4(3-3) CEM 143 or concurrently or approval of department. Not open to students with credit in FSC 440. Interdepartmental with and administered by Food Science. Effects of food handling, preparation and service on food safety. Microorganisms in foods, sanitation, foodborne disease and food service regulations.

400H. Honors Research
Fall, Winter, Spring, Summer. 2 credits. May reenroll for a maximum of 8 credits. Approval of department. A four-term research project with thesis.

406. Medical Mycology
Fall, Spring. 4(2-8) ROT 402 or approval of department. Interdepartmental with and administered by the Department of Botany and Plant Pathology. Characteristics, habits, and laboratory identification of fungus diseases infecting humans. Emphasis on laboratory techniques and morphological characteristics of the various mycoses.

407. Microbial Genetics
(MPH 423.) Winter. 4(4-0) MPH 303; BCH 452 or concurrently. Genetics and molecular biology of bacteria and viruses with emphasis on the genetic principles developed from their study.

409. Elements of Cell Function and Structure
Spring. 4(4-0) MPH 407, BCH 453 concurrently. Cell biology of eukaryotic cells, with an emphasis on animal cells. Molecular mechanisms which underlie cellular processes will be stressed.

413. Virology
Fall. 3(3-0) MPH 407. Viruses and modern molecular biology, stressing principles of viral replication and gene expression of the major classes of viruses; viral diseases; some elements of epidemiology of viral infections.

416. General Parasitology
Fall, Summer. Given at W. K. Kellogg Biological Station Summer term. Fall. 3(3-0) Summer. 3 credits. B S 310, B S 311, B S 312 or LB 141. Interdepartmental with the Department of Zoology. Life history, host-parasite relationships (including physiology, immunology, immunopathology and pathology) and epidemiology of selected groups and species of protozoan, trematode, cestode and nematode parasites.

418. General Parasitology Laboratory
(MPH 417.) Fall, Summer. Given at W. K. Kellogg Biological Station Summer term. Fall. 2(0-4) Summer. 2 credits. MPH 416 or concurrently or approval of department. Interdepartmental with the Department of Zoology. Identification and life histories of representative species of major groups of animal parasites. Selected concepts of host-parasite associations will be tested experimentally.

421. Microbial Physiology
Winter. 3(3-0) MPH 303, MPH 304, BCH 453. Cell structure and function, macromolecular synthesis and control.

422. Microbial Physiology Laboratory
Winter. 2(0-6) MPH 421 or concurrently. Laboratory work based upon the subject matter of MPH 421.

426. Microbial Ecology
(MPH 425.) Spring. 3(3-0) MPH 301 or MPH 303, MPH majors must enroll concurrently in MPH 453. Interdepartmental with the Department of Crop and Soil Sciences. Microbial activities in natural ecosystems; their association with plants and animals, and their transformations of carbon, nitrogen and sulfur in soil and aquatic habitats.

426A. Microbial Ecology Recitation
(MPH 425A.) Spring. 1(0-4) MPH 426 concurrently. Interdepartmental with the Department of Crop and Soil Sciences. Quantitative aspects of microbial ecology.

427. Immunobiology
(MPH 405.) Winter. 3(3-0) MPH 406. Students may not receive credit in both MPH 427 and MPH 481. Structure and function of molecules in the immune system, cellular participants and detection and measurement of immune responses; diversity; immunologic abnormalities; protective immune mechanisms. Experimental approaches to dissection of functions.

429. Host-Parasite Relationships
Winter. 3(3-0) MPH 407, MPH 413. Molecular basis of microbial virulence determinants and their role in overcoming mechanisms of host defense.

437. Introductory Medical Microbiology
Winter. 3(3-0) B S 210, B S 211, B S 212. Primarily for Medical Technology students. Biology of protozoan, helminth, and arthropod infections of humans. Laboratory diagnosis of these infections.

440. Food Microbiology
Spring. 3(3-0) MPH 200 or MPH 301 or approval of department. Interdepartmental with and administered by Food Science. Major groups of microorganisms of importance to the food industry are studied with emphasis on ecological, physiological, and public health aspects.

441. Food Microbiology Laboratory
Spring. 2(0-4) FSC 440 or concurrently or approval of department. Interdepartmental with and administered by Food Science. Laboratory practice with major groups of microorganisms of importance to the food industry. Concurrent enrollment in FSC 440 recommended.

444. Environmental Microbiology
Spring. 3(3-0) MPH 200 or MPH 301. Flora, methods of testing, and purification of environmental air and water. Treatment and disposal of sewage.

461. Medical Immunology and Microbiology
(MPH 462.. MPH 463.) Winter. 5(5-0) MPH 301, MPH 302. Students may not receive credit in both MPH 451 and MPH 427. Interdepartmental with Medical Technology. The immune system, cellular interaction of the in vivo and in vitro reaction, and associated immunobiology. Concepts of some elements of epidemiology of viral infections. Approval of department.

464. Medical Microbiology and Immunology Laboratory
Winter. 2(0-6) MPH 461 or concurrently. Basic immunologic and taxonomic laboratory techniques of selected bacterial pathogens.

470. Biological Membranes
(IDC 470.) Spring. 3(3-0) BCH 401. Interdepartmental with the departments of Biochemistry, and Physiology. Administered by the Department of Physiology. The chemistry, physics and mathematics of the permeability, energy transformations and surface functions of differentiated cell membranes and membranous organelles are compared. A brief discussion of theoretical and experimental models is included.

490. Special Problems in Microbiology
Fall, Winter, Spring, Summer. 1 to 6 credits. May reenroll for a maximum of 12 credits. Approval of department. Tutorial instruction in laboratory or library research for advanced undergraduates.

511. Medical Microbiology and Immunology
Winter. 1 to 5 credits. May reenroll for a maximum of 5 credits. A biochemistry course. Enrollment in College of Human Medicine or approval of department. Basic principles of microbiology (bacteriology, virology, mycology and parasitology) and immunology. Selected type infections relate these principles to disease in humans.

512. Infectious Diseases
Spring. 4(3-3) MPH 511, or approval of department. Interdepartmental with the Department of Medicine. Infectious diseases of humans, including biology of the causative microorganism, epidemiology, pathogenesis, host-parasite relationships, clinical and laboratory diagnosis, and clinical management.

521. Medical Microbiology and Immunology
Winter. 1 to 6 credits. May reenroll for a maximum of 6 credits. A biochemistry course. Enrollment in College of Osteopathic Medicine or approval of department. Basic principles of microbiology (bacteriology, virology, mycology and parasitology) and immunology. Selected type-infecions relate these principles to disease in humans.

53A. Medical Microbiology: Immunology
Winter. 4(3-2) Second-term Veterinary Medicine students or approval of department. Basic principles of immunology (immunobiology and immunochemistry) and their relation to disease in animals.
531B. Medical Microbiology: Bacteriology and Mycology
Spring, 5(3-8) Third-term Veterinary Medicine students or approval of department.
Basic principles of bacteriology and mycology and their relation to disease in animals.

531C. Medical Microbiology: Virology
Fall, 4(3-2) Fourth-term Veterinary Medicine students or approval of department.
General properties of animal viruses; pathogenesis, immune response and immunopathology in viral diseases; principles of clinical virology.

531D. Medical Microbiology: Parasitology
Winter, 4(3-3) Fifth-term Veterinary Medicine students or approval of department.
Basic principles of parasitology (protozoology, helminthology, and entomology) and their relation to disease in animals.

618. Infectious Disease Clerkship
Fall, Winter, Spring, Summer. 2 to 12 credits. May reenroll for a maximum of 12 credits. MED 608. Interdepartmental with and administered by the Department of Medicine. The clerkship emphasizes acquisition in depth of knowledge and skills essential in solution of clinical problems in infectious and immunologic diseases. Integrated basic science input is afforded through relevant seminars.

800. Seminar
Winter, Spring, Summer. 1(1-0) May reenroll for a maximum of 9 credits. Approval of department.

810. Topics in Microbiology
Fall, Winter, Spring, Summer. 2 to 4 credits. May reenroll for a maximum of 10 credits if different topic is taken. Approval of department. Topics will be selected from taxonomic subspecialties such as bacteriology, virology, protozoology, mycology, and parasitology; from transacting disciplines such as microbial genetics, immunology, physiology, and ecology.

813. Molecular Virology
Winter, 4(4-0) Background in biochemistry, and approval of department. Molecular nature and biochemistry of replication of bacterial and animal viruses. Emphasis is on current advances, research concepts, and the role of viruses in molecular biology research.

821. Advanced Microbial Physiology
Spring of even-numbered years. 4(4-0) MPH 303. Mechanism and regulation of physiologic and metabolic activities unique to procaryotes including fermentation, photosynthesis, respiration and autotrophy.

823. Microbial Genetics
Winter, 3(3-0) BCH 811. Gene structure, gene function, and genetic regulation at the classical and molecular levels in procaryotes and lower eukaryotes.

825. Cell Structure and Function
Winter, 4(4-0) BCH 451 or BCH 453 or approval of instructor. Interdepartmental with the departments of Biochemistry, and Phycology. Administered by the Department of Biochemistry. Molecular basis of structure and function of cells. Fundamental properties of cells: reproduction, dynamic organization, interaction, programmed and interactive information transfer considered through original investigations in all five kingdoms.

827. Immunochemistry
Spring of even-numbered years. 3(3-0) MPH 427; BCH 452 or ZOL 441; CEM 383 recommended. Structure and reactivity of antigens and antibodies; synthesis of immunoglobulins. Emphasis is on current advances and research concepts.

829. Host-Parasite Relationships
Fall, 3(3-0) MPH 427, MPH 429 or approval of department. Pathogenesis and host responses to selected bacterial, parasitic, and fungal pathogens. Emphasis is on current research models which exemplify a variety of host-parasite relationships.

831. Bacterial Diversity
Spring of odd-numbered years. 3(3-0) MPH 303, MPH 304; BCH 451 or BCH 453 concurrently. Morphological and physiological properties of diverse groups of bacteria and how these properties relate to their ecological niche and importance.

832. Bacterial Diversity Laboratory
Spring of odd-numbered years. 2(0-6) MPH 821 or concurrently. Representative groups of bacteria will be isolated and studied.

842. Advanced Soil Microbiology
Fall of odd-numbered years. 3(3-0) MPH 425 or approval of department. Interdepartmental with the Department of Crop and Soil Sciences. Biochemistry, biology, and community ecology of microorganisms indigenous to soil. Emphasis on current research problems.

843. Soil Microbiology Laboratory
Fall of odd-numbered years. 2(0-6) MPH 426 concurrently or approval of department. Interdepartmental with the Department of Crop and Soil Sciences. Fundamental techniques of dealing with microorganisms indigenous to soil. Metabolic activity of microorganisms. Interaction between microorganisms and plants.

850. Special Problems in Microbiology
Fall, Winter, Spring, Summer. 2 to 6 credits. May reenroll for a maximum of 12 credits. Approval of department.

900. Topics in Microbiology
Fall, Winter, Spring, Summer. 2(0-0) May reenroll if different topic is taken. Approval of department. Topics will be selected from taxonomic subspecialties such as bacteriology, virology, protozoology, mycology, algalogy, and helminthology; and from transacting disciplines such as microbial genetics, immunology, physiology, and ecology.

999. Doctoral Dissertation Research
Fall, Winter, Spring, Summer. Variable credit. Approval of department.

MILITARY SCIENCE

Office of the Provost

101. Introduction to the Military Profession
(M S 211.) Fall, Winter, Spring. 1(1-1) Approval of department. Analysis of the military profession from several academic perspectives. Exploration of the technical, ethical, and personal ramifications of service as an officer in the U.S. Army. Lab introduces military skills.

102. Military Leadership I
(M S 041A.) Winter. 1(1-1) M S 101 or approval of department. Introduction to military leadership. Draws upon examples from military history to illustrate what a military leader must be, know, and do to lead soldiers in battle. Lab includes both military skills and leadership applications.

103. Army Physical Fitness Training
Spring. 1(0-3) M S 102 or approval of department. The leader's role in implementing the Army Physical Fitness Program to provide for the physical well being of subordinates. Individual and group fitness programs are introduced. Includes rappelling and smallbore rifle marksmanship.

201. Military First Aid
(M S 221.) Fall. 1(1-1) M S 103 or approval of department. Emergency first aid techniques including casualty evaluation, lifesaving measures, CPR, and environmental injury prevention. Lab includes military skills and first aid applications.

202. Military Leadership II
(M S 041B.) Winter. 1(1-1) M S 201 or approval of department. Descriptive model of small unit leadership. Provides cadets with a realistic preview of the small unit leader's role in the Army. Lab includes small unit drill and ceremonies.

203. Land Navigation
(M S 223.) Spring. 1(1-2) M S 202 or approval of department. Use of military topographic and special use maps to include intersection, resction, modified resction, and polar coordinates. Development of overlays for tactical operations. Lab includes actual land navigation in the field using the electronic compass.

301. Command and Control Communications
Fall. 3(2-3) M S 203 or approval of department. Tactical wire and radio communications systems and employment during tactical operations to provide effective control of military operations. Encryption/decryption, use of codes, and electronic warfare. Lab emphasizes practical application of communication skills.
