

Descriptions — Theatre of Courses

- 808. Studies in Theatre History**
Fall, Winter, Spring, Summer. 3(3-0)
May reenroll for a maximum of 18 credits.
Approval of department.
Selected periods in Western and Asian Theatre
History emphasizing the theatre as a cultural
expression and a performing art.
- 809. Acting Theory**
Fall. 2(2-0) Approval of instructor.
Discussion of the theories, processes, techniques,
and styles of acting set forth in the writings of
prominent performers, teachers, and critics.
- 899. Master's Thesis Research**
Fall, Winter, Spring, Summer. Variable
credit. Approval of department.
- 990. Special Problems—Theatre**
Fall, Winter, Spring, Summer. 1 to 6
credits. May reenroll for a maximum of 15 cred-
its.
Special problems in theatre research and experi-
mentation with emphasis on the relation of the-
atre to other disciplines.
- 999. Doctoral Dissertation Research**
Fall, Winter, Spring, Summer. Variable
credit. Approval of department.

URBAN PLANNING

See Geography.

VETERINARY MEDICINE VM (COLLEGE OF)

- 511. Introduction to Veterinary
Medicine I**
Fall. 2(2-0) First-term Veterinary
Medicine students.
Species and breed identification, predisposition
for specific diseases, basic care and feeding,
restraint and handling of small domestic ani-
mals, unusual pets, and laboratory animals.
- 517. Perspectives in Veterinary
Medicine**
Fall. 1(1-0) First-term Veterinary
Medicine students.
Ethical principles, historical background and
organization of the veterinary profession.
- 521. Introduction to Veterinary
Medicine II**
Spring. 4(3-4) Third-term Veterinary
Medicine students.
Restraint, physical examination and diagnostic
procedures in food animals and horses. Funda-
mentals of equine conformation, gaits, shoeing
and routine medical care.
- 531. Animal Behavior**
Winter. 3(3-0) Second-term Veteri-
nary Medicine students.
Emphasis on behavior of animals relating to dis-
ease prevention and treatment. Veterinary etho-
logy including animal communications, re-
production, restraint, handling, housing and
feeding habits.
- 540. Metabolic Diseases and
Endocrinology**
Winter. 2(2-0) Fifth-term Veterinary
Medicine students.
Biochemical and physiological basis of meta-
bolic and endocrine diseases of animals includ-
ing diagnosis, treatment and management.
- 542. Principles of Radiology**
Fall. 2(2-0) Fourth-term Veterinary
Medicine students.
Fundamentals of veterinary radiography. Nor-
mal radiographic anatomy. Principles of radio-
graphic interpretation. Radiation safety.
- 544. Veterinary Epidemiology**
Fall. 4(4-0) Fourth-term Veterinary
Medicine students.
Meaning and relevancy of biostatistics in veteri-
nary medicine. Descriptive and inferential sta-
tistics. Study design and critical literature
review. Disease determinants, ecology, distribu-
tion and populations at risk. Analytic-clinical
investigative epidemiology.
- 550. Preventive Veterinary Medicine
and Public Health**
Spring. 4(4-0) Sixth-term veterinary
medicine students.
Public health aspects of veterinary medicine.
Preventive and regulatory medicine including
meat and milk hygiene, water supply and treat-
ment, solid and liquid waste treatment and dis-
posal and zoonosis.
- 560. Urinary System**
Spring. 3(3-0) Sixth-term Veterinary
Medicine students.
Normal and abnormal structure and function,
diagnostic methods, and the medical and surgi-
cal manipulation of the urinary system.
- 561. Core of Medicine Laboratories I**
Spring. 2(0-6) Sixth-term Veterinary
Medicine students.
Classification diagnosis and treatment of dis-
eases of the urinary, hematopoietic, nervous,
integumentary and visual systems of animals.
- 562. Hematopoietic System**
Spring. 2(2-0) Sixth-term Veterinary
Medicine students.
Normal structure and function of the hemato-
poietic system and pathophysiologic effects of
hematopoietic diseases. Clinical manifestations,
laboratory evaluation and medical manage-
ment.
- 563. Visual System**
Spring. 2(2-0) Sixth-term Veterinary
Medicine students.
Methods of examination, diagnosis, and treat-
ment of ocular diseases.
- 564. Survey of Infectious Agents**
Winter. 3(3-0) Fifth-term veterinary
medicine students.
Host-microorganism relationship in diseases of
animals; laboratory diagnosis, treatment, con-
trol, and public health significance.
- 566. Nervous System**
Spring. 3(3-0) Sixth-term Veterinary
Medicine students.
Normal and abnormal neural structure and
function in animals with emphasis on clinical
neurology and neuropathology.
- 568. Integumentary System**
Spring. 3(3-0) Sixth-term Veterinary
Medicine students.
Diseases of the integumentary system of animals
with emphasis on laboratory examinations,
interpretations of pathological features, diagno-
sis and treatment.
- 570. Principles of Anesthesia**
Fall. 2(2-0) Seventh-term Veterinary
Medicine students.
Principles and techniques of administering anes-
thetic agents. Supportive care including fluid
therapy. Emergency procedures. Euthanasia
agents.
- 571. Core of Medicine Laboratories II**
Fall. 1(0-3) Seventh-term Veterinary
Medicine students.
Classification, diagnosis and treatment of dis-
eases of the cardiovascular, respiratory and
digestive systems of animals. Preanesthetic and
anesthetic procedures and skills.
- 572. Cardiovascular System**
Fall. 3(3-0) Seventh-term Veterinary
Medicine students.
Pathogenesis, diagnosis, and management of
cardiovascular diseases of animals. Anatomical,
physiological, pathological and pharmacologi-
cal principles providing basis for medical and
surgical treatment. Diagnostic and surgical pro-
cedures and radiologic interpretation.
- 574. Respiratory System**
Winter. 4(4-0) Eighth-term Veterinary
Medicine students.
Pathogenesis, diagnosis, and management of
respiratory diseases of animals; anatomical,
physiological and surgical treatments. Diagnos-
tic and surgical procedures and radiologic inter-
pretation.
- 576. Digestive System I**
Fall. 4(4-0) Seventh-term Veterinary
Medicine students.
Pathogenesis, diagnosis, and treatment of dis-
eases of the alimentary tract and digestive organs
of small animals.
- 578. Principles of Surgery I**
Fall. 3(2-3) Seventh-term Veterinary
Medicine students.
Fundamentals of surgery. Common procedures
used in soft tissue surgery with small animals.
- 580. Theriogenology**
(516.) Fall. 6(5-3) Seventh-term Veteri-
nary Medicine students.
Reproductive function and diseases of animals'
genital structure and function and endocrine
controls. Examination, diagnosis and treatment
of the mammary gland and reproductive tract.
- 581. Core of Medicine Laboratories III**
Winter. 3(0-9) Eighth-term Veterinary
Medicine students.
Diagnosis and treatment of diseases of the repro-
ductive, digestive and musculoskeletal systems.
- 582. Musculoskeletal System I**
Winter. 3(3-0) Eighth-term Veterinary
Medicine students.
Diagnosis and treatment of musculoskeletal dis-
eases of animals with emphasis on pathological
changes, radiological techniques, and interpre-
tation of radiographs.

586. Digestive System II
Winter. 4(4-0) Eighth-term Veterinary Medicine students.

Pathogenesis, diagnosis and treatment of diseases of the alimentary tract and digestive organs of food animals and horses.

588. Principles of Surgery II
Winter. 3(2-3) Eighth-term Veterinary Medicine students.

Fundamental large animal surgery. Surgical techniques and management of animals before, during and after surgery.

590. Client Communication and Jurisprudence
Spring. 2(2-0) Ninth-term Veterinary Medicine students.

Communication and interviewing skills for effective client relations. Communication aspects of medical records and their use in medical problem solving. Legal responsibilities of the veterinary medical profession.

591. Core of Medicine Laboratories IV
Spring. 2(0-6) Ninth-term Veterinary Medicine students.

Diagnosis and treatment of common toxicologic conditions, musculoskeletal disorders and orthopedic conditions in animals.

592. Musculoskeletal System II
Spring. 4(4-0) Eighth-term Veterinary Medicine students.

Diagnosis, prognosis and management of musculoskeletal diseases of large animals. Anatomical relationships of normal to abnormal function. Surgical procedures applicable to the equine and ruminant. Radiographic diagnosis and interpretation of various lameness conditions.

594. Veterinary Toxicology
Spring. 4(4-0) Ninth-term Veterinary Medicine students.

Pharmacological basis and pathological features of diseases of animals caused by common toxic chemicals with emphasis on clinical manifestations, diagnosis, prevention, and treatment.

596. Diseases of Bones and Joints
Spring. 3(3-0) Ninth-term Veterinary Medicine students.

Anatomy and pathophysiology of diseases of bones and joints. Diagnosis, prognosis and treatment of abnormalities involving bones and joints.

602. Veterinary Practice Management
Spring. 2(2-0) Ninth-term Veterinary Medicine students, approval of college.

Establishment of a veterinary practice.

610. Veterinary Externship
Fall, Winter, Spring, Summer. 6 to 12 credits. May reenroll for a maximum of 12 credits. Veterinary Medicine students; completion of preclinical courses and approval of college. Students may not receive credit in both V M 610 and LCS 674.

Clinical or research experience in an off-campus setting.

ZOOLOGY ZOL

**College of Human Medicine
College of Natural Science**

203. Resource Ecology
(IDC 200.) Fall, Winter, Spring, Summer. 3(3-0) Interdepartmental with the departments of Fisheries and Wildlife, Forestry, Geography, and Resource Development. Administered by the Department of Fisheries and Wildlife.

Basic concepts of ecology which are the unifying basis for resource management, conservation policy and the analysis of environmental quality. Extensive use of guest lecturers.

301. Nature and Homo Sapiens
Spring. 4(4-0) Three terms of natural science; not open to zoology majors.

A case study approach which explores the interaction of technical, social, economic and legal influences on the management of contemporary environmental issues in Michigan.

302. Vertebrate Life of the Past
Fall. 3(3-0) One course in physical or biological science or Juniors. Interdepartmental with and administered by Geology.

Fossil vertebrates from fish to humans.

304. Biology, Behavior and Humans
Winter. 3(3-0) Juniors; not open to zoology majors.

Examines philosophical and biological issues which make the study of animal behavior relevant to humans. Emphasizes history of animal behavior, current theories, and experiments relating biological and environmental determinants of adaptive and non-adaptive behavior patterns.

306. Invertebrate Biology
Fall. 4(3-3) B S 212.

Systematics, morphology, and natural history of invertebrate animals. Laboratory includes identification of live and preserved animals and recognition of morphological characteristics of selected groups.

307. Vertebrate Biology
Winter. 4(3-3) B S 212.

Systematics, morphology and natural history of vertebrate animals. Laboratory includes identification of live and preserved animals and recognition of morphological characteristics of selected groups.

313. Animal Behavior
(413.) Spring. 4(4-0). Given at W. K. Kellogg Biological Station Summer term of odd-numbered years: 4 credits. B S 211.

Description of the known behavior of the various vertebrate and invertebrate phyla with emphasis upon adaptive significance. Thus, special attention will be given to mating, defensive, and nutritive behavior. The genetics and ontogeny of behavioral patterns will be presented where known. Behavior will be related to the ecology of various animal populations.

317. Principles of Development
Fall, Spring. 3(3-0) B S 212.

Development of animals, especially vertebrates. Principles are illustrated by modern experimental studies of developmental processes.

318. Principles of Development Laboratory

Fall, Spring. 2(0-6) ZOL 317 or concurrently; B S 212.

Principles of development illustrated by analysis of the ontogeny of selected organisms.

337. The Fossil Record of Organic Evolution

Spring. 3(3-0) One course in a natural science; Juniors. Interdepartmental with and administered by Geology.

The direct evidence for organic evolution in the fossil record. Evolution of life from prebiological systems to humans. Impact of fossil discoveries on human thought.

341. Human Heredity

Fall, Winter. 4(4-0) Sophomores. Not open to zoology majors. Students may not receive credit in more than one of the following: ZOL 341, ZOL 441.

Inheritance of human physiological, and psychological traits. Forces that influence human evolution. Applications of heredity in fields of education, sociology, anthropology, psychology, dentistry, and medicine.

389. Animal Ecology

Winter, Summer. Given at W. K. Kellogg Biological Station Summer term. Winter: 4(3-4) Summer: 4 credits. B S 212 or concurrently.

Animals in relation to their environment. Factors affecting the distribution and abundance of animals. Interrelationships between climate, soils, vegetation, geologic history and animal life. Population characteristics as related to reproduction and mortality factors.

391. Zoological Problems

Fall, Winter, Spring, Summer. 1 to 8 credits. May reenroll for a maximum of 12 credits. Juniors; B S 212; 6 credits in zoology; approval of department.

Advanced work in morphology, field zoology, genetics, mammalogy, ornithology, or ichthyology.

400H. Honors Work

Fall, Winter, Spring. 1 to 5 credits. May reenroll for a maximum of 15 credits. Juniors; approval of department.

401. Comparative Physiology I

Fall. 4(3-4) PSL 240 or B S 212; CEM 131 or CEM 141. Interdepartmental with and administered by the Department of Physiology.

A comparison of osmoregulation, digestion, respiration, and other physiological processes in a wide range of organisms.

402. Comparative Physiology II

Winter. 4(4-0) PSL 401 or approval of department. Interdepartmental with the Department of Physiology.

A comparison of sensory, motor, endocrine and other integrative mechanisms in animals.

404. Biological and Ecological Concepts for Engineers and Mathematicians

Winter. 3(3-0) Approval of department. Interdepartmental with Systems Science.

Biological and ecological concepts important to formal analysis of living systems, vital properties, processes, and limitations; population dynamics, selection, competition, and predation; ecological community structure and function; industrialized ecosystem.
