Courses

Historical and Comparative 822. Criminal Justice

Spring. 3(3-0) Majors or approval of school.

Criminal justice systems are examined on a global basis exclusive of the United States. Emphasis is placed on major different legal philosophies.

837. Managing Police Organizations Winter, 3(3-0) C J 812.

Administrative issues in directing, controlling and coordinating law enforcement agencies at supervisory levels. Applications of socio-behavioral concepts. Fundamental issues in police management.

Assessment of Police Policies and 838. Operations

Spring. 3(3-0) C J 837.

Critical analysis of recent police policy-related research. Operations research and policy analysis as applied to the deployment of human resources and policing strategies. Efficiency and effectiveness of operational information sys-

Highway Traffic Administration 840. Winter. 3(3-0)

The Federal-state-local partnership in highway traffic administration. Laws, standards and policies regulating the accident prevention and loss reduction countermeasures of governmental agencies and private industry. Problems and

Delinquency Prevention and 855. Control

Fall. 3(3-0)

Evaluation of primary and secondary delin-quency prevention, control and treatment pro-grams. Critical analysis of current major hypotheses, recent developments, and contributions by operational and academic sources.

865. **Adult Corrections**

Fall. 3(3-0)

Traditional and contemporary correctional practices. Social, political, economic and organizational factors that determine correctional policies. Current trends in adult corrections.

Adult and Juvenile Correctional 866. Program Management

Winter. 3(3-0) C J 855 or C J 865.

Planning, organizing and operating adult and juvenile correctional programs on institutional and community levels.

867. Analysis and Evaluation of Prevention and Correctional Programs

Spring. 3(3-0)

Analysis and evaluation of research relating to adult and juvenile prevention and correctional programming. Application of research design to program evaluation.

871. Law of Corrections

Winter. 4(4-0) Majors or approval of

school.

Constitutional limitations and impact of law on correctional practice. Due process, judicial sentencing, probation, prisoners' rights, parole grant, revocation of probation and parole.

872. Criminal Procedure

Spring. 4(4-0) A law course.

Criminal procedure as applied to police and courts. Due process, Bill of Rights, right to counsel, search and seizure, confessions, bail, prosecution, guilty pleas, trial.

Planning in Criminal Justice 880. Fall. 3(3-0) C J 492.

Models for planning. Empirical basis for organizational planning. Role of planning in operational administration. Assessment of current system capabilities.

Evaluation Research in Criminal 882.

Spring. 3(3-0) C J 880, C J 881.

The conduct and utilization of evaluative research in projects, programs and agencies. Strategies for conducting, interpreting and utilizing operational research.

Security Management 885.

Fall. 3(3-0) C J 485 or concurrently, or approval of instructor.

History of and legal bases for protective services. Organization and management of commercial and proprietary security units in business, industry, institutions and government. The systems approach to security.

ሰየጸ Practicum

Fall, Winter, Spring, Summer. 1(0-4) to 6(0-24) Majors or approval of school.

Planned program of research observation, study and work in selected criminal justice agencies. Designed to supplement classroom study with participation in domestic and foreign criminal justice systems.

Quantitative Methods in Criminal 892. Justice Research.

Winter. 4(4-0) C J 492, C J 811.

Views the relationship and application of statistical techniques to theory building and concept construction. Gives an overview of statistical methods with an emphasis on those most useful for research in criminal justice.

Policy Change Paper 897.

Fall, Winter, Spring, Summer. 1 to 4 credits. May reenroll for a maximum of 4 credits. Majors or approval of school.

Development of plan for significant policy change and its implementation in a criminal justice agency.

Master's Thesis Research

Fall, Winter, Spring, Summer. 1 to 12 credits. May reenroll for a maximum of 12 credits. Majors or approval of school.

Planned research and writing directed by student's thesis committee.

Seminar on Criminal Justice 930. Sustems

Winter. 3(3-0) Graduate students.

Topical issues on the development, functioning, and interrelationships of components of criminal justice systems and how systemic coherence can be achieved within a democratic society.

Seminar in Criminal Justice and 990. Criminology

Fall. 3 to 5 credits. Graduate students. Analysis of major research contributions to criminal justice and criminology.

992. Research Utilization and Application in Criminal Justice

Spring. 3(3-0) Majors or approval of

Substantive and administrative problems of conducting research and exisiting attempts to solve these. Utilization of research in bringing about change in the criminal justice system. Methods of maximizing research utility.

CROP AND SOIL **SCIENCES**

CSS

College of Agriculture and Natural Resources

101. Introduction to Crop Science Fall. 4(3-2)

Principles of identification, adaptation, management, and utilization of field crops for food and fiber. Fundamentals of crop management, breeding, weed control, crop quality, and tropical crops in world agriculture.

Soil and Our Environment

Spring. 3(3-0) Not open to students with credit in CSS 210. Non-majors only.

Role of soil in growing plants, water use and conservation, nutrient cycling, fertilizers, environmental quality, animal health, food-population dilemma.

Approved through Fall 1988.

Corn and Soybean Production 204.

Fall. 2(2-0) CSS 101, CSS 202 or CSS

Topics related to increased efficiency in corn and soybean production: time of planting; irrigation scheduling; fertility; and weed, insect and disease control

205. Navy Bean and Sugarbeet Production

Winter. 2(2-0) CSS 101, CSS 202 or CSS 210.

Navy bean and sugarbeet production and marketing in Michigan. Presentations by specialists from within the University and the navy bean and sugarbeet industries.

206. Small Grain Production

Winter. 2(2-0) CSS 101, CSS 202 or CSS 210.

Small grain production, use, and marketing in Michigan and the world.

Fundamentals of Soil Science 210.

Fall, Winter. 4(3-2) CEM 141B. Not open to students with credit in CSS 202.

Nature of soils and their relation to plant growth, water regimes, nutrient cycling, erosion, environmental quality, plant composition, animal health and world food production.

301. Forage Crops

Fall. 3(2-2) Sophomores.

Distribution, morphology, identification, physiology, management and utilization of forage crops for hay silage, and pasture for livestock and for soil improvement and conservation.

318. Turfgrass Management

(CSS 418.) Fall. 3(3-0) CSS 210 or concurrently

Turfgrass management of golf courses, home lawns, parks, and athletic fields. Species identification and adaptation, routine and specialized cultural practices, pest identification and control.

350. Plant and Animal Genetics

(CSS 250.) Winter. 5(5-0) Juniors or approval of department.

Fundamentals of modern genetics with particular focus on problems and application in agriculture and natural resources.

Ecology and Physiology of 380. Agricultural Plants

Spring. 3(3-0) BOT 301; CSS 101 or HRT 101.

Interrelationships of physiological processes and environmental manipulation for higher yield of agricultural plants.

390. Soil Conservation and Land Use Winter. 3(3-0) CSS 210.

Concepts of soil erosion by water and wind and methods for soil conservation including control of erosion and sedimentation. Interpretation of soil properties for land use decisions.

402. Principles of Weed Control in Field Crops

Fall. 4(3-2) CEM 143, BOT 301.

Principles underlying weed control practices for agronomic crops. Factors involved in mechanical, chemical and biological control and basic physiological aspects of herbicide applications.

Crop Improvement and Seed Production 406.

Winter. 4(3-2)

Practical methods of crop improvement, seed production, storing, cleaning, packing, and dis-tribution, seed certification of small grains, leg-umes, corn, beans, potatoes, visits to seed agencies and seed farms.

Principles of Plant Breeding

Winter. 4(3-2) CSS 350. Interdepartmental with the Department of Horticulture.

Application of genetics and other sciences to breeding and improvement of agronomic and horticultural crops.

Independent Study 411.

Fall, Winter, Spring, Summer. 1 to 4 credits. May reenroll for a maximum of 8 credits if different problem is taken. Approval of department.

Individual work on a field, laboratory or library research problem of special interest to the stu-dent and supervised by faculty.

412. Topics in Agronomy

Fall, Winter, Spring, Summer. 2(2-0) or 3(3-0) May reenroll for a maximum of 9 credits if different topics are taken. Approval of

Topics will be selected from crop production, crop physiology, turfgrass management, organic soils, turfgrass soils, soil fertility and genetic analysis.

Turfgrass Soil Management 414. Fall. 3(2-2) CSS 318.

Fertility and pH control of turf soils; drainage; irrigation programming; cultivation; topdressing; soil amendments; construction of specialized soils.

416. Principles of Turfgrass Culture Winter. 3(3-0) CSS 318.

Growth and development of the turfgrass plant as related to turfgrass management practices.

417. Turfgrass Seminar

Fall. 1(2-0) CSS 318.

Seminars by leaders of the turfgrass industry; golf course design and maintenance, specialized equipment, and research developments.

419. Management of Turfgrass Pests

Fall. 4(3-2) CSS 318 or concurrently.

Chemical, biological and cultural methods of managing weed, disease, and insect pests of turfgrass.

420. Seminar

Winter. 1(1-0) May reenroll for a maximum of 4 credits.

424. Forest Soils

Spring. 3(2-3) CSS 210; Juniors or approval of department. Forestry majors: FOR 305, FOR 402, FOR 425, FOR 429 concurrently. Interdepartmental with and administered by the Department of Forestry.

Interrelationships of forest site and the growth of trees. Properties, classification, inventory, productivity and management of forest soils. Effects of silvicultural and forest management practices on the soil.

426. Microbial Ecology

Spring. 3(3-0) MPH 301 or MPH 303. MPH majors must enroll concurrently in MPH 426A. Interdepartmental with and administered by the Department of Microbiology and Public Health.

Microbial activities in natural ecosystems; their association with plants and animals, and their transformations of carbon, nitrogen and sulfur in soil and aquatic habitats.

426A. Microbial Ecology Recitation

Spring. 1(1-0) MPH 426 concurrently. Interdepartmental with and administered by the Department of Microbiology and Public Health.

Quantitative aspects of microbial ecology.

Soil Fertility and Fertilizers 430.

Spring. 4(3-2) CSS 210.

Diagnosing fertility status of soils by soil analysis and plant deficiency symptoms. Liming and fertilization with macro- and micronutrients and transformation of nutrients in soils. Fertilizer manufacture technology and use.

Soil Biophysics

Winter. 3(3-0) CSS 210 and BOT 301; CSS 380 recommended.

Salient features of soil physical and biological properties related to plant growth, principles and applications. Emphasis on root responses to the environment. Bioenergetics of the root-soil interface.

Pollutants in the Soil Environment 455.

Fall. 3(3-0) CEM 143, Seniors or approval of department.

Chemical and biological reactions of organic and inorganic pollutants in soils.

470. Soil Classification

Spring. 4(0-8) CSS 210 or approval of department.

Determination of soil properties by field examination of soils. Classification of soils. Preparation of land use report based upon soil maps of assigned areas. Field trips required.

480. World Soils and Land Use

Spring. 3(2-2) CSS 210 or approval of department.

Nature, geography and use of the world's major soils. Uses emphasized will include agriculture, range, and forestry.

485. Seed Science

Spring, 3(3-2) Approval of depart-

Morphological and physiological changes during seed formation, development, maturation and germination. Practical and biological aspects of seed drying. Storage, deterioration, dormancy and quality. Current problems and research in seed science.

800. Statistical Packages for Analysis of Experiments

Fall, Spring. 3(2-2) STT 423 or approval of instructor.

Use of microcomputers and mainframes for research data analysis and graphical presenta-tions. Software covered includes SAS, BMDP, SPSS, MSTAT, and PLOTIT. File transfer. EDITOR.

Crop Ecology

Winter of even-numbered years. 2(2-0) Approval of department.

World climates affecting crops and cropping systems. Limiting environmental factors for crop distribution and productivity. Physiological basis of stress injury and resistance for chilling, freezing, flooding, drought and salinity.

805. Herbicidal Action and Metabolism

Spring of odd-numbered years. 3(3-0) CSS 402; BOT 415 or concurrently.

A study of the properties and characteristics of herbicides, the fundamental processes involved in the physiological action, behavior, and metabolism of herbicides.

811. Independent Study

Fall, Winter, Spring, Summer. 1 to 6 credits. May reenroll for a maximum of 12 credits. Approval of department.

Individual study on field, laboratory or library research.

812. **Selected Topics**

Fall, Winter, Spring, Summer. 2(2-0) or 3(3-0) May reenroll for a maximum of 9 credits if different topics are taken. Approval of department.

Topics will be selected from physiology of herbicides, micronutrients, advanced soil physics, advanced soil chemistry.

Plant Breeding and Genetics Seminar

Winter, 1(1-0) May reenroll for a maximum of 2 credits. Approval of department. Interdepartmental with the departments of Forestry and Horticulture.

Selected Topics in Plant Breeding 815. and Genetics (MTC)

Fall, Winter, Spring, Summer. 2 to 5 credits. May reenroll for a maximum of 12 credits if different topics are taken. Approval of department. Interdepartmental with the departments of Forestry and Horticulture.

Selected topics in plant breeding including: hostplant resistance, nutrition and quality, comput-erized records and data analysis, classical literature and strategies for improving field, horticulture and forestry crops.

Special Problems in Plant Breeding 816. and Genetics

Fall, Winter, Spring, Summer. 1 to 3 credits. May reenroll for a maximum of 8 credits. Approval of department. Interdepartmental with the departments of Forestry and Horticul-ture. Administered by the Department of Horti-

Students may conduct research in a laboratory, greenhouse or field-plot on a selected subject or study selected published literature under the supervision of a faculty member.

Plant Breeding Methods 817.

(CSS 823.) Fall. 3(3-0) STT 422 or concurrently. Interdepartmental with the departments of Forestry and Horticulture.

Methods, strategies and practices in organization and operation of plant breeding programs. Emphasis on practical application of classical, modern and futuristic approaches to plant breeding.

Descriptions — Crop and Soil Sciences of

Courses

819. Plant Breeding Systems

(CSS 822.) Winter. 3(3-0) CSS 821, STT 422. Interdepartmental with the departments of Forestry and Horticulture. Administered by the Department of Horticulture.

Breeding systems for improvement of self and cross pollinated and of vegetatively propagated crops. The genetic basis for parent selection.

821. Genetic Concepts in Plant Breeding

Fall. 3(3-0) CSS 350 or ZOL 441. Interdepartmental with the departments of Forestry and Horticulture.

Genetic structure of plant populations, gene action, inbreeding, outbreeding, heterosis, linkage and recombination, genetic architecture of traits, genetic distance.

825. Clay Mineralogy

(GLG 825.) Winter. 4(3-4) CSS 840, CSS 850 or approval of department. Interdepartmental with the Department of Geological Sciences.

Structures and properties of clays; their origins, occurrence, and utilization. Methods of studying clays including x-ray diffraction, differential thermal analysis, infrared absorption and other chemical and physical techniques.

831. World Food Crops

Spring of odd-numbered years. 3(3-0)

World food crop production and related systems of agriculture which provide this resource. The impact of modern discoveries and opportunities for change.

833. Soil Fertility and Plant Nutrition

Winter of odd-numbered years. 3(3-0) CSS 430 or approval of department.

Fundamental concepts in soil fertility and mineral nutriton of plants; fate of nutrients applied to soils, nutrient uptake, translocation and utilization by plants; principles of laboratory, greenhouse and field research methods.

836. Evolution of Crop Plants

Fall of even-numbered years. 3(3-0) CSS 821 or approval of department. Interdepartmental with the departments of Forestry and Horticulture. Administered by the Department of Horticulture.

Cultural and biological aspects of evolution under domestication; origin and diversity of cultivated plants.

838. Tissue Culture for Plant Breeding

(HRT 840.) Winter of even-numbered years. 3(2-2) BOT 414, CSS 821. Interdepartmental with the departments of Forestry and Horticulture. Administered by the Department of Horticulture.

The application of plant cell, protoplast and tissue culture methodologies and principles to crop improvement.

840. Soil Physics

Fall. 5(3-6) CSS 430, CEM 162 or approval of department.

Physical properties of soil (texture, structure, consistency, aeration, water, temperature, etc.), their quantitative measurement, and relation to plant growth, and agronomic and engineering practices.

842. Advanced Soil Microbiology

Fall of odd-numbered years. 3(3-0) MPH 426 or approval of department. Interdepartmental with and administered by the Department of Microbiology and Public Health. Biochemistry, biology, and community ecology of microorganisms indigenous to soil. Emphasis on current research problems.

843. Soil Microbiology Laboratory

Fall of odd-numbered years. 2(0-6) MPH 842 concurrently or approval of department. Interdepartmental with and administered by the Department of Microbiology and Public Health.

Fundamental techniques of dealing with microorganisms indigenous to soil. Metabolic activity of microorganisms. Interaction between microorganisms and plants.

850. Soil Chemistry

Winter. 5(3-6) CSS 430; CEM 162, CEM 383; or approval of department.

Chemistry of mineral weathering and soil formation, ion activities, ionic exchange and equilibrium reactions, soil pH, specific elements and their chemical analysis, and availability of nutrients to plants.

865. Organic Chemistry of Soils

Spring of odd-numbered years. 3(3-0) CEM 242.

Relationship of natural and synthetic organic chemicals to chemical and biochemical processes in the soil environment.

870. Origin and Classification of Soils

Winter, 4(3-2) CSS 470, CSS 840, or approval of department.

Genesis, morphology and classification of major soils of the world. Relationships among soils in natural and cultural landscapes. How soil properties affect their use, management and conservation. Land classifications for various purposes.

899. Master's Thesis Research

Fall, Winter, Spring, Summer. Variable credit. Approval of department.

920. Applied Regression Analysis

Spring. 3(3-0) STT 423 or approval of department.

Multiple regression, model selection, the general linear model and confounding in factorial sets of treatments.

940. Theoretical Population Genetics

Winter. 4(4-0) MTH 113, STT 422 or approval of department. Interdepartmental with the departments of Forestry and Horticulture. Administered by the Department of Forestry.

Discussion of mathematical theories in population genetics and experimental works on natural and laboratory populations.

941. Quantitative Genetics in Plant Breeding

Spring of even-numbered years. 4(4-0) STT 423, CSS 817 or approval of department. Interdepartmental with the departments of Forestry and Horticulture.

Calculation and implication of genetic parameters. Linkage. Coancestry and inbreeding. Covariance between relatives. Heritability and selection. Genotype by environment interaction. Emphasis on relationship of quantitative genetics to plant breeding.

944. Physiological Genetics

Winter of odd-numbered years. 3(3-0) BOT 413; CSS 821. Interdepartmental with the departments of Forestry and Horticulture. Administered by the Department of Forestry. Control of variation in higher plants including adaptive physiology, quantitative genetics, growth correlation, biochemical genetics, hybrid physiology, and genecology.

999. Doctoral Dissertation Research

Fall, Winter, Spring, Summer. Variable credit.

EARTH SCIENCE

See Geological Sciences.

ECONOMICS

EC

College of Business and Graduate School of Business Administration

201. Introduction to Microeconomics

Fall, Winter, Spring, Summer. 4(4-0) Open to Freshmen. Not open to students who have credit in EC 251H or EC 210.

Economic institutions, reasoning and analysis. Consumption, production, determination of price and quantity in different markets, income distribution, market structure and normative analysis.

202. Introduction to Macroeconomics

(EC 200.) Fall, Winter, Spring, Summer. 4(4-0) Open to Freshmen. Not open to students who have credit in EC 252H or EC 210.

Determinants of Gross National Product, unemployment, inflation and economic growth. National income accounting, fiscal policy; aggregate demand and supply management.

210. Fundamentals of Economics

Fall, Winter. 4(4-0) MTH 215 or concurrently. Students may not earn credit in EC 210 if they have credit in either EC 201 or EC 202.

Economic principles, institutions and reasoning using mathematics, when useful, as a tool of analysis. Consumption, production, the market system, income distribution and elements of employment and inflation theory.

251H. Households, Firms and Markets

Fall. 5(5-0) Honors College students. Not open to students who have credit in EC 201, EC 324 and EC 325.

Microeconomic theory and its applications to analysis and policy. Substitutes for EC 201, EC 324, and EC 325.

252H. Macroeconomics and Public Policy

Winter. 5(5-0) Honors College students. Not open to students who have credit in EC 202, EC 326 and EC 327.

Theory of national income, unemployment, inflation and economic growth and its application to economic analysis and policy. Substitutes for EC 200, EC 326 and EC 327 combined.

305. Industrial Relations and Trade Unionism

Fall, Winter, Spring, Summer. 4(4-0) EC 201 or EC 202.

Development, aims, structure, and functions of labor and employer organizations. Their relation to economic, political, and legal institutions and their impact on society. Primary issues in collective bargaining.
