PHYSICS AND ASTRONOMY

College of Natural Science

Physics

Introductory physics courses are offered in both the lecture-recitation and the Competency-Based Instructional (CBI) format. In the latter format the students are carefully guided through each course via written materials with ample consulting time available. Both content and pace of course are flexible to suit student's needs and interests, final grades being based on total amount of material for which student's mastery is certified. The introductory courses may be grouped by the application of two criteria: The interests of the students the courses are designed to serve and the method of instruction employed.
