550. Preventive Veterinary Medicine and Public Health
Spring, 4(4-0) Sixth-term veterinary medicine students.
Public health aspects of veterinary medicine. Preventive and regulatory medicine including meat and milk hygiene, water supply and treatment, solid and liquid waste treatment and disposal, and zoonosis.

560. Urinary System
Spring, 3(3-0) Sixth-term Veterinary Medicine students.
Normal and abnormal structure and function, diagnosis and treatment of diseases of the urinary system. Measurement of renal function.

561. Core of Medicine Laboratories I
Spring, 2(0-6) Sixth-term Veterinary Medicine students.
Classification diagnosis and treatment of diseases of the urinary, hematopoietic, nervous, integumentary and visual systems of animals.

562. Hematopoietic System
Spring, 2(2-0) Sixth-term Veterinary Medicine students.
Normal structure and function of the hematopoietic system and pathophysiologic effects of hematopoietic diseases. Clinical manifestations, laboratory evaluation and medical management.

563. Visual System
Spring, 2(2-0) Sixth-term Veterinary Medicine students.
Methods of examination, diagnosis, and treatment of ocular diseases.

564. Survey of Infectious Agents
Winter, 3(3-0) Fifth-term veterinary medicine students.
Host-microorganism relationship in diseases of animals; laboratory diagnosis, treatment, control, and public health significance.

566. Nervous System
Spring, 3(3-0) Sixth-term Veterinary Medicine students.
Normal and abnormal neural structure and function in animals with emphasis on clinical neurology and neuropathology.

568. Integumentary System
Spring, 3(3-0) Sixth-term Veterinary Medicine students.
Diseases of the integumentary system of animals with emphasis on laboratory examinations, interpretations of pathological features, diagnosis and treatment.

570. Principles of Anesthesia
Fall, 2(2-0) Seventh-term Veterinary Medicine students.

571. Core of Medicine Laboratories II
Fall, 1(0-3) Seventh-term Veterinary Medicine students.
Classification, diagnosis and treatment of diseases of the cardiovascular, respiratory and digestive systems of animals. Preanesthetic and anesthetic procedures and skills.

572. Cardiovacular System
Fall, 3(3-0) Seventh-term Veterinary Medicine students.
Pathogenesis, diagnosis, and management of cardiovascular diseases of animals. Anatomical, physiological, pathologic and pharmacologic principles providing basis for medical and surgical treatment. Diagnostic and surgical procedures and radiologic interpretation.

574. Respiratory System
Winter, 4(4-0) Eighth-term Veterinary Medicine students.
Pathogenesis, diagnosis, and management of respiratory diseases of animals; anatomical, physiological and surgical treatments. Diagnostic and surgical procedures and radiologic interpretation.

576. Digestive System I
Fall, 4(4-0) Seventh-term Veterinary Medicine students.
Pathogenesis, diagnosis, and treatment of diseases of the alimentary tract and digestive organs of small animals.

580. Theriogenology
Fall, 6(5-3) Seventh-term Veterinary Medicine students.
Reproductive function and diseases of animals' genital structure and function and endocrine controls. Examination, diagnosis and treatment of the mammary gland and reproductive tract.

582. Musculoskeletal System I
Winter, 3(3-0) Eighth-term Veterinary Medicine students.
Diagnosis and treatment of musculoskeletal diseases of animals with emphasis on pathological changes, radiological techniques, and interpretation of radiographs.

584. Principles of Surgery II
Winter, 4(4-0) Eighth-term Veterinary Medicine students.
Fundamental large animal surgery. Surgical techniques and management of animals before, during and after surgery.

590. Client Communication and Jurisprudence
Spring, 2(2-0) Ninth-term Veterinary Medicine students.
Communication and interviewing skills for effective client relations. Communication and aspects of medical records and their use in medical problem solving. Legal responsibilities of the veterinary medical profession.

591. Core of Medicine Laboratories IV
Spring, 2(0-6) Ninth-term Veterinary Medicine students.
Diseases and treatment of common toxicologic conditions, musculoskeletal disorders and orthopedic conditions in animals.

592. Musculoskeletal System II
Spring, 4(4-0) Eighth-term Veterinary Medicine students.
Diagnosis, prognosis and management of musculoskeletal diseases of large animals. Anatomical relationships of normal to abnormal function. Surgical procedures applicable to the equine and ruminant. Radiographic diagnosis and interpretation of various lameness conditions.

594. Veterinary Toxicology
Spring, 4(4-0) Ninth-term Veterinary Medicine students.
Pharmacological basis and pathological features of diseases of animals caused by common toxic chemicals with emphasis on clinical manifestations, diagnosis, prevention, and treatment.

596. Diseases of Bones and Joints
Spring, 3(3-0) Ninth-term Veterinary Medicine students.
Anatomy and pathophysiology of diseases of bones and joints. Diagnosis, prognosis and treatment of abnormalities involving bones and joints.

602. Veterinary Practice Management
Spring, 2(2-0) Ninth-term Veterinary Medicine students, approval of college.
Establishment of a veterinary practice.

610. Veterinary External Examination
Fall, Winter, Spring, Summer. 6 to 12 credits. May enroll for a maximum of 12 credits. Veterinary Medicine students; completion of preclinical courses and approval of college. Students may not receive credit in both VM 610 and LCS 674.
Clinical or research experience in an off-campus setting.

690. Special Problems in Veterinary Medicine
Fall, Winter, Spring, Summer. 1 to 6 credits. May enroll for a maximum of 24 credits. Professional veterinary medicine students and/or approval of department.
Individual study under the direction of a faculty member on an experimental, theoretical or applied problem.

WOMEN'S STUDIES PROGRAM

College of Arts and Letters
College of Social Science

201. Introduction to Women's Studies: Women's Consciousness
(1DC 233.) Fall, Winter. Spring, 4(4-0) Interdepartmental with the colleges of Arts and Letters and Social Science.
Development of women's consciousness in various historical, cross-cultural and scientific contexts. Contexts basic to feminist thought are clarified. Critique of sexism in traditional scholarship.

300. Special Topics in Women's Studies
Spring of even-numbered years, 3(3-0) or 4(4-0) May enroll for a maximum of 6 credits if different topic is taken. Sophomores, W S 201 or approval of instructor, interdepartmental with the colleges of Arts and Letters and Social Science.
Special topic emphasizing women and/or gender.
305. Women’s Studies Internship
Fall, Winter, Spring, Summer. 2 to 4 credits. May reenroll for a maximum of 4 credits. Six credits of women’s studies courses, approval of Women’s Studies Program. Interdepartmental with the colleges of Arts and Letters and Social Science. Integration of feminist knowledge through work experience in legislative, community or educational settings.

401. Women’s Studies Senior Level Seminar
Spring. 4(4-0) Juniors, W S 201 or six credits of ATL 181, ATL 182, ATL 183. Interdepartmental with the colleges of Arts and Letters and Social Science. Synthesis of course work in women’s studies. Emphasis on individualized research projects.

402. Feminist Theory
Fall. 4(4-0) Nine credits in women’s studies courses, approval of Instructor. Interdepartmental with the colleges of Arts and Letters and Social Science. Integrative theoretical approaches to women’s studies; ways of conceptualizing sex and gender; varieties of explanation of sexual inequality; feminist critiques of traditional knowledge.

409. Independent Study in Women’s Studies
Fall, Winter, Spring, Summer. 1 to 4 credits. May reenroll for a maximum of 8 credits. Juniors, approval of Women’s Studies Program. Interdepartmental with the colleges of Arts and Letters and Social Science. Individual reading and research on women and gender.

Winter. 3(3-0) Juniors or approval of department. Interdepartmental with and administered by the Department of Religious Studies. Writings and thought of contemporary Jewish and Christian feminist theologians; views on scripture, God-language, patriarchy, ministry, spirituality, ethics. Scriptural reinterpretations; overview of women’s role and place in world religions.

ZOOLOGY

College of Human Medicine
College of Natural Science

203. Resource Ecology
(1DC 206) Fall, Winter, Spring, Summer. 3(3-0) Interdepartmental with the departments of Fisheries and Wildlife, Forestry, Geography, and Resource Development. Administered by the Department of Fisheries and Wildlife. Basic concepts of ecology which are the unifying basis for resource management, conservation policy and the analysis of environmental quality. Extensive use of guest lecturers.

301. Nature and Homo Sapiens
Spring. 4(4-0) Three terms of natural science; not open to zoology majors. A case study approach which explores the interaction of technical, social, economic and legal influences on the management of contemporary environmental issues in Michigan.

302. Vertebrate Life of the Past
Fall. 3(3-0) One course in physical or biological science or Juniors. Interdepartmental with and administered by Geology. Fossil vertebrates from fish to humans.

304. Biology, Behavior, and Humans
Winter. 3(3-0) Juniors; not open to zoology majors. Examines philosophical and biological issues which make the study of animal behavior relevant to humans. Emphasizes history of animal behavior, current theories, and experiments relating biological and environmental determinants of adaptive and non-adaptive behavior patterns.

306. Invertebrate Biology
Fall. 3-4 S 212. Systematics, morphology, and natural history of invertebrate animals. Laboratory includes identification of live and preserved animals and recognition of morphological characteristics of selected groups.

307. Vertebrate Biology
Fall, Winter. Green at W. K. Kellogg Biological Station Summer term. Fall. 4(3-3) Summer. 4 credits. B S 212. Systematics, morphology and natural history of vertebrate animals. Laboratory includes identification of live and preserved animals and recognition of morphological characteristics of selected groups.

313. Animal Behavior
Spring, Summer. Given at W. K. Kellogg Biological Station Summer of odd-numbered years. Spring, Summer. 4(4-0) Summer of odd-numbered years: 4 credits. B S 211. Description of the known behavior of the various vertebrate and invertebrate phyla with emphasis upon adaptive significance. Thus, special attention will be given to mating, defensive, and nutritive behavior. The genetics and ontogeny of behavioral patterns will be presented where known. Behavior will be related to the ecology of various animal populations.

317. Principles of Development
Fall, Spring, Summer. 3(3-0) B S 211. Development of animals, especially vertebrates. Principles are illustrated by modern experimental studies of developmental problems.

318. Principles of Development Laboratory
Fall, Spring. 2(0-0) ZOL 317 or concurrently; B S 212. Principles of development illustrated by analysis of the ontogeny of selected organisms.

337. The Fossil Record of Organic Evolution
Spring. 3(3-0) One course in a natural science; Juniors. Interdepartmental with and administered by Geology. The direct evidence for evolution in the fossil record. Evolution of life from prebiological systems to humans. Impact of fossil discoveries on human thought.

341. Human Heredity
Fall, Winter. 4(4-0) Sophomores. Not open to zoology majors. Students may not receive credit in more than one of the following: ZOL 341, ZOL 441. Inheritance of human physiological, and psychological traits. Forces that influence human evolution. Applications of heredity in fields of education, sociology, anthropology, psychology, dentistry, and medicine.

389. Animal Ecology

391. Zoological Problems
Fall, Winter, Spring, Summer. 1 to 8 credits. May reenroll for a maximum of 12 credits. Juniors; B S 212; 6 credits in zoology; approval of department. Advanced work in morphology, field zoology, genetics, mammalogy, ornithology, or ichthyology.

400H. Honors Work
Fall, Winter, Spring. 1 to 5 credits. May reenroll for a maximum of 15 credits. Juniors; approval of department.

401. Comparative Physiology I
Fall. 4(3-4) PSL 240 or B S 212; CEM 121 or CEM 141. Interdepartmental with and administered by the Department of Physiology. A comparison of osmoregulation, digestion, respiration, and other physiological processes in a wide range of organisms.

402. Comparative Physiology II
Winter. 4(4-0) PSL 401 or approval of department. Interdepartmental with the Department of Physiology. A comparison of sensory, motor, endocrine and other integrative mechanisms in animals.

414. Biological Mechanisms of Animal Behavior
Winter. 3(3-0) or 3(4-0) ZOL 313 recommended.

415. Ecological Aspects of Animal Behavior
Fall. 4(4-0) ZOL 313.

416. General Parasitology
Fall. Summer of odd-numbered years. Given at W. K. Kellogg Biological Station Summer of odd-numbered years. Fall. 3(3-0) Summer of odd-numbered years: 3 credits. B S 210, B S 211, B S 212 or LBS 141. Interdepartmental with and administered by the Department of Microbiology and Public Health. Life history, host-parasite relationships (including physiology, immunology, immunopathology and pathology) and epidemiology of selected groups and species of protozoan, trematode, cestode and nematode parasites.

417. Advanced Developmental Biology
Fall. 3(3-0) ZOL 317. Molecular and cellular biology of development.
