### Descriptions — Biochemistry of Courses

#### 502. Medical Biochemistry
- **Winter. 3(3-0) BCH 501 or approval of department.**
- A continuation of BCH 501.

#### 511. Medical Biochemistry I
- **Winter. 4(4-0) One year of organic chemistry. Open only to students in the professional programs in the College of Human Medicine and the College of Osteopathic Medicine.**
- Basic biochemical principles and terminology with emphasis on metabolism and function of biomolecules of importance in medical biology.

#### 512. Medical Biochemistry II
- **Spring. 4(4-0) BCH 511.**
- Basic biochemical principles and processes pertinent to specific areas of human pathophysiology.

#### 811. Nucleic Acid Structure and Function
- **Fall. 4(4-0) One year of organic chemistry, one year of physical chemistry, and one year of basic biochemistry or BCH 453; or approval of department. A course in fundamental genetics is strongly recommended.**
- Limited to graduate students in biochemistry or other students needing a similar professional preparation.
- Organization and expression of prokaryotic and eukaryotic genes, including gene structure, regulation of gene expression, replication, and recombination.
- Molecular cloning, DNA sequencing, and gene transfer techniques.

#### 821. Biochemical Mechanisms and Structure
- **Winter. 4(4-0) One year of organic chemistry; introductory biochemistry; and one year of physical chemistry or BCH 453; or approval of department.**
- Limited to graduate students in biochemistry or other students needing a similar professional preparation.
- Protein structure and function relationships, macromolecule-ligand interactions, enzyme kinetics and principles of methods used in enzymology.

#### 829. Methods of Macromolecular Analysis and Synthesis
- **Fall. 3(3-0) BCH 452.**
- Technical approaches to isolation, purification, and characterization of macromolecules.
- Emphasis will be placed on the uses of the computer in structure-function analysis of macromolecules.

#### 831. Physiological Biochemistry I
- **Winter. 3(3-0) BCH 401.**
- Physiological biochemistry, with emphasis on metabolic interpretation of normal and altered physiological states of the human organism and appropriate animal models.

#### 832. Physiological Biochemistry II
- **Spring. 3(3-0) BCH 832.**
- Continuation of BCH 831.

#### 855. Special Problems
- **Fall, Winter, Spring, Summer. 1 to 6 credits. May reenroll for a maximum of 12 credits. Approval of department.**
- Consideration of current problems.

#### 856. Plant Genetics and Molecular Biology
- **Spring. 3(3-0) Approval of department and a course in introductory genetics. Interdepartmental with the Departments of Botany and Plant Pathology, administered by the Department of Botany and Plant Pathology.**
- Recent advances in genetics and molecular biology of higher plants.

#### 960. Selected Topics in Biochemistry
- **Fall, Winter, Spring. 1 to 6 credits. May reenroll for a maximum of 12 credits. Approval of department.**
- Topics will be selected from the areas of biochemical genetics, biochemistry of development, biochemical evolution, complex proteins, lipid metabolism, immunology, hormones, control mechanisms and structure of biological macromolecules.

#### BIOLOGICAL SCIENCE B S

### College of Natural Science

The content of courses 400 and 405, as well as the research and problems courses 499, 500 and 899, may vary from term to term. Brochures giving detailed information about individual courses are available in the Office of the Assistant Dean for Lifelong Education in the College of Natural Science. These courses are primarily designed for in-service teachers and interested adults and are offered in off-campus locations.

#### 202. Introductory Biology for Non-Science Majors
- **Fall, Winter, Spring, Summer. 4(3-3) 12 credits in general education natural science courses.**
- Concepts, procedures, and perspectives appropriate to developing a basic literacy in biology with emphasis on fundamental biological principles and their relationship to world society. Appropriate preparation for pre-service elementary teachers.

#### 210. General Biology
- **Fall, Winter, Summer. 3(2-2) Not open to students with credit in LBS 141. Interdepartmental with the departments of Biochemistry, Microbiology and Public Health, and Physiology.**
- Principles of biological organization: scientific method, biochemistry, cell biology, and evolution.

#### 211. General Biology
- **Fall, Winter, Summer. 4(4-2) Not open to students with credit in LBS 342. Interdepartmental with the departments of Botany and Plant Pathology, and Zoology.**
- Principles of biological regulation and integration: genetics, development, and selected physiological topics.

#### 221. General Biology
- **Winter, Spring, Summer. 4(4-2) Not open to students with credit in LBS 140. Interdepartmental with the departments of Botany and Plant Pathology, and Zoology.**
- Principles of biological diversity: taxonomy and systematics, comparative physiology, and ecology.

#### 400. Biological Science for Teachers
- **Fall, Winter, Spring. 1 to 6 credits. May reenroll for a maximum of 12 credits. Teacher certification with science major or minor.**
- A course for in-service teachers, topics will be selected from actual classroom problems of the participants. Stress will be placed on field, laboratory and inquiry teaching.

#### 405. Topics in Biological Science
- **Fall, Winter, Spring. 1 to 4 credits. May reenroll for a maximum of 8 credits if different topic is taken. Approval of department.**
- Presentation of single topics from the biological sciences by senior faculty and guest lecturers. Topics are selected to facilitate development of strong biological science programs in schools.
418. Field Biology for Teachers
Fall, Winter, Spring, Summer. 4 credits. Biology course or approval of department. Field investigation and interpretation of prairie, dune, forest and wetland communities. An ecosystem approach to ecological concepts. Natural history and identification of key species. Field trips required.

460. Ornithology for Teachers
Summer. 3 credits. A course in biology, or approval of department. Not open to Zoology majors. Given at W. K. Kellogg Biological Station. Interdepartmental with and administered by the Department of Zoology. Distribution, breeding cycles, migration, food and feeding habits, voice and other important areas of avian biology. Emphasis on field identification and natural history.

499. Research
Fall, Winter, Spring. 2 to 4 credits. May reenroll for a maximum of 12 credits. Approval of director of biological science program and student's advisor. Undergraduates are invited on an individual basis to research laboratories of faculty in biological departments of the college. After three terms of research, a dissertation in thesis form is produced and defended.

800. Problems in Biological Science
Fall, Winter, Spring. Summer. 1 to 6 credits. May reenroll for a maximum of 18 credits. B.S. degree in biological science.

805. Outdoor Environmental Studies
Fall, Winter, Spring. Summer. 1 to 4 credits. May reenroll for a maximum of 9 credits if different topics are taken. R S 418 or ZOL 460 or approval of department. Emphasis on environmental understanding. Development of educational materials through team research and testing. Trials of materials with elementary, middle, secondary school or college students.

899. Master's Thesis Research
Fall, Winter, Spring. Variable credit. Approval of department.

BIOMECHANICS BIM

College of Osteopathic Medicine

500. Basic Concepts in Biomechanics
Winter. 2(3-0) Admission to a college of medicine or approval of department. Interdepartmental with the College of Osteopathic Medicine. Basic concepts of biomechanics and their relationships to functional anatomy and osteopathic manipulative therapy.

590. Special Problems in Biomechanics
Fall, Winter, Spring. Summer. 1 to 8 credits. May reenroll for a maximum of 32 credits. Approval of department. Each student will work under direction of a faculty member on an experimental, theoretical or applied problem.

601. Osteopathic Manipulative Medicine Clerkship
Fall, Winter, Spring, Summer. 6 credits. May reenroll for a maximum of 12 credits. Grade P in all courses offered in terms 1 through 8. Advanced training in the diagnosis of musculoskeletal dysfunctions and application of osteopathic manipulative techniques in patient care.

620. Directed Studies
Fall, Winter, Spring, Summer. 1 to 6 credits. May reenroll for a maximum of 24 credits. Approval of department. Individual or group work on special problems related to biomechanics, neuromusculoskeletal system primarily.

800. Special Topics
Fall, Winter, Spring. Summer. 1 to 4 credits. May reenroll for a maximum of 9 credits. Approval of department. Independent study in topics of biomechanics.

805. Biomechanical Analysis
Fall. 3(0)-Approval of department. Methods for analysis of biokinematic and biokinetic data.

810. Biokinetimatics
Spring. 3(3-0) BIM 805 or approval of department. Size, position and mobility of the human body as a mechanical linkage system. Detailed study of body joints and kinematic models.

811. Biokinetimatics
Winter. 2(2-0) BIM 805 or approval of department. Application of Newtonian mechanics to problems of force transmission and related motions in the muscular-skeletal system.

830. Biokinetics
Fall. 3(3-0) BIM 805 or approval of department. Application of biokinetimatics to problems of force transmission and related motions in the muscular-skeletal system.

850. Research Seminar
Fall, Winter, Spring. 1(1-0) May reenroll for a maximum of 3 credits. Approval of department. Discussion of current research topics in biomechanics with strong clinical application.

870. Research Methods in Biomechanics I
Fall, Winter, Spring. 2(2-0) BIM 812 or concurrently or approval of department. Measurement of responses of biological tissues to internal and external demands. Techniques include visual, palpation, electromyographic and mechanical assessment methods.

871. Research Methods in Biomechanics II
Fall, Winter, Spring. 2(2-3) BIM 810 or concurrently or approval of department. Measurement of body geometry and mass distribution. Measurements include anthropometry, goniometry, volume and inertial properties of the human body.

873. Research Methods in Biomechanics III
Spring. 2(3-0) BIM 811 or concurrently or approval of department. Measurement of dynamics of human motion. Measurements include force plate and photoelectric kinematic assessment methods.

890. Independent Study
Fall, Winter, Spring, Summer. 1 to 8 credits. May reenroll for a maximum of 32 credits. Approval of department. Individual or group work related to biomechanics and/or neuromusculoskeletal system.

Biomedical Engineering — Descriptions of Courses

899. Master's Thesis Research
Fall, Winter, Spring, Summer. Variable credit. Approval of department. Conduct research for master's thesis.

BIOMEDICAL ENGINEERING BME

College of Engineering

410. Electronic Instrumentation in Biology and Medicine
Fall. 4(4-0) MTH 112, PHY 238 or approval of instructor. Electronic components and circuits. Physiological measurements. Transduction of physiological events to electrical signals. Detection of physiological events by electrical impedance measurements. Ultrasonic techniques in biomedical systems. Biomedical applications of lasers.

411. Electric Theory of Nerves

414. Clinical Instrumentation

424. Materials in Biomedical Engineering
Winter. 3(3-0) PSL 240 or PSL 431 or approval of department. Basics of materials science. Biocompatibility of metals, polymers and ceramics. Internal and external prosthetic materials.

431. Biological Transport Mechanisms
Spring. 3(3-0) MTH 215. Mechanisms which govern transport or momentum, heat and mass. Application to mathematical description of transport processes in biological systems and to solution of biomedical problems.

481. Tissue Biomechanics
Fall. 3(3-0) ANT 316 or approval of department. Fundamentals of continuum mechanics in relation to morphological classification of tissue. Mechanical properties of connective and muscle tissue.

499. Independent Study
Fall, Winter, Spring, Summer. 1 to 4 credits. May reenroll for a maximum of 9 credits. Approval of instructor. Individual reading and research under the supervision of a member of the Biomedical Engineering Committee.
