980. Documentary and Bibliographic Research Methods
(SOC 831.) Spring. 4(4-0) Approval of department.
Systematic and detailed exploration of source materials relevant to documentary and bibliographic social science research. Emphasis on research strategy and techniques.

984. Techniques of Population Analysis
(SOC 852.) Spring. 4(4-0) SOC 420; STT 422 or SOC 882 or approval of department.
Techniques for the analysis of population size and composition, mortality, fertility, migration, population estimates and forecasts, population and labor force distribution, and selected techniques of ecological analysis.

985. Field Research Methods
(SOC 955.) Fall. 4 credits. Approval of department.
An overview of the design and execution of social research.

986. Survey Research Principles
(SOC 854.) Winter. 4(4-0) SOC 882, STT 422.
The design and analysis of theoretically oriented survey research. Sampling, questionnaire construction, interviewing, and data processing.

987. Survey Research Practices
Spring. 4(1-6) SOC 882, SOC 986.
Practicum in use of survey skills in study design, sampling, data collection, processing, and analysis.

988. Comparative Research Methods
(SOC 983.) Spring of odd-numbered years. 4(4-0) Thirty graduate credits or approval of department.
Sampling problems, data collection strategies, problems of translation and concept equivalence. Management, analysis and interpretation of cross-cultural data.

999. Doctoral Dissertation Research
Fall, Winter, Spring, Summer. Variable credit. Approval of department.

STATISTICS AND PROBABILITY

College of Natural Science
Introductory courses are further classified as follows:

315—for undergraduate students of Business Administration.

201—survey course.

421, 422, 423—minimal sequence for students planning to use statistical methods in their research.

441, 442, 443—minimal sequence in theory of statistics. Qualified students should take the 861, 862, 863 sequence instead.

861, 862, 883—sequence for students preparing to do advanced work in statistics.

201. Statistical Methods
Fall, Winter, Spring, Summer. 4(4-0) MTH 108 or MTH 111. Primarily for students in psychology, sociology, anthropology, political science, economics, agriculture, and forestry. Credit may not be earned in more than one of the following: STT 201, STT 315, STT 421.

315. Introduction to Probability and Statistics for Business
Fall, Winter, Spring. Summer. 4(5-0) MTH 101. Credit may not be earned in more than one of the following: STT 201, STT 315, STT 421.
Descriptive statistics, elementary probability, random variables, probability models, sampling distributions, the Central Limit Theorem, confidence intervals and one-sample tests based on normal, t and chi-square with applications to business problems.

317. Quantitative Business Research Methods
Fall, Winter, Spring. 4(4-0) STT 215. Interdepartmental with and administered by the Department of Marketing and Transportation Administration.
Application of statistical techniques to business decision making. Topics covered include applications of linear regression and correlation, analysis of variance, selected nonparametric tests, time series, and index numbers.

351. Probability and Statistics for Engineers
Fall, Winter, Spring. 4(4-0) MTH 215. Discrete and continuous probability models, conditional probability, independence, random variables. Estimation and testing, including one- and two-sample tests and confidence intervals. Applications to engineering problems.

421. Statistics I
Fall, Winter, Spring. Summer. 4(4-0) MTH 108. Credit may not be earned in more than one of the following: STT 201, STT 315, STT 421. This course and STT 422, STT 423 form a one year sequence in statistics for those without a calculus background. STT 422 provides an introduction to a few of the main ideas of probability and statistics. The course sequences STT 441-2 and STT 861-2 form one year sequences in statistics for those with a calculus background. Those expecting to use statistics in their graduate research should complete one of the full year sequences.
Descriptive statistics, elementary probability, combinatorics. Binomial distribution. Random variables, expectations and variances. Central Limit Theorem, point estimation. One sample confidence intervals, tests based on the binomial, normal, t, chi-square distributions.

422. Statistics II
Fall, Winter, Spring. Summer. 3(3-0) STT 421.
Two sample confidence intervals and tests based on the normal and t-distributions. Nonparametric models, contingency table analysis, simple linear regression, one-way analysis of variance.

423. Statistics III
Fall, Winter, Spring. 3(3-0) STT 422.
Multiple regression. Analysis of variance for various experimental designs such as randomized block, factorial, nested and Latin square designs.

441. Probability and Statistics I: Probability
Fall, Winter, Spring. Summer. 4(4-0) MTH 215.
Mathematical probability as a basis for the theory of statistics. Discrete and continuous probability models, conditional probability and independence, random variables, central limit theorem, sampling distributions.

442. Probability and Statistics II: Inference
Winter, Spring. 4(4-0) STT 441; MTH 334 or concurrently.
Estimation, confidence intervals, tests of hypotheses, linear models.

443. Probability and Statistics III: Inference
Spring. 4(4-0) STT 442.
Multiple linear regression, analysis of variance, goodness of fit tests, certain non-parametric tests.

461. Computations in Statistics and Probability
Spring. 4(4-0) STT 441, MTH 334, one course in computer science or approval of department.
Computer algorithms for evaluation, simulation and visualization: sampling from prescribed distributions; robustness and error analysis of procedures used by statistical packages; graphs for data display; computation of probabilities and percentiles.

471. Statistics for Quality and Productivity
Spring. 4(4-0) STT 351 or STT 422 or STT 442.
Scientific context of quality: Box, Deming, Taguchi; graphical techniques; control charts; design of experiments: factorial and fractional; confounding and aliasing; engineering parameter design through experimentation.

490. Statistical Problems
Fall, Winter. Spring. 1 to 8 credits. Approval of department.
Individualized study adapted to the preparation and interests of the student.

825. Sample Surveys
Fall. 3(3-0) STT 423 or STT 442 or STT 862.
Application of statistical sampling theory to survey designs involving simple random, stratified, and systematic samples; sub-sampling, double sampling; ratio and regression estimates; other topics.

826. Nonparametric Statistics
Spring. 4(4-0) STT 442 or STT 862.
Current tests of hypotheses which may be made without specification of the underlying distribution. Rank tests and tests based on permutation of observations. Tolerance and confidence sets. Large sample distributions. Applications to research in the social and natural sciences.

841. Linear Statistical Models
Fall. 4(4-0) STT 443 or STT 863.
Use of linear statistical models. Curve fitting, single and multiple regression analysis, multiple and partial correlation coefficients, the analysis of variance, simultaneous confidence intervals, more complex experimental designs.
843. Multivariate Analysis
Winter of even-numbered years. 3(3-0) STT 443 or STT 483.
The multivariate normal distribution, tests of hypotheses on means, discriminant analysis, multivariate analysis of variance, principal components, factor analysis, analysis of multivariate categorical data.

844. Time Series Analysis
Winter of odd-numbered years. 3(3-0) STT 443 or STT 483.
The autocorrelation function and its spectrum, moving average and autoregressive processes, model identification and estimation.

852. Methods in Operations Research I
Winter. 3(3-0) STT 441 or STT 861.
Optimization techniques and probability models with a wide variety of applications: linear programming; game theory; queuing theory. Optimization techniques and probability work analysis, including PERT; dynamic programming, including special problems; nonlinear programming; some special continuous stochastic processes. Bayesian approach to estimation problems. Recent developments in econometrics.

861. Theory of Probability and Statistics I
Fall. 4(4-0) MTH 424 or MTH 427 or concurrently.
Discrete probability models. Random variable expectation, combinatorial analysis, conditional probability and independence, generating functions, some special discrete distributions, continuous probability models.

862. Theory of Probability and Statistics II
Winter. 4(4-0) STT 861; MTH 425 or MTH 428 or concurrently.
Continuous probability models, density transformations, some special continuous distributions, limit laws. Introduction to statistical inference, estimation of parameters, hypothesis testing.

863. Theory of Probability and Statistics III
Spring. 4(4-0) STT 862; MTH 334, MTH 426 or MTH 429 or concurrently.
Continuation of hypotheses testing, sufficiency, Rao-Blackwellization, some nonparametric methods, linear models.

864. Stochastic Models in Biology
Fall of even-numbered years. 3(3-0) STT 441 or STT 861.
Stochastic processes. Selected topics from growth processes, epidemic theory, prey-predator models, mathematical genetics.

870. Theory of Measure and Probability
Fall. 3(3-0) MTH 821 or concurrently.

872. Theory of Statistics I
Winter. 3(3-0) STT 870; MTH 822 or concurrently.

873. Theory of Statistics II
Spring. 3(3-0) STT 872.
Basic concepts and properties of estimation and hypothesis testing. Linear models.

876. Statistical Inference in Economics I
Fall. 3(3-0) EC 424A or EC 420A; STT 443 or STT 861, or approval of department.
Interdepartmental with the departments of Agricultural Economics and Economics. Administered by the Department of Economics. Review and extension of single-equation regression models. Properties of least squares estimators under alternative specifications. Problems of analyzing nonexperimental data. Errors in variables, autoregressive and heteroscedastic models.

877. Statistical Inference in Economics II
Winter. 3(3-0) EC 876 or approval of department. Interdepartmental with the departments of Agricultural Economics and Economics. Administered by the Department of Economics. Specification interpretation and estimation of simultaneous equation models. Nonlinear models. Bayesian approach to estimation problems. Recent developments in econometrics.

878. Statistical Inference in Economics III
Spring. 3(3-0) EC 877 or approval of department. Interdepartmental with the departments of Agricultural Economics and Economics. Administered by the Department of Economics. Validation and application of dynamic econometric models. Bayesian approach to estimation problems. Recent developments in econometric methods and in applied econometric research.

882. Probability I
Winter. 3(3-0) STT 870; MTH 822 or concurrently.
Laws of large numbers, random series, central limit problem, stable laws.

883. Probability II
Spring. 3(3-0) STT 882.

886. Stochastic Processes and Applications I
Winter. 3(3-0) STT 441 or STT 861.
Discrete and continuous Markov processes including the ergodic theorem. Other topics selected from: stationary processes, Brownian motion, stochastic differential equations, counting and Poisson processes, queuing processes, branching processes.

887. Stochastic Processes and Applications II
Spring. 3(3-0) STT 886 or approval of department. Continuation of STT 886.

590. Statistical Problems
Fall, Winter, Spring, Summer. 1 to 4 credits. May reenroll for a maximum of 36 credits. Approval of department.

899. Master's Thesis Research
Fall, Winter, Spring, Summer. Variable credit. Approval of department.

929. Foundations of Decision Theory
Fall of even-numbered years. 3(3-0) STT 873, STT 883.

951. Advanced Theory of Nonparametric Statistics
Spring of even-numbered years. 3(3-0) STT 873, STT 883.
Possible topics include small and large sample properties of distribution free tests; recent estimation of location, scale and regression parameters; nonparametric ANOVA.

952. Asymptotic Theory
Winter of even-numbered years. 3(3-0) STT 872, STT 883.
Possible topics include large sample behavior of likelihood functions: contiguity; Bahadur and Pitman efficiency of statistical procedures.

954. Sequential Analysis
Spring of odd-numbered years. 3(3-0) STT 873, STT 883.
Possible topics include sequential estimation, testing and design; optimal stopping.

955. Estimation and Testing
Winter of odd-numbered years. 3(3-0) STT 875, STT 883.
Possible topics include completeness and admissibility results for the family of Neyman-Pearson tests, minimum variance estimates, admissibility of estimators in exponential families and estimation in the normal multivariate case.

961. Convergence of Measures and Random Variables
Fall of odd-numbered years. 3(3-0) STT 883.

962. Martingales
Winter of even-numbered years. 3(3-0) STT 883.
Convergence, sampling, decomposition and stopping of sub- and super-martingales. Relationship with differentiation of measures. Applications to sequential analysis and boundary crossing probabilities.

963. Stochastic Analysis
Spring of even-numbered years. 3(3-0) STT 883.

964. Renewal Theory and Random Walk
Fall of even-numbered years. 3(3-0) STT 885.
Descriptions — Statistics and Probability of Courses

965. Stationary and Second Order Processes
Winter of odd-numbered years. 3(3-0)
STT 883.
Stationary, second order, and Gaussian processes. Sample path properties. Linear and nonlinear prediction and estimation. Applications.

966. Markov Processes
Spring of odd-numbered years. 3(3-0)
STT 883.

990. Problems in Statistics and Probability
Fall, Winter, Spring, Summer. 1 to 4 credits. May reenroll for a maximum of 10 credits. STT 873 or STT 883.
Seminar or individual study on an advanced topic in statistics.

995. Topics in Statistics and Probability
Fall, Winter, Spring, Summer. 1 to 4 credits. May reenroll for a maximum of 36 credits.
Nonparametric statistics, multivariate statistical analysis, statistical time series analysis, Bayesian statistics, reliability theory, stochastic approximation, design of experiments, sets of decision problems, stochastic processes, sequential analysis, other topics.

999. Doctoral Dissertation Research
Fall, Winter, Spring, Summer. Variable credit. Approval of department.

STUDIO ART
See Art.

SURGERY

College of Human Medicine

608. Basic Surgery Clerkship
Fall, Winter, Spring, Summer. 8 to 15 credits. May reenroll for a maximum of 30 credits. FMP 602.
An introduction to the surgical patient, stressing surgical diagnosis, pre-operative evaluation and post-operative care. Objectives are designed to help the student attain acceptable levels of surgical competence for physicians.

609. Otolaryngology Clerkship
Fall, Winter, Spring, Summer. 1 to 17 credits. May reenroll for a maximum of 34 credits. SUR 608.
Common otolaryngologic disorders, emergencies, including diagnosis and treatment, and judgments concerning proper management by primary physicians.

610. Plastic Clerkship
Fall, Winter, Spring, Summer. 1 to 17 credits. May reenroll for a maximum of 34 credits. SUR 608.
Principles of wound healing and tissue repair. Indications and applications of plastic procedures.

611. Urology Clerkship
Fall, Winter, Spring, Summer. 1 to 17 credits. May reenroll for a maximum of 34 credits. SUR 608.
Demonstration of clinical manifestations of genito-ureinary disease, investigative methods and techniques of diagnosis and management, familiarity with urologic emergencies and performance of basic urologic skills.

613. Orthopedic Clerkship
Fall, Winter, Spring, Summer. 1 to 17 credits. May reenroll for a maximum of 34 credits. SUR 608.
Diagnostic and management information and skills, including emergencies, in common orthopedic problems.

614. Neurosurgery Clerkship
Fall, Winter, Spring, Summer. 1 to 17 credits. May reenroll for a maximum of 34 credits. SUR 608.
A hospital-based experience to provide the student with familiarity with the field and understanding of the contribution of neurosurgery in medicine generally.

615. Ophthalmology Clerkship
Fall, Winter, Spring, Summer. 1 to 17 credits. May reenroll for a maximum of 34 credits. SUR 608.
Development of skills and knowledge in ophthalmoscopy, neuro-ophthalmology, visual function, and management of problems such as glaucoma, the red eye, and trauma.

616. Thoracic Surgery Clerkship
Fall, Winter, Spring, Summer. 1 to 17 credits. May reenroll for a maximum of 34 credits. SUR 608.
Problem-solving in thoracic medicine and surgery, also stressing pulmonary physiology, use of diagnostic tools and tests, and indications for surgical procedures.

618. Anesthesiology Clerkship
Fall, Winter, Spring, Summer. 4 to 16 credits. May reenroll for a maximum of 16 credits. SUR 608.
Introduces common anesthetic agents and provides opportunities for performing anesthetic procedures under faculty supervision.

619. General Surgery Elective Clerkship
Fall, Winter, Spring, Summer. 4 to 16 credits. May reenroll for a maximum of 16 credits. SUR 608.
Experiences in clinical general surgery.

620. Advanced Surgery Clerkship
Fall, Winter, Spring, Summer. 6 to 8 credits. May reenroll for a maximum of 16 credits. SUR 608; MED 608.
Focus on advanced clinical and surgical skills. Students have more responsibility for patient care and direct learning to specific topics in general or subspecialty surgery. Clerkship options vary by community.

621. Nutritional Care of Surgical Patients
Fall, Winter, Spring, Summer. 4 to 12 credits. SUR 808, MED 608, approval of instructor.
Clinical experience on the Nutrition Team in dealing with surgical and medical patients requiring therapeutic nutrition as a result of metabolic derangement and nutritional deficiencies. Major emphasis on nutritional assessment and formulation of plans of management through intravenous support.

501. Shock and Metabolism
Fall, Winter, Spring, Summer. 4(4-4) Master's student in surgery or approval of department.
Results of prolonged reduction in tissue perfusion on tissue metabolism, structure and function at the systemic, cellular and subcellular levels and pharmacologic interventions useful in volume resuscitation.

502. Clinical Surgical Anatomy
Spring, 4(2-4) Master's student in surgery or approval of department, interdepartmental with the Department of Anatomy.
Review of surgical anatomy; the opportunity to obtain detailed anatomical information through lecture and dissection sessions; and the clinical interpretation of anatomy and surgical approaches.

503. Enteral and Parenteral Nutrition
Winter. 4(2-4) Master's student in surgery, approval of department.
The identification of individuals requiring nutritional support, nutritional requirements in diseases, delivery of total parenteral and enteral nutrition and special problems in nutrition (i.e., anorexia nervosa and obesity).

890. Seminars in Research
Fall, Winter, Spring, Summer. 1 credit. May reenroll for a maximum of 3 credits.
Master's student in surgery, approval of department.
Preparation and presentation of research data, philosophy and methods of research, thesis and other research reports, literature review, illustration of research data, practical assignments.

899. Master's Thesis Research
Fall, Winter, Spring, Summer. 1 to 15 credits. May reenroll for a maximum of 15 credits. SUR 801, SUR 802, SUR 803, approval of department.

SYSTEMS SCIENCE
See Electrical Engineering.

TEACHER EDUCATION

College of Education

101. Exploring Teaching
Fall, Winter, Spring. 3(3-3)
Examination of the manifest and hidden curriculum in classrooms; the multiple purposes of schooling; individual reasons for choosing teaching; participant/observation in a local classroom required.

200. Individual and the School
Fall, Winter, Spring, Summer. 5(5-0)
Not open to students with credit in T E 200A, T E 200B, T E 200C or T E 200D.
Major psychological factors in the school learning-teaching situation; concepts in human development related to problems in the school situation; teacher's role in motivation, conceptual learning, problem solving, and the development of emotional behavior, attitudes and values, learning of skills, retention and transfer, and measurement of student abilities and achievement.
