391. Quantum Chemistry and Statistical Thermodynamics I
Fall, Spring. 3(3-0)
R: Open only to graduate students in College of Natural Science or College of Engineering.
Principles and applications of quantum chemistry. Partition functions, spectroscopic measurements, and thermodynamic applications.

392. Quantum Chemistry and Statistical Thermodynamics II
Spring. 3(3-0)
P: CEM 391.
Analytical and numerical methods for solving quantum chemical problems. Statistical mechanics of solids and liquids.

393. Advanced Topics in Quantum Chemistry
Spring of odd-numbered years. 3(3-0) A student may earn a maximum of 9 credits in all enrollments for this course.
R: Open only to graduate students in College of Natural Science or College of Engineering.
Spectroscopic theory, properties of atoms and molecules in electric and magnetic fields, intermolecular forces. Many-body theory, molecular electronic structure, solid state chemistry, or molecular reaction dynamics.

394. Advanced Topics in Statistical Mechanics
Spring of even-numbered years. 3(3-0) A student may earn a maximum of 9 credits in all enrollments for this course.
R: Open only to graduate students in College of Natural Science or College of Engineering.
Non-equilibrium statistical mechanics and thermodynamics. Correlation functions and spectroscopy, light scattering, magnetic relaxation, transport properties of fluids and gases, or statistical mechanics of chemical reactions.

398. Physical Chemistry Seminar
Fall, Spring. 1(1-0) A student may earn a maximum of 3 credits in all enrollments for this course.
R: Open only to graduate students in Chemistry. Advances in physical chemistry reported by graduate students.

399. Doctoral Dissertation Research
Fall, Spring, Summer. 1 to 20 credits. A student may earn a maximum of 99 credits in all enrollments for this course.
R: Open only to doctoral students in Chemistry and Chemical Physics.

CHINESE

Department of Linguistics and Germanic, Slavic, Asian and African Languages
College of Arts and Letters

101. Elementary Chinese I
Fall. 4(4-1)
Pronunciation, writing system, and basic vocabulary and sentence patterns, with emphasis on conversation.

102. Elementary Chinese II
Spring. 4(4-1)
P: CHS 101 or approval of department.
Further work on conversation, character writing, and comprehension, with increasing emphasis on vocabulary building and grammar.

201. Second-Year Chinese I
Fall. 4(4-1)
P: CHS 102 or approval of department.
Intermediate-level work on skills in conversation, comprehension, and grammar. Practice in composition.

202. Second-Year Chinese II
Spring. 4(4-1)
P: CHS 201 or approval of department.
Further intermediate-level work on skills in conversation, comprehension, and grammar. Continued practice in composition.

301. Third-Year Chinese I
Fall. 4(4-0)
Advanced-level work on speaking, listening comprehension, reading, and writing skills, based on materials of cultural interest.

302. Third-Year Chinese II
Spring. 4(4-0)
P: CHS 301.
Advanced-level work on speaking, listening comprehension, reading, and writing skills, based on materials of cultural interest.

360. Studies in the Chinese Language
Spring. 3(3-0)
P: CHS 201 or approval of department.
Grammar structures of modern Chinese. Grammar review, sound system, word formation, sentence and discourse structures, historical evolution of the Chinese language, dialects, sociolinguistics.

401. Fourth-Year Chinese I
Fall. 3(0-0)
P: CHS 302.
Reading, discussion, and writing of advanced materials, including classical texts of broad cultural interest.

402. Fourth-Year Chinese II
Spring. 3(3-0)
P: CHS 401.
Further reading, discussion and writing based on original materials, including classical texts of broad cultural interest.

499. Senior Thesis Research
Fall, Spring. 1 to 4 credits. A student may earn a maximum of 4 credits in all enrollments for this course.
R: Approval of department.
An individual research project supervised by a faculty member that demonstrates the student's ability to do independent research and submit or present a major paper.

CIVIL ENGINEERING

Department of Civil and Environmental Engineering
College of Engineering

271. Engineering Surveying
Fall, Spring. 4(3-0)
P: MTH 190.
Application of surveying and error analysis to civil engineering problems. Earthwork, calculations, layout and management of construction sites.

360. Introduction to Environmental Engineering
Fall. Spring. 3(3-0)
P: CEM 141 or CEM 151, MTH 132, CPS 130 or CPS 131.
Elements of hydrology. Groundwater and surface water supply and contamination. Treatment systems for drinking water, wastewater, air, and solid and hazardous waste. Introduction to noise and radiation pollution.

365. Structural Analysis
Fall. Spring. 3(3-0)
P: MSM 211, CE 396 or concurrently.
R: Open only to Civil Engineering majors.
Determinate and indeterminate plane structures. Linearity, stability, determinacy. Virtual-work calculation of forces and displacements. Flexibility and stiffness methods in plane structures.

312. Soil Mechanics
Fall, Spring. 3(2-3)
P: MSM 211. R: Open only to Civil Engineering and Agricultural Engineering majors. Completion of Tier I writing requirement.

321. Introduction to Fluid Mechanics
Fall. Spring. 3(3-0)
P: MTH 285 or concurrently. R: Open only to Civil Engineering and Biosystems Engineering majors. Completion of Tier I writing requirement. Fluid properties, fluid statics, fluids in motion. Conservation of mass, energy and momentum. Dimensional analysis and similarity. Internal and external flows. Applications.

332. Civil Engineering Materials I
Fall, Spring. 4(3-0)
P: MSM 211 or concurrently. R: Open only to Civil Engineering majors.
Common civil engineering construction and paving materials: aggregates, inorganic cements, asphalts, concretes, wood and steel. Composition, structure, physical and mechanical properties, tests, and production mix design.

346. Transportation
Fall. Spring. 3(3-0)
P: MTH 138. R: Open only to Civil Engineering, Engineering Arts, and Urban Planning students.
Planning, design, and evaluation of transportation systems. Transportation demand, capacity, delay, and service quality. Elements of geometric design.

370. Engineering Economics
Fall. Spring. 3(3-0)
P: MTH 133. R: Open only to College of Engineering students.

372. Construction Estimating and Scheduling
Fall. 3(3-0)
R: Open only to College of Engineering and Building Construction Management majors.
Estimating quantities and costs for construction projects. Optimal scheduling of personnel and equipment subject to constraints and uncertainty.
430. Civil Engineering Analysis
Fall, Spring. 3(3-0)
P: CE 305 or CE 131; MTH 225; MSM 211 or concurrently. R: Open only to College of Engineering majors. Application of numerical methods and computing to civil engineering problems. Random variables in civil engineering. Problem solving methods. Report preparation.

400. Structural Mechanics
Fall. 3(3-0)

405. Design of Steel Structures
Fall, Spring. 3(3-0)
P: CE 305. R: Open only to Civil Engineering majors. Design of steel beams, columns, tension members and connections. Stability and plastic strength.

406. Design of Concrete Structures
Fall, Spring. 3(3-0)
P: CE 305, CE 337. R: Open only to Civil Engineering majors. Design of reinforced concrete beams, slabs, columns and footings.

407. Structural System Design
Spring. 3(3-0)
P: CE 405 or concurrently; CE 406. R: Open only to Civil Engineering majors. Building or bridge design using steel, concrete, wood, or other materials. Approximate methods. Wind and earthquake forces.

418. Geotechnical Engineering
Fall. 4(4-0)
P: CE 312, CE 390. R: Open only to Civil Engineering majors. Shallow foundation design including bearing capacity, stress distribution, and settlement analysis. Pile foundations. Design of retaining structures including rigid walls, braced excavations, and sheet-pile walls. Stability of slopes and embankments.

421. Engineering Hydrology
Fall. 3(3-0)

422. Applied Hydraulics
Spring. 3(3-2)
P: CE 321 or ME 332; CE 390 or ME 391. R: Open only to Civil Engineering, Mechanical Engineering, and Agricultural Engineering majors. Fundamentals of open-channel flow. Rapidly and gradually varied nonlinear flow analysis. Confined flows past submerged bodies, in pipe networks, and in turbo machinery. Design applications.

431. Pavement Design and Analysis I
Fall. 3(3-0)
P: CE 312, CE 337. R: Open only to Civil Engineering majors. Highway and airfield pavement structural design. Performance measures. Failure mechanisms, popular thickness design procedures, and design considerations for surface friction, pavement joints, and drainage.

432. Rehabilitation of Highways and Airfield Pavements
Spring of even-numbered years. 3(3-0)

441. Highway Operations
Fall. 3(3-0)

442. Airport Planning and Design
Spring. 3(3-0)
P: CE 346. R: Open only to Civil Engineering majors. Components of the airport system including ground access facilities, aircraft characteristics, air traffic control, airport configuration, capacity analysis.

448. Transportation Planning
Spring. 3(3-0)

449. Highway Design
Fall. 3(3-0)
P: CE 271, CE 346. R: Open only to Civil Engineering majors. Geometric design of highways as related to operation, capacity and safety. Alignment, drainage and pavement design. The use of CAD systems in preparing contract plans.

474. Contracts and Ethics
Spring. 3(3-0)

489. Water and Wastewater Analysis Laboratory
Fall. 1(0-3)
C: CE 481. R: Open only to majors in Civil Engineering and Environmental Engineering. Chemical and microbial analysis of water and wastewater.

491. Environmental Engineering Chemistry
Fall. 3(3-0)
P: CEM 381, CHE 201, CE 280. Chemistry of environmental processes including alkalinity, precipitation-dissolution reactions, chemical complexation and redox reactions. Engineering applications to processing plants for water and wastewater.

493. Water and Wastewater Treatment
Fall. 3(3-0)
P: CE 280, CE 321. R: Open only to Civil Engineering majors. Distribution of water and collection of sewage. Theory and design of water treatment processes.

485. Solid and Hazardous Waste Management
Spring. 3(3-0)
P: CE 280. R: Open only to College of Engineering majors. Design of solid waste collection and disposal systems. Definition of hazardous waste problems and selection of treatment alternatives.

487. Microbiology for Environmental Health Engineering
Spring. 3(3-0)
P: CEM 381, CHE 201. R: Open only to College of Engineering majors. Use and control of microorganisms for the protection of public health and the environment. Thermodynamics of microbial populations and microbial transformations.

490. Independent Study
Fall, Spring. Summer. 1-3 credits. A student may earn a maximum of 6 credits in all enrollments for this course. R: Open only to Civil Engineering majors. Approval of department. Civil engineering problem of specific interest to the student and a faculty member. May be analysis or design.

491. Civil Engineering Design Project
Fall, Spring. 3(3-0) A student may earn a maximum of 6 credits in all enrollments for this course. R: Open only to Civil Engineering majors. Approval of department. Planning, specification, and design of a civil engineering project or facility.

801. Experimental Methods for Structures and Materials
Spring of odd-numbered years. 3(3-2) Principles of instrumentation and experimental measurement techniques for materials and structural systems. Statistical methods for design and analysis of experiments.

802. Structural Dynamics
Fall. 3(3-0) Dynamic loads and characteristics of structures. Steady-state and transient behavior. Numerical solutions and method of normal modes. Applications such as earthquake engineering.

804. Advanced Structural Mechanics I
Fall. 3(3-0) Advanced linear structural mechanics. Potential energy principle. Finite element formulations. Applications to space frames, plates, and shell structures.

805. Advanced Design of Steel Structures
Spring. 3(3-0) Flexural and torsional instability of columns and beams. Slender cross-sectional elements, design of beam-columns. Tension, plastic design, plate girders, composite steel-concrete construction, connections.

806. Advanced Design of Reinforced Concrete
Fall of even-numbered years. 3(3-0) Analysis and design of reinforced concrete components under multiaxial loads. Modeling, analysis and design of continuous reinforced concrete systems.

807. Concrete Materials and Technology
Summer. 3(3-0) Concrete properties and production, structure-property relations. Advances in concrete technology. Special engineering applications.
808. Prestressed Concrete Structures  
Fall of odd-numbered years. 3(3-0)  
Prestressing principles, methods and materials. Analysis and design of prestressed concrete elements and structures.

809. Finite Element Method  
Fall. 3(3-0) Interdepartmental with Materials Science and Mechanics, Agricultural Engineering, and Mechanical Engineering. Administered by Materials Science and Mechanics. R: Approval of department. Theory and application of the finite element method to the solution of continuous type problems in heat transfer, fluid mechanics, and stress analysis.

810. Reliability-Based Design in Civil Engineering  
Fall. 3(3-0)  
Probabilistic treatment of live and dead loads: earthquake, floods, material properties, and capacity. Reliability basis of design specifications, reliability index, probability of failure, design for reliability, Reliability of engineering systems.

812. Mechanical Properties of Soils  
Fall. 3(2-3)  
Permeability, consolidation theory, stress-strain behavior, conditions of failure, shear strength. Laboratory determination of soil properties including interpretation of experimental data.

815. Selected Topics in Geotechnical Engineering  
Spring. 3(3-0) Adjunct may earn a maximum of 6 credits in all enrollments for this course. Selected topics related to soil stabilization, highway and airport soils, and frozen ground engineering.

818. Advanced Geotechnical Design  
Spring. 3(3-0)  

821. Groundwater Hydraulics  
Fall. 3(3-0)  

822. Experimental Fluid Mechanics in Civil Engineering  
Fall of even-numbered years. 3(1-6)  
Design and conduct of laboratory experiments in fluid mechanics. Computer-based data acquisition. Interpretation and analysis of experimental data.

826. Environmental Fluid Mechanics  
Spring. 3(3-0)  

833. Free Surface Flow  
Spring of odd-numbered years. 3(3-0)  
Steady and unsteady open-channel flow: profile synthesis, surge and wave phenomena, computer modeling. Coastal engineering: wave theory, wave statistics, breakwater design.

839. Fluid Transients  
Spring of odd-numbered years. 3(3-0)  
Application of unsteady flow concepts and wave mechanics to hydraulic engineering; method of characteristics, surges and water hammer in piping systems, resonance phenomena.

831. Pavement Design and Analysis II  
Spring. 3(3-0)  
Theoretical models for analysis of pavement systems. Evaluation and application of current design practices related to elastic and plastic theory. Formulation of improved design procedures.

835. Engineering Management of Pavement Networks  
Spring of even-numbered years. 3(0-3)  
Theoretical and statistical analysis of pavement networks. Engineering planning; Determination of distress mechanisms and engineering solutions. Assignment of priorities to engineering actions.

837. Transportation Materials Engineering  
Fall of even-numbered years. 3(0-3)  
Engineering characteristics of soils and materials commonly used in transportation facilities. Relationships of material engineering properties to pavement design and performance. Material behavior under cyclic loading.

838. Selected Topics in Highway and Airfield Engineering  
Fall of odd-numbered years. 1 to 4 credits. A student may earn a maximum of 6 credits in all enrollments for this course. Topics in pavement engineering such as nondestructive deflection testing and back calculation of layer moduli, advanced application of finite element theory in slab design, or fracture mechanics analyses of joint and crack performance.

839. Stabilizing Unbound Granular Materials  
Fall of even-numbered years. 3(3-0)  
Improving performance and engineering properties of various granular materials through the use of mechanical processes, and chemical or mineralogical additives. Characterization of engineering properties of stabilized materials.

840. Plates and Shells  
Fall of odd-numbered years. 3(3-0) Interdepartmental with Materials Science and Mechanics. Administered by Materials Science and Mechanics. P: MM 815. 
Deformation and stress analysis of plates and shells with different types of geometry, thickness, and boundary conditions.

841. Traffic Flow Theory  
Spring. 3(3-0)  
Microscopic and macroscopic traffic flow models, Queueing theory, Gap acceptance, Simulation models for network analysis. Intelligent vehicle highway systems.

843. Simulation and Optimization of Urban Traffic Flow  
Fall of even-numbered years. 3(3-0)  
P: CE 841.  
Statistical analysis of highway geometric designs and operational-control strategies with respect to the optimal flow of traffic intersection, arterial, network design and control models. Traffic simulation, System management and optimization.

844. Highway and Traffic Safety  
Fall of odd-numbered years. 3(3-0)  
Analysis of highway geometric design alternatives and operational-control strategies with respect to accident probabilities. Statistical methods of pattern identification, Countermeasure selection and evaluation methodology, Risk management.

845. Public Transportation System Planning  
Fall of odd-numbered years. 3(3-0)  
Planning and operating urban and rural transportation systems. System technology and management. Budgeting and programming of transportation services. Environmental impact statements. Paratransit and demand-responsive systems.

846. Statewide Transportation Network Evaluation  
Spring of even-numbered years. 3(3-0)  
Transportation system measures, needs studies, sufficiency ratings. Cost allocation models, programming and budget constraints. Corridor analysis, transportation economics, demand elasticity.

848. Travel Demand Analysis  
Fall of even-numbered years. 3(3-0)  

849. Transportation Research Methods  
Spring. 3(3-0)  
Application and interpretation of quantitative methods and design of experiments for transportation research; ANOVA, non-parametric, discriminant analysis, factor analysis, multivariate regression, SPSS.

850. Independent Study in Civil Engineering  
Fall, Spring, Summer. 1 to 4 credits. A student may earn a maximum of 9 credits in all enrollments for this course. R: Approval of department. Research problems of limited scope not pertaining to thesis accomplished under CE 899 or CE 999.

851. Selected Topics in Civil Engineering  
Fall, Spring, Summer. 2 to 4 credits. A student may earn a maximum of 9 credits in all enrollments for this course. Selected topics in new or developing areas of civil engineering.

859. Master's Thesis Research  
Fall, Spring, Summer. 1 to 8 credits. A student may earn a maximum of 24 credits in all enrollments for this course.

862. Random Vibration of Structural and Mechanical Systems  
Spring of odd-numbered years. 3(3-0) Interdepartmental with Mechanical Engineering and Materials Science and Mechanics. P: CE 800 or ME 860; CE 810.  
Probabilistic modeling of random excitations (e.g., earthquake, aerodynamic, and ocean wave loadings). Response of single and multiple degree-of-freedom systems to random excitation. Designing against failure. Nonstationary and nonlinear problems.

894. Advanced Structural Mechanics II  
Spring. 3(3-0)  
P: CE 804.  

906. Advanced Theory of Concrete Composites and Structures  
Spring of even-numbered years. 3(3-0)  
P: CE 806.  
Applications of fracture mechanics and plastic theories to modeling the mechanical behavior of concrete composites and structures. Fiber reinforced concrete.
915. Earth Structures
Fall of odd-numbered years. 3(3-0)
P: CE 812.

916. Soil Dynamics
Spring. 3(3-0)
P: CE 812.

921. Advanced Topics in Groundwater
Spring of odd-numbered years. 3(3-0)
P: CE 821.
Formulation and use of numerical simulation to model the physics of flow and contaminant transport in complex settings or the mechanics of immiscible fluids in porous media.

929. Selected Topics in Hydraulics
Fall of odd-numbered years. 1 to 3 credits. A student may earn a maximum of 6 credits in all enrollments for this course.
P: CE 829 or CE 892.
Advanced fluid mechanics and hydraulics related to civil and environmental engineering.

998. Doctoral Dissertation Research
Fall, Spring, Summer. 1 to 24 credits. A student may earn a maximum of 72 credits in all enrollments for this course.

CLASSICAL STUDIES CLA
Department of Romance and Classical Languages
College of Arts and Letters

120. English from Latin and Greek Roots
Fall of odd-numbered years. 3(3-0)
Prefects, suffixes, and roots of English vocabulary from Greek and Latin word elements.

121. Medical Terminology
Spring of even-numbered years. 3(3-0)
Basic Greek and Latin word elements used in the formation of prefixes, suffixes, and roots.

292. Introduction to Ancient Studies
Fall. 2(1-2) Interdepartmental with Arts and Letters, History, and History of Art. Administered by Arts and Letters.
Methods and current trends in the study of the Greek and Roman world. Visits to library and museum collections.

300. Greek Civilization
Fall. 3(3-0)
R: Not open to freshmen.
Enduring features of Roman civilization to Justinian. Political institutions, religion, architecture, literary forms, creative arts, and gender roles.

350. Greek and Roman Literature in English Translation
Fall. 3(3-0)
R: Not open to freshmen.
Representative works of major Greek and Roman authors.

400. Women in Classical Greek Society
Fall. 3(3-0) Interdepartmental with Women's Studies.
R: Not open to freshmen and sophomores.
Images, roles, and statuses of women in Greek society as seen through literary sources.

410. Greek Mythology
Spring. 3(3-0)
R: Not open to freshmen and sophomores.
Myths as social discourse defining order in Greek culture, as source of inspiration for poets and thinkers, and as legacy for modern Western culture.

420. Greek and Roman Religions
Fall of odd-numbered years. 3(3-0)
R: Not open to freshmen and sophomores.

499. Senior Thesis
Fall, Spring. 3(3-0)
P: LTN 402. R: Approval of department.
Scholarly research and writing with a focus on specific problems, under faculty supervision.

COMMUNICATION COM
Department of Communication
College of Communication Arts and Sciences

100. Human Communication
Fall, Spring, Summer. 3(3-0)
Process and functions of communication. Principles underlying communication behavior. Practice in analyzing communication situations and in speaking and writing.

200. Methods of Communication Inquiry
Fall, Spring, Summer. 3(3-2)
P: MTH 110 or MTH 116 or designated score on mathematics placement test.
Nature and conduct of communication inquiry. Significant questions about communication and finding systematic answers.

225. An Introduction to Interpersonal Communication
Fall, Spring, Summer. 3(3-0)
Principles and practices of interpersonal communication. Emphasis on effective and responsible interpersonal communication.

240. Introduction to Organizational Communication
Fall, Spring, Summer. 4(4-0)
Theories, problems, structures and processes of organizational communication. Organizational cultures. Communication in multilateral organizations and in individual, leadership, supervisor-subordinate and small group situations.

275. Effects of Mass Communication
Fall, Spring, Summer. 3(3-0) Interdepartmental with Telecommunication. Administered by Telecommunication.
R: Not open to freshmen.
Major social effects of mass media on audience behavior. Political communication. Media effects on children. Message strategies producing attitude change. Interrelationships between mass media and interpersonal communication.

315. Information Gathering and Interviewing in Organizations
Fall. 3(3-0)
R: Open only to juniors and seniors.
Information gathering as a relational process. Interaction through the asking and answering of questions.

325. Interpersonal Communication Theory and Research
Fall, Spring. 3(3-0)
R: Open only to juniors and seniors.
Theories, processes and models of interpersonal communication. Topics include conflict resolution, deception, consensus, and uncertainty reduction in communication.

340. Dyadic and Group Processes in Organizations
Spring. 3(3-0)
R: Open only to juniors and seniors.
Theory and research on dyadic and group relations within organizations. Topics include leadership, motivation, networks, decision making, and organizational effectiveness.

375. Audience Response to Media
Spring. 3(3-0)
R: Open only to juniors and seniors.
Theory and research on audience responses to mediated communication including entertainment.

391. Topics in Verbal or Intercultural Communication
Fall. 4(4-0) A student may earn a maximum of 6 credits in all enrollments for this course.
P: One 200 level course in Communication. R: Not open to freshmen and sophomores.
Topics in cultural diversity and verbal interaction.

399. Special Topics in Communication
Spring. 3(3-0) A student may earn a maximum of 6 credits in all enrollments for this course.
P: One 200 level COMM course. R: Not open to freshmen, and sophomores.
Contemporary issues in communication.

425. Communication in Close Relationships
(W) Fall, Spring. 4(4-0)
P: COM 225 or COM 226. R: Open only to junior, senior or graduate student Communication majors. Completion of Tier I writing requirement.
In-depth treatment of current research and of theoretical and methodological issues.

440. Organizational Communication Structure (W)
Fall. 4(4-0)
P: COM 340. R: Open only to junior, senior or graduate student Communication majors. Completion of Tier I writing requirement.
Systems approaches to information processing and communication structures in organizations.
