#### 434. Process Design and Optimization II

Spring. 2 credits.

P: CHE 433. R: Open only to Chemical Engineering majors.

Design project requiring an integrated design of chemical engineering processes. Process and project engineering. Instrumentation and control systems. Flowsheet layout and optimization. Process simulation.

#### Composite Materials Processing 472.

Fall. 3(2-3)

P: CHE 311 or ME 332 or CE 321. R: Open only to College of Engineering majors.

Manufacturing processes for thermoset and thermoplastic matrix composites. Mechanical and thermal evaluation of composites. Rheology and molding of fiber-filled materials.

#### Biochemical Engineering 481.

Fall. 3(2-3)

P: CHE 431. R: Open only to College of Engineering majors.

Applications of microbiology and biochemistry to biochemical engineering. Kinetics and thermodynamics of biochemical reactors. Transport phenomena in biological systems. Bioreactor design and scale-up.

### Independent Study

Fall, Spring, Summer. 1 to 3 credits. A student may earn a maximum of 6 credits in all enrollments for this course.

R: Open only to Chemical Engineering majors. Approval of department.

Theoretical or experimental studies of current research

topics in chemical engineering. Individual interaction with faculty adviser.

#### 491. Selected Topics in Chemical Engineering

Fall, Spring. 1 to 4 credits. A student may earn a maximum of 6 credits in all enrollments for this

R: Open only to Chemical Engineering majors. Study of newly-developing or non-traditional chemical engineering topics in a classroom environment.

#### Advanced Chemical Engineering 801. Calculations

Fall, 3(3-0)

P: CHE 431.

Formulation of differential equations modelling physical phenomena in chemical engineering. Application of analytical and numerical solution methods. Interpretation of solutions.

#### Thermodynamics and Kinetics in 804. Chemical Engineering

Summer. 3(2-2)

R: Approval of department.

Mass and energy balances in batch, continuous and open systems. Process thermodynamics. Cryogenics. Properties of substances and mixtures. Phase equilibria. Chemical reaction equilibria. Chemical reactor kinetics. Process design orientation.

#### 805. Transport and Separation Processes Summer. 3(2-2)

R: Approval of department.

Momentum, energy, and mass transfer, Laminar and turbulent flow. Fluid friction. Dimensional analysis. Heat transfer in stationary and flowing materials. Interchanges. Condensation. Boiling. Binary and multicomponent distillation, absorption, extraction.

#### Advanced Chemical Engineering 821. Thermodynamics

Fall, 3(3-0)

R: Open only to Chemical Engineering majors. Laws of thermodynamics, unsteady state processes. Prediction and correlation of phase equilibria for nonelectrolytes. Relation of quantum theory and statistical mechanics to thermodynamic properties.

#### Advanced Transport Phenomena 299

Spring. 3(3-0)

P: CHE 422.

Derivation of balance equations for mass, energy, and momentum. Constitutive equations for multicomponent fluids. Estimates of transport properties. Approximate models for turbulent and boundary layer flows. Boundary value problems.

#### Advanced Chemical Reaction 831 Engineering

Spring. 3(3-0)

P: CHE 341.

Characterization of solid catalysts. Heterogeneous reaction rate expressions. Simultaneous mass and heat transport and chemical reaction in porous catalysts. Design of fixed-bed and fluidized-bed reactors. Industrial catalytic react ions.

#### Advanced Biochemical Engineering 882. Spring. 3(3-0)

P: CHE 481.

Microbial strain improvement. Metabolic engineering. Structured growth models. Non-ideal bioreactor performance. Biosensors and process control of bioreactors. Separation processes for biochemicals.

#### Independent Study 890.

Fall, Spring, Summer. 1 to 3 credits. A student may earn a maximum of 6 credits in all enrollments for this course.

R: Open only to Chemical Engineering majors. Approval of department.

Supervised individual investigation of a problem in chemical engineering.

# Selected Topics

Fall, Spring, Summer. 3(3-0) A student may earn a maximum of 6 credits in all enrollments for this course.

R: Open only to Chemical Engineering majors.

Physical and mathematical analysis of phenomena such as swirling flows or stability of reactions and transport processes.

#### 202 Seminar

Fall, Spring. 1 credit. A student may earn a maximum of 4 credits in all enrollments for this course. R: Open only to Chemical Engineering majors. Presentations of detailed studies on one or more spe-

cialized aspects of chemical engineering.

#### 899. Master's Thesis Research

 $Fall, Spring, Summer.\ 1\ to\ 8\ credits.\ A\ student$ may earn a maximum of 24 credits in all enrollments for this course.

R: Open only to Chemical Engineering majors.

# 972. Viscoelasticity and Flow of Polymeric

Spring of odd-numbered years, 3(3-0)

P: CHE 801 or CHE 822.

Time dependent and steady flow properties of polymeric materials related to molecular and structural parameters. Examples of polymeric blends and composites with thermoplastic and thermoset components.

#### Advanced Polymer Reaction 973. Engineering

Spring of even-numbered years. 3(3-0)

P: CHE 831. R: Open only to Chemical Engineering

Principles of chain polymerization and network forming reactions. Emulsion and suspension polymerization versus graft reactions on bulk polymers. Reactor design. Morphology in polymer alloys, effects of mixing on polymer reactions.

#### 999 Doctoral Dissertation Research

Fall, Spring, Summer. 1 to 12 credits. A student may earn a maximum of 72 credits in all enrollments for this course.

R: Open only to Chemical Engineering majors.

## CHEMISTRY

CEM

# Department of Chemistry College of Natural Science

# General Chemistry

Fall, Spring. 4(4-0)

P: MTH 103 or MTH 110 or MTH 116 or concurrently. R: Not open to students with credit in CEM 152 or CEM

Atoms, molecules, ions; chemical calculations; reactions, energy changes; gases; periodic properties of elements; chemical bonds; states of matter, solutions; acids and bases; aqueous reactions and ionic equations.

#### 142. General and Inorganic Chemistry

Fall, Spring. 3(4-0)

P: CEM 141. R: Not open to students with credit in CEM 151 or CEM 181H.

Kinetics; gaseous equilibria; acids and bases; pH; aqueous equilibria involving buffers, hydrolysis, and titrations; heterogeneous equilibria of weakly soluble salts; electrochemistry; coordination chemistry, stereochemistry, and bondin g within the transition elements.

# Survey of Organic Chemistry

Fall, Spring. 4(3-3)
P: CEM 141 or CEM 151. R: Not open to students with credit in CEM 251 or CEM 351.

Chemistry of carbon compounds. Chemistry of the main organic functional groups with applications to everyday life, industry and biology.

# General and Descriptive Chemistry

Fall. 4(4-0)

P: MTH 116 or concurrently. R: Not open to students with credit in CEM 142 or CEM 181H.

Atomic and molecular structure; ionic and molecular bonding models; periodic trends; chemical reactivity by periodic group; nomenclature, structure, bonding and reactivity of coordination compounds; bioinorganic chemistry.

#### Principles of Chemistry 152.

Spring. 3(3-0)

P: CEM 151. R: Not open to students with credit in CEM 141 or CEM 182H.

The mole concept; stoichiometry and chemical calculations; gas laws; phase changes; thermodynamics; enthalpy, entropy and free energy; crystal structures; properties of solutions; chemical kinetics; gaseous equilibria; theory and reacti ons of acids/bases; aqueous equilibria; electrochemistry.

#### 161. Chemistry Laboratory I

Fall, Spring. 1 credit.

P: CEM 141 or CEM 151 or concurrently.

Quantitative physiochemical or analytical experiments and chemical synthesis.

# Chemistry Laboratory II

Spring. 1 credit.

P: CEM 161; CEM 142 or CEM 152 or concurrently. Preparation and qualitative analysis of inorganic compounds.

# 181H. Honors Chemistry I

Fall. 4(4-0)

P: MTH 124 or MTH 132 or MTH 152H or concurrently. R: Approval of department.

States of matter. Descriptive inorganic chemistry by periodic groups of elements. Kinetic theory of gases. Thermodynamics, chemical equilibrium and electrochemistry. Properties of solutions. Macromolecular chemistry. Macroscopic kinetic s.

#### 182H. Honors Chemistry II

Spring. 4(4-0)
P: CEM 181H: MTH 126 or MTH 133 or MTH 153H or concurrently. R: Approval of department.

Subatomic, atomic and molecular structure. Quantum theory and bonding. Stereochemistry and nomenclature. Experimental methods of structure determination. Reactions of compounds of the main-group and transition elements. Reaction dynamic s. Nuclear chemistry.

#### 185H. Honors Chemistry Laboratory I

Fall. 2 credits.

C: CEM 181H concurrently.

Techniques of measurement: experiments related to gas behavior, thermodynamics, electrochemistry, chemical kinetics and properties of solutions.

### Honors Chemistry Laboratory II

Spring. 2 credits. R: Approval of department.

Independent laboratory work in chemistry.

#### 251. Organic Chemistry I

Fall, Spring. 3(4-0)

P: CEM 161; CEM 141 or CEM 152 or CEM 181H. R: Not open to students with credit in CEM 143 or CEM 351.

Common classes of organic compounds including their nomenclature, structure, bonding, reactivity, and spectroscopic characterization.

#### Organic Chemistry II 252.

Fall, Spring. 3(4-0)

P: CEM 251. R: Not open to students with credit in CEM

Continuation of 251 with emphasis on polyfunctional compounds, particularly those of biological interest.

# Organic Chemistry Laboratory

Fall, Spring. 2(1-3)

P: CEM 252 or concurrently. R: Not open to students with credit in CEM 355.

Preparation and qualitative analysis of organic compounds.

#### 262. Quantitative Analysis

Fall, Spring. 2(2-3)

P: CEM 162.

Preparation and quantitative analysis of chemical compounds.

#### 333. Instrumental Methods

Spring. 3(2-3)

P: CEM 143 or CEM 251 or CEM 351; CEM 161. R: Completion of Tier I writing requirement. Not open to students with credit in CEM 372.

Principles of instrumental analysis. Application of separation techniques and instrumental analysis.

### Organic Chemistry I

Fall. 3(4-0)

P: CEM 152 or CEM 182H. R: Not open to students with credit in CEM 251 or CEM 143.

Structure, bonding, and reactivity of organic molecules.

#### 352. Organic Chemistry II

Spring. 3(4-0)

P: CEM 351. R: Not open to students with credit in CEM

Carboxylate derivatives. Conjugation. Aromaticity. Amino acids. Proteins. Carbohydrates. Nucleic acids.

#### 355. Organic Laboratory I

Spring. 2 credits.

P: CEM 162. C. CEM 352 concurrently. R: Completion of Tier I writing requirement. Not open to students with credit in CEM 255.

Organic laboratory techniques. Distillation. Spectroscopy. Melting points. Recrystallization. Chromatography. Measuring physical properties.

#### 356. Organic Laboratory II

Fall. 2 credits.

P: CEM 355.

Multi-step organic synthesis. Qualitative organic analysis. Separation, identification, and characterization of unknowns.

# Analytical-Physical Chemistry I

P: CEM 142 or CEM 152 or CEM 182H; MTH 234 or MTH 254H; PHY 182B or PHY 184 or PHY 184B or PHY 232 or PHY 232B or PHY 294H. R: Not open to students with credit in CEM 383.

Thermodynamics and its application to simple systems: gases, liquids and solids.

#### Analytical-Physical Chemistry II 362.

Spring. 3(4-0)

P: CEM 361.

Advanced treatment of equilibria, chemical kinetics and separations.

### Analytical-Physical Chemistry Laboratory I

Spring. 3(1-6)

P: CEM 262; CEM 383 or CEM 361. R: Completion of Tier I writing requirement.

Electronic and optical components of chemical instrumentation. Spectroscopic and chromatographic meth-

# Introductory Physical Chemistry I

P: CEM 143 or CEM 251 or CEM 351; MTH 133 or MTH 153H. R. Not open to students with credit in CEM 361. Physical chemistry of macroscopic systems: thermodynamics, kinetics, electrochemistry.

### 384. Introductory Physical Chemistry II

Spring. 3(4-0)

P: CEM 383. R: Not open to students with credit in CEM

Physical chemistry of microscopic systems: quantum mechanics, spectroscopy.

### Honors Work

Fall, Spring, Summer. 1 to 12 credits. A student may earn a maximum of 12 credits in all enrollments for this course.

R: Approval of department. Completion of Tier I writing

Readings and investigations in chemistry.

#### 410. Literature and Writing in Chemistry Spring. 3 credits.

P: CEM 252; CEM 384; CEM 333 or concurrently. R: Open only to B.A. Chemistry majors. Completion of Tier I writing requirement.

Library research related to a topic in contemporary chemistry; thesis required.

# Inorganic Chemistry

Spring. 4(4-0)

P: CEM 361 or CEM 383.

Principles of structure and bonding, symmetry; solid state chemistry; acid-base and redox reactions. Main group chemistry: transition metal bonding, spectra and reaction mechanisms.

# Advanced Synthesis Laboratory

Spring. 3 credits.

P: CEM 472; CEM 411 or concurrently. R: Open only to B.S. Chemistry majors. Completion of Tier I writing requirement.

Methods of synthesizing inorganic and organometallic compounds.

#### Independent Study 419.

Fall, Spring, Summer. 1 to 12 credits. A student may earn a maximum of 12 credits in all enrollments for this course.

R: Approval of department. Not open to students with credit in CEM 420.

Faculty supervised readings in chemistry.

### Independent Research

Fall, Spring, Summer. 1 to 12 credits. A student may earn a maximum of 12 credits in all enrollments for this course.

R: Approval of department. Not open to students with credit in CEM 419.

Faculty supervised independent investigations in chemistry.

#### 430. Introduction to Radioactivity and Radioisotope Techniques

Spring. 3(2-3)

P: CEM 142 or CEM 152; CEM 161, PHY 232. Elementary nuclear processes and properties. Radioactivity, its measurement and its interaction with matter.

#### Theoretical Chemistry 461.

Fall. 3(4-0) P: CEM 361 or CEM 383 or concurrently; MTH 234. Postulates of quantum mechanics. Model problems. Theories of chemical bonding. Interaction of radiation with matter. Foundation of spectroscopy, statistical

# Analytical-Physical Chemistry Laboratory II

Fall. 3(1-6)

P: CEM 372; CEM 461 or CEM 384 or concurrently. R: Completion of Tier I writing requirement.

Kinetic measurements. Electrochemical, radiochemical and spectrophotometric measurements of reaction rates. Mass spectrometry. Electronic, vibrational and rotational spectroscopy.

#### 499. Chemical Physics Seminar

Fall, Spring, Summer. 1(1-0) A student may earn a maximum of 2 credits in all enrollments for this

P: CEM 362, MTH 235, PHY 321. R: Completion of Tier I writing requirement.

Written and oral reports on selected journal articles in chemical physics.

### Advanced Inorganic Chemistry I Fall. 3(3-0)

R: Open only to graduate students in College of Natural Science or College of Engineering.

Principles of chemical bonding, electronic structure, and reaction mechanisms of main group and transition metal compounds. Concepts of group theory.

#### 812. Advanced Inorganic Chemistry II Spring. 3(3-0)

P: CEM 811. R: Open only to graduate students in College of Natural Science or College of Engineering. Descriptive chemistry of inorganic compounds. Emphasis on synthesis, structure, and reactivity patterns of coordination, organometallic, and solid state compounds of transition metals and main group elements.

#### 832. Mass Spectrometry

Fall of odd-numbered years. 3(3-0)

R: Open only to graduate students in College of Natural Science or College of Engineering.

Instrumentation of mass spectrometry. Interpreting mass spectra of organic and inorganic molecules. Applications to analysis of large molecules and chromatography.

#### 834. Advanced Analytical Chemistry

Fall. 3(3-0)

R: Open only to graduate students in College of Natural Science or College of Engineering.

Principles of equilibria and applications in analytical methodology. Acid-base, complexation, redox reactions. Potentiometry and conductometry. Solute partitioning in extraction and chromatography. Kinetic methods of analysis.

#### Spectrochemical Methods of Analysis 835.

Spring of even-numbered years. 3(2-3)

R: Open only to graduate students in College of Natural Science or College of Engineering.

Principles and applications of atomic absorption, emission, fluorescence. Plasma emission spectroscopy. UV, visible, IR spectrophotometry. Reaction-rate methods. Molecular fluorescence and phosphorescence. Principles and applications of lasers.

#### Separation Science 836.

Spring of odd-numbered years. 3(3-0)

R: Open only to graduate students in College of Natural Science or College of Engineering.

Physical and chemical principles of separations, column technology, and instrumentation for gas, liquid, and supercritical fluid chromatography.

#### 837. Electroanalytical Chemistry

Fall of even-numbered years. 3(3-0)

R: Open only to graduate students in College of Natural Science or College of Engineering.

Modern electroanalytical chemistry. Theory and applications to chemical and biological problems. Coulometry, voltammetry, electrometric titrations, and ion-selective potentiometry in macro, micro, and trace analysis.

#### 838. Computer-Based Scientific Instrumentation

Fall. 3(1-6) A student may earn a maximum of 6 credits in all enrollments for this course.

R: Open only to graduate students in College of Natural Science or College of Agriculture and Natural Re-

Electronic and computer-aided measurement and control in scientific instrumentation and experimentation. Principles and applications of digital computers, operational amplifiers, digital logic devices, analog-to-digital converters, and other electronic instruments.

#### Structure and Spectroscopy of Organic 845. CompoundsFall 3(3-0)

R: Open only to graduate students in College of Natural

Science or College of Engineering.

Structural and stereochemical principles in organic chemistry. Applications of spectroscopic methods, especially nuclear magnetic resonance, static and dynamic aspects of stereochemistry. Spectroscopy in structure determination.

# Advanced Organic Chemistry

Fall. 3(3-0)

R: Open only to graduate students in College of Natural Science or College of Engineering.

Structure, reactivity, and methods. Acid-base reactions, substitution, addition, elimination, and pericyclic processes. Major organic intermediates related to simple bonding theory, kinetics, and thermodynamics.

#### 852. Methods of Organic Synthesis

Spring. 3(3-0)

R: Open only to graduate students in College of Natural Science or College of Engineering.

Principal reactions leading to carbon-carbon bond formation and functional group transformations. Strategies and methods of organic synthesis.

#### Atomic and Molecular Structure 881.

R: Open only to graduate students in College of Natural Science or College of Engineering.

Postulates of quantum mechanics, analytical solutions of the Schroedinger equation, theoretical descriptions of chemical bonding, spectroscopy, statistical mechanics, and statistical thermodynamics.

### Kinetics and Spectroscopic Methods Spring. 3(3-0)

R: Open only to graduate students in College of Natural Science or College of Engineering.

Rate equations and mechanisms of chemical reactions: reaction rate theory, kinetic theory of gases, photochemistry. Spectroscopic methods, and applications of spectroscopy in reaction kinetics.

### Computational Quantum Chemistry Fall. 3(2-3)

P: CEM 461 or CEM 881

Computational methods in determining electronic energy levels, equilibrium nuclear configurations, and other molecular properties.

#### 890. Chemical Problems and Reports

Fall, Spring, Summer. 1 to 6 credits. A student may earn a maximum of 12 credits in all enrollments for this course.

Investigation and report of a nonthesis problem in chemistry.

### Master's Thesis Research

Fall, Spring, Summer. 1 to 20 credits. A stu-dent may earn a maximum of 99 credits in all enrollments for this course.

R: Open only to graduate students in Chemistry.

### Selected Topics in Inorganic Chemistry

Fall, Spring. 1 to 3 credits. A student may earn a maximum of 9 credits in all enrollments for this course.

R: Open only to graduate students in College of Natural Science or College of Engineering.

Chemistry of metal-metal bonds and clusters, organometallic chemistry, layered oxides, and complex layered oxides. Photochemistry. Solid state chemistry and applications of quantum mechanics.

# Inorganic Chemistry Seminar

students.

Fall, Spring. 1(1-0) A student may earn a maximum of 3 credits in all enrollments for this course. R: Open only to graduate students in Chemistry. Advances in inorganic chemistry reported by graduate

#### 924. Selected Topics in Analytical Chemistry

Fall, Spring. 2 to 3 credits. A student may earn a maximum of 9 credits in all enrollments for this course.

R: Open only to graduate students in College of Natural Science or College of Engineering.

Advanced computer techniques, surface chemistry, analytical chemistry of polymers, or statistics for chem-

#### Analytical Chemistry Seminar 938.

Fall, Spring. 1(1-0) A student may earn a maximum of 3 credits in all enrollments for this course. R: Open only to graduate students in College of Natural Science or College of Engineering.

Advances in analytical chemistry reported by graduate students, faculty, and guest lecturers.

## Selected Topics in Organic Chemistry

Fall, Spring. 1 to 3 credits. A student may earn a maximum of 12 credits in all enrollments for this course.

R: Open only to graduate students in College of Natural Science or College of Engineering.

Heterocyclic and organometallic chemistry, natural products, photochemistry, free radicals, or reaction mechanisms.

#### Organic Chemistry Seminar 958.

Fall, Spring. 1(1-0) A student may earn a maximum of 2 credits in all enrollments for this course. R: Open only to graduate students in College of Natural Science or College of Engineering.

Advances in organic chemistry reported by graduate students.

#### 971. Emerging Topics in Chemistry

Fall, Spring. 1 to 3 credits. A student may earn a maximum of 6 credits in all enrollments for this course.

R: Open only to doctoral students in the Chemistry or Chemical Physics major.

Discussion of a research topic of emerging interest in chemistry. Preparation of a proposal for funding of research.

#### Selected Topics in Physical Chemistry I 987.

Fall. 1 to 3 credits. A student may earn a maximum of 9 credits in all enrollments for this course. R: Open only to doctoral students or approval of department.

Topics such as kinetics and photochemistry, macromolecular and surface chemistry, molecular spectroscopy, electric and magnetic properties of matter, or applications of statistical mechanics to chemical prob-

#### 988. Selected Topics in Physical Chemistry II

Spring, 1 to 3 credits. A student may earn a maximum of 9 credits in all enrollments for this course. R: Open only to doctoral students or approval of department.

Topics such as analysis and interpretation of molecular spectra, advanced molecular structure theory, magnetic resonance, X-rays and crystal structure, scientific analysis of vacuum systems, or problems in statistical mechanics.

# Quantum Chemistry and Statistical Thermodynamics I

Fall. 3(3-0)

R: Open only to graduate students in College of Natural Science or College of Engineering.

Principles and applications of quantum chemistry. Partition functions, spectroscopic measurements, and thermodynamic applications.

### Quantum Chemistry and Statistical Thermodynamics II

Spring. 3(3-0)

Analytical and numerical methods for solving quantum chemical problems. Statistical mechanics of solids and liquids.

#### 993. Advanced Topics in Quantum Chemistry

Spring of odd-numbered years. 3(3-0) A student may earn a maximum of 9 credits in all enrollments for this course.

R: Open only to graduate students in College of Natural Science or College of Engineering.

Spectroscopic theory, properties of atoms and molecules in electric and magnetic fields, intermolecular forces. Many-body theory, molecular electronic structure, solid state chemistry, or molecular reaction dynamics.

#### 994. Advanced Topics in Statistical Mechanics

Spring of even-numbered years, 3(3-0) A student may earn a maximum of 9 credits in all enrollments for this course.

R: Open only to graduate students in College of Natural Science or College of Engineering.

Nonequilibrium statistical mechanics and thermodynamics. Correlation functions and spectroscopy, light scattering, magnetic relaxation, transport properties of fluids and gases, or statistical mechanics of chemical reactions.

#### 998. Physical Chemistry Seminar

Fall, Spring. 1(1-0) A student may earn a maximum of 3 credits in all enrollments for this course. R: Open only to graduate students in Chemistry. Advances in physical chemistry reported by graduate students.

#### Doctoral Dissertation Research 999.

Fall, Spring, Summer. 1 to 20 credits. A student may earn a maximum of 99 credits in all enrollments for this course.

R: Open only to doctoral students in Chemistry and Chemical Physics.

# **CHINESE**

CHS

# Department of Linguistics and Germanic, Slavic, Asian and African Languages College of Arts and Letters

## Elementary Chinese I

Fall. 5(5-0)

Pronunciation, writing system, and basic vocabulary and sentence patterns, with emphasis on conversation.

#### Elementary Chinese II 102.

Spring. 5(5-0)

P: CHS 101 or approval of department.

Further work on conversation, character writing, and comprehension, with increasing emphasis on vocabulary building and grammar.

### Second-Year Chinese I

Fall. 5(5-1)

P: CHS 102 or approval of department.

Intermediate-level work on skills in conversation, comprehension, and grammar. Practice in composition.

#### Second-Year Chinese II 202.

Spring. 5(5-0)

P: CHS 201 or approval of department.

Further intermediate-level work on skills in conversation, comprehension, and grammar. Continued practice in composition.

# Third-Year Chinese I

Fall. 4(4-0)

P: CHS 202.

Advanced-level work on speaking, listening comprehension, reading, and writing skills, based on materials of cultural interest.

### Third-Year Chinese II

Spring. 4(4-0)

P: CHS 301.

Advanced-level work on speaking, listening comprehension, reading, and writing skills, based on materials of cultural interest.

#### Studies in the Chinese Language 350.

Spring. 3(3-0)

P: CHS 201 or approval of department.

Grammatical structures of modern Chinese. Grammar review, sound system, word formation, sentence and discourse structures, historical evolution of the Chinese language, dialects, sociolinguistics.

#### 401. Fourth-Year Chinese I

P: CHS 302.

Reading, discussion, and writing of advanced materials, including classical texts of broad cultural interest.

# Fourth-Year Chinese II

Spring. 3(3-0)

P: CHS 401.

Further reading, discussion and writing based on original materials, including classical texts of broad cultural interest.

#### 499. Senior Thesis Research

Fall, Spring. 1 to 4 credits. A student may earn a maximum of 4 credits in all enrollments for this

R: Approval of department.

An individual research project supervised by a faculty member that demonstrates the student's ability to do independent research and submit or present a major

## CIVIL ENGINEERING

# CE

# Department of Civil and Environmental Engineering College of Engineering

### Engineering Surveying

Fall. 4(3-3)

P: MTH 120.

Application of surveying and error analysis to civil engineering problems. Earth work. Calculations. Layout and management of construction sites.

### Introduction to Environmental Engineering

Fall, Spring. 3(3-0)

P. CEM 141 or CEM 151, MTH 132, CPS 101 or CPS 131.

Elements of hydrology. Groundwater and surface water supply and contamination. Treatment systems for drinking water, wastewater, air, and solid and hazardous waste. Introduction to noise and radiation pollution.

#### 305. Structural Analysis

Fall, Spring. 3(3-0)

P: MSM 211. R: Open only to Civil Engineering majors. Determinate and indeterminate plane structures. Linearity, stability, determinacy. Virtual-work calculation of forces and displacements. Flexibility and stiffness methods in plane structures.

# Soil Mechanics

Fall, Spring. 3(2-3)

P: MSM 211. R: Open only to Civil Engineering and Biosystems Engineering majors. Completion of Tier I writing requirement.

Engineering properties of soil and their measurement. Effective-stress concept. Permeability and seepage. Compaction. Consolidation, shear strength and stressstrain behavior.

## Introduction to Fluid Mechanics

Fall, Spring. 4(3-2)

P: MTH 235 or concurrently. R: Open only to Civil Engineering and Biosystems Engineering majors. Completion of Tier I writing requirement. Not open to students with credit in ME 332.

Fluid properties, fluid statics, fluids in motion. Conservation of mass, energy and momentum. Dimensional analysis and similitude. Internal and external flows. Applications.

#### 337. Civil Engineering Materials I

Fall, Spring. 4(3-3)

P: MSM 211 or concurrently. R: Open only to Civil Engineering majors.

Common civil engineering construction and paving materials: aggregates, inorganic cements, asphalts, concretes, wood and steel. Composition, structure, physical and mechanical properties, tests, and production mix design.

#### 400. Structural Mechanics

Fall, 3(3-0)

P: CE 305. R: Open only to Civil Engineering majors, Matrix methods of structural analysis. Flexibility method. Direct stiffness method for plane structures. Elastic supports, inclined supports, member releases and non-prismatic members. Application software.

### Design of Steel Structures

Fall. 3(3-0)

P: CE 305, R: Open only to Civil Engineering majors. Design of steel beams, columns, tension members and connections. Stability and plastic strength.

### Design of Concrete Structures

Spring. 3(3-0)

P: CE 305, CE 337. R: Open only to Civil Engineering majors.

Design of reinforced concrete beams, slabs, columns and footings.

# Geotechnical Engineering

Fall. 4(4-0)

P: CE 312. R: Open only to Civil Engineering majors. Shallow foundation design including bearing capacity, stress distribution, and settlement analysis. Pile foundations. Design of retaining structures including rigid walls, braced excavations, and sheet-pile walls. Stability of slopes and embankments.

### Engineering Hydrology Fall. 3(3-0)

P: STT 351; CE 321 or concurrently. R: Open only to College of Engineering, College of Natural Science, and Crop and Soil Sciences majors.

Hydrologic cycle, streamflow, precipitation, evapotranspiration, infiltration, groundwater. Quantitative methods of analysis: probability, unit hydrograph, routing, and flow nets. Groundwater supply development, well flows.

### Applied Hydraulics 422

Spring. 3(2-2) P: CE 321 or ME 332. R: Open only to Civil Engineering, Mechanical Engineering, and Biosystems Engineering

Fundamentals of open-channel flow. Rapidly and gradually varied nonuniform flow analysis. Confined flows past submerged bodies, in pipe networks, and in turbo machinery. Design applications.

#### Pavement Design and Analysis I 431. Fall. 4(4-0)

P: CE 312, CE 337. R: Open only to Civil Engineering majors.

Highway and airfield pavement structural design. Performance measures. Failure mechanisms, popular thickness design procedures, and design considerations for surface friction, pavement joints, and drainage. Design of rehabilitation alt ernatives, design of overlays.

#### 441. **Highway Operations**

Fall, 3(3-0)

P: STT 351. R: Open only to Civil Engineering majors. Driver and vehicle characteristics affecting traffic flow. Traffic flow density, highway speed and capacity. Signal control of intersections and networks. Risk management and liability.

### Airport Planning and Design Fall. 3(3-0)

R: Open only to Civil Engineering majors.

Components of the airport system including ground access facilities, aircraft characteristics, air traffic control, airport configuration, capacity analysis.

# Advanced Airport Systems Design

Spring. 3(3-0)

P. CE 442. R. Open only to Civil Engineering majors. Analysis and design of airport systems using computer models. Design parameters, demand analysis. Runway orientation and capacity, airside delay, vehicle processing. Passenger processing.

SA: CE 842
