820. Forensic Science II
Spring. 3(3-0)
P: CJ 810, CJ 819. R: Open only to graduate students in the Criminal Justice or Social Science-Criminal Justice major.
Continuation of CJ 819. Analysis of trace evidence including hairs and fibers, paints and coatings, explosives and fire residues, glass and soil.

825. Managing Police Organizations
Fall. 3(3-0)
P: CJ 819. R: Open only to graduate students in the Criminal Justice or Social Science-Criminal Justice major.
Issues and practices in police management. Management philosophy and personnel management.

836. Assessment of Police Policies and Operations
Spring. 3(3-0)
P: CJ 835. R: Open only to graduate students in the Criminal Justice or Social Science-Criminal Justice major.
Recent policy-related research and its application to the deployment of human resources.

855. Delinquency Prevention and Control
Fall. 3(3-0)
R: Open only to graduate students in the Criminal Justice or Social Science-Criminal Justice major.

856. Adult Corrections
Fall. 3(3-0)
R: Open only to graduate students in the Criminal Justice or Social Science-Criminal Justice major.
Traditional and contemporary adult correctional practices. Social, political, economic, and organizational factors affecting correctional policies.

857. Quantitative Methods in Criminal Justice Research
Spring. 3(3-0)
P: CJ 811. R: Open only to graduate students in the School of Criminal Justice. 
Descriptive and inferential statistics and computer use in criminal justice research.

890. Independent Study
Fall, Spring. 1 to 6 credits. A student may earn a maximum of 6 credits in all enrollments for this course.
R: Open only to graduate students in the School of Criminal Justice or Social Science-Criminal Justice major.
Individual research and writing under faculty supervision.

100. Forage Crops
Fall. 3(0-2)
Forage crop production, management, and utilization.

105. Fundamentals of Soil and Landscape Science
Fall. (3-6) Interdepartmental with Forestry.
P: CEM 141. 

202. New Horizons in Biotechnology
Fall. 2(4) Interdepartmental with Entomology.
P: CSS 110; CSS 210 or concurrently.
Perspectives on biotechnology for safer food production, environmental quality, and improved human health. Impacts of biotechnology on the national economy. Political and ethical ramifications of applied biotechnology.

203. Introduction to Turfgrass Management
Fall. 3(2-2)
P: CSS 110; CSS 210 or concurrently.
Turfgrass utilization, identification, establishment and management principles. Responses to cultural practices.

222. Athletic Field Maintenance
Fall. 2 credits.
P: CSS 210 or approval of department.
Art and science of athletic field maintenance including root zone modification, traffic wear management, field preparation techniques, wet weather strategies, safety concerns, legal issues, and crisis management. Field trips required.

262. Turfgrass Management Seminar
Fall. 3(2-2)
P: CSS 220 or concurrently.
Presentations by individuals involved in turfgrass and golf course management. Topics include golf course construction and operations, preparation for tournaments, and public relations.

310. Soil Management and Environmental Impact
Spring. 3(2-3)
Management of soil physical and chemical properties for the production of food and fiber. Soil management systems that reduce the environmental impact on soil, water and air resources and maximize crop production potential.

322. Advanced Turf Management
Spring. 3(0-0)
P: CSS 222. R: Completion of Tier I writing requirement.
Effect of light, heat, cold, drought, and traffic on turfgrass growth and development. Impact of practices such as mowing, cultivation, and compaction on the growth of grasses.
Descriptions — Crop and Soil Sciences of Courses

342. Turfgrass Soil Management
   Fall. 3(3-0)

350. Introduction to Plant Genetics
   Spring. 3(4-0)
   P: BOT 105 or BS 111. R: Not open to freshmen or sophomores.

352. Management of Turfgrass Pests
   Fall. 4(2-0) Interdepartmental with Botany and Plant Pathology, and Entomology.
   P: CSS 222.
   Chemical, biological, and cultural methods of managing weeds, diseases, and insect pests of turfgrasses. Environmental considerations in pest management.

370. Agricultural Cropping Systems Management
   Fall. 3(2-3)
   P: CSS 101 or CSS 210; MTH 119 or MTH 118. R: Not open to freshmen and sophomores.

380. Crop Physiology
   Spring of even-numbered years. 3(2-3)
   P: CSS 101; BOT 105 or BOT 301. R: Not open to freshmen and sophomores.
   Physiological and metabolic function of plants from a whole plant viewpoint. Environmental effects on crop growth, development, and yield.

402. Principles of Weed Science
   Fall. 3(2-2)
   P: BOT 105, CEM 143. R: Not open to freshmen and sophomores.
   Weed biology and ecology. Cultural, mechanical, biological, and chemical control practices. Herbicide action, selectivity in plants, and effects on environment.

404. Forest and Agricultural Ecology
   Fall. 4 credits. Interdepartmental with Forestry. Administered by Forestry.
   P: CSS 210; BOT 105 or BS 110.
   Structure and function of ecosystems managed for crop and wood production. Productivity, nutrient cycling, community dynamics as affected by management intensity and natural disturbance. Dynamics of managed versus natural ecosystems.

406. Seed Production and Technology
   Fall of even-numbered years. 3(2-2)
   P: CSS 101, CSS 350. R: Not open to freshmen and sophomores.
   Principles and practices of field seed production. Crop improvement, variety release, seed production, seed technology and evaluation involved in producing high quality field crop seed.

409. Forest Hydrology
   Spring of odd-numbered years. 3 credits. Interdepartmental with Forestry and Resource Development. Administered by Forestry.
   P: CSS 210, MTH 118 R: Not open to freshmen and sophomores.
   Science and technology of the hydrologic cycle and water resources in forest, wildland, wetland, and rural watersheds.

425. Microbial Ecology
   Spring. 3(3-0) Interdepartmental with Microbiology. Administered by Microbiology.
   P: MIC 391.
   Microbial population and community interactions. Microbial activities in natural systems, including associations with plants or animals.

426. Biogeography
   Summer. 3 credits. Given only at W.K. Kellogg Biological Station. Interdepartmental with Microbiology, Geology, Sciences, and Zoology. Administered by Microbiology.
   P: BS 110 or BS 111, CEM 143 or CEM 251.
   Integration of the principles of ecology, microbiology, geochemistry, and environmental chemistry. Societal applications of research in aquatic and terrestrial habitats.

450. Soil Fertility and Chemistry
   Fall. 3(2-2)
   P: CSS 210. R: Not open to freshmen and sophomores.

440. Soil Biophysics
   Fall of even-numbered years. 3(2-2)
   P: CSS 210. R: Not open to freshmen and sophomores.
   Plant growth properties and soil physical conditions which influence productivity. Principles and applications of soil texture, structure, mechanical impedance, aeration and water. Root responses to the environment.

441. Plant Breeding and Biotechnology
   Spring. 4(2-2) Interdepartmental with Horticulture and Forestry.
   P: CSS 350.
   Plant improvement by genetic manipulation. Genetic variability in plants. Traditional and biotechnological means of creating and disseminating recombinant genotypes and cultivars.

451. Cellular and Molecular Principles and Techniques for Plant Sciences
   Spring. 4(3-0) Interdepartmental with Forestry and Horticulture.
   P: CSS 350 or ZOL 541.
   Principles, concepts, and techniques of agricultural plant biotechnology. Recombinant DNA technology, plant molecular biology, transformation, cell tissue, and organ culture in relation to plant improvement.

455. Pollutants in the Soil Environment
   Fall. 3(3-0)
   P: CEM 143. R: Open only to seniors and graduate students.
   Completion of Tier I writing requirement. Chemical and biological reactions of organic and inorganic pollutants in soils.

464. Statistical Methods for Biologists I
   Fall. 3(3-0) Interdepartmental with Statistics and Probability, and Animal Science. Administered by Statistics and Probability.
   P: SFT 481.
   Principles of biological data analysis. Estimation of population parameters. Testing hypotheses. Linear correlation and regression (prediction). Analysis of variance (ANOVA) and covariance (ANCOVA) using data from crop, forestry, and animal experiments. Application of biostatistics to practical situations.

465. Statistical Methods for Biologists II
   Spring. 3(3-0) Interdepartmental with Statistics and Probability, and Animal Science. Administered by Statistics and Probability.
   P: SFT 484.
   Concepts of reducing experimental error: covariance, complete and incomplete block designs, latin squares, split plots, repeated-measures designs, regression applications, and response surface designs.

470. Soil Resources
   Fall. 3(2-3)
   P: CSS 210. R: Not open to freshmen and sophomores.
   Evaluation of the properties, genesis, and classification of soils resources to assist in making land-use decisions. Field trips required.

477. Pest Management I: Pesticides in Management Systems
   Fall. 3(3-0) Interdepartmental with Entomology, Horticulture, and Fisheries and Wildlife. Administered by Entomology.
   P: CEM 143; BOT 405 or CSS 402, ENT 404 or ENT 470 or FW 438, 439.
   Chemistry, efficient use, and environmental fate of pesticides. Legal and social aspects of pesticide use.

478. Pest Management II: Biological Components of Management Systems
   Spring of odd-numbered years. 3 credits. Interdepartmental with Entomology, Horticulture, Fisheries and Wildlife, and Forestry. Administered by Entomology.
   P: ENT 470 or ENT 470 or BOT 405 or CSS 402 or FW 438, 439.
   Completion of Tier I writing requirement. Principles of host plant resistance and biological control and their relationship to the design of agroecosystems. Classification of insect biological control agents.

481. Agricultural Research Systems in Developing Countries
   Summer. 3(2-0) Interdepartmental with Agriculture and Natural Resources, Agricultural Economics, and Animal Science. Administered by Agriculture and Natural Resources.
   R: Open only to seniors and graduate students in the College of Agriculture and Natural Resources. Planning, organizing, and managing agricultural research systems. Problems and alternative reforms to improve research productivity. Adapting new agricultural technology in developing countries.

485. Biotechnology in Agriculture: Applications and Ethical Issues
   Spring of even-numbered years. 3(3-0) Interdepartmental with Agriculture, Philosophy, and Forestry. Administered by Forestry.
   P: BS 105 or BOT 105. R: Not open to freshmen and sophomores.
   Current and future roles of biotechnology in agriculture: scientific basis, applications. Environmental, social, and ethical concerns.

490. Independent Study
   Fall, Spring, Summer. 1 to 4 credits. A student may earn a maximum of 8 credits in all enrollments for this course.
   P: CSS 101 or CSS 210. R: Approval of department; application required.
   Individual work on field, laboratory, or library research problem of special interest to the student.

491. Special Topics
   Fall, Spring, Summer. 1 to 4 credits. A student may earn a maximum of 8 credits in all enrollments for this course.
   P: CSS 210 or CSS 210. R: Approval of department; application required.
   Topics in seed production, crop physiology, turfgrass management, organic soils, turfgrass soils, soil fertility, plant and soil relationships, genetics, biotechnology, environmental science, or sustainable agriculture.

492. Seminar
   Fall. 1(1-0)
   P: CSS 210; CSS 342 or CSS 370. R: Completion of Tier I writing requirement. Synthesis, integration and application of agronomic principles to current issues in agronomy via discussion and oral and written communication.
807. **Physiological Crop Ecology**  
Fall of even-numbered years. 2(2-0)  
Environmental factors that limit crop distribution and productivity. Physiological basis for stress injury, resistance to temperature extremes, flooding, drought, and salinity.

808. **Herbicide Action and Metabolism**  
Spring of odd-numbered years. 2(2-0)  
Properties and characteristics of herbicides. Processes involved in herbicide action, transport, and fate in plants and soils.

819. **Advanced Plant Breeding**  
Fall. 3(0-3) Interdepartmental with Horticulture and Forestry. Administered by Horticulture.  
P: CSS 450, STT 422.  
Genetic expectations resulting from breeding strategies with cross- and self-pollinated crop plants. Germplasm collections, mapping populations, and modifications of reproductive biology useful for crop improvement.

823. **Methods in Genetic Engineering of Plants**  
Fall of even-numbered years. 4 credits. Interdepartmental with Horticulture and Forestry.  

825. **Clay Mineralogy and Soils Genesis**  
Spring of even-numbered years. 4(3-3) Interdepartmental with Geological Sciences.  
R: Open only to graduate students in College of Agriculture and Natural Resources, College of Engineering, or College of Natural Science.  
Mineral structures. X-ray diffraction, pedogenic processes, and mineral transformations and stability.

827. **Techniques in Cytogenetics**  
Fall of odd-numbered years. 1 credit. Interdepartmental with Horticulture and Forestry.  
Preparation of chromosomes from commercially important plants for cytogenetic analysis.

829. **Advanced Microbial Ecology**  
Fall of even-numbered years. 3(0-3) Interdepartmental with Microbiology. Administered by Microbiology.  
Functional roles of microorganisms, their population dynamics and interactions, and their mechanisms of evolutionary change in natural communities, laboratory experiments, and mathematical models.

831. **Soil and Plant Resources for Sustained World Food Production**  
Spring of odd-numbered years. 3(3-0)  
World food production capacities related to soil and climatic resources. Management and utilization of genetic resources for sustained production of human foods and animal feeds.

832. **Environmental and Natural Resource Law**  
Fall. 3(0-3) Interdepartmental with Resource Development, Agricultural Economics, Forestry, and Geography. Administered by Resource Development.  
P: RD 430.  
Origin and development of environmental law. Theories of power, jurisdiction, sovereignty, property interests, pollution, and other bases for legal controls of natural resources. Common law and constitutional limitations on governmental power.

836. **Plant Evolution and the Origin of Crop Species**  
Fall of even-numbered years. 3(3-0) Interdepartmental with Horticulture and Forestry. Administered by Horticulture.  
P: CSS 350.  
Cultural and biological aspects of the evolution of domestic plants. Origin and diversity of cultivated plants.

837. **Confocal Microscopy**  
Fall, Spring. 2(2-2) Interdepartmental with Natural Science.  
R: Approval of department; application required.  

840. **Soil Physics**  
Fall of odd-numbered years. 3(2-3)  
R: Open only to graduate students in College of Agriculture and Natural Resources, College of Engineering, or College of Natural Science.  
Physical properties of soil including texture, structure, consistency, aeration, moisture content, and temperature. Quantitative measurement of plant growth. Agromonic and engineering practices.

841. **Soil Microbiology**  
Spring of even-numbered years. 3(3-0) Interdepartmental with Microbiology. Administered by Microbiology.  
P: MIC 405.  
Ecology, physiology, and biochemistry of microorganisms indigenous to soil.

850. **Soil Chemistry**  
Spring. 3(3-3)  
R: Open only to graduate students in College of Agriculture and Natural Resources, College of Engineering, or College of Natural Science.  
Ion activities, ionic exchange and equilibrium reactions. Soil pH, macro- and micronutrients, saline soils and availability of nutrients to plants.

853. **Plant Mineral Nutrition**  
Fall of odd-numbered years. 3(0-3) Interdepartmental with Horticulture.  
P: BGT 101.  

855. **Interfacial Environmental Chemistry**  
Fall of even-numbered years. 4(4-0)  
R: Open only to graduate students in College of Agriculture and Natural Resources, College of Engineering, or College of Natural Science.  

860. **Ecology and Evolution in Terrestrial Systems**  
Summer. 4 credits. Given only at W.K. Kellogg Biological Station. Interdepartmental with Botany and Plant Pathology, and Zoology. Administered by Botany and Plant Pathology.  
P: STT 422.  
Field experimental and quantitative approaches to ecological and evolutionary mechanisms.

863. **Mineral-Water Interactions**  
Spring of odd-numbered years. 4(3-2) Interdepartmental with Geological Sciences. Administered by Geological Sciences.  
R: Open only to graduate students in Crop and Soil Sciences or Geological Sciences or Geography.  
Mineralogy, petrology and geochemistry of fluid-rock reactions in geologic, sedimentary and geochemical cycles. Rock and mineral weathering, soil formation, genesis and burial diagenesis of sediments and sedimentary rocks, and metamorphism.

865. **Organic Chemistry of Soils**  
Spring of odd-numbered years. 2(2-0)  
Chemistry of natural and anthropogenic organic substances in soils.

890. **Independent Study**  
Fall, Summer. 1 to 6 credits. A student may earn a maximum of 6 credits in all enrollments for this course.  
R: Open only to graduate students in College of Agriculture and Natural Resources, College of Engineering, or College of Natural Science.  
Individual study on field, laboratory, or library research.

891. **Current Topics in Ecology and Evolution**  
Summer. 1 credit. Given only at W.K. Kellogg Biological Station. A student may earn a maximum of 8 credits in all enrollments for this course.  
R: Open only to graduate students in College of Agriculture and Natural Resources, College of Engineering, or College of Natural Science.  
Presentation and critical evaluation of theoretical and empirical developments by visiting scientists.

891B. **Selected Topics in Plant Breeding and Genetics**  
Fall, Spring. Summer. 1 to 2 credits. A student may earn a maximum of 6 credits in all enrollments for this course.  
R: Open only to graduate students in Plant Breeding and Genetics. Approval of department.  
Selected topics in plant breeding.

892. **Plant Breeding and Genetics Seminar**  
Fall, Spring, Summer. 1(1-0) A student may earn a maximum of 6 credits in all enrollments for this course.  
R: Interdepartmental with Horticulture and Forestry. Administered by Horticulture.  
Experience in review, organization, oral presentation, and analysis of research.

893. **Selected Topics**  
Fall, Spring, Summer. 1 to 3 credits. A student may earn a maximum of 6 credits in all enrollments for this course.  
R: Open only to graduate students in College of Agriculture and Natural Resources, College of Engineering, or College of Natural Science.  
Selected topics in crop and soil sciences of current interest and importance.

899. **Master's Thesis Research**  
Fall, Spring, Summer. 1 to 12 credits. A student may earn a maximum of 49 credits in all enrollments for this course.  
R: Open only to master's students in Crop and Soil Sciences.

921. **Contemporary Statistical Models in Biology**  
Fall of odd-numbered years. 3(3-0)  
P: STT 465 or approval of department. Working knowledge of SAS.  
930. Advanced Forest Genetics
Fall of even-numbered years, 2(1,2) Interdepartmental with Forestry and Horticulture. Administered by Forestry.
P: HRT 619 or HRT 636.
Applications of genetics, plant breeding, and biotechnology to the improvement and preservation of diversity of tree species.

940. Advanced Soil Physics
Fall of even-numbered years. 2(2-0)
P: CSS 440. R: Open only to graduate students in College of Agriculture and Natural Resources, College of Engineering, or College of Natural Science.
Modelling major physical transport mechanisms in the soil profile. Aeration, temperature and solute movement. Water movement and evaporation.

941. Quantitative Genetics in Plant Breeding
Spring of even-numbered years, 3(3-0) Interdepartmental with Forestry and Horticulture.
P: CSS 440, SFT 422.
Theoretical genetic basis of plant breeding with emphasis on traits exhibiting continuous variation. Classical and contemporary approaches to the study and manipulation of quantitative trait loci.

943. Techniques of Analyzing Unbalanced Research Data
Spring, 3(3-0) Interdepartmental with Animal Science, Forestry, Horticulture, and Fisheries and Wildlife. Administered by Animal Science.
P: SFT 464. R: Open only to graduate students in the College of Agriculture and Natural Resources.
Linear model techniques to analyze research data characterized by missing and unequal number of observations in classes. Simultaneous consideration of multiple factors, estimable comparisons and hypotheses testing. Computational strategies. Variance and covariance components. Breeding values.

999. Doctoral Dissertation Research
Fall, Spring, Summer. 1 to 24 credits. A student may earn a maximum of 99 credits in all enrollments for this course.
R: Open only to doctoral students in Crop and Soil Sciences.

ECONOMICS

Department of Economics
The Eli Broad College of Business and The Eli Broad Graduate School of Management

201. Introduction to Microeconomics
Fall, Spring, Summer. 3(3-0)
R: Not open to students with credit in EC 251H.
Economic institutions, reasoning and analysis. Consumption, production, determination of price and quantity in different markets. Income distribution, market structure and normative analysis.

202. Introduction to Macroeconomics
Fall, Spring, Summer. 3(3-0)
R: Not open to students with credit in EC 252H.

210. Economics Principles Using Calculus
Fall. 3(3-0)
P: MTH 333 or MTH 153L or MTH 156. R: Not open to students with credit in EC 201 or EC 202.
A combined microeconomics and macroeconomics course. Emphasis on topics of interest in engineering and management, such as discounting, cost-benefit analysis, innovation, externalities, and the role of government regulation.

251H. Microeconomics and Public Policy
Fall, Spring. 4(4-0)
R: Not open to students with credit in EC 301.
Theories of consumer behavior, production and cost. Output and price determination in competition and monopoly. Welfare economics, general equilibrium, externalities, and public goods.

252H. Macroeconomics and Public Policy
Fall, Spring, Summer. 3(3-0)
P: EC 251H or EC 201, EC 301. R: Not open to students with credit in EC 302.
Theory of national income, unemployment, inflation and economic growth and its application to economic analysis and policy.

301. Intermediate Microeconomics
Fall, Spring, Summer. 3(3-0)
P: EC 201, EC 202. R: Not open to students with credit in EC 251H.
Theories of consumer choice, production, cost, perfect competition, and monopoly. Welfare economics, general equilibrium, externalities and public goods.

302. Intermediate Macroeconomics
Fall, Spring, Summer. 3(3-0)
P: EC 201, EC 202. R: Not open to students with credit in EC 252H.

303. Economic Thought I
Fall. 3(3-0)
P: EC 201 or EC 251H, EC 202 or EC 252H.
Forerunners of classical economics. Classical economic thought from Adam Smith to J.S. Mill. The socialist reaction.
SA: EC 403

304. Economic Thought II
Spring. 3(3-0)
P: EC 201 or EC 251H, EC 202 or EC 252H.
Decline of classical economics and rise of marginalist value and distribution theory. Marxism and institutionalism.
SA: EC 404

306. Comparative Economic Systems
Fall. 3(3-0)
P: EC 201 or EC 251H, EC 202 or EC 252H.
Characteristics and functions of economic systems. Alternative patterns of economic control, planning, and market structure. Theories, philosophies, and experiences associated with capitalism, socialism, and mixed economies.

310. Economics of Developing Countries
Spring. 3(3-0)
P: EC 201 or EC 251H
Overview of economic patterns and policy issues of developing countries such as economic growth and structural transformation, state control versus markets, poverty and human welfare, investments in human resources, and trade and industrialization.

330. Money, Banking, and Financial Markets
Fall, Spring, Summer. 3(3-0)
P: EC 201 or EC 251H, EC 202 or EC 252H.
Money markets and financial intermediation. Money, the Federal Reserve System, and monetary policy. Regulation of money markets.

335. Taxes, Government Spending and Public Policy
Fall, Spring, Summer. 3(3-0)
Interdepartmental with Public Resource Management.
P: EC 201 or EC 251H. R: Not open to students with credit in EC 435 or EC 456.
Economics of the public sector. Public goods, externalities, design and incidence of the tax system. Equity and efficiency effects of government programs.

340. Survey of International Economics
Fall, Spring, Summer. 3(3-0)
P: EC 201 or EC 251H, EC 202 or EC 252H. R: Not open to students with credit in EC 440 or EC 441.

350. Private Enterprise and Public Policy
Fall, Spring, Summer. 3(3-0)
P: EC 201 or EC 251H.
Effects of antitrust, economic regulation, and other public policies on competition, monopoly, and other market problems in the United States economy.

385. International Labor Market Policy and Labor Relations
Fall, Spring, Summer. 3(3-0)
P: EC 201 or EC 251H.

386. International Labor Market Policy and Labor Relations
Fall, Spring, Summer. 3(3-0)
P: EC 201 or EC 251H.
International labor market and labor relations in the United States, Western Europe, Japan, Canada, and Australia. Analysis of how different policies affect wages, living standards, and economic efficiency. Labor markets and integration of national economies.

401. Advanced Microeconomics
Fall, Spring. 3(3-0)
P: EC 301 or EC 251H.
Economics of uncertainty and incomplete information. Game theory and theories of oligopoly. Transaction costs. Advanced topics in welfare economics, general equilibrium, externalities, and public goods.
