812 Graduate Seminar
Fall, Spring. 1(1-0) A student may earn a maximum of 10 credits in all enrollments for this course.
Current research topics. Student presentation required.

815 Insect Behavior
Fall of odd years. 3(2-3) RB: (ENT 404) Fundamentals of insect behavior with emphasis on mechanisms. Quantitative methods.

818 Systematics, Morphology, Biology: Adults
Spring of even years. 3(1-7) RB: (ENT 404) Classification, identification, morphology, biology and evolutionary relationships of adult insects. Specimens provided.

838 Systematics, Morphology, Biology: Immatures
Fall of even years. 3(3-0) RB: (ENT 404) Classification, identification, morphology, biology and evolutionary relationships of immature insects. Emphasis on terrestrial holometabola. Collection required.

844 Insect Ecology, Evolution and Conservation
Spring of odd years. 3(2-2) RB: (ENT 404) Unique characteristics and principles of insect ecology and evolution including trophic relationships, community structure, speciation, coevolution and conservation.

848 Biological Control of Insects and Weeds
Spring of odd years. 3(2-2) RB: Ecology and introductive entomology. Principles and practices in the application of natural enemies to control arthropod and weed pests. Identification and biology of beneficial species (parasitoids, predators, pathogens) and the ecological basis for their use in pest management systems.

850 Insect Physiology
Spring of odd years. 3(2-2) RB: (ENT 404) System by system description of insect form and function. Examples of how physiological systems are coordinated for complex biological functions.

851 Molecular Entomology
Fall of odd years. 3(3-0) Interdepartmental with Genetic engineering. Analysis of molecular processes unique to insects, and their potentials for genetic engineering.

870 Nematode Management in Crop Systems
Summer of even years. 3(2-3) Interdepartmental with Plant Pathology. RB: (PLP 405) SA: BOT 870. Biology, host parasite relationships and management by farming and cropping systems of selected nematode diseases of economic plants.

880 Independent Study
Fall, Spring. 1 to 3 credits. A student may earn a maximum of 8 credits in all enrollments for this course. R: Open only to graduate students. Individual study on a field or laboratory research topic or review of published literature on a topic of interest.

889 Master's Research
Fall, Spring. 1 to 6 credits. A student may earn a maximum of 10 credits in all enrollments for this course. R: Open only to master's students in Entomology. Master's degree Plan B research paper.

899 Master's Thesis Research
Fall, Spring, Summer. 1 to 12 credits. A student may earn a maximum of 24 credits in all enrollments for this course. R: Open only to master's students in Entomology. Master's thesis research.

940 Analytical Techniques for Bioactive Compounds: Separation
Spring of odd years. 4(2-6) Extraction and chromatographic separations of compounds from environmental matrices.

941 Analytical Techniques for Bioactive Compounds: Confirmation
Spring of even years. 4(2-6) Instrumental confirmation of compounds from environmental matrices.

999 Doctoral Dissertation Research
Fall, Spring, Summer. 1 to 12 credits. A student may earn a maximum of 90 credits in all enrollments for this course. R: Open only to Ph.D. students in Entomology. Doctoral dissertation research.

ENVIRONMENTAL ECONOMICS AND POLICY EEP

Department of Agricultural Economics
College of Agriculture and Natural Resources

201 Community Economics
Fall. 3(3-0) SA: PRM 201 Policy analysis of state and local government revenues, services, and private business regulation. Impact on resource use, economic development, income distribution and human values.

211 Introduction to Gender and Environmental Issues
Spring. 3(3-0) Interdepartmental with Fisheries and Wildlife; Forestry; Resource Development; Women's Studies. Administered by Department of Fisheries and Wildlife. R: Not open to freshmen. SA: PRM 211 The concept of gender. Overview of environment and habitat. Historical gender roles in environmental management. Gender-based theoretical perspectives. Case studies on developing and developed countries. Environmental management with emphasis on fisheries, wildlife and wetlands. Women environmental professionals.

255 Ecological Economics
Fall, Spring. 3(3-0) RB: (EC 201) SA: PRM 255 Relationship between the economy and the natural environment. Economic organization and sustainability. Economic concepts applied to natural resources and agriculture.

260 World Food, Population and Poverty
Fall. 3(3-0) SA: PRM 260 Description and analysis of world food, population and poverty problems. Interrelationships between developed and developing countries.

320 Environmental Economics
Spring. 3(3-0) P:M: (EEP 255) SA: PRM 320 Analytical methods for evaluating economic impacts of environmental policies and understanding the economic causes of environmental problems.

335 Taxes, Government Spending and Public Policy
Fall, Spring, Summer. 3(3-0) Interdepartmental with Economics. Administered by Department of Economics. P:M: (EC 201 or EC 251H) SA: PRM 335 Not open to students with credit in EC 435 or EC 436. Economics of the public sector. Public goods, externalities, design and incidence of the tax system. Equity and efficiency effects of government programs.

404 Public Sector Budgeting and Program Evaluation (W)
Spring. 3(3-0) P:M: Completion of Tier I writing requirement. RB: (EC 201 or EC 252) and (STT 200 or STT 201 or STT 315) R: Not open to freshmen or sophomores. SA: PRM 404 Structure and finance of government. Approaches to public sector budgeting. Evaluation of output of programs and community services. Impact and multiple outcome analysis.

405 Corporate Environmental Management
Fall. 3(3-0) Interdepartmental with Agribusiness Management. P:M: (EEP 255 or ABM 332 or MGT 315 or MGT 325) SA: PRM 405 Integration of environmental protection and pollution prevention with business management. Economic and strategic analysis of environmental protection.

430 Law and Resources
Fall. 3(3-0) Interdepartmental with Resource Development; Forestry. Administered by Department of Resource Development. RB: (RD 301) R: Open only to juniors or seniors or graduate students. SA: PRM 430 Legal principles applied to natural resource use. Sovereignty, property rights, land and water use, jurisdiction, public trust doctrine, fish and game law, mineral rights, and eminent domain. Case and statutory law analysis.

433 Law and Social Change
Spring. 3(3-0) Interdepartmental with Resource Development; Sociology. Administered by Department of Resource Development. RB: (RD 301 or RD 336 or GBL 395) R: Open only to juniors or seniors. SA: PRM 433 Function of law in a modern society. Concepts of power, public regulation, civil rights, and property rights. Limits on freedom.

440 The Resource Development Policy Process in Michigan
Spring. 3(3-0) Interdepartmental with Resource Development. Administered by Department of Resource Development. RB: (RD 200 or EEP 201 or PLB 301 or PLB 324) SA: PRM 440 Public policy formulation related to environmental and economic development issues at state and community levels. Observation and analysis of actual proceedings. Field trips required.
453 **Women and Work: Issues and Policy Analysis**  
Spring. 3(3-0) Interdepartmental with Economics; Women's Studies. RB: (EC 201 or EC 202 or EEP 201 or concurrently) R: Not open to freshmen or sophomores. Current and past quantity and quality of women's participation in the labor force. Gender differentials in earnings and occupations. Employment discrimination. Laws, especially affirmative action laws. Social policy effects. International issues.

470 **Theory and Practice in Community and Economic Development**  
Fall. 3(3-0) Interdepartmental with Resource Development; Sociology. Administered by Department of Resource Development. P.M: (EC 201 or EC 202) SA: PRM 470 Concepts, principles, models, and skills for community and economic development. Community participation in local development initiatives.

493 **Professional Internship in Public Resource Management**  
Fall, Spring, Summer. 1 to 6 credits. A student may earn a maximum of 7 credits in all enrollments for this course. R: (EEP 201 or EEP 255) R: Open only to Environmental Economics and Policy majors. Approval of department; application required. SA: PRM 490  
In-depth independent study of topics affecting public resource management. Complementary with previous coursework, adapted to career aspirations.

ENVIRONMENTAL ENGINEERING  

Department of Civil and Environmental Engineering  
College of Engineering  

427 **Environmental Toxicology and Society**  
Spring of odd years. 3(3-0) Interdepartmental with Animal Science; Sociology. Administered by Department of Animal Science. RB: (ISB 200 or ISB 202 or ISB 204 or ISB 206H or BMB 200 or BS 111 or BS 110)  
Impact of environmental chemicals on health and modern society. Cellular and organ functions and their interface with the environment. Limitations of scientific investigation and environmental regulations.

800 **Environmental Engineering Seminar**  
Fall, Spring. 1(1-0) R: Open only to Environmental Engineering majors. Current research in environmental engineering.

801 **Dynamics of Environmental Systems**  
Spring. 3(3-0)  
Principles of mass balance, reaction kinetics, mass transfer, reactor theory in environmental engineering.

802 **Physicochemical Processes in Environmental Engineering**  
Fall. 3(3-0) R: (ENE 801)  
Physical and chemical principles of air and water pollution control and environmental contaminants in water, air and soils.

804 **Biological Processes in Environmental Engineering**  
Fall. 3(3-0) R: (ENE 801 or concurrently)  
Engineering of microbial processes used in wastewater treatment, in-situ bioreclamation, and solid waste stabilization.

806 **Laboratory Feasibility Studies for Environmental Remediation**  
Spring. 3(2-4) R: (ENE 802 and ENE 804)  
Open only to graduate students in Environmental Engineering. Environmental Engineering-Environmental Toxicology, and Environmental Engineering Urban Studies. Not open to students with credit in ENE 803 or ENE 805. Analysis and characterization of contaminants in soil or water. Conceptual and preliminary design of treatment systems. Use of treatability studies to evaluate treatment options. Oral presentations and preparation of consulting reports with design recommendations.

807 **Environmental Analytical Chemistry**  
Fall. 3(3-0) R: Open only to Environmental Engineering majors. Techniques for measurement and analysis in environmental engineering. Sample preparation. Quality assurance.

808 **Environmental Analytical Chemistry Laboratory**  
Spring. 1(0-3) R: (ENE 807) R: Open only to Environmental Engineering majors. Laboratory work in environmental analytical chemistry.

880 **Independent Study in Environmental Engineering**  
Fall, Spring, Summer. 1 to 6 credits. A student may earn a maximum of 6 credits in all enrollments for this course. R: Open only to Environmental Engineering majors. Solution of environmental engineering problems not related to student's thesis.

890 **Selected Topics in Environmental Engineering**  
Fall, Spring. 3(3-0) A student may earn a maximum of 9 credits in all enrollments for this course. R: Open only to Environmental Engineering majors. Selected topics in new or developing areas of environmental engineering.

892 **Master's Research Project**  
Fall, Spring, Summer. 1 to 5 credits. A student may earn a maximum of 5 credits in all enrollments for this course. R: Open only to master's students in the Environmental Engineering major. Approval of department. Master's degree Plan B individual student research project. Original research, research replication, or survey and reporting on a research topic.

893 **Master's Design Project**  
Fall, Spring, Summer. 1 to 3 credits. A student may earn a maximum of 3 credits in all enrollments for this course. R: Open only to master's students in the Environmental Engineering major. Approval of department. Master's degree Plan B individual student environmental engineering design project.

899 **Master's Thesis Research**  
Fall, Spring, Summer. 1 to 8 credits. A student may earn a maximum of 24 credits in all enrollments for this course. Master's thesis research.

999 **Doctoral Dissertation Research**  
Fall, Spring, Summer. 1 to 24 credits. A student may earn a maximum of 72 credits in all enrollments for this course. Doctoral dissertation research.

EPI—Epidemiology  

Department of Epidemiology  
College of Human Medicine  

390 **Disease in Society: An Introduction to Epidemiology and Public Health**  
Spring. 3(3-0) Interdepartmental with Social Science.  
Human epidemiology and population health issues facing contemporary society, in both developed and less developed settings. Health-related information in the mass media and scholarly publications.

805 **Readings in the Historical Roots of Epidemiological Thought**  
Fall. 3(3-0) Interdepartmental with History. Historical evolution of models of disease causation and population perspectives on disease.

806 **Workshop in History of Public Health**  
Spring. 3(3-0) Interdepartmental with History. Historical reasoning, research and writing on a significant event or theme in history of epidemiology and public health.

810 **Introduction to Descriptive and Analytical Epidemiology**  
Fall. 3(3-0) R: Open only to master's students in the Epidemiology major or approval of department. SA: HM 810  
Study of disease from a population perspective as the interaction of host, agent, and environment. Fundamental concepts include case definition, measuring frequency of disease, mortality and morbidity data, and major study designs.
