FORESTRY

Department of Forestry College of Agriculture and **Natural Resources**

Michigan's Forests 101 Spring. 3(3-0)

Ecological, social and economic roles of Michigan's forests in historic and contemporary context. Geographic similarities and differences in forest resources.

201 Foundations of Forestry

Fall. 2(2-0) R: Open only to students in the Department of Forestry.

History, founding principles, and core concepts of forestry. Stewardship, conservation, professional ethics, and current forestry issues.

202 Introduction to Forestry

Fall, Spring. 3(3-0)

Historical development of forestry. Forest growth, protection, management, and products. Relationship of national and world economy and policy to forestry. Emphasis on multiple uses of forests.

204 Forest Vegetation

Fall. 4(3-3)

Nomenclature, classification, and identification of woody plants. Tree structure as it relates to growth and ecosystem dynamics.

Introduction to Gender and Environ-211

mental Issues Spring. 3(3-0) Interdepartmental with Environmental Economics and Policy and Fish-eries and Wildlife and Resource Develop-

ment and Women's Studies. Administered by Fisheries and Wildlife. R: Not open to freshmen. SA: PRM 211

The concept of gender. Overview of environment and habitat. Historical gender roles in environmental management. Gender-based theoretical perspectives. Case studies on developing and developed countries. Environmental management with emphasis on fisheries, wildlife and wetlands. Women environmental professionals.

Forests and the Global Environment 220 Fall. 3(3-0)

Relationships between forests, climatic and edaphic factors, and human influences upon forest re-sources. Deforestation, biodiversity, sustainable forest management and timber trade.

304

Wood Technology Fall. 4(3-2) P.M: (CEM 141 and PHY 231) and (MTH 116 or MTH 104 or LBS 117) R: Not open to freshmen or sophomores.

Structure and identification of wood. Physical and mechanical characteristics. Major industrial timber utilization processes including manufacture of lumber, furniture, composites, and paper.

305 Wood Composites

Spring. 2(2-0) P:M: CEM 141 or CEM 151 or CEM 181H

Physical and chemical principles of wood adhesion. Wood gluing. Wood adhesives and their properties. Manufacturing principles of wood-based composites. Composite design, process unit operations, property evaluation, and applications. New wood-based composite developments.

306 Forest Biometry

FOR

Spring. 4(3-2) P:M: MTH 124 or MTH 132 or LBS 118 RB: FOR 204 R: Not open to freshmen or sophomores.

Describing location and area of forest resources. Quantification of site, stand, and tree characteristics. Sampling and inventory. Predicting growth and yield.

330 Social Applications in Forestry

Spring. 2(2-0) P:M: ISS 210 or ISS 215 or ISS 220 or ISS 225

Social factors underlying forest resource management issues. Public values, attitudes, knowledge, and behavior with respect to forests. Public participation, conflict resolution, and communicating forestry issues.

Forest Products Internship 393

Summer. 2 credits. RB: FOR 304 or FOR 305 R: Open only to juniors in the Forestry major.

Pre-professional educational employment experience in forest products industry, government, or public agency.

Forest Harvest Operations 400

Spring. 2(1-2) P:M: CSS 210 and FOR 404 and ((MTH 124 or concurrently) or (MTH 132 or concurrently)) RB: FOR 406 and FOR 420 R: Open only to juniors or seniors.

Forest harvest systems, components and equipment, non-timber products, and road and transport planning. Soil, slope, riparian and wetland limitations. Erosion prediction and control. Harvest contracting and best management practices.

Forest and Agricultural Ecology 404

Fall. 3(3-0) Interdepartmental with Crop and Soil Sciences. Administered by Forestry. P:M: CSS 210 and (BOT 105 or BS 110) RB: ZOL 355

Ecological interactions crucial to the sustainable management of crop and forest ecosystems. Plant resources, competition, community development and dynamics, biodiversity, primary productivity, nutrient cycling, ecosystem structure and function, and impacts of global environmental change.

404L Forest and Agricultural Ecology Laboratory

Fall. 1(0-3) Interdepartmental with Crop and Soil Sciences. Administered by Forestry. P:M: CSS 210 and (BOT 105 or BS 110)

and (FOR 404 or concurrently) RB: ZOL 355 Field studies and data analysis of ecological processes central to the sustainable management of forest and agricultural resources. Field exercises cover primary production, community structure, soil resources, biodiversity, succession, nutrient cycling, critiques of primary literature. Two weekend field trips required.

406 Silviculture

Spring. 4(3-3) P:M: FOR 204 and FOR 404 R: Not open to freshmen or sophomores.

Ecophysiology of tree growth and reproduction. Stand structure, composition and growth. Intermediate stand treatments. Natural and artificial reproduction. Silvicultural techniques.

408 **Forest Resource Management**

Spring. 3(2-2) P:M: FOR 406 and FOR 464 RB: Forestry major.

Management of forests to sustain ecological, economic, and social values. Management and administration of forestry organizations. Timber production in multiple-use and ecosystem management contexts

410 Forest Conservation Thesis (W)

Fall, Spring. 3(3-0) P:M: Completion of Tier I writing requirement. RB: FOR 310 R: Open only to seniors in the Department of Forestry.

Selecting, researching, and evaluating a forest conservation issue and communicating findings in a thesis and a departmental seminar.

Wildland Fire 412

Fall. 2(2-0) P:M: FOR 404 or ZOL 355 Fire in wildland forest and grassland communities as a physical and ecological process. Fire history, culture, and management. Global perspectives, strategies for prevention and suppression of wildfires. Techniques for using prescribed fire.

415 Forest Products Marketing

Spring. 2(2-0) P:M: EC 201 or EC 202 Global marketing of forest products. Domestic and international marketing, trade patterns and policies, resource base dynamics, pricing strategy, and marketing techniques.

419 Applications of Geographic Information Systems to Natural Resources Management

Spring. 4(2-4) Interdepartmental with Community, Agriculture, Recreation and Re-source Studies and Biosystems Engineering and Fisheries and Wildlife and Geography. Administered by Fisheries and Wildlife. RB: GEO 221 Not open to students with credit in GEO 425

Application of geographic information systems, remote sensing, and global positioning systems to integrated planning and management for fish, wildlife, and related resources.

420 **Forestry Field Studies**

Spring. 3 credits. P:M: FOR 306 and FOR 406 R: Open only to juniors or seniors in the College of Agriculture and Natural Resources.

Ecological and silvicultural assessments and planning for multiple uses of forest lands. Forest management concepts including soils, biometry, harvesting and protection.

424 Forest Resource Modeling

Spring of even years. 2(1-2) P:M: FOR 306 or FW 364 or STT 200 or STT 201

Understanding and predicting forest growth. Organizing information on observed and measured forest patterns. Predicting forest response. Growth and yield prediction, tree survival modeling, and resource competition modeling.

441 Plant Breeding and Biotechnology

Spring of even years. 3(3-0) Interdepartmental with Crop and Soil Sciences and Horticulture. Administered by Crop and Soil Sciences. P:M: CSS 101

Plant improvement by genetic manipulation. Genetic variability in plants. Traditional and biotechnological means of creating and disseminating recombinant genotypes and cultivars. Importance of plant breeding to our food system, economy, and environment.

450 Forestry in International Development

Fall. 3(3-0) Interdepartmental with Sociology. Administered by Forestry. RB: FOR 404 R: Open only to seniors or graduate students

Biophysical, social and economic factors influencing design and implementation of farm, village and community level forestry and agroforestry projects.

451 **Biotechnology Applications for Plant Breeding and Genetics**

Spring. 3(2-2) Interdepartmental with Crop and Soil Sciences and Horticulture. Administered by Crop and Soil Sciences. RB: (CSS 350 or ZOL 341) and CSS 441

Principles, concepts, and techniques of agricultural plant biotechnology. Recombinant DNA technology, plant molecular biology and transformation in relation to plant improvement.

460 Arboriculture

Fall. 3(2-2) P:M: BOT 105 and (FOR 204 or HRT 211) R: Not open to freshmen or sophomores.

Tree selection and planting to fit climatic, space and edaphic conditions. Diagnosing tree abnormalities. Cultural practices used in the care and maintenance of shade and ornamental trees.

461 **Urban Forestry**

Spring. 3(3-0) P:M: FOR 204 or HRT 211 R:

Not open to freshmen or sophomores. Trees in improving the urban environment. Principles of urban forest management: legal, economic, organizational, and cultural. Street tree planning and inventory systems. Utility forestry and commercial arboriculture.

464 Forest Resource Economics (W)

Fall. 3(2-2) P:M: (EC 201 or EC 202) and Completion of Tier I writing requirement. R: Not open to freshmen or sophomores. Basic economic principles that govern human use

and production of forest resources. Application of financial and economic analysis techniques to forest resource allocation.

466 **Natural Resource Policy**

Spring. 3(3-0) Interdepartmental with Fisheries and Wildlife and Park, Recreation and Tourism Resources and Resource Development. Administered by Forestry. R: Not open to freshmen or sophomores.

Natural resources policy-making in the context of environmental, social, and legalscientific. institutional factors. Historical evolution of policies and case studies of contemporary policy issues.

478 Pest Management II: Biological **Components of Management Systems** (W)

Spring of even years. 3(2-3) Interdepart-mental with Crop and Soil Sciences and Entomology and Fisheries and Wildlife and Horticulture. Administered by Entomology. P:M: (ENT 404 or ENT 470 or PLP 405 or CSS 402) and completion of Tier I writing requirement

Principles of host plant resistance and biological control and their relationship to the design of agroecosystems. Classification of insect biological control agents.

480 Woody Plant Physiology

Spring. 3(3-0) Interdepartmental with Horticulture. Administered by Horticulture. P:M: PLB 105 or BS 110 R: Not open to fresh-

men or sophomores. Physiology of carbon utilization. Effects of water, temperature, nutrition, and light on apical, vegetative, and reproductive growth of woody plants.

486 **Biotechnology in Agriculture:** Applications and Ethical Issues

Fall of even years. 3(3-0) Interdepartmental with Crop and Soil Sciences and Horticulture and Philosophy. Administered by Horticulture. P:M: BOT 105 or BS 111 RB: CSS 350 or ZOL 341 R: Not open to freshmen or sophomores.

Current and future roles of biotechnology in agriculture: scientific basis, applications. Environmental, social, and ethical concerns.

Independent Study in Forestry 490

Fall, Spring, Summer. 1 to 3 credits. A stu-dent may earn a maximum of 8 credits in all enrollments for this course. R: Open only to juniors or seniors. Approval of department.

Special problems course for students qualified for advanced study in some phase of forestry.

802 **Forest Science Research**

Fall. 2 credits. The philosophy, nature, and procedures of research in the forestry sciences.

804

Forest Ecology Fall of odd years. 3(3-0) RB: FOR 404 Processes controlling population, community, eco-system, landscape, and global ecology of forested systems. Extrapolation across scales, succession, spatial models of forest dynamics, causes and consequences of biodiversity, nutrient cycling, sustainability of managed ecosystems and human-accelerated environmental change.

810 Forest Hydrology

Spring. 3(2-2) RB: ((CSS 210) or familiarity with forestry, agriculture or natural land-scapes. Computer literacy including spreadsheets.) and (MTH 116 or LBS 117)

Water inputs, outputs, storage and internal fluxes of forest, rural and wetland ecosystems. Ecological and environmental interpretation of precipitation, soil water, evaporation, leaching, groundwater and stream hydrographs. Quantitative modeling.

819 Advanced Plant Breeding

Fall. 3(3-0) Interdepartmental with Crop and Soil Sciences and Horticulture. Administered by Horticulture. RB: CSS 450 and STT 422

Genetic expectations resulting from breeding strate-gies with cross- and self-pollinated crop plants. Germplasm collections, mapping populations, and modifications of reproductive biology useful for crop improvement.

Plant Reproductive Biology and 820 Polyploidy

Spring of odd years. 1(3-0) Interdepartmental with Crop and Soil Sciences and Horticulture and Plant Biology and Plant Pathology. Administered by Horticulture. RB: Introductory Genetics and Plant Biology

Genetic processes underlying variations in plant reproductive biology and polyploidy. Utilization of these characteristics in plant breeding.

821 **Crop Evolution**

Spring of odd years. 1 credit. Interdepartmental with Crop and Soil Sciences and Horticulture and Plant Biology and Plant Pathology. Administered by Horticulture. RB: Introductory Genetics and Plant Biology

Cultural and biological aspects of the evolution of domestic plants.

822 **Historical Geography of Crop Plants**

Spring of odd years. 1 credit. Interdepart-mental with Crop and Soil Sciences and Horticulture and Plant Biology and Plant Pathology. Administered by Horticulture. RB: Introductory Genetics and Plant Biology

Development and spread of the major crop species.

824 **Forest Soils**

Fall of even years. 3(2-2) Evaluation and inventory of forest soils and land-scape ecosystems. Physical, biological, and chemi-cal processes. Nutrient cycling, diagnosis, and fertilization. Variability, geography, and landscape ecology.

International Development and 826 Sustainability

Fall. 3(3-0) Interdepartmental with Anthropology and Political Science and Resource Development and Social Science. Administered by Resource Development.

Environmental, economic, political, legal, management, and cultural components of sustainable development.

827 **Techniques in Cytogenetics**

Fall of odd years. 1(0-3) Interdepartmental with Crop and Soil Sciences and Horticulture. Administered by Crop and Soil Sciences

Preparation of chromosomes from commercially important plants for cytogenetic analysis.

The Economics of Environmental 829 Resources

Fall. 3(3-0) Interdepartmental with Agricultural Economics and Economics and Park, Recreation and Tourism Resources and Resource Development. Administered by Agricultural Economics.

Economic principles related to environmental conflicts and public policy alternatives. Applications to water quality, land use, conservation, development, and global environmental issues.

830 Wetlands Law and Policy

Spring of odd years. 3(3-0) Interdepartmen-tal with Agricultural Economics and Fisher-ies and Wildlife and Resource Development. Administered by Resource Development. RB: (RD 801) or prior exposure to environmental and natural resource economics, management, policy, or law. An ability to do legal and other library-based research.

Origin and development of wetlands law and policy. Wetland functions, mitigation, and banking. Legal, economic, political, and administrative perspectives. Cases, statutes and regulations.

Population Genetics, Genealogy and 842 Genomics

Fall. 3(3-0) Interdepartmental with Animal Science and Crop and Soil Sciences and Fisheries and Wildlife and Genetics and Horticulture. Administered by Forestry. RB:

Pre-calculus, basic genetics Population genetic processes underlying patterns of molecular genetic variation. Genealogical approaches to the study of genomic diversity, phylogenetic reconstruction, and molecular ecology.

852 Systems Modeling and Simulation Fall of even years. 3(3-0) Interdepartmental

with Biosystems Engineering and Fisheries and Wildlife and Resource Development. Administered by Fisheries and Wildlife. RB: STT 422 or STT 442 or STT 464 or GEO 463

General systems theory and concepts. Modeling and simulation methods. Applications of systems approach and techniques to natural resource management, and to ecological and agricultural research.

853 Applied Systems Modeling and Simulation for Natural Resource Management

Spring of odd years. 3(2-2) Interdepartmental with Biosystems Engineering and Fisheries and Wildlife and Resource Development and Zoology. Administered by Fisheries and Wildlife. RB: (FW 820 or BE 486 or ZOL 851) or or approval of department. R: Open only to seniors and graduate students

Mathematical models for evaluating resource management strategies. Stochastic and deterministic simulation for optimization. System control structures. Team modelling approach.

858 Gender, Justice and Environmental Change : Issues and Concepts Spring of odd years. 3(3-0) Interdepartmen-

Wildlife and Geography and Resource Development and Sociology. Administered by Fisheries and Wildlife. RB: Background in social science, environmental science, or natural resources.

Issues and concepts related to gender, ecology, and environmental studies. Key debates and theoretical approaches to addressing environmental issues from a gender and social justice perspective. Gender and environment issues and processes from a global perspective.

859 Gender, Justice, and Environmental Change: Methods and Application

Spring of even years. 3(3-0) Interdepartmental with Anthropology and Fisheries and Wildlife and Geography and Resource Development and Sociology. Administered by Anthropology. RB: Background in social science, environmental science, or natural resources.

Methods and case studies related to gender, ecology, and environmental studies. Methodological and fieldwork issues from a feminist perspective in international and intercultural contexts. Qualitative and quantitative methods for integrating social and environmental data.

866 Economics of Renewable Resources

Spring of odd years. 3(2-2) Interdepartmental with Resource Development. Administered by Forestry. RB: AEC 829 or EC 803 or EC 805

Applications of economic theory and analysis to renewable natural resources problems. Focus on renewable resource interactions, including multipleuse forestry and agroforestry.

870 Techniques of Analyzing Unbalanced Research Data

Spring. 4(4-0) Interdepartmental with Animal Science and Crop and Soil Sciences and Fisheries and Wildlife and Horticulture. Administered by Animal Science. RB: STT 464 R: Open only to graduate students in the College of Agriculture and Natural Resources. SA: ANS 943

Linear model techniques to analyze biological research data characterized by missing and unequal number of observations in classes. Simultaneous consideration of multiple factors. Prediction of breeding values and estimation of population parameters from variance and covariance components.

881 Building and Implementing Watershed Management Plans

Fall, Špring, Summer. 3(3-0) Interdepartmental with Fisheries and Wildlife and Resource Development. Administered by Resource Development. RB: RD 324 and ZOL 355 and RD 452 Not open to students with credit in RD 824.

Problem definition. Data collection. Public consultation. Program evaluation. Case studies include watershed planning in the Great Lakes region.

882 Watershed Assessments and Tools

Fall, Spring, Summer. 3(3-0) Interdepartmental with Fisheries and Wildlife and Resource Development. Administered by Resource Development. RB: RD 452 and RD 881

Techniques for assessing and predicting physical, chemical, biological, and socioeconomic conditions within a watershed. Water quality monitoring. Bioassessment protocols. Pollutant loading models.

885 Leadership in Natural Resources and Environmental Management

Fall. 3(3-0) Interdepartmental with Agricultural Economics and Fisheries and Wildlife and Park, Recreation and Tourism Resources. Administered by Fisheries and Wildlife.

Theory and practice of leadership in natural resource and environmental management. Integration across disciplinary and jurisdictional divisions.

890 Special Problems

Fall, Spring, Summer. 1 to 5 credits. A student may earn a maximum of 7 credits in all enrollments for this course. R: Approval of department; application required.

Advanced individual study in an area of forestry.

891B Selected Topics in Plant Breeding and Genetics

Fall, Spring, Summer. 1 to 2 credits. A student may earn a maximum of 6 credits in all enrollments for this course. Interdepartmental with Crop and Soil Sciences and Horticulture. Administered by Horticulture. R: Open only to graduate students in the Plant Breeding and Genetics major or Genetics major. Approval of department.

Selected topics in plant breeding.

892 Plant Breeding and Genetics Seminar

Fall, Spring, Summer. 1(1-0) A student may earn a maximum of 8 credits in all enrollments for this course. Interdepartmental with Crop and Soil Sciences and Horticulture. Administered by Horticulture.

Experience in review, organization, oral presentation, and analysis of research.

899 Master's Thesis Research

Fall, Spring, Summer. 1 to 10 credits. A student may earn a maximum of 99 credits in all enrollments for this course.

Master's thesis research.

923 Advanced Environmental and Resource Economics

Fall. 3(3-0) Interdepartmental with Agricultural Economics and Economics and Park, Recreation and Tourism Resources and Resource Development. Administered by Agricultural Economics. RB: AEC 829 and EC 812A

Advanced economic theory of environmental management and policy. Treatment of externalities and market and non-market approaches to environmental improvement. Topics in conservation and sustainable economic growth. Applications to research and policy.

925 Advanced Natural Resource Economics

Spring. 3(3-0) Interdepartmental with Agricultural Economics and Economics and Park, Recreation and Tourism Resources and Resource Development. Administered by Agricultural Economics. RB: EC 812A and AEC 829 and FOR 866 SA: AEC 991H

Economic theory of managing nonrenewable and renewable resources, including optimal use, the incentives for use under decentralized markets, and public policy design. Analysis of the co-evolution of economic and ecological systems.

941 Quantitative Genetics in Plant Breeding

Spring of even years. 3(2-2) Interdepartmental with Crop and Soil Sciences and Horticulture. Administered by Crop and Soil Sciences. RB: CSS 819 and STT 464

Theoretical and genetic basis of statistical analysis of quantitative traits using genetic markers. Computational tools for the study of quantitative traits.

999 Doctoral Dissertation Research

Fall, Spring, Summer. 1 to 24 credits. A student may earn a maximum of 99 credits in all enrollments for this course. R: Open only to doctoral students in the Department of Forestry.

Doctoral dissertation research.
