

BIOMEDICAL LABORATORY DIAGNOSTICS

BLD

Biomedical Laboratory Diagnostics Program College of Natural Science

- 120 Learning in the Biomedical Sciences**
Fall. 1 credit. R: Open to freshmen or sophomores. SA: MT 120 Not open to students with credit in NSC 201 or NSC 202.
Learning strategies appropriate for science. Development of critical thinking and problem solving. Group processes. Adapting study to personal learning styles and college instruction.
- 150 Preview of Biomedical Research**
Spring. 1(1-0) Interdepartmental with Natural Science. Administered by Biomedical Laboratory Diagnostics. R: Open to freshmen or sophomores. SA: MT 150
Exploration of biomedical research careers. Biomedical research in the United States: funding, safety, regulatory agencies, ethics, experimental design, trouble-shooting, and data interpretation.
- 204 Mechanisms of Disease**
Spring. 3(3-0) P: BS 111 or LB 145 or BS 149H or BS 159H SA: MT 204
Pathophysiological mechanisms of diseases. Selected applications to organ system pathology.
- 213 Application of Clinical Laboratory Principles**
Fall, Summer. 2(1-3) RB: BS 111L R: Open to students in the Clinical Laboratory Sciences major or in the Diagnostic Molecular Science major or in the Human Biology major or in the Lyman Briggs School-Medical Technology Coordinate Major or in the Medical Technology major. SA: MT 213
Lab safety and standards of good laboratory practice including specimen handling and processing. Application of technologies and techniques to the performance of clinical diagnostic testing.
- 220 Preparing for a Health Professions Career**
Spring. 1(1-0) R: Open to freshmen or sophomores or juniors. SA: MT 220
Development of skills needed for success in health professions careers. Historical, economic, sociological and ethical perspectives on the U.S. health professions with focus on medical laboratory careers.
- 324 Fundamentals of Hematology, Hemostasis, and Urinalysis**
Fall. 3(3-0) P: (BS 111 or concurrently) or (LB 145 or concurrently) or (BS 149H or concurrently) or (BS 159H or concurrently) SA: MT 324
Physiology and biochemistry of normal hematologic, hemostatic, and urinary systems. Principles of diagnostic assays to detect diseases affecting those systems.
- 324L Introductory Laboratory in Hematology, Hemostasis and Urinalysis**
Fall. 1(0-3) P: BLD 324 R: Open to students in the Clinical Laboratory Sciences major. SA: MT 423, MT 324L
Routine laboratory assays used to assess the health of the hematological, hemostatic, and urinary systems.
- 416 Clinical Chemistry**
Fall. 4(4-0) P: BLD 213 and (BMB 401 or BMB 461) and (PSL 250 or PSL 432) RB: BLD 417 and (CEM 332 or CEM 333) SA: MT 416
Correlation of laboratory test results with normal physiology and biochemistry and with disease states. Metabolic and endocrine systems. Acquired and inherited diseases. Therapeutic drug monitoring, and toxicology.
- 417 Quality Processes in Diagnostic Laboratory Testing**
Fall. 2(2-0) P: (STT 200 or concurrently) or (STT 201 or concurrently) or (STT 421 or concurrently) or (STT 351 or concurrently) or (STT 231 or concurrently) RB: BLD 213 SA: MT 414, MT 417
Statistical methods for validating diagnostic laboratory tests including quality control processes, proficiency testing, method evaluation, related regulatory requirements, laboratory information systems, and laboratory mathematics.
- 424 Advanced Hematology, Hemostasis and Urinalysis**
Spring. 2(2-0) P: BLD 324 SA: MT 422, MT 424
Etiology and pathogenesis of diseases of the hematologic, hemostatic and urinary systems including anemias, leukemias, and hemophilias. Diagnostic testing for such diseases.
- 424L Advanced Laboratory in Hematology, Hemostasis, and Urinalysis**
Spring. 1(0-3) P: BLD 324L and (BLD 424 or concurrently) SA: MT 423, MT 424L
Specialized and advanced assays used in the diagnosis of diseases of the hematological, hemostatic, and urinary systems.
- 430 Molecular Laboratory Diagnostics**
Spring. 2(2-0) P: BS 111 or LB 145 or BS 149H or BS 159H SA: MT 430
Concepts and principles of molecular analysis applied to medical diagnostics and related applications.
- 433 Clinical Immunology and Immunohematology Laboratory**
Spring. 1(0-3) P: BLD 213 and (BLD 435 or concurrently) R: Open to students in the Clinical Laboratory Sciences major. SA: MT 433
Immunologic methods for disease detection. Methods of blood typing and pre-transfusion testing.
- 434 Clinical Immunology**
Fall. 3(3-0) P: (BS 111 or concurrently) or (LB 145 or concurrently) or (BS 149H or concurrently) or (BS 159H or concurrently) SA: MT 432, MT 434 Not open to students with credit in MMG 451.
Concepts of innate, cellular, and humoral immunity. Immunodeficiency and autoimmunity. Principles and applications of immunoassays in medical laboratories.
- 435 Transfusion and Transplantation Medicine**
Spring. 3(3-0) P: BLD 434 or MMG 451 SA: MT 432, MT 435
Principles and practice of transfusion medicine including blood typing. Principles and practices of transplantation medicine. Transplantation immunology, organ procurement, and rejection detection.
- 436 Principles of Diagnostic Molecular Science**
Spring. 2(2-0) P: BMB 461 and (BS 111 or LB 145 or BS 149H or BS 159H) and ZOL 341 SA: MT 436 Not open to students with credit in BLD 830. C: BMB 462 concurrently.
Principles and techniques of molecular diagnostic assays including applicable regulations.
- 437 Clinical Applications of Diagnostic Molecular Science**
Spring. 2(2-0) P: BLD 436 SA: MT 437 Not open to students with credit in BLD 831.
Application of molecular diagnostic methods in clinical and other types of laboratory disciplines.
- 438 Molecular Diagnostic Laboratory**
Fall. 2(0-6) P: BLD 436 SA: MT 438 Not open to students with credit in BLD 832.
Laboratory in molecular techniques with emphasis on clinical and diagnostic applications.
- 442 Education and Management in the Clinical Laboratory**
Spring. 3(3-0) P: MTH 116 or (MTH 103 and MTH 114) or (STT 200 or STT 201 or STT 231 or STT 351 or STT 421) R: Open to students in the Clinical Laboratory Sciences major or in the Diagnostic Molecular Science major. SA: MT 442
Basic principles and concepts in education and management in clinical laboratories. Systematic approach to instructional design, delivery and evaluation. Principles of leadership, personnel management, fiscal management, and regulatory compliance.
- 450 Eukaryotic Pathogens**
Spring. 3(3-0) P: BS 111 or LB 145 or BS 149H or BS 159H RB: MMG 201 or MMG 301 SA: MT 450
Medically important fungi and parasites. Host-parasite relationships, life cycles, culture, identification, and associated diseases.
- 455 Integrating Clinical Laboratory Science Discipline (W)**
Fall, Spring. 2(2-0) P: ((BLD 324 or concurrently) or (BLD 417 or concurrently) or (BLD 416 or concurrently) or (MMG 463 or concurrently) or (BLD 435 or concurrently) or (CEM 332 or concurrently) or (BLD 436 or concurrently)) and completion of Tier I writing requirement R: Open to undergraduate students in the Clinical Laboratory Sciences major and open to undergraduate students in the Diagnostic Molecular Science major and open to undergraduate students in the Medical Technology major. SA: MT 455
Problem oriented approach integrating topics from biomedical laboratory diagnostics courses with emphasis on writing experience in the major and on critical thinking skills.

Biomedical Laboratory Diagnostics—BLD

- 463 Medical Microbiology**
Fall. 3(3-0) Interdepartmental with Microbiology and Molecular Genetics. Administered by Microbiology and Molecular Genetics. P: MMG 301 RB: MMG 451 or BLD 434 R: Open to juniors or seniors in the Biomedical Laboratory Diagnostics Program or in the Department of Microbiology and Molecular Genetics or in the Lyman Briggs Environmental/Biology/Microbiology Coordinate Major or in the Lyman Briggs Genomics and Molecular Genetics Coordinate Major or in the Lyman Briggs Human Biology Coordinate Major or in the Human Biology major or in the Lyman Briggs Medical Technology Coordinate Major or in the Lyman Briggs Microbiology Coordinate Major or in the Environmental Biology/Microbiology major or in the Genomics and Molecular Genetics major. SA: MIC 463
Properties of pathogenic bacteria and viruses and their mechanisms of pathogenicity and clinical diagnoses.
- 464 Diagnostic Microbiology Laboratory**
Fall. 2(0-4) Interdepartmental with Microbiology and Molecular Genetics. Administered by Microbiology and Molecular Genetics. P: MMG 463 or concurrently R: Open to juniors or seniors in the Department of Microbiology and Molecular Genetics or in the Biomedical Laboratory Diagnostics Program or in the Clinical Laboratory Sciences major. SA: MIC 464
Clinical laboratory diagnostic procedures for the identification of pathogenic microbes.
- 471 Advanced Clinical Chemistry Laboratory**
Fall, Spring, Summer. 3 credits. P: CEM 333 R: Open to students in the Clinical Laboratory Sciences major. SA: MT 471
Application and integration of theory and technical skills in clinical chemistry and biochemistry.
- 472 Advanced Clinical Chemistry**
Fall, Spring, Summer. 1 credit. P: BLD 416 and BLD 417 R: Open to seniors in the Clinical Laboratory Sciences major. SA: MT 472 C: BLD 471 concurrently.
Theoretical aspects of clinical chemistry, chemical and biochemical reactions, statistical analysis, and pathophysiologic relationships. Integration of cognitive material with clinical laboratory test results.
- 473 Advanced Clinical Hematology and Body Fluids Laboratory**
Fall, Spring, Summer. 3 credits. P: BLD 424L R: Open to seniors in the Clinical Laboratory Sciences major. SA: MT 473
Application and integration of theory and technical skills in hematology, hemostasis, and body fluid analysis.
- 474 Advanced Clinical Hematology and Body Fluids**
Fall, Spring, Summer. 1 credit. P: BLD 424 R: Open to seniors in the Clinical Laboratory Sciences major. SA: MT 474 C: BLD 473 concurrently.
Theoretical aspects of advanced hematology, hemostasis and body fluid analysis. Integration of cognitive material with clinical laboratory test results.
- 475 Advanced Clinical Immunology and Immunoematology Laboratory**
Fall, Spring, Summer. 2 credits. P: BLD 433 R: Open to seniors in the Clinical Laboratory Sciences major. SA: MT 475
Application and integration of theory and technical skills in immunology and immunoematology.
- 476 Advanced Clinical Immunology and Immunoematology**
Fall, Spring, Summer. 1 credit. P: BLD 435 and BLD 434 R: Open to seniors in the Clinical Laboratory Sciences major. SA: MT 476 C: BLD 475 concurrently.
Theoretical aspects of immunology and immunoematology. Integration of cognitive material with clinical laboratory test results.
- 477 Advanced Clinical Microbiology Laboratory**
Fall, Spring, Summer. 3 credits. P: MMG 464 and BLD 450 R: Open to seniors in the Clinical Laboratory Sciences major. SA: MT 477
Application and integration of theory and technical skills in clinical microbiology and infectious disease.
- 478 Advanced Clinical Microbiology**
Fall, Spring, Summer. 1 credit. P: MMG 463 or BLD 450 or BLD 498 R: Open to seniors in the Clinical Laboratory Sciences major. SA: MT 478 C: BLD 477 concurrently.
Theoretical aspects of clinical microbiology and infectious disease. Integration of cognitive material with clinical laboratory test results.
- 479 Professional Behavior in Clinical Laboratory Science**
Fall, Spring, Summer. 1(0-2) P: (BLD 220 and BLD 442) and ((BLD 471 or concurrently) or (BLD 473 or concurrently) or (BLD 475 or concurrently) or (BLD 477 or concurrently)) R: Open to students in the Clinical Laboratory Sciences major. SA: MT 479
Application of professional behavior principles to practical experiences in clinical laboratory science.
- 482 Advanced Diagnostic Molecular Science**
Spring. 2 credits. R: Open to students in the Diagnostic Molecular Science major. SA: MT 482 C: BLD 483 concurrently or BLD 484 concurrently or BLD 485 concurrently or BLD 486 concurrently.
Integration of principles and concepts in diagnostic molecular science with diagnostic laboratory test results.
- 483 Molecular Diagnostic Experience in Hematopathology and Oncology**
Spring. 2 credits. P: BLD 438 R: Open to students in the Diagnostic Molecular Science major. SA: MT 483 C: BLD 482 concurrently.
Clinical experience in molecular diagnostic laboratories with applications in hematopathology and oncology.
- 484 Molecular Diagnostic Experience in Infectious Disease**
Spring. 2 credits. P: BLD 438 R: Open to students in the Diagnostic Molecular Science major. SA: MT 484 C: BLD 437 concurrently.
Clinical experience in molecular diagnostic laboratories with applications to infectious disease diagnosis.
- 485 Molecular Diagnostic Experience in Inherited and Predictive Genetics**
Spring. 2 credits. P: BLD 438 R: Open to students in the Diagnostic Molecular Science major. SA: MT 485 C: BLD 482 concurrently.
Clinical experience in molecular diagnostic laboratories with applications in inherited and predictive genetics.
- 486 Molecular Diagnostic Experience in Genotyping and Individual Identification**
Spring. 2 credits. P: BLD 438 R: Open to students in the Diagnostic Molecular Science major. SA: MT 486 C: BLD 482 concurrently.
Clinical experience in molecular diagnostic laboratories with applications to genotyping and identification of individuals.
- 495 Directed Study**
Fall, Spring, Summer. 1 to 3 credits. A student may earn a maximum of 6 credits in all enrollments for this course. R: Open to students in the Clinical Laboratory Sciences major or in the Diagnostic Molecular Science major or in the Lyman Briggs School-Medical Technology Coordinate Major or in the Medical Technology major. SA: MT 495
Faculty directed study including assigned readings, reviews of appropriate scientific periodicals, research, and laboratory experience.
- 496 Integrative Correlations in Clinical Laboratory Science I**
Fall, Spring. 1(2-0) P: BLD 213 and BLD 417 R: Open to juniors or seniors in the Clinical Laboratory Sciences major or in the Diagnostic Molecular Science major or in the Lyman Briggs School-Medical Technology Coordinate Major or in the Medical Technology major. SA: MT 496
Application of the principles and concepts of clinical laboratory science in a problem-based learning format. Ethics, diagnostic value of laboratory tests, social-economic impact of laboratory tests and their regulation.
- 497 Integrative Correlations in Clinical Laboratory Science II**
Fall, Spring. 1(2-0) P: BLD 496 R: Open to juniors or seniors in the Medical Technology major or in the Diagnostic Molecular Science major or in the Lyman Briggs School-Medical Technology Coordinate Major. SA: MT 497
Continuation of BLD 496.
- 498 Focused Problems in Clinical Laboratory Science**
Spring. 2(1-2) P: (MMG 463 or concurrently) and (MMG 464 or concurrently) and BLD 496 R: Open to students in the Clinical Laboratory Sciences major. SA: MT 454, MT 498
Case study problems of medical microbiology, hematology, and clinical chemistry.
- 801 Biomedical Laboratory Diagnostics Seminar**
Spring. 1(1-0) A student may earn a maximum of 2 credits in all enrollments for this course. R: Open to graduate students in the Clinical Laboratory Sciences major. SA: MT 801
Current research topics in clinical laboratory sciences.
- 811 Fundamentals of Scientific Research**
Spring of even years. 1(1-0) R: Open to masters students in the Biomedical Laboratory Diagnostics Program. SA: MT 810 Not open to students with credit in NSC 830.
Best practices for the research enterprise. Ethical conduct of research. Critical evaluation of scientific literature.

- 815 Cell Biology in Health and Disease I**
 Spring. 2(2-0) RB: Undergraduate course in Biochemistry and Physiology.
 Experience in a clinical laboratory
 Principles and theories of cell biology and biochemistry are presented with a focus on applications to clinical pathology.
- 820 Advanced Human Hematology**
 Fall of odd years. 2(2-0) Interdepartmental with Pathobiology and Diagnostic Investigation. Administered by Biomedical Laboratory Diagnostics. RB: BLD 424
 Pathogenesis, mechanisms, and morphological pictures. Laboratory tests and interpretation of results.
- 830 Concepts in Molecular Biology**
 Fall, Spring. 2(2-0) Interdepartmental with Pathobiology and Diagnostic Investigation. Administered by Biomedical Laboratory Diagnostics. RB: One course in biochemistry or concurrently. SA: MT 830
 Techniques and theories of molecular biology, nucleic acid synthesis and isolation, enzymatic digestion and modification, electrophoresis, hybridization, amplification, library construction, and cloning.
- 831 Clinical Application of Molecular Biology**
 Spring, Summer. 2(2-0) P: BLD 830 RB: Basic biochemistry, medical or research laboratory experience SA: MT 831
 Molecular diagnostic principles. Diagnostic outcomes in traditional and non-traditional laboratory disciplines.
- 832 Molecular Pathology Laboratory**
 Summer. 2(0-4) P: BLD 831 or concurrently SA: MT 831L, MT 832
 Equipment operation, DNA extraction and measurement, electrophoresis, hybridization and transfers, amplification and detection including techniques and automated sequencing. Clinical applications.
- 835 Hemostasis, Thrombosis and Effective Resource Management**
 Fall. 3(3-0) RB: Background in hemostasis, thrombosis and blood product management. R: Open to lifelong graduate students in the College of Natural Science or in the Biomedical Laboratory Diagnostics Program or in the Clinical Laboratory Sciences major or approval of department.
 Theories of coagulation, thrombosis and effective blood product management. Needs and particular stresses during an active bleeding crisis.
- 842 Managing Biomedical Laboratory Operations**
 Fall. 2(2-0) R: Open to in the Biomedical Laboratory Operations major or approval of department. SA: MT 842
 Integration of the roles of legislative, regulatory, technological and economic factors that influence the practice and management of biomedical laboratory operations.
- 844 Topics in Biomedical Laboratory Operations**
 Spring. 1(1-0) P: BLD 842 R: Open to students in the Biomedical Laboratory Operations major or approval of department. SA: MT 844
 Current issues relevant to biomedical laboratory operations from an interdisciplinary perspective with an emphasis on efficient laboratory operations.
- 846 Decision Processes for Biomedical Laboratory Operations**
 Fall. 2(2-0) P: BLD 842 R: Open to students in the Biomedical Laboratory Operations major or approval of department. SA: MT 846
 Integrative case studies presented in a problem-based learning format. Strategies for decision-making in the operations of a biomedical laboratory. Cases integrate scientific principles, management principles and regulatory factors.
- 850 Concepts in Immunodiagnosics**
 Fall, Spring. 2(2-0) RB: An undergraduate course in biochemistry or cell biology. SA: MT 850
 Immunology principles and theory applied to diagnostic evaluation of the host immune response during health and disease.
- 851 Clinical Application of Immunodiagnostic Principles**
 Spring, Summer. 2(2-0) P: BLD 850 SA: MT 851
 Immunodiagnostic theories and principles applied to clinical assay development and method evaluation.
- 852 Immunodiagnosics Laboratory**
 Summer. 2(2-0) P: BLD 850 SA: MT 851L, MT 852
 Performance of immunopurifications, in vitro diagnostic assays and basic flow cytometry. Data analysis and quality control evaluation.
- 860 Clinical Laboratory Diagnosis of Infectious Diseases**
 Fall of odd years. 2(2-0) Interdepartmental with Pathobiology and Diagnostic Investigation. Administered by Biomedical Laboratory Diagnostics. RB: MMG 451 and MMG 464 and BLD 434 SA: MT 860
 Laboratory techniques for diagnosing infectious diseases in humans. Emphasis on differential diagnosis and correlation of microbiological results with serology, hematology, and clinical chemistry.
- 890 Selected Problems in Clinical Laboratory Science**
 Fall, Spring, Summer. 1 to 6 credits. A student may earn a maximum of 12 credits in all enrollments for this course. R: Open to graduate students in the Clinical Laboratory Sciences major. SA: MT 890
 Non-thesis research for Plan B master's students.
- 895 Projects in Biomedical Laboratory Operations**
 Fall, Spring, Summer. 1 to 6 credits. A student may earn a maximum of 6 credits in all enrollments for this course. R: Open to masters students in the Biomedical Laboratory Operations major or approval of department. SA: MT 895
 Completion of a significant on-site project in cooperation with an industrial/clinical partner.
- 899 Master's Thesis Research**
 Fall, Spring, Summer. 1 to 10 credits. A student may earn a maximum of 36 credits in all enrollments for this course. R: Open to graduate students in the Clinical Laboratory Sciences major. SA: MT 899
 Master's thesis research.
