

EPIDEMIOLOGY

EPI

Department of Epidemiology
College of Human Medicine

- 200 History of Public Health and Epidemiology**
Spring. 2(2-0) R: Open to undergraduate students. Approval of department.
Introduction to the historical development and evolution of public health and epidemiology. Development of theories of models of disease and disease causation via selected case studies.
- 290 Critical Thinking and Scientific Reasoning in Public Health and Epidemiology**
Fall. 2(2-0) R: Open to undergraduate students. Approval of department.
Exploration of critical thinking skills and inductive vs. deductive reasoning strategies and their weaknesses.
- 390 Disease in Society: Introduction to Epidemiology and Public Health**
Spring. 4(4-0) Interdepartmental with Social Science. Administered by Epidemiology.
Human epidemiology and population health issues facing contemporary society. Developed and less-developed settings. Health-related information in the mass media and scholarly publications.
- 490 Public Health and Epidemiology**
Fall. 4(4-0) P: STT 200 and EPI 200 and EPI 290 and PHL 344 and EPI 390 R: Open to undergraduate students. Approval of department.
Concepts and methods of public health and epidemiology.
- 491 Biostatistics Lab**
Fall. 1(0-2) P: EPI 200 and EPI 290 and EPI 390 and STT 200 and PHL 344 R: Open to undergraduate students. Approval of department. C: EPI 490 concurrently.
Introduction to biostatistics and data analysis software package using epidemiological examples in public health.
- 499 Senior Seminar/Capstone Experience**
Spring. 2(2-0) P: STT 200 and PHL 344 and EPI 200 and EPI 290 and EPI 390 and EPI 490 and EPI 491 R: Open to undergraduate students. Approval of department.
Selected problems in the study of global public health and epidemiology. Development and defense of thesis paper.
- 546 Information Management: Fundamentals of Epidemiology and Biostatistics**
Spring. 1(1-0) RB: Undergraduate mathematics and/or statistics R: Open only to graduate-professional students in the College of Human Medicine.
Introduction to accessing, analyzing, and applying information to patients and to populations. Offered first ten weeks of the semester.
- 547 Information Management: Applications of Epidemiology and Biostats**
Fall. 1(1-0) P: EPI 546 RB: Undergraduate mathematics and/or statistics. R: Open to students in the College of Human Medicine or approval of department.
Basic competency in accessing, analyzing, and applying information to patients and populations.
- 805 Readings in the Historical Roots of Epidemiological Thought**
Fall. 3(3-0) Interdepartmental with History. Administered by Epidemiology.
Historical evolution of models of disease causation and population perspectives on disease.
- 808 Biostatistics I**
Fall. 3(3-0) Interdepartmental with Statistics and Probability. Administered by Epidemiology. RB: College-level algebra. R: Open to masters students or doctoral students in the Epidemiology major or approval of department.
Applications of probability and statistics in the applied health sciences. Probability distributions, estimation and tests for one-, two-, and paired samples, linear regression, correlation, and ANOVA. Use of statistical software. Critical appraisal of statistical methods in the biomedical literature.
- 809 Biostatistics II**
Spring. 3(3-0) Interdepartmental with Statistics and Probability. Administered by Epidemiology. P: STT 425 or EPI 808 RB: MTH 103 or MTH 110 or MTH 116 R: Open to masters students or doctoral students in the Epidemiology major or approval of department.
Analysis of categorical data in epidemiologic studies. Contingency tables and logistic regression.
- 810 Introductory Epidemiology**
Fall. 2(2-0) R: Open to graduate students in the Department of Epidemiology or approval of department. SA: HM 810
Disease from a population perspective as the interaction of host, agent, and environment. Case definition, measuring frequency of disease, mortality and morbidity data, and major study designs.
- 811 Epidemiology Exercises and Applications**
Fall. 1(1-0) R: Open to graduate students in the Department of Epidemiology or approval of department. C: EPI 810 concurrently and STT 425 concurrently.
Theoretical, conceptual, and methodological issues in epidemiological practice.
- 812 Causal Inference in Epidemiology**
Fall. 3(3-0) P: EPI 810 and EPI 811 RB: LCS 829 R: Open to graduate students in the Epidemiology major or approval of department. SA: HM 812
Causality in epidemiology. Application of theoretical concepts to the design, analysis, and assessment of epidemiologic research.
- 813 Investigation of Disease Outbreaks**
Spring. 3 credits. P: EPI 810 and EPI 811 R: Open to graduate students in the Epidemiology major or approval of department. SA: HM 813
Principles of and practice in investigating disease outbreaks.
- 814 Nutritional Epidemiology**
Spring of even years. 3(3-0) RB: EPI 810 and EPI 811 R: Open to graduate students in the Epidemiology major or approval of department. SA: HM 814
Methodologies used in epidemiologic studies of diet and health in the context of U.S. and international dietary patterns. Relationship between diet and specific diseases.
- 815 Epidemiology of Cardiovascular Disease**
Fall of even years. 3(3-0) RB: EPI 810 and EPI 811 R: Open to graduate students in the Epidemiology major or approval of department. SA: HM 815
Survey of methodologies used in epidemiologic studies of cardiovascular diseases. Review of evidence of genetic, environmental, and behavioral causes of cardiovascular disease.
- 816 Perinatal Epidemiology**
Summer of odd years. 3(3-0) RB: EPI 810 R: Open only to graduate students in the Epidemiology major or approval of department. SA: HM 816
Epidemiology of adverse health states in pregnancy and the puerperium. Impact of these health states on subsequent child development.
- 817 Epidemiology of Communicable Diseases**
Fall of even years. 3(3-0) RB: EPI 810 R: Open to graduate students in the Epidemiology major or approval of department. SA: HM 817
Application of principles of epidemiology to research in communicable diseases relevant to public health in the U.S. and other countries.
- 818 The Epidemiology of Zoonotic Diseases**
Spring of odd years. 3(3-0) Interdepartmental with Veterinary Medicine. Administered by Epidemiology. RB: EPI 810 R: Open to graduate students in the Epidemiology major or approval of department. SA: HM 818
Human susceptibility to diseases of animals. Modes of transmission, surveillance, and strategies for prevention of specific zoonotic diseases.
- 819 Spatial Epidemiology and Medical Geography**
Spring. 3(3-0) Interdepartmental with Geography. Administered by Epidemiology. P: EPI 810 or GEO 435 R: Open to graduate students in the Department of Epidemiology or in the Department of Geography or approval of department. SA: HM 819
Concepts, techniques, and utilization of spatio-epidemiologic analyses for human health.
- 820 Evidence-Based Medicine**
Spring of even years. 3(3-0) Interdepartmental with Medicine. Administered by Epidemiology. P: EPI 810 and EPI 811 and STT 425
Methodology of clinical epidemiology and health services outcomes research. Linkage of epidemiology with daily clinical problems.
- 822 Environmental Epidemiology**
Fall of odd years. 3(3-0) P: (EPI 810 or concurrently) and (STT 421 or concurrently) RB: Basic science in biology, physiology, immunology R: Open only to graduate students in the Department of Epidemiology or approval of department.
Epidemiology of health effects and risk communication.
- 823 Cancer Epidemiology**
Spring of odd years. 3(3-0) P: EPI 810 and EPI 811 and STT 425 R: Open to graduate students in the Epidemiology major or approval of department. SA: HM 823
Basic principles of carcinogenesis. Major etiologic factors, types of malignancies, and biomarkers for susceptibility and exposure. Prevention and early detection of cancer.

Epidemiology—EPI

- 824 Reproductive Epidemiology**
Fall of even years. 3(3-0) P: (EPI 810 or concurrently) and (STT 421 or concurrently)
RB: Social science or biological science R: Open only to graduate students in the Department of Epidemiology or approval of department.
Epidemiology of reproductive events.
- 826 Research Methods in Epidemiology**
Fall. 3(3-0) P: STT 426 R: Open to graduate students in the Epidemiology major or approval of department. SA: HM 826
Analyses of epidemiologic and clinical data applying statistical methods, based on logistic and survival models, using standard software.
- 827 The Nature and Practice of Scientific Integrity**
Spring. 3(3-0) P: EPI 810 and EPI 811
Historical development of where and how science is practiced in the United States. Scientific culture, sociology, and ethical standards. Principles, standards, and practices which define scientific integrity and responsible research conduct.
- 829 Design and Conduct of Epidemiological Studies and Clinical Trials**
Spring. 3(2-2) Interdepartmental with Large Animal Clinical Sciences. Administered by Large Animal Clinical Sciences. P: (VM 533 or EPI 810) and STT 425
Applied analytical methods in experimental design. Assessment of health and disease status of animal and human populations. Risk assessment and interpretation of clinical trials.
- 830 Epidemiologic Overview of Foodborne Diseases and Food Safety**
Fall. 3(3-0) Interdepartmental with Large Animal Clinical Sciences. Administered by Large Animal Clinical Sciences. RB: Advanced undergraduate courses in biology, microbiology, biological sciences, biochemical sciences, food technology. R: Open to graduate students in the College of Veterinary Medicine or in the Food Safety Specialization or in the Food Safety major.
Epidemiologic survey of important foodborne diseases addressing recent trends. Sources of surveillance data. Measurement and management of risk factors associated with major foodborne diseases. Tracking foodborne pathogens from farm to table. Introduction to Hazard Analysis Critical Control Points (HACCP).
- 835 Neuroepidemiology**
Summer of even years. 3(3-0) Interdepartmental with Neurology and Ophthalmology. Administered by Epidemiology. P: EPI 810 and EPI 811 R: Open to graduate students in the Epidemiology major or approval of department.
Epidemiology of neurologic conditions and discussion of the inherent difficulty in studying these disorders.
- 847 Analysis of Survival Data**
Spring of odd years. 3(3-0) Interdepartmental with Statistics and Probability. Administered by Statistics and Probability. RB: STT 422 or STT 442 or STT 862
Analysis of lifetime data. Estimation of survival functions for parametric and nonparametric models. Censored data. The Cox proportional hazards model. Accelerated failure time models. Frailty models. Use of statistical software packages.
- 851 SAS Programming I: Essentials**
Fall. 1(1-0) R: Open only to graduate students in the Epidemiology major or approval of department.
A programming approach to plan and write simple SAS programs to solve common data management and data analysis problems.
- 852 SAS Programming II: Data Management and Analysis**
Spring. 1(1-0) P: EPI 851 R: Open only to graduate students in the Epidemiology major or approval of department.
A programming approach to plan and write SAS programs to solve common data management and data analysis problems.
- 853 SAS Programming III: Research Data Analysis Using SAS**
Summer. 1(1-0) P: EPI 852 R: Open only to graduate students in the Epidemiology major or approval of department.
A programming approach to plan and write SAS programs to solve data management and data analysis problems in research settings.
- 890 Independent Study in Epidemiology**
Fall, Spring, Summer. 1 to 3 credits. A student may earn a maximum of 12 credits in all enrollments for this course. RB: EPI 810 R: Open only to master's students in the Epidemiology major. Approval of department. SA: HM 890
Independent study in areas relevant to epidemiology such as population genetics.
- 899 Master's Thesis Research**
Fall, Spring, Summer. 1 to 12 credits. A student may earn a maximum of 36 credits in all enrollments for this course. R: Open only to master's students in the Epidemiology major. Approval of department. SA: HM 899
Master's thesis research.
- 910 Themes in Contemporary Epidemiology**
Fall of odd years. 3(3-0) RB: Master of Science in Epidemiology
Discussion and critique of important contemporary themes in epidemiology as reflected in current publications in the field.
- 920 Advanced Methods in Epidemiology and Applied Statistics**
Spring of even years. 3(3-0) Interdepartmental with Statistics and Probability. Administered by Epidemiology. P: EPI 826
Pattern recognition and cluster analysis, longitudinal data analysis, path analysis, repeated measures and time-series analysis.
- 935 Research Seminar**
Spring. 3(3-0) P: EPI 810 and EPI 811 and EPI 812 and LCS 829 RB: Master of Science in Epidemiology or equivalent.
Conceptualization, development, and writing of research proposals in epidemiology and other forms of clinical field research.
- 945 Molecular Epidemiology**
Fall of even years. 3(3-0) P: EPI 910 or concurrently
Strategies for incorporation of genetic and non-genetic biomarkers in epidemiology.
- 950 Advanced Biostatistical Methods in Epidemiology**
Fall of even years. 3(3-0) P: STT 425 and STT 426 or approval of department; application required RB: Calculus, linear algebra, regression, experimental designs. R: Open to graduate students.
In-depth study of specific biostatistical methods and epidemiology applications.
- 990 Independent Study**
Fall, Spring, Summer. 1 to 3 credits. A student may earn a maximum of 12 credits in all enrollments for this course. R: Open to doctoral students in the Department of Epidemiology. Approval of department.
Special projects, directed reading, and research arranged by an individual graduate student and a faculty member in areas supplementing regular course offerings.
- 999 Doctoral Dissertation Research**
Fall, Spring, Summer. 1 to 24 credits. A student may earn a maximum of 99 credits in all enrollments for this course. R: Open only to doctoral students in the Epidemiology major.
Doctoral dissertation research.
