HORTICULTURE

HRT

Department of Horticulture College of Agriculture and **Natural Resources**

Horticulture: Plants and People

Spring. 3(2-2) R: Not open to juniors or seniors in the Department of Horticulture.

Functional uses of plants: aesthetics, food, industry, recreation. Growing and using horticultural plants. Consumer and environmental issues related to horticulture in daily living.

109

Introduction to Applied Plant Science Fall. 2(2-0) R: Open only to students in the Institute of Agricultural Technology.

Plant growth and development. Interrelationship between cultural practice and plant performance. Plant classification, plant physiology and metabol-

111 Landscape Design

Spring. 3(3-3) Not open to students with credit in HRT 072 or HRT 311.

Functional uses of the landscape, landscape design process, drafting and graphic representation, plant selection and use, planting design principles, construction materials and specifications.

Crop Scouting and Investigation

Spring. 2(3-0) Interdepartmental with Crop and Soil Sciences. Administered by Crop and Soil Sciences. P: CSS 101 or HRT 203

Crop production, pest scouting and other production problems, and field diagnoses. Interaction with agriculture clientele.

203 **Principles of Horticulture**

Fall. 3(2-2) SA: HRT 201

Basics of horticulture. Plant growth including crop selection and management, cultivar development, crop geography, environmental factors affecting plant growth and development, and reproductive development.

204 **Plant Propagation**

Spring. 2(2-3) SA: HRT 204L, HRT 104 Asexual propagation including rooting of cuttings, micropropagation, grafting, layering, and underground structures. Sexual propagation including seed germination, storage, and production. Offered first 10 weeks of the semester.

Plant Mineral Nutrition

Spring. 1(3-0) P: CSS 210 RB: HRT 203 Mineral elements required by plants. Essential elements, effect of soil and potting media on nutrient availability, absorption and function in plant physiology, and nutrient deficiency and toxicity symptoms. Methods of monitoring and managing plant nutrient levels. Class meets first five weeks of semester.

206 **Training and Pruning Plants**

Spring. 1(2-2)

Principles and techniques of pruning for landscape and nursery ornamentals, Christmas tree production, tree fruits, and small fruits. Pruning practices, equipment, and basic large tree care techniques. Class meets last five weeks of the semester.

207 **Horticulture Career Development**

Fall. 1(1-0)

Internship preparation and identification of employment opportunities. Career goal establishment, resume construction, correspondence development, personal budgeting, interview skills and strategies.

208 **Pruning and Training Systems in** Horticulture

Spring of odd years. 3(2-2) R: Open only to n the Applied Plant Science major.

Principles and practices of plant growth management. Plant biology. Crown and canopy develop-ment. Crop specific training systems. Pruning techniques.

Nursery Management 210

Fall. 3(2-3) P: (HRT 203 or concurrently) and (HRT 204 or concurrently) SA: HRT 071 HRT 310

Management of field and container grown nursery operations. Site selection and development, financing, legal restrictions, production practices, nutrition, irrigation, weed and pest control, modification of plant growth, storage, shipping, and marketing.

Landscape Plants I

Fall. 3(2-3)

Identification, adaptation, and evaluation of shade trees, narrow-leaved evergreens, shrubs, woody vines, herbs, ornamental grasses, and herbaceous

211A Landscape Plants I A

Fall. 2(2-0)

Identification, adaptation, and evaluation of shade trees, narrow-leaved evergreens, shrubs, woody vines, herbs, ornamental grasses, and other herbaceous perennials.

212 Landscape Plants II

Fall, Spring. 3(2-3)

Identification, adaptation, and evaluation of flowering trees and shrubs, broad-leaved evergreens, herbaceous vines, ground covers, bulbs, wildflowers, ferns, and aquatic plants.

Landscape Maintenance

Fall. 2(2-0) R: Open only to students in the Institute of Agricultural Technology.

Ornamental plant management. Plant growth and development related to pruning, fertilization, irrigation, weed control, transplanting; development of landscape management specifications: integrated plant management and plant health care programs.

Landscape Maintenance Field Laboratory Fall. 1(0-2) P: HRT 213 or concurrently R:

Open only to students in the Institute of Agricultural Technology.

Landscape maintenance. Site analysis. Pruning woody plants, transplanting by hand and mechanical tree spade, and planting techniques for ornamentals. Herbaceous perennial care, cutting back, dividing. Scouting as a component of integrated pest management and plant health care programs.

Landscape and Turfgrass Business Operations

Spring. 2(3-0) R: Open only to students in the Institute of Agricultural Technology. SA: AT 082 Not open to students with credit in AT 082.

Organizing, marketing, and directing a business enterprise within the turf and landscape industry. Project estimating, bidding, payroll, equipment, and accounting.

215 Landscape Industries Seminar

Fall. 1(0-2) RB: Interest or experience in the 'green industries'. R: Open only to students in the Institute of Agricultural Technology. SA: HRT 064 Not open to students with credit in HRT 207 or HRT 064.

Landscape, nursery and related 'green industry' firms. Career opportunities. Horticulture operations, products, services and marketing practices. Personal and professional development.

216 Landscape Construction

Fall. 3(2-2) R: Open only to students in the Institute of Agricultural Technology. SA: HRT 076 Not open to students with credit in HRT 076.

Construction installation techniques encountered in landscape development. Field installation of patios, retaining walls, ponds, and plant materials. Construction estimating and bidding procedures.

218 Landscape Irrigation

Spring. 3(3-3) Not open to students with credit in HRT 078.

Design, installation and maintenance of irrigation systems for turfgrass and landscape plants. Design hydraulics, equipment selection, pump stations, water features, water quality and conservation. Offered the first ten weeks of the semester.

Landscape Computer Aided Design 219

Spring. 2(3-0) RB: CSE 101 or CSS 110
Computer Aided Design (CAD) for landscape design. Calculations, take offs, perspective drawings using AutoCAD software.

Greenhouse Structures and Management 221 Fall. 3(3-0)

Planning and operation of a commercial green-Structures, coverings, heating, cooling, ventilation, irrigation, fertilization, root media, and pest control.

Ornamental Grasses

Fall of even years. 1(3-0)

Selection, propagation, production, garden design, and maintenance of ornamental grasses for landscape use. Invasive issues and responsible use of ornamental grasses in the landscape. Class meets first five weeks of semester.

242 Passive Solar Greenhouses for Protected Cultivation

Fall, Spring. 1(1-0)

Season extension and year-round vegetable, herb, flower, and fruit production in unheated, low cost passive solar greenhouses. Marketing options, site selection, site preparation, structures, and organic crop management methods.

243 **Organic Transplant Production**

Spring. 1(1-0)

Seed ordering. Seed storage and seed germination. Vegetative propagation. Growing containers. Organic root media. Fertility, light, and temperature. Plant health. Hardening off. Considerations for organic

244 **Culinary and Medicinal Herbs**

Summer. 1(1-0)

Field and greenhouse species and variety selection. Planting, organic production, and harvesting methods and schedules. Postharvest storage and maintenance of quality. Herbal teas, salves, oils, and tinctures.

245 Specialty Cut Flowers

Summer. 1(1-0)

Field and greenhouse cut flower species and variety selection. Planting, organic production methods, and harvesting and scheduling. Bouquet assembly. Postharvest handling and marketing. Value for biological diversity and farm scaping.

251 Organic Farming Principles and Practices

Spring. 3(3-0) Interdepartmental with Crop and Soil Sciences. Administered by Horticulture

History and principles of organic farming. Farms as ecological systems. Certification process and agencies. Organic matter management, the soil food web, and nutrient availability. Biodiversity, crop rotations, plant competition, ground cover, and plant health. Integrating crops and animals. Organic animal husbandry.

252 Organic Certification and Farm Plans Fall. 1(1-0) P: HRT 251

Organic certification requirements as specified by the USDA National Organic Program and implemented by certifying agencies. Methods of record keeping and farm plans for specialty crop, field crop, perennial fruit, and livestock farms. Organic processing and marketing.

253 Compost Production and Use

Summer. 1(1-0)

Process and methods of composting, maturity and quality analysis, and use of compost products at home and farm scale.

256 Organic Produce Direct Marketing Fall. 1(1-0)

Food chain and produce marketing; values added versus value added. Community supported agriculture (CSA). Multi-farm CSA, farmers' markets, roadside markets, u-pick, restaurants. Crop scheduling and rotation strategies. Estimating cost, income, profit, yield.

257 Organic Produce Wholesale Marketing Fall. 1(1-0)

Marketing options for high volume sales of organic produce. Farmer cooperatives. Produce suppliers handling organic produce; retailers handling exclusively organic. Retailers diversifying into organic. Requirements for storing, handling and displaying organic produce. Organic labeling requirements.

258 Study a Farm

Summer. 3(1-2) P: HRT 251

Field trips to visit Michigan organic farms, farmers' markets, food distributors and retailers to observe farming and marketing methods and learn from farmers.

259 Student Organic Farm Practicum

Fall, Spring, Summer. 2 to 4 credits. A student may earn a maximum of 10 credits in all enrollments for this course. R: Open to agricultural technology students.

Year-round intensive organic vegetable, fruit, herb, and flower farming by direct involvement in the weekly activities and operation of the MSU Student Organic Farm. Planning, scheduling, planting, growing, irrigation, fertility, use of tools and equipment, harvesting, storage, CSA and farm stand marketing, record keeping, and organic certification.

290 Independent Study in Ornamental Horticulture

Fall, Spring, Summer. 1 to 4 credits. A student may earn a maximum of 6 credits in all enrollments for this course. R: Open only to students in the Institute of Agricultural Technology. SA: HRT 075 Not open to students with credit in HRT 075.

A planned learning experience developed by the student in cooperation with a faculty member.

291 Current Issues in Commercial Horticulture

Spring of even years. 2(2-0) A student may earn a maximum of 4 credits in all enrollments for this course. R: Open only to students in the Applied Plant Science major.

Current topics related to commercial horticulture. Crop biology. Biotechnology. Applications of new technologies. Economic, environmental, social and legal concerns.

311 Landscape Design and Management Specifications

Spring. 4(3-2) Interdepartmental with Landscape Architecture. Administered by Horticulture. P: HRT 211 and (HRT 212 or concurrently)

Landscape design techniques, spatial organization, plant selection, plant and site interaction. Relationship between design, construction and maintenance. Preparation of planting and maintenance specifications

323 Floriculture Production: Herbaceous Perennials and Annuals

Spring. 3(2-3) P: HRT 203 and HRT 203L and HRT 204 or concurrently and HRT 221

Commercial greenhouse and outdoor production of herbaceous perennials, annuals, and other plants typically sold in retail nurseries for outdoor gardens. Plant identification, propagation, production, scheduling, and finishing procedures based on specific plant growth requirements. Plant selection, marketing, and retailing issues.

332 Tree Fruit Production and Management

Fall. 2(1-3) P: HRT 203 or HRT 251 Commercial apple, cherry, peach, and pear production. Cultural practices to manipulate growth and development and optimize fruit yields and quality.

333 Wine Judging

Fall. 3(3-0) R: Open only to students in the Viticulture and Enology major. Approval of department; application required.

Sensory evaluation and selection of wines. World and regional wine production. Characteristics influenced by grape cultivar and wine production methodology. Aroma and flavor components. Quality assessment. Identification of specific wine "faults" and suggested means for amelioration in the cellar and prevention in future wine production.

334 Current Issues in Viticulture and Enology

Spring of even years. 1(1-0) A student may earn a maximum of 3 credits in all enrollments for this course. R: Open only to students in the Viticulture and Enology major.

Grape, juice, and wine production. Current and new technologies. Wine sales and marketing. Vineyard and winery establishment and management. Presentations and discussions by MSU faculty and Michigan grape and wine industry professionals.

335 Berry Crop Production and Management

Spring. 1(2-1) P: HRT 203 or HRT 251 Commercial production of blueberries, strawberries, raspberries, blackberries, cranberries, and minor fruit. Physiology, growth, and development of these species, and how cultural practices can be used to optimize fruit yields and quality.

341 Vegetable Production and Management Spring, 3(2-3) P: HRT 203 or (HRT 251 or

Spring. 3(2-3) P: HRT 203 or (HRT 251 concurrently) SA: HRT 440, HRT 442

Field production of vegetable crops. Marketing systems, tillage practices, field establishment, cultural management, pest management, harvesting, and postharvest handling and storage.

361 Applied Plant Physiology

Fall. 3(3-0) P: PLB 105 and (PLB 106 or concurrently) RB: HRT 203 and HRT 204 Whole plant physiological and growth responses of plants to light, temperature, and gases during commercial plant production. Coordination and management of growth for optimum production and quality.

362 Applied Crop Improvement

Spring. 1(3-0) P: HRT 203 and PLB 105 History of plant improvement. Basic genetic principles of crop breeding and biotechnology. Class meets weeks 6 to 10 of the semester.

382 Turfgrass Physiology

Spring. 2(3-0) Interdepartmental with Crop and Soil Sciences. Administered by Crop and Soil Sciences. P: (CSS 232) Completion of Tier I writing requirement. RB: PLB 105 SA: CSS 282, CSS 068 Not open to students with credit in CSS 332.

Physiological principles of turfgrass growth and development. Water relations, light, temperature, respiration, photosynthesis, mineral nutrition, and hormone action. Impact of mowing, cultivation, and traffic on turfgrass growth.

391 Special Topics

Fall, Spring. 1 to 2 credits. A student may earn a maximum of 9 credits in all enrollments for this course.

Specific topics in horticulture of current interest and importance. Possible field trips.

401 Physiology and Management of Herbaceous Plants

Fall. 3(3-0) P: HRT 361 or PLB 301 R: Not open to freshmen or sophomores.

Physiological and flowering responses of herbaceous plants to light, temperature, nutrients, and gases. Management of these factors for optimum production.

403 Handling and Storage of Horticultural Crops

Fall. 3(2-3) P: BOT 105 or BS 110 R: Not open to freshmen or sophomores. SA: HRT 482

Biological principles involved in quality maintenance of horticultural products. Control of deterioration during harvesting, handling, transport, and storage.

404 Horticulture Management (W)

Spring. 3(2-2) P: Completion of Tier I writing requirement. RB: (EC 201 or EC 202) and (HRT 203 and HRT 204)} or (CSS 370 or FOR 404) R: Open only to seniors in the College of Agriculture and Natural Resources. SA: HRT 488

Integration of management, economic, marketing, and horticultural production principles to develop personnel, financial, and resource strategies. Horticultural business plan development in a team situation. Effects of business decisions on people and profits.

407

Horticulture Marketing
Fall. 3(2-2) RB: (HRT 203 and HRT 204)
and (EC 201 and EC 202) and ((HRT 210 or concurrently) or (HRT 322 or concurrently) or (HRT 323 or concurrently) or (HRT 331 or concurrently) or (HRT 341 or concurrently))

Demographic and purchase trends of perishable horticultural commodities including landscape and floral crops, and fruits and vegetables. Market segmentation and product targeting, distribution, branding and packaging, and advertising and promotion. Services as a critical component of strategic business planning.

408 **Agricultural Services Marketing**

Spring of even years. 1(3-0) P: HRT 203 RB: HRT 407 R: Not open to freshmen.

Products and services for horticulture marketing. Marketing agricultural services to a diverse customer base. Class meets first five weeks of semester.

Landscape Contract Management 411 Fall. 3(2-2) RB: HRT 311

Management of landscape construction and maintenance operations. Working drawing, contracts, bonds, and insurance. Estimating and bidding procedures. Installation techniques for hardscapes and plant material.

Sustainable Landscape Practices 413

Spring of even years. 1(3-0) P: HRT 203 and (HRT 211 or HRT 212)

Landscape construction and maintenance to minimize adverse environmental effects. Site protection. restoration, plant selection, bioengineering, green roofs, water issues, and maintenance practices. Class meets last five weeks of semester.

Ornamental Conifers 414

Fall of odd years. 1(3-0) P: HRT 211 or HRT 212 or FOR 204

Taxonomy, ecology, and production of important conifers for landscape and Christmas trees. Class meets first five weeks of semester.

419 Landscape Design Practicum

Fall, Spring. 2 to 4 credits. A student may earn a maximum of 6 credits in all enrollments for this course. P: HRT 111 or HRT 311 R: Approval of department; application required.

Application of landscape design theory and practice to landscape development projects. Client interaction, site visits and design, plan development, and construction and management specifications. Residential, commercial and public landscape projects.

432 **Principles and Practices of Grape** Production I

Spring. 3(3-0) P: CEM 141 and CEM 161 and CSE 101 R: Open only to students in the Viticulture and Enology major.

Grapevine physiology, structure, and function. Techniques for vineyard establishment. Cultivar and rootstock selection, influence of environmental factors on vine growth, pre-plant site selection and preparation, training and trellising systems, cultural practices for canopy management, and methods of crop control.

Principles and Practices of Grape 432L

Production I Laboratory
Spring. 2(0-4) P: CEM 141 and CEM 161
and CSE 101 R: Open only to students in the Viticulture and Enology major. C: HRT 432 concurrently.

Grafting, pruning, and training of grapevines. Determination of vineyard structure and methods of trellis construction. Assessment of grapevine nutrient needs, irrigation management, and disease and pest control strategies.

Principles and Practices of Grape Production II

Summer. 3(3-0) P: HRT 432 and HRT 432L R: Open only to students in the Viticulture and Enology major.

Canopy management, disease and pest control, and the influence of crop adjustment on vine physiology. Environmental effects on fruit maturation. Vineyard sampling techniques and harvesting practices for improved fruit quality.

Principles and Practices of Grape 433L Production II Laboratory

Summer. 2(0-4) P: HRT 432 and HRT 432L R: Open only to students in the Viticulture and Enology major. C: HRT 433 concurrent-

Vineyard management. Climate, crop load and vine physiology. Effects of pre- and post-veraison practices on vine and fruit development. Disease and pest control strategies. Vineyard berry sampling techniques and laboratory methods to assess fruit quality for harvest.

Principles and Practices of Wine Production I

Fall. 3(3-0) P: CEM 142 and CEM 162 and CSE 101 R: Open only to students in the Viticulture and Enology major.

Origin and history of wine and wine production. Determination and timing of harvest, methods of postharvest handling, storage, and processing of grapes into juice and wine. Physical and chemical changes in wine and processes. Must analysis and adjustment, fermentation, fining, and aging. Physiology of yeasts and bacteria involved in winemaking and spoilage. Cellar practices, problems, and opera-

Principles and Practices of Wine Production I Laboratory

Fall. 2(0-4) P: CEM 142 and CEM 162 and CSE 101 R: Open only to students in the Viticulture and Enology major. C: HRT 434 concurrently.

White and red wine production. Harvest through the aging process. Methods of harvest and factors affecting yield components. Crushing and pressing grapes, must preparation and instrumental analysis of juice and wine. Methods of fermentation, fining treatments, and cellar and small winery operations.

435 **Principles and Practices of Wine** Production II

Spring. 3(3-0) P: HRT 434 and HRT 434L R: Open only to students in the Viticulture and Enology major.

Continuation of wine production and winery practices. Instrumental analyses of wine, filtration testing, and bottling. Principles, microbiology, and chemistry involved in the production of good wines. Product quality, cellar practices and problems, and costs of winery establishment. Federal requirements for licensing and operating a small winery.

Principles and Practices of Wine 435L

Production II Laboratory
Spring. 2(0-4) P: HRT 434 and HRT 434L R: Open only to students in the Viticulture and Enology major. C: HRT 435 concurrently.

Procedures and analysis involved in wine production during the aging process. Management practices of a small winery, including quality analysis of wines and cellar and equipment concerns.

Plant Breeding and Biotechnology 441

Spring of even years. 3(3-0) Interdepartmental with Crop and Soil Sciences and Forestry. Administered by Crop and Soil Sciences. P: CSS 101

Plant improvement by genetic manipulation. Genetic variability in plants. Traditional and biotechnological means of creating and disseminating recombinant genotypes and cultivars. Importance of plant breeding to our food system, economy, and environment.

451 **Biotechnology Applications for Plant Breeding and Genetics**

Spring. 3(2-2) Interdepartmental with Crop and Soil Sciences and Forestry. Administered by Crop and Soil Sciences. RB: (CSS 350 or ZOL 341) and CSS 441

Principles, concepts, and techniques of agricultural plant biotechnology. Recombinant DNA technology, plant molecular biology and transformation in relation to plant improvement.

International Studies in Horticulture 475

Spring of odd years, Summer. 1 to 6 credits. A student may earn a maximum of 6 credits in all enrollments for this course. RB: HRT 203 and HRT 204 R: Approval of department; application required.

Study and travel experience emphasizing contemporary problems, issues, and trends in horticulture.

477 Pest Management I: Pesticides in Management Systems

Fall of even years. 3(3-0) Interdepartmental with Crop and Soil Sciences and Entomology and Fisheries and Wildlife. Administered by Entomology. RB: (CEM 143 or CEM 251) and (PLP 405 and CSS 402) and (ENT 404 or ENT 470) R: Open to juniors or seniors or graduate students.

Chemistry, modes of action, and environmental fate of pesticides. Product development and regulation. Social aspects of pesticide use.

478 Pest Management II: Biological Components of Management Systems

Spring of even years. 3(2-3) Interdepartmental with Crop and Soil Sciences and Entomology and Forestry and Fisheries and Wildlife. Administered by Entomology. P: (ENT 404 or ENT 470 or PLP 405 or CSS 402) and completion of Tier I writing requirement

Principles of host plant resistance and biological control and their relationship to the design of agroe-cosystems. Classification of insect biological control

Woody Plant Physiology 480

Spring. 3(3-0) Interdepartmental with Forestry. Administered by Horticulture. P: PLB 105 or BS 110 R: Not open to freshmen or sophomores.

Physiology of carbon utilization. Effects of water, temperature, nutrition, and light on apical, vegetative, and reproductive growth of woody plants.

486 **Biotechnology in Agriculture:** Applications and Ethical Issues

Fall of even years. 3(3-0) Interdepartmental with Crop and Soil Sciences and Forestry and Philosophy. Administered by Horticulture. P: BOT 105 or BS 111 RB: CSS 350 or ZOL 341 R: Not open to freshmen or sophomores.

Current and future roles of biotechnology in agriculture: scientific basis, applications. Environmental, social, and ethical concerns.

490 Independent Study

Fall, Spring, Summer. 1 to 2 credits. A student may earn a maximum of 6 credits in all enrollments for this course. P: HRT 203 and HRT 203L and HRT 204 R: Approval of department; application required.

Independent study of horticulture on a field, laboratory, or library research program of special interest

Selected Topics in Horticulture 491

Fall, Spring. 1 to 3 credits. A student may earn a maximum of 6 credits in all enrollments for this course. P: HRT 203 and HRT 203L and HRT 204 R: Not open to freshmen or sophomores.

Selected topics in horticulture of current interest and importance.

Undergraduate Research 492

Fall, Spring, Summer. 1 to 2 credits. A student may earn a maximum of 3 credits in all enrollments for this course. P: HRT 203 and HRT 204 R: Approval of department; application required.

Mentored field or laboratory research experience.

Professional Internship in Horticulture 493

Fall, Spring, Summer. 3 credits. A student may earn a maximum of 6 credits in all enrollments for this course. A student may earn a maximum of 6 credits in all enrollments for any or all of these courses: ABM 493, AEE 493, ANR 493, ANS 493, CMP 493, CSS 493, EEP 493, ESA 493, FIM 493, FSC 493, FW 493, HRT 493, PKG 493, PLP 493, and PRR 493. P: HRT 203 and HRT 203L and HRT 204 R: Open only to juniors and seniors in the College of Agriculture and Natural Resources. Approval of department; application required.

Professional career-related work experience supervised by a professional horticulturist.

494 Industry Master's Apprenticeship

Fall, Spring, Summer. 3 credits. A student may earn a maximum of 6 credits in all enrollments for this course. P: (HRT 433 and HRT 433L) or (HRT 435 and HRT 435L) R: Open only to students in the Viticulture and Enology major. Approval of department; application required.

A focused and supervised work experience with a grape or wine industry master. Intensive training in vineyard or winery techniques, operations and management.

Environmental Design Theory

Fall. 3(3-0) Interdepartmental with Human Environment and Design and Landscape Architecture and Park, Recreation and Tour-ism Resources. Administered by Landscape Architecture. RB: Undergraduate design degree recommended.

Differences between normative theories, scientific theories, models, and constructs. Exploration of normative theories related to thesis or practicum.

Environmental Design Studio

Spring. 3(0-6) Interdepartmental with Human Environment and Design and Landscape Architecture and Park, Recreation and Tourism Resources. Administered by Landscape Architecture. P: (LA 816 and LA 883) RB: Undergraduate design degree.

Development of a student-selected environmental design project in a collaborative setting.

Advanced Plant BreedingFall of even years. 3(3-0) Interdepartmental with Crop and Soil Sciences and Forestry. Administered by Horticulture. RB: STT 422 and ZOL 341

Genetic expectations resulting from breeding strategies with cross- and self-pollinated crop plants. Germplasm collections, mapping populations, and modifications of reproductive biology useful for crop

820 Plant Reproductive Biology and Polyploidy

Spring of odd years. 1(3-0) Interdepartmental with Crop and Soil Sciences and Forestry and Plant Biology and Plant Pathology. Administered by Horticulture. RB: Introductory Genetics and Plant Biology

Genetic processes underlying variations in plant reproductive biology and polyploidy. Utilization of these characteristics in plant breeding.

821 **Crop Evolution**

Spring of odd years. 1 credit. Interdepartmental with Crop and Soil Sciences and Forestry and Plant Biology and Plant Pathology. Administered by Horticulture. RB: Introductory Genetics and Plant Biology

Cultural and biological aspects of the evolution of domestic plants.

Historical Geography of Crop Plants

Spring of odd years. 1 credit. Interdepartmental with Crop and Soil Sciences and Forestry and Plant Biology and Plant Pathology. Administered by Horticulture. RB: Introductory Genetics and Plant Biology

Development and spread of the major crop species.

Techniques in Cytogenetics

Fall of odd years. 1(0-3) Interdepartmental with Crop and Soil Sciences and Forestry. Administered by Crop and Soil Sciences.

Preparation of chromosomes from commercially important plants for cytogenetic analysis.

842 Population Genetics, Genealogy and Genomics

Fall. 3(3-0) Interdepartmental with Animal Science and Crop and Soil Sciences and Forestry and Fisheries and Wildlife and Genetics. Administered by Forestry. RB: Precalculus, basic genetics

Population genetic processes underlying patterns of molecular genetic variation. Genealogical approaches to the study of genomic diversity, phylogenetic reconstruction, and molecular ecology.

853 Plant Mineral Nutrition

Fall of odd years. 3(3-0) Interdepartmental with Crop and Soil Sciences. Administered by Crop and Soil Sciences. RB: BOT 301

Inorganic ion transport in plant cells and tissues. Physiological responses and adaptation to problem soils. Genetic diversity in nutrient uptake and use by plants. Physiological roles of elemental nutrients in crop growth.

863 **Environmental Plant Physiology**

Spring of odd years. 3(3-0) Interdepartmental with Plant Biology. Administered by Plant Biology. RB: PLB 301 or PLB 414 or PLB 415 ŠÁ: BOT 863

Interaction of plant and environment. Photobiology, thermophysiology, and plant-water relations.

865 **Plant Growth and Development**

Fall. 3(3-0) Interdepartmental with Plant Biology. Administered by Plant Biology. RB: PLB 415 SA: BOT 865

Genetics and biochemistry of development in higher plants as influenced by genes and environment. Biosynthesis, action and signal transduction of phytohormones and other signaling molecules. Patterning, meristem organization and formation of tissues and organs. Genetic mechanisms underlying developmental diversity.

870 **Techniques of Analyzing Unbalanced** Research Data

Spring. 4(4-0) Interdepartmental with Animal Science and Crop and Soil Sciences and Forestry and Fisheries and Wildlife. Administered by Animal Science, RB: STT 464 R: Open only to graduate students in the College of Agriculture and Natural Resources. SA: ANS 943

Linear model techniques to analyze biological research data characterized by missing and unequal number of observations in classes. Simultaneous consideration of multiple factors. Prediction of breeding values and estimation of population parameters from variance and covariance components.

883 **Environmental Design Seminar**

Fall. 3(3-0) Interdepartmental with Human Environment and Design and Landscape Architecture and Park, Recreation and Tourism Resources. Administered by Landscape Architecture. RB: Undergraduate design degree.

Examination of the breadth of environmental design projects. Literature review of focused projects. Development of practicum or thesis proposals.

Independent Study

Fall, Spring, Summer. 1 to 4 credits. A student may earn a maximum of 6 credits in all enrollments for this course. R: Approval of department.

Individual study of problems of special interest.

891A Selected Topics in Horticulture

Fall, Spring, Summer. 1 to 3 credits. A student may earn a maximum of 6 credits in all enrollments for this course. R: Open only to graduate students in the Department of Horticulture. Approval of department.

Horticultural science topics of current interest and importance.

891B Selected Topics in Plant Breeding and Genetics

Fall, Spring, Summer. 1 to 2 credits. A student may earn a maximum of 6 credits in all enrollments for this course. Interdepartmental with Crop and Soil Sciences and Forestry. Administered by Horticulture. R: Open only to graduate students in the Plant Breeding and Genetics major or Genetics major. Approval of department.

Selected topics in plant breeding.

892 Plant Breeding and Genetics Seminar

Fall, Spring, Summer. 1(1-0) A student may earn a maximum of 8 credits in all enrollments for this course. Interdepartmental with Crop and Soil Sciences and Forestry. Administered by Horticulture.

Experience in review, organization, oral presentation, and analysis of research.

894 Horticulture Seminar

Fall, Spring. 1(1-0) A student may earn a maximum of 4 credits in all enrollments for this course

Experience in review, organization, oral presentation and analysis of research.

898 Master's Research

Fall, Spring, Summer. 1 to 6 credits. A student may earn a maximum of 6 credits in all enrollments for this course. R: Approval of department.

Master's degree Plan B project.

899 Master's Thesis Research

Fall, Spring, Summer. 1 to 10 credits. A student may earn a maximum of 99 credits in all enrollments for this course. R: Open only to graduate students in the Department of Horticulture.

Master's thesis research.

941 Quantitative Genetics in Plant Breeding

Spring of even years. 3(2-2) Interdepartmental with Crop and Soil Sciences and Forestry. Administered by Crop and Soil Sciences. RB: CSS 819 and STT 464

Theoretical and genetic basis of statistical analysis of quantitative traits using genetic markers. Computational tools for the study of quantitative traits.

999 Doctoral Dissertation Research

Fall, Spring, Summer. 1 to 24 credits. A student may earn a maximum of 99 credits in all enrollments for this course. R: Open only to doctoral students in the Department of Horticulture.

Doctoral dissertation research.
