**FISHERIES AND WILDLIFE**

Department of Fisheries and Wildlife
College of Agriculture and Natural Resources

110 Conservation and Management of Marine Resources
Fall, Spring. 3(3-0) SA: FW 100, FW 205
Ecological and sociological concepts of fisheries and wildlife ecology and management. Career opportunities.

101 Fundamentals of Fisheries and Wildlife Ecology and Management
Fall, Spring. 3(3-0) Open to undergraduates. Focus on aquatic ecosystems. Species and communities in Michigan and the United States. Species identification in various ecosystem types. Impacts of disturbances on ecosystems. Field trips required.

110L Fundamentals of Fisheries and Wildlife Ecology and Management Lab
Fall. 2(0-4) P: FW 101 or concurrently R: Open to undergraduates in the Fishery and Wildlife major. Not open to students with credit in FW 284.

116 Great Lakes: Biology and Management
Fall. 1(0-2) P: FW 101 or concurrently R: Open to undergraduates. Focus on aquatic ecosystems. Species and communities in Michigan and the United States. Species identification in various ecosystem types. Impacts of disturbances on ecosystems. Field trips required.

118 Introduction to Science, Technology, the Environment and Public Policy
Fall. 3(3-0) P: FW 101L and FW 102L or concurrently R: Open to students with credit in FW 284.

119 Conservation and Management of Marine Resources
Spring. 3(3-0) Focus on aquatic ecosystems. Species and communities in Michigan and the United States. Species identification in various ecosystem types. Impacts of disturbances on ecosystems. Field trips required.

203 Resource Ecology
Fall, Spring. 3(3-0) Basic concepts of ecology which provide a foundation for examining environmental problems and their solutions.

204 Energy Issues in Natural Resource Management
Spring. 3(3-0) Interdepartmental with Community, Agriculture, Recreation and Resource Studies. Administered by Fisheries and Wildlife. RB: FW 101 or FW 203 or ESA 200 or ESA 201 or FOR 202

207 Great Lakes: Biology and Management
Fall. 3(3-0) Interdepartmental with Environmental Studies and Applications. Administered by Fisheries and Wildlife. Living aquatic resources of the Great Lakes, environmental history, and biological resources and their management. Policy issues.

208 Outdoor Preparedness for Natural Resources Professionals
Spring. 3(3-0) Basic outdoor preparedness. Psychology of becoming lost or an accident victim. Basic wilderness and sea survival. Wilderness accident management. Backcountry and coastal navigation.

211 Introduction to Gender and Environmental Issues
Spring. 3(3-0) Interdepartmental with Environmental Economics and Policy and Environmental Studies and Applications and Forestry and Women's Studies. Administered by Fisheries and Wildlife. R: Not open to freshmen.

224 Introduction to Probability and Statistics for Ecologists
Spring. 3(2-2) Interdepartmental with Statistics and Probability. Administered by Statistics and Probability. P: MTH 103 or MTH 116 or (MTH 124 or concurrently) or (MTH 132 or concurrently) or (MTH 152H or concurrently) or (LB 110 or concurrently) RB: BS 110 or BS 148H or LB 144 SA: FW 324
Not open to students with credit in STT 231.
Probability and statistics with computer applications for the analysis, interpretation and presentation of ecological data. Data analysis, probability models, random variables, estimation, confidence intervals, test of hypotheses, and simple linear regression with applications to ecology.

238 Introductory Fisheries and Wildlife Field Experience
Summer. 3(1-4) RB: Introductory Biology, Botany, Zoology, Forestry, Natural Resources, Plant Biology, Fisheries and Wildlife course R: Approval of department; application required.
Terrestrial and aquatic field research techniques and their application to current issues. Interaction with professionals. Field trips required.

284 Natural History and Conservation in Michigan
Fall. 3(2-3) R: Not open to undergraduate students in the Fisheries and Wildlife major. Not open to students with credit in FW 101L.
Identification, habitat requirements, and distribution of Michigan's flora and fauna. Interrelationships which influence natural resource use.

293 Undergraduate Seminar in Fisheries and Wildlife
Fall. 1(0-2) P: FW 101 R: Open to undergraduate students in the Department of Fisheries and Wildlife.
Case studies highlighting the integrative nature of fisheries and wildlife management.

300 Environmental History and Policy
Fall. 3(2-2) P: (ZOL 355) and completion of Tier I writing requirement.
Historical gender roles in environmental management. Gender-based theoretical perspectives. Case studies on developing and developed countries. Environmental management with emphasis on fisheries, wildlife and wetlands. Women environmental professionals.

308 Writing Nature and the Nature of Writing
Fall of odd years. 3(3-0) Interdepartmental with Writing. Administered by Women's Studies.

341 Writing Nature and the Nature of Writing Fall of odd years. 3(3-0) Interdepartmental with Writing, Rhetoric and American Cultures. Administered by Writing, Rhetoric and American Cultures. P: Completion of Tier I writing requirement. R: Open to students in the College of Agriculture and Natural Resources or in the Professional Writing major. Not open to freshmen.

364 Ecological Problem Solving
Spring. 3(2-2) P: (MTH 124 or concurrently) or (MTH 132 or concurrently) or (LB 110 or concurrently) and (LB 144 or concurrently) or (STT 224 or STT 231 or STT 421) and (ZOL 355 or BE 230)
Application of ecological concepts and models to problems in natural resource and ecosystem management.

370 Writing- and reading-intensive course focusing on the language of scientists, poets, essayists, naturalists, environmentalists, and biologists, and on their various responses to and representations of the natural environment.

386 Introduction to Gender and Natural Resources Professionals
Fall. 3(3-0) Interdepartmental with Environmental Economics and Policy and Environmental Studies and Applications and Forestry and Women's Studies. Administered by Fisheries and Wildlife. R: Not open to freshmen.

394 Wildlife Research and Management
Fall. 3(3-0) Interdepartmental with Geographical Anthropology and Zoology. Administered by Zoology. R: Not open to freshmen.
Introduction to data collection and analysis methods. Application of ecological concepts and models to problems in natural resource and ecosystem management.

404 Women and the Law in the United States
Fall of odd years. Spring of odd years. 3(3-0) Interdepartmental with Women's Studies. Administered by Women's Studies. R: WS 201 or WS 202 or WS 203 R: Not open to freshmen or sophomores.
Introduction to law in the United States as a vehicle for structuring and maintaining women’s social roles, and for social change.

410 Upland Ecosystem Management
Spring. 3(2-3) P: (ZOL 355 or FOR 404) and completion of Tier I writing requirement.
Analysis and management of upland ecosystems to meet wildlife management and biodiversity objectives. Mitigation of human impact. Field trips required.

413 Wildlife Research and Management Techniques
Fall. 3(1-6) P: FW 101 and FW 101L
Field techniques used in collecting, analyzing, and communicating data on wild animal populations and their habitats. Field trips required.

414 Aquatic Ecosystem Management
Fall. 3(3-0) P: (ZOL 355) and completion of Tier I writing requirement.
Management of aquatic habitats and populations for ecological and socioeconomic objectives; human impacts on aquatic ecosystems. Field trips required.
Fisheries and Wildlife—FW

416 Marine Ecosystem Management
Fall. 3(3-0) P: ZOL 355 RB: FW 110 or ZOL 353 or GLG 303

417 Wetland Ecology and Management
Fall. 3(2-3) P: (ZOL 355) and completion of Tier I Writing requirement SA: FW 412
Biological, physical, and chemical processes controlling wetland structure and function. Utilization, mitigation, and conservation of wetlands on a sustainable basis.

418 Applications of Geographic Information Systems to Natural Resources Management
Spring. 4(2-4) Interdepartmental with Community, Agriculture, Recreation and Resource Studies and Biosystems Engineering and Forestry and Geography. Administered by Fisheries and Wildlife. P: GEO 221
Application of geographic information systems, remote sensing, and global positioning systems to integrated planning and management for fish, wildlife, and related resources.

419 Stream Ecology
Fall. 3(3-0) Interdepartmental with Zoology. Administered by Fisheries and Wildlife. P: BS 110 or BS 148H or LB 144 RB: (CEM 141 and ZOL 355)
Biological and environmental factors determining structure and function of stream ecosystems.

420 Aquatic Entomology
Fall of odd years. 3(2-3) Interdepartmental with Entomology and Zoology. Administered by Entomology. P: BS 110 SA: ENT 420
Biological and ecological systematics of aquatic insects in streams, rivers and lakes. Field trips and aquatic insect collection required.

421 Principles of Fish and Wildlife Disease
Spring of odd years. 3(3-0) Interdepartmental with Large Animal Clinical Sciences. Administered by Fisheries and Wildlife. P: BS 110 or BS 148H or LB 144 RB: Additional course work in ecology, zoology, microbiology or environmental science. R: Open to juniors or seniors or graduate students in the College of Agriculture and Natural Resources or in the College of Veterinary Medicine.
Diseases of fish and wildlife species. Disease detection and diagnosis. Ecological and epidemiological analysis and management of major classes of wildlife diseases. Threatened and endangered species, game species, and fish and wildlife species that serve as vectors or reservoirs of human and domestic animal diseases.

423L Principles of Fish and Wildlife Disease Laboratory
Spring of odd years. 1(0-3) Interdepartmental with Large Animal Clinical Sciences. Administered by Fisheries and Wildlife. RB: Additional laboratory course work in ecology, zoology, microbiology or environmental sciences. C: FW 423 concurrently.
Tools for diagnosis and assessment of disease in fish and wildlife populations. Field Trips required.

424 Population Analysis and Management
Fall. 4(3-2) P: ZOL 355 and (STT 224 or STT 231 or STT 421) and (MTH 124 or MTH 132 or LB 118)
Statistical, ecological and management concepts and methods needed to analyze and interpret demographic data and manage fish and wildlife populations.

425 Integrated Communications for the Fisheries and Wildlife Professional
Fall. 3(3-0) P: Completion of Tier I writing requirement R: Open to juniors or seniors or graduate students.
Role and practical application of communications for fisheries and wildlife professionals, which integrates public and media relations, community relations, social marketing, and courtroom testimony using a variety of communication tools including news releases, direct mail, storyboards, and business writing.

426 Philosophy of Ecology (W)
Spring of even years. 3(3-0) Interdepartmental with Lyman Briggs. Administered by Fisheries and Wildlife. P: Completion of Tier I Writing Requirement RB: Additional coursework in ecology, natural resources, philosophy, or environmental sciences. R: Open to juniors or seniors or graduate students.
Conceptual issues in the science of ecology, including connections between ecology and environmental philosophy. Western and non-western perspectives.

427 Conservation Ethics
Spring of odd years. 3(3-0) P: Completion of Tier I Writing Requirement RB: Additional coursework in ecology, natural resources, philosophy, or environmental sciences. R: Open to juniors or seniors or graduate students.
Ethical concepts and arguments underlying natural resources.

428 Restoration Ecology
Spring. 3(2-2) Interdepartmental with Biosystems Engineering and Zoology. Administered by Fisheries and Wildlife. P: BS 110 or BS 148H or LB 144 RB: Additional course work in ecology, zoology, microbiology or environmental science. R: Open to juniors or seniors or graduate students.
Principles of ecological restoration of disturbed or damaged ecosystems. Design, implementation, and presentation of restoration plans. Field trips required.

429 Biodiversity Conservation Policy and Practice
Spring of even years. 3(3-0) Interdepartmental with James Madison College. Administered by Fisheries and Wildlife. P: ((EC 201 or concurrently) or (EC 202 or concurrently) or (EC 251H or concurrently) or (EC 252H or concurrently) [or approval of department]) and completion of Tier I writing requirement RB: Interest in Conservation Biology
Social, economic, and policy considerations. Approaches to conserve biodiversity.

430 International Environmental Law and Policy
Spring. 3(3-0) Interdepartmental with James Madison College. Administered by James Madison College. P: EC 201 or EC 202 RB: FW 181 and EC 340
Overview of concepts, actors, norms, laws, and institutions related to international environmental policy. Case studies on current global environmental issues.

432 Watershed Concepts
Fall, Spring, Summer. 3(3-0) Interdepartmental with Biosystems Engineering and Crop and Soil Sciences and Environmental Studies and Agriscience and Forestry. Administered by Environmental Studies and Agriscience. P: ESA 324 and ZOL 355 RB: organic chemistry SA: RD 452
Watershed hydrology and management. The hydrologic cycle, water quality, aquatic ecosystems, and social systems. Laws and institutions for managing water resources.

433 Environmental Hydrology for Watershed Management
Spring of odd years. 3(3-0) P: (MTH 124 or MTH 132 or LB 118) and (PHY 183 or current or concurrently) and (PHY 231 or concurrently) or (PHY 231 or concurrently) RB: ZOL 355 or concurrently
Effect of climate, topography, geology, soil, vegetation, and anthropogenic land uses on the amount, timing, and quality of water yield. Implications for fish and wildlife resource management. Field trips required.

434 Natural Resource Policy
Spring. 3(3-0) Interdepartmental with Forestry and Park, Recreation and Tourism Resources and Resource Development. Administered by Forestry. R: Not open to freshmen or sophomores.
Natural resources policy-making in the context of scientific, environmental, social, and legal-institutional factors. Historical evolution of policies and case studies of contemporary policy issues.

435 Principles of Ecosystem Management
Spring or odd years. 3(3-0) Interdepartmental with Zoology. P: (ZOL 355) and (ZOL 353 or GLG 303)
Overview of concepts, actors, norms, laws, and institutions for managing wetlands, direct mail, storyboards, and business writing on a sustainable basis. Field trips required.

436 Organic Chemistry
Fall. 4(3-2) Interdepartmental with Zoology. Administered by James Madison College. P: ZOL 355 or concurrently or (EC 251H or concurrently) or (EC 252H or concurrently) or approval of department.
Principles of organic chemistry. SA: RD 452

437 Integrated Watershed Management
Spring. 3(2-2) Interdepartmental with Biosystems Engineering and Zoology. Administered by Fisheries and Wildlife. P: BS 110 or BS 148H or LB 144 RB: Additional coursework in ecology, natural resources, philosophy, or environmental sciences. R: Open to juniors or seniors or graduate students.
Field trips and laboratory course work in ecology, zoology, microbiology or environmental science. R: Open to juniors or seniors or graduate students.

438 Principles of Ecosystem Management
Spring or odd years. 3(3-0) Interdepartmental with Zoology. P: (ZOL 355) and completion of Tier I writing requirement R: Open to juniors or seniors or approval of department.
Field trips required.

439 Principles of Strategic Planning
Spring or odd years. 3(3-0) Interdepartmental with Zoology. P: (ZOL 355) and (ZOL 353 or GLG 303)
Principles of ecological restoration of disturbed or damaged ecosystems. Design, implementation, and presentation of restoration plans. Field trips required.

440 Conservation Biology
Spring. 3(3-0) Interdepartmental with Zoology. Administered by Fisheries and Wildlife. P: ZOL 355 or concurrently or completion of Tier I writing requirement R: Open to juniors or seniors or graduate students.
Ecological theories and methodologies to manage species, communities and genetic diversity on a local and global scale.

441 Aquatic Biology
Fall. 3(3-0) Interdepartmental with Zoology. Administered by Fisheries and Wildlife. P: BS 110 or BS 148H or LB 144 RB: (CEM 141 and ZOL 355)
Biological and environmental factors determining structure and function of stream ecosystems.

442 Aquatic Entomology
Fall of odd years. 3(2-3) Interdepartmental with Zoology and Ecology and Systematics of aquatic insects in streams, rivers and lakes. Field trips and aquatic insect collection required.

443 Aquatic Biology
Fall. 3(3-0) Interdepartmental with Zoology. Administered by Fisheries and Wildlife. P: BS 110 or BS 148H or LB 144 RB: Additional course work in ecology, zoology, microbiology or environmental science. R: Open to juniors or seniors or graduate students.
Ecological theories and methodologies to manage species, communities and genetic diversity on a local and global scale.

444 Principles of Stream and River Ecology
Spring. 3(2-2) Interdepartmental with Zoology. Administered by Fisheries and Wildlife. P: BS 110 or BS 148H or LB 144 RB: Additional laboratory course work in ecology, zoology, microbiology or environmental sciences. C: FW 423 concurrently.
Tools for diagnosis and assessment of disease in fish and wildlife populations. Field Trips required.

445 Biocenology of Streams and Rivers
Summer of even years. 3(2-3) Interdepartmental with Zoology. Administered by Entomology. P: BS 110
Practical field and lab rapid bioassessment methodologies used to sample and assess the biota of streams and rivers. Sampling and identification of fish, macroinvertebrates and other biota.

446 Principles of Fish and Wildlife Disease
Spring of odd years. 3(3-0) Interdepartmental with Zoology. Administered by Fisheries and Wildlife. P: BS 110 or BS 148H or LB 144 RB: Additional course work in ecology, zoology, microbiology or environmental sciences. C: FW 423 concurrently.
Tools for diagnosis and assessment of disease in fish and wildlife populations. Field Trips required.

447 Stream and River Ecology
Spring. 3(2-2) P: ZOL 355 or concurrently or completion of Tier I writing requirement R: Open to juniors or seniors or graduate students.
Field trips required.

</tr>
<tr>
<td>513</td>
<td>Democracy and Environment</td>
<td>3</td>
<td>Fall of odd years. 3(3-0) RB: Exposure to social science or legal approaches to the environment. Relationship between democracy and environmental protection and management. Effects of democratic institutions on natural resource management.</td>
</tr>
<tr>
<td>582</td>
<td>Aquatic Animal Medicine</td>
<td>3</td>
<td>Fall. 3(2-2) Interdepartmental with Pathobiology and Diagnostic Investigation and Veterinary Medicine. Administered by Fisheries and Wildlife. RB: (FW 423) or prior course work in animal ecology, microbiology, parasitology or pathology. Health management techniques and pathobiological processes relating to the etiology, diagnosis, and control of diseases affecting aquatic animal populations and communities.</td>
</tr>
<tr>
<td>824</td>
<td>Analysis of Wildlife Populations</td>
<td>3</td>
<td>Spring of even years. 3(2-3) Statistical and ecological concepts, methods and computer techniques needed to analyze and interpret demographic data from fish and wildlife studies.</td>
</tr>
<tr>
<td>828</td>
<td>Conservation and Genetics</td>
<td>3</td>
<td>Fall of even years. 3(2-2) Interdepartmental with Plant Biology and Zoology. Administered by Fisheries and Wildlife. RB: ZOL 341 or CSS 350 or ANS 314. Population and evolutionary genetic principles applied to ecology, conservation, and management of fish and wildlife at the individual, population, and species level.</td>
</tr>
<tr>
<td>829</td>
<td>The Economics of Environmental Resources</td>
<td>3</td>
<td>Spring. 3(3-0) Interdepartmental with Community, Agriculture, Recreation and Resource Studies and Agricultural Economics and Forestry. Administered by Agricultural Economics. Economic principles related to environmental conflicts and public policy alternatives. Applications to water quality, land use, fish and wildlife, conservation, development, and global environmental issues.</td>
</tr>
</tbody>
</table>
840 Landscape Ecology
Fall of even years. 3(2-2) RB: Knowledge or course work in the natural sciences, particularly ecological concepts, as well as exposure to GIS and data analysis. Ecological patterns and processes. Spatial variation in landscapes at multiple scales as affected by natural causes and human activity. Landscape ecology in natural resource decision-making and management.

842 Population Genetics, Genealogy and Genomics
Fall. 3(3-0) Interdepartmental with Animal Science and Crop and Soil Sciences and Forestry and Genetics and Horticulture. Administered by Forestry. RB: Pre-calculus, basic genetics

850 Applied Multivariate Statistical Methods
Spring of even years. 4(3-2) Interdepartmental with Statistics and Probability. Administered by Fisheries and Wildlife. RB: (STT 422 or concurrently) and MTH 314 SA: FOR 976 Application of multivariate methods to research problems. Hotelling's T-test, profile analysis, discriminant analysis, canonical correlation, principal components, principal coordinates, correspondence analysis, and cluster analysis.

852 Systems Modeling and Simulation
Fall of even years. 3(3-0) Interdepartmental with Biosystems Engineering and Forestry. Administered by Fisheries and Wildlife. RB: STT 422 or STT 442 or STT 464
General systems theory and concepts. Modeling and simulation methods. Applications of systems approach and techniques to natural resource management, and to ecological and agricultural research.

853 Applied Systems Modeling and Simulation for Natural Resource Management
Spring of odd years. 3(2-2) Interdepartmental with Biosystems Engineering and Forestry and Zoology. Administered by Fisheries and Wildlife. RB: (ZOL 851) or approval of department. R: Open to seniors or graduate students.

854 Adaptive Management of Natural Resource Systems
Fall of odd years. 3(2-2) RB: ZOL 355
Principles and practices of adaptive environmental assessment and management. Applications to ecosystem and natural resource management.

857 Theoretical Ecology
Spring of even years. 3(2-2) Interdepartmental with Plant Biology and Zoology. Administered by Fisheries and Wildlife. RB: One course in ecology and calculus. Programming experience helpful.
Theoretical ecology of animal behavior, population dynamics, and multispecies communities. Basic mathematical approaches and use of modeling software to perform mathematical functions and develop models.

858 Gender, Justice and Environmental Change: Issues and Concepts
Fall. 3(3-0) Interdepartmental with Anthropology and Forestry and Geography and Sociology. Administered by Fishers and Wildlife. RB: Background in social science, environmental science, or natural resources. Issues and concepts related to gender, ecology, and environmental studies. Key debates and theoretical approaches to addressing environmental issues from a gender and social justice perspective. Gender and environment issues and processes from a global perspective.

859 Gender, Justice, and Environmental Change: Methods and Application
Spring of even years. 3(3-0) Interdepartmental with Anthropology and Forestry and Geography and Resource Development and Sociology. Administered by Anthropology. RB: Background in social science, environmental science, or natural resources. Methods and case studies related to gender, ecology, and environmental studies. Methodological and fieldwork issues from a feminist perspective in international and intercultural contexts. Qualitative and quantitative methods for integrating social and environmental data.

860 Wildlife Nutrition
Fall of odd years. 3(2-2) R: Open only to graduate students in the Colleges of Agriculture and Natural Resources, and Natural Science.
Nutritional ecology of wild species. Techniques for analyzing and improving nutritional qualities.

861 Water Policy and Management
Fall of odd years. 3(3-0) RB: Familiarity with biological and ecological science and environmental policy issues. SA: FW 468
Environmental policy issues associated with the use, management, and protection of water resources and aquatic ecosystems. Case studies in water science and management.

866 Community and Conservation
Fall of even years, Summer of even years. 3 credits. Interdepartmental with Resource Development and Sociology. Administered by Sociology. RB: Social Science methods, social science theory and environmental coursework.
Use of experiential, participatory, field-based mode of inquiry to develop understanding of social and cultural issues associated with conservation. Understanding of different social positions and perspectives.

871 Fish Population Dynamics
Fall of even years. 3(2-2) R: Open only to graduate students in the College of Agriculture and Natural Resources or College of Natural Science.
Quantitative analysis of fish populations. Evaluation, causes, and impacts of the rates of change in survival, growth, reproduction, and recruitment for fish populations and their yield.

879 Advanced Limnology
Spring of even years. 3(3-0) RB: FW 472 or ZOL 431
Theory and management of streams, rivers, lakes, reservoirs, and other deepwater habitats from ecosystem and landscape perspectives.
