Horticulture: Plants and People

Spring, 3(2-2) R: Not open to juniors or seniors in the Department of Horticulture. Functional uses of plants: aesthetics, food, industry, recreation. Growing and using horticultural plants. Consumer and environmental issues related to horticulture in daily living.

Horticulure Career Development

Fall, 1(1-0) Internship preparation and identification of employment opportunities. Career goal establishment, resume construction, correspondence development, personal budgeting, interview skills and strategies.

Pruning and Training Systems in Horticulture

Nursery Management

Fall, 3(2-3) P: (HRT 203 or concurrently) and (HRT 204 or concurrently) SA: HRT 071, HRT 310 Management of field and container grown nursery operations. Site selection and development, financing, legal restrictions, production practices, nutrition, irrigation, weed and pest control, modification of plant growth, storage, shipping, and marketing.

Landscape Plants I

Fall, 3(2-3) Identification, adaptation, and evaluation of shade trees, narrow-leaved evergreens, shrubs, woody vines, herbs, ornamental grasses, and herbaceous perennials.

Landscape Plants II

Fall, Spring, 3(2-3) Identification, adaptation, and evaluation of flowering trees and shrubs, broad-leaved evergreens, herbaceous vines, ground covers, bulbs, wildflowers, ferns, and aquatic plants.

Landscape Maintenance

Fall, 2(2-0) R: Open only to students in the Institute of Agricultural Technology. Ornamental plant management. Plant growth and development related to pruning, fertilization, irrigation, weed control, transplanting; development of landscape management specifications; integrated plant management and plant health care programs.

Landscape Maintenance Field Laboratory

Fall, 1(0-2) P: HRT 213 or concurrently R: Open only to students in the Institute of Agricultural Technology. Landscape maintenance. Site analysis. Pruning woody plants, transplanting by hand and mechanical tree spade, and planting techniques for ornamentals. Herbaceous perennial care, cutting back, dividing. Scouting as a component of integrated pest management and plant health care programs.

Training and Pruning Plants

Spring, 1(2-2) Principles and techniques of pruning for landscape and nursery ornamentals, Christmas tree production, tree fruits, and small fruits. Pruning practices, equipment, and basic large tree care techniques. Class meets last five weeks of the semester.

Introduction to Applied Plant Science

Fall, Spring, 1(0-2) R: Open only to students in the Institute of Agricultural Technology. Plant growth and development. Interrelationship between cultural practice and plant performance. Plant classification, plant physiology and metabolism.

Landscape Design

Spring, 3(3-3) Not open to students with credit in HRT 072 or HRT 311. Functional uses of the landscape, landscape design process, drafting and graphic representation, plant selection and use, planting design principles, construction materials and specifications. Offered first ten weeks of semester.

Introduction to Sustainable Agriculture and Food Systems

Fall, Spring, 1(0-2) Interdepartmental with Crop and Soil Sciences and Environmental Studies and Agriscience. Administered by Crop and Soil Sciences. Impact of agricultural and social sciences on our food system. Contemporary research and movements involving agricultural and food system sustainability.

Crop Scouting and Investigation

Spring, 2(3-0) Interdepartmental with Crop and Soil Sciences. Administered by Crop and Soil Sciences. P: CSS 101 or HRT 203 Crop production, pest scouting and other production problems, and field diagnoses. Interaction with agriculture clientele. Offered first ten weeks of semester.

Principles of Horticulture

Fall, 3(2-2) SA: HRT 201 Basics of horticulture. Plant growth including crop selection and management, cultivar development, crop geography, environmental factors affecting plant growth and development, and reproductive development. Field trip required.

Plant Propagation

Spring, 2(2-3) SA: HRT 204L, HRT 104 Asexual propagation including rooting of cuttings, micropropagation, grafting, layering, and under-ground structures. Sexual propagation including seed germination, storage, and production. Offered first 10 weeks of the semester.

Plant Mineral Nutrition

Spring, 1(3-0) P: CSS 210 RB: HRT 203 Mineral elements required by plants. Essential elements, effect of soil and potting media on nutrient availability, absorption and function in plant physiology, and nutrient deficiency and toxicity symptoms. Methods of monitoring and managing plant nutrient levels. Class meets first five weeks of semester.

Landscape Irrigation

Spring, 3(3-3) Not open to students with credit in HRT 078. Design, installation and maintenance of irrigation systems for turfgrass and landscape plants. Design hydraulics, equipment selection, pump stations, water features, water quality and conservation. Offered the first ten weeks of the semester.

Landscape Construction

Fall, 3(2-2) R: Open only to students in the Institute of Agricultural Technology. SA: HRT 076 Not open to students with credit in HRT 076. Construction installation techniques encountered in landscape development. Field installation of patios, retaining walls, ponds, and plant materials. Construction estimating and bidding procedures. Field Trip required.

Landscape Irrigation

Spring, 3(3-3) Not open to students with credit in HRT 078. Design, installation and maintenance of irrigation systems for turfgrass and landscape plants. Design hydraulics, equipment selection, pump stations, water features, water quality and conservation. Offered the first ten weeks of the semester.

Landscape Irrigation

Spring, 3(2-2) R: Open only to students in the Institute of Agricultural Technology. SA: HRT 076 Not open to students with credit in HRT 076. Construction installation techniques encountered in landscape development. Field installation of patios, retaining walls, ponds, and plant materials. Construction estimating and bidding procedures. Field Trip required.

Landscape Irrigation

Spring, 3(3-3) Not open to students with credit in HRT 078. Design, installation and maintenance of irrigation systems for turfgrass and landscape plants. Design hydraulics, equipment selection, pump stations, water features, water quality and conservation. Offered the first ten weeks of the semester.

Landscape Irrigation

Spring, 3(3-3) Not open to students with credit in HRT 078. Design, installation and maintenance of irrigation systems for turfgrass and landscape plants. Design hydraulics, equipment selection, pump stations, water features, water quality and conservation. Offered the first ten weeks of the semester.

Landscape Irrigation

Spring, 3(3-3) Not open to students with credit in HRT 078. Design, installation and maintenance of irrigation systems for turfgrass and landscape plants. Design hydraulics, equipment selection, pump stations, water features, water quality and conservation. Offered the first ten weeks of the semester.

Landscape Irrigation

Spring, 3(3-3) Not open to students with credit in HRT 078. Design, installation and maintenance of irrigation systems for turfgrass and landscape plants. Design hydraulics, equipment selection, pump stations, water features, water quality and conservation. Offered the first ten weeks of the semester.
244 Culinary and Medicinal Herbs
Summer. 1(1-0)

245 Specialty Cut Flowers
Summer. 1(1-0)

251 Organic Farming Principles and Practices
Spring. 3(3-0) Interdepartmental with Crop and Soil Sciences. Administered by Horticulture.
History and principles of organic farming. Farms as ecological systems. Certification process and agencies. Organic matter management, the soil food web, and biodiversity. Biodiversity, crop rotations, plant competition, ground cover, and plant health. Integrating crops and animals. Organic animal husbandry. Field trip required.

252 Organic Certification and Farm Plans
Fall. 1(1-0) P: HRT 251
Organic certification requirements as specified by the USDA National Organic Program and implemented by certifying agencies. Methods of record keeping and farm plans for specialty crop, field crop, perennial fruit, and livestock farms. Organic processing and marketing.

253 Compost Production and Use
Summer. 1(1-0)
Process and methods of composting, maturity and quality analysis, and use of compost products at home and farm scale. Field trip required.

256 Organic Produce Direct Marketing
Fall. 1(1-0)

257 Organic Produce Wholesale Marketing
Fall. 1(1-0)

258 Study a Farm
Summer. 3(1-2) P: HRT 251
Field trips to visit Michigan organic farms, farmers’ markets, food distributors and retailers to observe farming and marketing methods and learn from farmers. Field trips required.

259A Student Organic Farm Practicum I
Spring. 3(0-9) R: Open to agricultural technology students. SA: HRT 259
Intensive organic vegetable, fruit, herb, and flower farming by direct involvement in the weekly activities and operation of the MSU Student Organic Farm. Local food systems, farm operations, transplantsing, community-supported agriculture management, winter hoophouse, and edible forest gardening.

259B Student Organic Farm Practicum II
Summer. 4(0-12) P: HRT 259A R: Open to agricultural technology students. SA: HRT 259
Intensive organic vegetable, fruit, herb, and flower farming by direct involvement in the weekly activities and operation of the MSU Student Organic Farm. Equipment basics, soil fertility, field cultivation, harvesting, post-harvest handling, summer hoophouse, and farm stand operations.

259C Student Organic Farm Practicum III
Spring. 3(0-9) P: HRT 259B R: Open to agricultural technology students. SA: HRT 259
Intensive organic vegetable, fruit, herb, and flower farming by direct involvement in the weekly activities and operation of the MSU Student Organic Farm. Harvest and post-harvest handling, crop storage, fall hoophouses, cover crops, crop specialty planting, organic farm plan, crop plan, farm stand, and community-supported agriculture.

290 Independent Study in Horticulture
Fall, Spring, Summer. 1 to 4 credits. A student may earn a maximum of 6 credits in all enrollments for this course. R: Open to students in the Institute of Agricultural Technology. SA: HRT 075
A planned learning experience developed by the student in cooperation with a faculty member.

311 Landscape Design and Management
Spring. 4(3-2) Interdepartmental with Landscape Architecture. Administered by Horticulture. P: HRT 211 and (HRT 212 or concurrently)
Landscape design techniques, spatial organization, plant selection, plant and site interaction. Relationship between design, construction and maintenance. Preparation of planting and maintenance specifications.

323 Floriculture Production: Herbaceous Perennials and Annuals
Spring. 3(2-3) P: HRT 203 and HRT 203L and HRT 204 or concurrently and HRT 221
Commercial greenhouse and outdoor production of herbaceous perennials, annuals, and other plants typically sold in retail nurseries for outdoor gardens. Plant identification, propagation, production, scheduling, and finishing procedures based on specific plant growth requirements. Plant selection, marketing, and retailing issues.

332 Tree Fruit Production and Management
Fall. 2(1-3) P: HRT 203 or HRT 251
Commercial apple, cherry, peach, and pear production. Cultural practices to manipulate growth and development and optimize fruit yields and quality. Field trips required.

335 Berry Crop Production and Management
Spring. 1(2-1) P: HRT 203 or HRT 251
Commercial production of blueberries, strawberries, raspberries, blackberries, cranberries, and minor fruit. Physiology, growth, and development of these species, and how cultural practices can be used to optimize fruit yields and quality. Field trip required.

341 Vegetable Production and Management
Spring. 3(2-3) P: HRT 203 or (HRT 251 or concurrently) SA: HRT 440, HRT 442
Field production of vegetable crops. Marketing systems, tillage practices, field establishment, cultural management, pest management, harvesting, and postharvest handling and storage.

351 Applied Crop Improvement
Spring. 4(3-0) Interdepartmental with Crop and Soil Sciences. Administered by Crop and Soil Sciences. P: (CSS 232) Completion of Tier I writing requirement. RB: PLB 105 SA: CSS 282, CSS 068 Not open to students with credit in CSS 332.
Physiological principles of turfgrass growth and development. Water relations, light, respiration, photosynthesis, mineral nutrition, and hormone action. Impact of mowing, cultivation, and traffic on turfgrass growth. Offered first ten weeks of semester.

361 Applied Plant Physiology
Fall. 3(3-0) P: PLB 105 and (PLB 106 or concurrently) RB: HRT 203 and HRT 204
Whole plant physiological and growth responses of plants to light, temperature, and gases during commercial plant production. Coordination and management of growth for optimum production and quality.

362 Applied Crop Improvement
Spring. 3(3-0) P: HRT 203 and PLB 105
History of plant improvement. Basic genetic principles of crop breeding and biotechnology. Class meets weeks 6 to 10 of the semester.

382 Turfgrass Physiology
Spring. 3(3-0) Interdepartmental with Crop and Soil Sciences. Administered by Crop and Soil Sciences. P: (CSS 232) Completion of Tier I writing requirement. RB: PLB 105 SA: CSS 282, CSS 068 Not open to students with credit in CSS 332.
Physiological principles of turfgrass growth and development. Water relations, light, respiration, photosynthesis, mineral nutrition, and hormone action. Impact of mowing, cultivation, and traffic on turfgrass growth. Offered first ten weeks of semester.

391 Special Topics
Fall. 1 to 2 credits. A student may earn a maximum of 9 credits in all enrollments for this course. Specific topics in horticulture of current interest and importance. Possible field trips. Offered half of the semester.

401 Physiology and Management of Herbaceous Plants
Fall. 3(3-0) P: HRT 361 or PLB 301 R: Not open to freshmen or sophomores.
Physiological and flowering responses of herbaceous plants to light, temperature, nutrients, and gases. Management of these factors for optimum production.

403 Handling and Storage of Horticultural Crops
Fall. 3(3-0) P: BOT 105 or BS 110 R: Not open to freshmen or sophomores. SA: HRT 482
Biological principles involved in quality maintenance of horticultural products. Control of deterioration during harvesting, handling, transport, and storage. Field Trip required.

404 Horticulture Management (W)
Spring. 3(2-3) P: Completion of Tier I writing requirement. RB: (EC 201 or EC 202) and (HRT 203 and HRT 204) or (CSS 370 or FOR 404) R: Open only to seniors in the College of Agriculture and Natural Resources. SA: HRT 488
Integration of management, economics, marketing, and horticultural production principles to develop personnel, financial, and resource strategies. Horticultural business plan development in a team situation. Effects of business decisions on people and profits.
Horticulture Marketing
Fall. 3(2-2) RB: (HRT 203 and HRT 204) and (EC 201 and EC 202) and ((HRT 210 or concurrently) or (HRT 322 or concurrently) or (HRT 332 or concurrently) or (HRT 341 or concurrently)). Demographic and purchase trends of perishable horticultural commodities including landscape and floral crops, and fruits and vegetables. Market segmentation and product targeting, distribution, branding and packaging, and advertising and promotion. Services as a critical component of strategic business planning.

Agricultural Services Marketing
Spring of even years. 1(3-0) P: HRT 203 RB: HRT 407 R: Not open to freshmen. Products and services for horticulture marketing. Marketing agricultural services to a diverse consumer base. Class meets first five weeks of semester.

Landscape Contract Management
Fall. 3(2-2) RB: HRT 311 Management of landscape construction and maintenance operations. Working drawing, contracts, bonds, and insurance. Estimating and bidding procedures. Installation techniques for hardscapes and plant material.

Sustainable Landscape Practices
Spring of even years. 1(3-0) P: HRT 203 and (HRT 211 or HRT 212) Landscape construction and maintenance to minimize adverse environmental effects. Site protection, restoration, plant selection, bioengineering, green roofs, water issues, and maintenance practices. Class meets last five weeks of semester.

Ornamental Conifers
Fall of odd years. 1(3-0) P: HRT 211 or HRT 212 or FOR 204 Taxonomy, ecology, and production of important conifers for landscape and Christmas trees. Class meets first five weeks of semester.

Natural Landscapes, Native Plants and Landscape Restoration
Fall. 3(3-0) P: HRT 211 or HRT 212 or BS 110 or LB 144 R: Not open to freshmen. Natural landscapes, native plants and landscape restoration options for natural and built environments. Planning and design approaches, site engineering, construction practices, and management guidelines. Case studies, regulatory policies, contract resources, services and issues. Field trip required.

Sustainable Sites and Environmental Landscape Practices
Fall. 3(3-0) P: HRT 211 or HRT 212 R: Not open to freshmen. Sustainable sites and environmental landscape practices integrated into the built environment. Planning and design approaches, site engineering, construction practices, and management guidelines. Case studies, specifications, certification programs.

Landscape Design Practicum
Fall, Spring. 2 to 4 credits. A student may earn a maximum of 6 credits in all enrollments for this course. P: HRT 311 R: Approval of department; application required. Application of landscape design theory and practice to landscape development projects. Client interaction, site visits and design, plan development, and construction and management specifications. Residential, commercial and public landscape projects.

Sustainable Agriculture and Food Systems: Integration and Synthesis
Fall. 3(3-0) Interdepartmental with Crop and Soil Sciences and Environmental Studies and Agriscience. Administered by Crop and Soil Sciences. P: CSS 124 RB: (CSS 101 or CSS 360 or CSS 431 or ENT 479 or HRT 203 or HRT 251 or HRT 341 or EEP 255 or EEP 260 or ESA 343) or (ESA 449 or GEO 410) R: Open to juniors or seniors or graduate students. Biogeochemical and socio-economic aspects of food, fiber, and fuel production. Environmental impacts and social context. Experiential learning projects.

Exploring Wines and Vines
Spring. 3(3-0) R: Must be 21 years of age. R: Approval of department. Consumer-oriented study of wine history, production methods, climatic influences, cultural impacts, social responsibility, and economic impact of wine industry as part of modern agriculture. Sensory evaluation and its relationship to food pairings. Field trip required.

Plant Breeding and Biotechnology
Spring of even years. 3(3-0) Interdepartmental with Crop and Soil Sciences and Forestry. Administered by Crop and Soil Sciences. P: CSS 101. Plant improvement by genetic manipulation. Genetic variability in plants. Traditional and biotechnological means of creating and disseminating recombinant genotypes and cultivars. Importance of plant breeding to our food system, economy, and environment.

Biotechnology Applications for Plant Breeding and Genetics
Spring. 3(2-2) Interdepartmental with Crop and Soil Sciences and Forestry. Administered by Crop and Soil Sciences. P: CSS 350 or ZOL 341 and CSS 441 Principles, concepts, and techniques of agricultural plant biotechnology. Recombinant DNA technology, plant molecular biology and transformation in relation to plant improvement.

Pest Management I: Pesticides in Agricultural Systems
Fall of even years. 3(3-0) Interdepartmental with Crop and Soil Sciences and Entomology and Fisheries and Wildlife. Administered by Entomology. RB: (CEM 143 or CEM 251 and (PLP 405 and CSS 402) and (ENT 404 or ENT 470) R: Open to juniors or seniors or graduate students. Chemistry, modes of action, and environmental fate of pesticides. Product development and regulation. Social aspects of pesticide use.

Pest Management II: Biological Components of Management Systems (W)
Spring of even years. 3(2-3) Interdepartmental with Crop and Soil Sciences and Entomology and Forestry and Fisheries and Wildlife. Administered by Entomology. P: (ENT 404 or ENT 470 or PLP 405 or CSS 402) and completion of Tier I writing requirement Principles of host plant resistance and biological control and their relationship to the design of agro-ecosystems. Classification of insect biological control agents.

Woody Plant Physiology
Spring. 3(3-0) Interdepartmental with Forestry. Administered by Horticulture. P: PLB 105 or BS 110 R: Not open to freshmen or sophomores. Physiology of carbon utilization. Effects of water, temperature, nutrition, and light on apical, vegetative, and reproductive growth of woody plants.

Biotechnology in Agriculture: Applications and Ethical Issues
Fall of even years. 3(3-0) Interdepartmental with Crop and Soil Sciences and Forestry and Philosophy. Administered by Horticulture. P: BOT 105 or BS 111 RB: CSS 350 or ZOL 341 R: Not open to freshmen or sophomores. Current and future roles of biotechnology in agriculture: scientific basis, applications. Environmental, social, and ethical concerns.

Independent Study
Fall, Spring, Summer. 1 to 2 credits. A student may earn a maximum of 6 credits in all enrollments for this course. P: HRT 203 and HRT 203L and HRT 204 R: Approval of department; application required. Independent study of horticulture on a field, laboratory, or library research program of special interest to the student.

Selected Topics in Horticulture
Fall, Spring. 1 to 3 credits. A student may earn a maximum of 6 credits in all enrollments for this course. P: HRT 203 and HRT 203L and HRT 204 R: Not open to freshmen or sophomores. Selected topics in horticulture of current interest and importance.

Undergraduate Research
Fall, Spring, Summer. 1 to 2 credits. A student may earn a maximum of 3 credits in all enrollments for this course. P: HRT 203 and HRT 204 R: Approval of department; application required. Mentored field or laboratory research experience.

Professional Internship in Horticulture
Fall, Spring, Summer. 3 credits. A student may earn a maximum of 6 credits in all enrollments for this course. A student may earn a maximum of 6 credits in all enrollments for any or all of these courses: ABM 493, AEE 493, ANR 493, ANS 493, CMP 493, CSS 493, EEP 493, ESA 493, FIM 493, FSC 493, FW 493, HRT 493, PKG 493, PLP 493, and PRR 493. P: HRT 203 and HRT 203L and HRT 204 R: Open only to juniors and seniors in the College of Agriculture and Natural Resources. Approval of department; application required. Professional career-related work experience supervised by a professional horticulturist.

Laboratory Research Techniques
Fall. 2(1-3) R: Open to graduate students in the Department of Horticulture. Demonstration and experience using various research techniques.
Horticulture—HRT

816 Environmental Design Theory
Fall. 3(3-0) Interdepartmental with Human Environment and Design and Landscape Architecture and Park, Recreation and Tourism Resources. Administered by Landscape Architecture. RB: Undergraduate design degree recommended.
Differences between normative theories, scientific theories, models, and constructs. Exploration of normative theories related to thesis or practicum.

817 Environmental Design Studio
Spring. 3(6-0) Interdepartmental with Human Environment and Design and Landscape Architecture and Park, Recreation and Tourism Resources. Administered by Landscape Architecture. P: (LA 816 and LA 883) RB: Undergraduate design degree.
Development of a student-selected environmental design project in a collaborative setting.

819 Advanced Plant Breeding
Fall of even years. 3(3-0) Interdepartmental with Crop and Soil Sciences and Forestry. Administered by Horticulture. RB: STT 422 and ZOL 341
Genetic expectations resulting from breeding strategies with cross- and self-pollinated crop plants. Germplasm collections, mapping populations, and modifications of reproductive biology useful for crop improvement.

820 Plant Reproductive Biology and Polyploidy
Spring of odd years. 1(3-0) Interdepartmental with Crop and Soil Sciences and Plant Biology and Plant Pathology. Administered by Horticulture. RB: Introductory Genetics and Plant Biology
Genetic processes underlying variations in plant reproductive biology and polyploidy. Utilization of these characteristics in plant breeding.

821 Crop Evolution
Spring of odd years. 1 credit. Interdepartmental with Crop and Soil Sciences and Forestry and Plant Biology and Plant Pathology. Administered by Horticulture. RB: Introductory Genetics and Plant Biology
Cultural and biological aspects of the evolution of domestic plants.

822 Historical Geography of Crop Plants
Spring of odd years. 1 credit. Interdepartmental with Crop and Soil Sciences and Forestry and Plant Biology and Plant Pathology. Administered by Horticulture. RB: Introductory Genetics and Plant Biology
Development and spread of the major crop species.

842 Population Genetics, Genealogy and Genomics
Fall. 3(3-0) Interdepartmental with Animal Science and Crop and Soil Sciences and Forestry and Fisheries and Wildlife and Genetics. Administered by Forestry. RB: Pre-calculus, basic genetics

853 Plant Mineral Nutrition
Fall of odd years. 3(3-0) Interdepartmental with Crop and Soil Sciences. Administered by Crop and Soil Sciences. RB: PLB 301

863 Environmental Plant Physiology
Spring of odd years. 3(3-0) Interdepartmental with Plant Biology. Administered by Plant Biology. RB: PLB 301 or PLB 414 or PLB 415 SA: BOT 863
Interaction of plant and environment. Photobiology, thermophysiology, and plant-water relations.

865 Plant Growth and Development
Fall of even years. 3(3-0) Interdepartmental with Plant Biology. Administered by Plant Biology. RB: PLB 415 SA: BOT 865
Genetics and biochemistry of development in higher plants as influenced by genes and environment. Biosynthesis, action and signal transduction of phytohormones and other signaling molecules. Patterning, meristem organization and formation of tissues and organs. Genetic mechanisms underlying developmental diversity.

883 Environmental Design Seminar
Fall. 3(3-0) Interdepartmental with Human Environment and Design and Landscape Architecture and Park, Recreation and Tourism Resources. Administered by Landscape Architecture. RB: Undergraduate design degree.
Examination of the breadth of environmental design projects. Literature review of focused projects. Development of practicum or thesis proposals.

890 Independent Study
Fall, Spring, Summer. 1 to 4 credits. A student may earn a maximum of 6 credits in all enrollments for this course. R: Approval of department.
Individual study of problems of special interest.

891A Selected Topics in Horticulture
Fall, Spring, Summer. 1 to 3 credits. A student may earn a maximum of 6 credits in all enrollments for this course. R: Open only to graduate students in the Department of Horticulture.
Horticultural science topics of current interest and importance.

891B Selected Topics in Plant Breeding and Genetics
Fall, Spring, Summer. 1 to 2 credits. A student may earn a maximum of 6 credits in all enrollments for this course. R: Open only to graduate students in the Plant Breeding and Genetics major or Genetics major. Approval of department.
Selected topics in plant breeding.

892 Plant Breeding and Genetics Seminar
Fall, Spring, Summer. 1(1-0) A student may earn a maximum of 4 credits in all enrollments for this course.
Experience in review, organization, oral presentation and analysis of research.

894 Horticulture Seminar
Fall, Spring. 1(1-0) A student may earn a maximum of 4 credits in all enrollments for this course.
Experience in review, organization, oral presentation and analysis of research.

898 Master's Research
Fall, Spring, Summer. 1 to 6 credits. A student may earn a maximum of 6 credits in all enrollments for this course. R: Approval of department.
Master's degree Plan B project.

899 Master's Thesis Research
Fall, Spring, Summer. 1 to 10 credits. A student may earn a maximum of 99 credits in all enrollments for this course. R: Open only to graduate students in the Department of Horticulture.
Master's thesis research.

941 Quantitative Genetics in Plant Breeding
Spring of even years. 3(2-2) Interdepartmental with Crop and Soil Sciences and Forestry. Administered by Crop and Soil Sciences. RB: CSS 819 and STT 464
Theoretical and genetic basis of statistical analysis of quantitative traits using genetic markers. Computational tools for the study of quantitative traits.

999 Doctoral Dissertation Research
Fall, Spring, Summer. 1 to 24 credits. A student may earn a maximum of 99 credits in all enrollments for this course. R: Open only to doctoral students in the Department of Horticulture.
Doctoral dissertation research.
