PATHOBIOLOGY AND DIAGNOSTIC INVESTIGATION

Veterinary Clinical Pathology 554 PDI

Fall, Spring. 3(2-2) RB: Completion of Year 2 of the graduate-professional program in the College of Veterinary Medicine. R: Open to graduate-professional students in the College of Veterinary Medicine.

Collection and assessment of body fluids and tissue. Interpretation of test results. Pathophysiological basis for test abnormalities. Basic technical laboratory competencies.

Department of Pathobiology and Diagnostic Investigation **College of Veterinary Medicine**

514 **Veterinary Neurosciences**

graduate-Fall. 2(2-0) R: Open to professional students in the College of Veterinary Medicine. SA: PDI 515, PDI 517

Introduction to the sensory, motor, and the special senses systems as they relate to domestic animals.

Comparative Veterinary Gross Anatomy I 518

Fall. 4(2-6) R: Open to graduate-professional students in the College of Veterinary Medicine.

Introduction to canine anatomy through lectures and dissection.

519 **Comparative Veterinary Gross Anatomy**

Spring. 4(2-6) R: Open to graduateprofessional students in the College of Veterinary Medicine.

Introduction to comparative anatomy of all domestic animals through lectures and dissection. Clinically relevant anatomy.

520 **Veterinary Tissue Structure and Function** 4(3-3) R: Open to graduateprofessional students in the College of Veterinary Medicine.

Microscopic anatomy and cellular physiology of vertebrate tissues. Introduction to the use of the microscope.

521 **Veterinary Organ Microanatomy**

Spring. 2(1-3) R: Open to graduate-professional students in the College of Veterinary Medicine.

Microanatomy of organ systems and relationship of structure to function.

551 **General Pathology**

Fall. 2(1-2) RB: Completion of year 1 of the graduate professional program in the College of Veterinary Medicine. R: Open to graduate-professional students in the College of Veterinary Medicine. SA: PTH 551

Host responses to injury, including cell degeneration, necrosis, disturbances of growth and development, neoplasia, circulatory disturbances, and inflammation.

553 Systemic Pathology

Spring. 4(3-2) RB: Completion of Year 1 in the graduate professional program in the College of Veterinary Medicine. R: Open to graduate-professional students in the College of Veterinary Medicine. SA: PTH 553

Anatomic pathology of digestive, urinary, respiratory, integumentary, cardiovascular, nervous, reproductive, musculoskeletal, endocrine, and lymphatic systems

Introduction to Veterinary Cytology

Fall. 1(0-2) RB: Completion of year 2 of the graduate professional program in the College of Veterinary Medicine. R: Open to graduate-professional students in the College of Veterinary Medicine.

Principles of sample collection, slide preparation, fluid analysis and interpretation using clinical case material.

Tropical Veterinary Medicine 561

Fall. 1(1-0) RB: Completion of year 2 of the graduate professional program in CVM. R: Open to graduate-professional students in the College of Veterinary Medicine.

Veterinary sciences and the needs of tropical coun-

562 Introduction to Emerging and Foreign **Animal Diseases**

Spring. 1(1-0) RB: Completion of year 1 of the graduate professional program in the College of Veterinary Medicine. R: Open to graduate-professional students in the College of Veterinary Medicine.

Emerging and exotic animal diseases, their recognition, diagnosis, and proper reporting.

Topographic and Applied Anatomy of Live Cats and Dogs Spring. 1(0-2) RB: Completion of year 1 of

the graduate professional program in CVM. R: Open to graduate-professional students in the College of Veterinary Medicine.

Identification of structures and landmarks of clinical significance in live cats and dogs in relation to the structures imaged using endoscopy, ultrasonogra-phy, radiology, MRI, and CT scans.

Topographic and Applied Anatomy of 564 Live Horses and Cattle

Fall. 1(0-2) RB: Completion of year 2 of the graduate professional program in the College of Veterinary Medicine R: Open to graduate-professional students in the College of Veterinary Medicine.

Identification of structures and landmarks of clinical significance in live horses and cattle in relation to the structures imaged using endoscopy, ultrasonography, radiology, MRI, and CT scans.

565 **Surgical Anatomy of Cats and Dogs**

Fall. 1(0-2) RB: Completion of year 2 of the graduate professional program in the College of Veterinary Medicine.

Anatomy of the cat and dog encountered during commonly used surgical approaches.

Selective Topics in Pathobiology and **Diagnostic Investigation**

Fall, Spring. 1(1-0) RB: Completion of year 1 of the graduate professional program in the College of Veterinary Medicine R: Open to graduate-professional students in the College of Veterinary Medicine.

Important field of study in Pathobiology and Diagnostic Investigation.

610 **Veterinary Gross Anatomy Dissection**

Fall, Spring, Summer. 1 to 3 credits. A student may earn a maximum of 6 credits in all enrollments for this course. RB: Completion of semester 5 of the graduate-professional program in the College of Veterinary Medicine. R: Open to graduate-professional students in the College of Veterinary Medicine. SA: ANTV 610

Dissection and prosection of selected regions of domestic animals.

611 Research Problems in Veterinary Anatomy

Fall, Spring, Summer. 1 to 3 credits. A student may earn a maximum of 6 credits in all enrollments for this course. RB: Completion of semester 5 of the graduate-professional program in the College of Veterinary Medicine R: Open to graduate-professional students in the College of Veterinary Medicine. SA: ANTV 611

Veterinary gross anatomy, cell biology, histology, or neurobiology.

630 Diagnostic Pathology Clerkship

Fall, Spring. 3 credits. RB: Completion of semester 5 of the graduate-professional program in the College of Veterinary Medicine. R: Open to graduate-professional students in the College of Veterinary Medicine. SA: PTH 630

Necropsy and clinical pathology techniques and interpretation of clinical findings, post mortem findings, and diagnostic laboratory results.

631 **Necropsy Clerkship**

Summer. 3 credits. P: PDI 630 RB: Completion of semester 5 of the graduate professional program in the College of Veterinary Medicine. R: Open to graduate-professional students in the College of Veterinary Medicine. SA: PTH 631

Supervised necropsy. Interpretation and presenta-

Problems in Veterinary Pathology 632

Fall, Spring, Summer. 1 to 3 credits. A student may earn a maximum of 6 credits in all enrollments for this course. RB: Completion of Semester 5 of the graduate professional program in the College of Veterinary Medicine. R: Open to graduate-professional students in the College of Veterinary Medicine. SA: PTH 632

Supervised projects involving gross pathology, histopathology, clinical pathology, or molecular

633 Special Problems in Veterinary Pathology

Fall, Spring, Summer. 3 credits. A student may earn a maximum of 6 credits in all enrollments for this course. RB: Completion of Semester 5 of the graduate professional program in the College of Veterinary Medicine. R: Open to graduate-professional students in the College of Veterinary Medicine.

Supervised off-campus experience or project involving gross pathology, histopathology, ultrastructural pathology, clinical pathology, or molecular pathology. Experience may emphasize diagnostic pathology or research. Settings may include, but are not limited to other colleges of veterinary medicine, private industry. and governmental institutions

Pathobiology and Diagnostic Investigation—PDI

634 **Endocrinology Clerkship**

Spring. 3 credits. RB: Completion of semester 5 of the graduate-professional program in the College of Veterinary Medicine. R: Open to graduate-professional students in the College of Veterinary Medicine. SA:

Principles of endocrinology and diagnosis of endocrinology disorders. Case review and interpretation.

Special Problems in Histopathology and Cytology Clerkship Spring. 3 credits. P: PDI 630 RB: Comple-

tion of Semester 5 of the professional program in the College of Veterinary Medicine. R: Open to graduate-professional students in the College of Veterinary Medicine. SA: PTH 635

Study of the histopathology and clinical cytology of various diseases of veterinary importance.

Aquatic Animal Medicine Clerkship

Spring. 3 credits. RB: Completion of semester 5 of the graduate-professional program in the College of Veterinary Medicine. R: Open to graduate-professional students in the College of Veterinary Medicine. SA: PTH 636

Clinical, laboratory, and ecological principles of disease of aquatic organisms with special emphasis on impacts and management. Critical analysis and review of selected case studies and disease control reaimen.

Molecular and Developmental 804 Neurobiology

Fall. 3(3-0) Interdepartmental with Neuroscience and Pharmacology and Toxicology and Psychology and Zoology. Administered by Neuroscience. RB: Bachelor's degree in a Biological Science or Psychology. R: Open to graduate students in Neuroscience major.

Nervous system specific gene transcription and translation. Maturation, degeneration, plasticity, and repair in the nervous system.

Integrative Toxicology: Mechanisms, Pathology and Regulation

Fall of odd years. 3(3-0) Interdepartmental with Animal Science and Biochemistry and Molecular Biology and Pharmacology and Toxicology. Administered by Pharmacology and Toxicology. P: PHM 819

Biochemical, molecular, and physiological mechanisms of toxicology. Functional and pathological responses of major organ systems to chemical Mechanisms of mutagenesis, carcinogenesis, and reproductive toxicology. Concepts in risk and safety assessment.

820 **Advanced Human Hematology**

Fall of odd years. 2(2-0) Interdepartmental with Biomedical Laboratory Diagnostics. Administered by Biomedical Laboratory Diagnostics. RB: BLD 424

Pathogenesis, mechanisms, and morphological pictures. Laboratory tests and interpretation of re-

822 **Aquatic Animal Medicine**

Fall. 3(2-2) Interdepartmental with Fisheries and Wildlife and Veterinary Medicine. Administered by Fisheries and Wildlife. RB: (FW 423) or prior course work in animal ecology, microbiology, parasitology or pathology

Health management techniques and pathobiological processes relating to the etiology, diagnosis, and control of diseases affecting aquatic animal populations and communities.

Concepts in Molecular Biology

Fall, Spring. 2(2-0) Interdepartmental with Biomedical Laboratory Diagnostics. Administered by Biomedical Laboratory Diagnostics. RB: One course in biochemistry or concurrently. SA: MT 830

Techniques and theories of molecular biology, nucleic acid synthesis and isolation, enzymatic digestion and modification, electrophoresis, hybridization, amplification, library construction, and cloning.

Advanced General Pathology 851

Fall of even years. 3(3-0) R: Approval of department. SA: PTH 851

Fundamental concepts of cell injury, inflammation, and oncogenesis. Mechanisms of disease.

853 **Advanced Systemic Pathology**

Spring of odd years. 3(0-6) R: Approval of department. SA: PTH 853

Pathological aspects of the nervous, endocrine, cardiovascular, respiratory, urinary, genital, musculoskeletal, integumentary, and special sense systems

854 **Advanced Clinical Pathology**

Fall of odd years. 2(2-0) RB: Doctor of Veterinary Medicine degree. R: Approval of department. SA: PTH 854

Hematology, including anemias, leukocyte responses and hemostasis. Evaluation of clinical chemistry, urinalysis, and endocrinology.

Advanced Clinical Pathology Laboratory 855L

Fall of odd years. 1(0-2) RB: Doctor of Veterinary Medicine degree. R: Approval of department.

Clinical pathology laboratory techniques including sample preparation and examination of blood smears and cytologic preparations.

Pathology of Avian Diseases

Spring of even years. 2(2-0) R: Approval of department. SA: PTH 858

Disease and pathology affecting domestic poultry, pet birds, and wild birds.

Avian Histopathology Laboratory Spring of even years. 1(0-2) R: Approval of department. SA: PTH 859

Recognition and description of microscopic lesions of avian diseases.

Clinical Laboratory Diagnosis of Infectious Diseases

Fall of odd years. 2(2-0) Interdepartmental with Biomedical Laboratory Diagnostics. Administered by Biomedical Laboratory Diagnostics. RB: MMG 451 and MMG 464 and BLD 434 SA: MT 860

Laboratory techniques for diagnosing infectious diseases in humans. Emphasis on differential diagnosis and correlation of microbiological results with serology, hematology, and clinical chemistry.

Laboratory Animal Pathology

Summer of odd years. 2(1-2) RB: Background in histopathology, veterinary medicine, and systemic pathology R: Approval of department.

Diseases and pathology of laboratory animal species including mice, rats, ferrets, rabbits, primates, and fish, including current use of laboratory animals for toxicological pathology in industry.

Problems in Veterinary Pathology

Fall, Spring, Summer. 1 to 12 credits. A student may earn a maximum of 12 credits in all enrollments for this course. R: Approval of department. SA: PTH 890

Faculty supervised work on an experimental, theoretical, or applied problem in veterinary pathology.

Problems in Pathobiology

Fall, Spring, Summer. 1 to 12 credits. A student may earn a maximum of 12 credits in all enrollments for this course. R: Approval of department. SA: PTH 891

Faculty supervised work on an experimental, theoretical, or applied problem in pathobiology and diagnostic investigation.

892 **Pathology Seminar**

Fall, Spring. 1(1-0) A student may earn a maximum of 3 credits in all enrollments for this course. R: Approval of department. SA: PTH 892

Presentation and discussion of current topics in pathology by departmental graduate students, faculty, or outside speakers.

893 **Pathology Case Discussion Seminar**

Fall, Spring. 1(1-0) A student may earn a maximum of 6 credits in all enrollments for this course. R: Open to graduate students or lifelong graduate students in the Department of Pathobiology and Diagnostic Investigation. Approval of department. SA: PTH 893

Utilization of a group of theme-based veterinary cases to train pathology residents and graduate students in diagnostic pathology.

Diagnostic Histopathology of Neoplastic **Diseases of Domestic Animals**

Summer. 2(1-2) R: Approval of department. Histologic diagnosis of neoplastic diseases of domestic animals, including prognostic criteria, grading systems, and ancillary techniques to aid in diagnosis and prognosis.

Master's Thesis Research 899

Fall, Spring, Summer. 1 to 10 credits. A student may earn a maximum of 10 credits in all enrollments for this course. R: Open to masters students in the Department of Pathobiology and Diagnostic Investigation.
Approval of department. SA: PTH 899

Master's thesis research.

Investigating the Lung 901

Fall of even years. 2(2-0) Interdepartmental with Large Animal Clinical Sciences and Physiology. Administered by Large Animal Clinical Sciences. R: Open to graduate stu-

Integrative biology of the lung. Structure and function. Molecular, cellular, and organ responses to injury.

999 **Doctoral Dissertation Research**

Fall, Spring, Summer. 1 to 24 credits. A student may earn a maximum of 42 credits in all enrollments for this course. R: Open to doctoral students in the Department of Pathobiology and Diagnostic Investigation. Approval of department. SA: PTH 999

Doctoral dissertation research.
