MECHANICAL ENGINEERING

Department of

Mechanical Engineering **College of Engineering**

201 Thermodynamics

Fall, Spring. 3(3-0) P: (CEM 141 or CEM 151 or CEM 181H or LB 171) and ((MTH 234 or concurrently) or (MTH 254H or concurrently) or (LB 220 or concurrently)) and (PHY 183 or PHY 183B or PHY 193H or LB 273) Not open to students with credit in BE 351 or CHE 321.

Basic concepts of thermodynamics. Thermodynamic properties and their evaluation. Theory and application of conservation of mass and the first and second laws of thermodynamics. Carnot efficiency and cyclic processes for power generation and refrigeration.

221 Statics

Fall, Spring. 3(3-0) Interdepartmental with Civil Engineering. Administered by Civil Engineering. P: {(PHY 183 or PHY 183B or PHY 193H) or (PHY 231 and PHY 233B)} and ((MTH 234 or concurrently) or (LB 220 or concurrently) or (MTH 254H or concurrently)) SA: MSM 205

Vector description of forces and moments. Two- and three- dimensional equilibrium of particles and rigid bodies. Analysis of trusses, frames, and machines. Coulomb friction.

222

Mechanics of Deformable Solids Fall, Spring. 4(3-2) P: (MTH 234 and ME 221) SA: MSM 211

Tension compression and shear stresses. Axially loaded bars. Torsion of circular shafts. Beam theory. Combined stresses. Mohr's circles. Columns.

280 **Graphic Communications**

Fall, Spring. 2(0-4) P: (EGR 100 and (EGR 102 or concurrently)) and ((MTH 116 or concurrently) or (LB 118 or concurrently) or (MTH 132 or concurrently) or (MTH 152H or concurrently) or MTH 103 or (MTH 114 or concurrently)) SA: ME 180

Computer-aided three-dimensional design. Freehand sketching. Two-and-three-dimensional visuali-zation. Blueprint reading.

285

Computer Aided Design Tools Fall, Spring. 3(0-6) P: ME 280 R: Open to students in the College of Engineering. SA: MSM 260

Advanced 3-D solid modeling

332 Fluid Mechanics

Fall, Spring. 4(3-3) P: ME 361 and (CHE 321 or ME 201) and ((ME 391 or concurrently) and completion of Tier I Writing requirement) R: Open only to juniors and seniors in the Mechanical Engineering major.

Statics, control volume equations, similitude, and exact fluid solutions. Turbulence, pipe flow, boundary layer flow, compressible flow, and Navier-Stokes equations.

361 **Dynamics**

Fall, Spring. 3(3-0) P: (ME 221) and (MTH 235 or MTH 255H or LBS 220) R: Open only to students in the College of Engineering. SA: MSM 306

Kinematics of particles, rigid bodies, and mass moments of inertia. Kinetics of particles and rigid bodies. Energy and momentum principles.

371 Mechanical Design I

ME

Fall, Spring. 3(3-0) P: (ME 361 or concurrently) R: Open only to juniors or seniors in the Mechanical Engineering major or Manufacturing Engineering major.

Analysis of displacement, velocity and acceleration in mechanical linkages. Kinematics and dynamics of machines.

372 Machine Tool Laboratory

Fall, Spring. 1(0-2) R: Open only to juniors and seniors in the Mechanical Engineering major.

Principles and practice of machine tools. Safety, terminology, measurement, and working procedures for hand and machine tools.

386 **Computer Aided Product Design**

Spring. 3(0-6) P: (ME 285) R: Open only to students in Mechanical Engineering major. SA: MSM 361

Freeform modeling techniques. Top-down product design. Use of computer tools to assist in the development of products.

Mechanical Engineering Analysis 391

Fall, Spring. 3(3-0) P: (MTH 235 or MTH 255H or LBS 220) R: Open only to juniors or seniors in the Mechanical Engineering major or Biosystems Engineering major or Engineering Mechanics major.

Analytical and numerical methods for the modeling and analysis of mechanical engineering systems. Applications to vibrating elements, heat transfer, linear springs, and coupled spring-mass systems.

Special Topics in Mechanical 399 Engineering

Fall, Spring. 1 to 4 credits. A student may earn a maximum of 8 credits in all enrollments for this course. R: Approval of department.

Topics selected to supplement and enrich existing courses.

410 Heat Transfer

Fall, Spring. 3(3-0) P: (ME 332 or CE 321 or CHE 311) and (ME 391 and completion of Tier I Writing requirement) R: Open only to juniors or seniors in the Mechanical Engineering major or Engineering Mechanics maior.

Steady state and transient heat conduction. Natural and forced convection based on boundary layer theory. Application of Nusselt number correlations. Radiant heat transfer principles and applications including radiation networks.

412 Heat Transfer Laboratory

Fall, Spring. 2(1-2) P: (ME 410) and completion of Tier I writing requirement. R: Open only to juniors or seniors in the Mechanical Engineering major or Engineering Mechanics maior.

Practices and measurement techniques for heat transfer and thermal systems. Experimental problem solving applied to heat transfer.

416 **Computer Assisted Design of Thermal** Systems

Fall. 3(4-0) P: (ME 410 or concurrently) R: Open only to juniors or seniors in the Mechanical Engineering major.

Classifying, cataloging and processing design information. Modeling of thermal equipment. Simulation and optimization of thermal systems. Computer based design projects.

417 **Design of Alternative Energy Systems** Spring. 3(3-0) P: ME 410 or concurrently R:

Open only to juniors or seniors in the Mechanical Engineering major.

Analysis of alternative energy systems, including ocean, wind, fuel cells, solar, and nuclear. Predic-tive models for the systems. Design studies.

422 Introduction to Combustion

Fall. 3(3-0) P: (ME 332 or concurrently) R: Open only to juniors or seniors in the Mechanical Engineering major.

Thermodynamics, chemistry, fluid mechanics, and heat transfer principles applied to combustion.

423 Intermediate Mechanics of Deformable Solids

Fall. 3(3-0) P: (ME 222) R: Open only to students in the College of Engineering. SA: MSM 401

Stress, strain and linearly elastic behavior. Plane stress and plane strain. Torsion. Yield criteria. Elastoplastic behavior of beams, shafts and cylinders. Unsymmetrical bending. Curved beams.

Experimental Mechanics 425

Fall of odd years. 3(2-3) P: (ME 222) R: Open only to students in the College of Engineering. SA: MSM 405

Measurement of stress, strain, vibration, and motion using strain gauges, accelerometers, photoelasticity, holography, Moire patterns, laser speckle and electronic imaging. Transducer design.

Introduction to Composite Materials 426

Spring. 3(3-0) Interdepartmental with Materials Science and Engineering. Administered by Mechanical Engineering. P: ME 222 R: Open only to juniors or seniors in the College of Engineering. SA: MSM 444

Constituents and interfacial bonding. Manufacturing techniques. Microstructure and micromechanics. Theory of anisotropy. Classical laminate theory. Material characterization. Failure and damage. Composite structure design.

Aerospace Engineering Fundamentals 440

Fall. 3(3-0) P: (ME 332 or concurrently) R: Open only to juniors or seniors in the Mechanical Engineering major.

Aerodynamics, propulsion, and flight mechanics. Vehicle and propulsion engine performance and design characteristics.

442

Turbomachinery Spring. 3(3-0) P: (ME 332) R: Open only to juniors or seniors in the Mechanical Engineering major.

Applying energy, momentum, and continuity equations of thermo-fluids to turbomachinery. Blade geometry and aerodynamics. Performance and design parameters. Turbomachine design.

Automotive Engines 444

Fall. 3(3-0) P: (ME 410 or concurrently) R: Open only to juniors or seniors in the Mechanical Engineering major.

Design and development of internal and external combustion engines for vehicular propulsion.

Automotive Powertrain Design 445

Spring. 3(3-0) P: (ME 444) R: Open only to juniors or seniors in the Mechanical Engineering major.

Design of powertrain systems including piston ring assembly, combustion and induction systems, and transmissions. Performance emission tradeoffs with emphasis on emission control. Detailed design study required.

451 **Control Systems**

Fall, Spring. 4(3-3) P: ME 461 and ECE 345 R: Open to juniors or seniors in the Mechanical Engineering major.

Mathematical modeling of dynamic systems. Standard feedback control formulation. Transient and sinusoidal steady state analysis. Time and frequency domain controller synthesis.

456 Mechatronic System Design

Fall. 3(2-3) P: (ECE 345 or concurrently) and (ME 391 or concurrently) R: Open to juniors or seniors in the Department of Me-

chanical Engineering. Application of imbedded microcontrollers to the design of mechatronic systems. Introduction to feedback and feedforward control concepts. Design of software and hardware for systems with mechanical, electrical and fluid components plus imbedded control systems. Laboratory exercises and design projects. Application to automotive, consumer, industrial and commercial systems.

461 **Mechanical Vibrations**

Fall, Spring. 3(3-0) P: ME 361 and ME 391 R: Open to juniors or seniors in the Mechanical Engineering major.

Modeling and analysis of oscillatory phenomena found in linear discrete and continuous mechanical systems.

464 Intermediate Dynamics

Fall of even years. 3(3-0) P: (ME 361) R: Open only to students in the College of Engineering. SA: MSM 403

Kinematics and kinetics of particle and rigid body systems. Virtual work, Lagrangian method, and Euler equations. Basic vibrations of discrete and continuous systems. Elementary wave propagation.

465 **Computer Aided Optimal Design**

Fall. 3(3-0) P: (ME 471 or concurrently) R: Open only to juniors or seniors in the Mechanical Engineering major.

Modeling for mechanical design optimization. Algo-rithms for constrained and unconstrained optimization. Optimality criteria. Optimization using finite element models. Design projects.

Mechanical Design II 471

Fall, Spring. 3(3-0) P: ME 371 and ME 391 and ME 222 R: Open only to juniors or sen-

iors in the Mechanical Engineering major. Engineering design of machine elements and mechanical systems. Computer-based analysis in support of design. Design for static and fatigue strength, deflection, and reliability.

475 **Computer Aided Design of Structures**

Fall, Spring, Summer. 3(3-0) P: ME 471 or concurrently R: Open to seniors in the Mechanical Engineering major.

Computational methods for analysis, design, and optimization of structural components. Basic concepts in geometric modeling, finite element analysis, and structural optimization.

477 **Manufacturing Processes**

Fall, Spring. 3(3-0) Interdepartmental with Materials Science and Engineering. Administered by Mechanical Engineering. P: (ME 222 and MSE 250) and completion of Tier I writing requirement R: Open only to students in the Applied Engineering Sciences, Materials Science and Engineering, and Mechanical Engineering majors. SA: MSM 481

Fundamentals of manufacturing processes such as casting, heat treating, particulate processing, form-ing, machining, joining, and surface processing. Selection of manufacturing processes based on design and materials.

478 **Product Development**

Spring. 3(3-0) P: (ME 477) and completion of Tier I writing requirement. R: Open only to juniors or seniors in the Mechanical Engineering major or Materials Science and Engineering major. SA: MSM 482

Simulation of industrial environment for product development. Product concept, design, and manufacturing.

Mechanical Engineering Design Projects 481

Fall, Spring. 3(1-6) P: (ME 410 and ME 471) and completion of Tier I Writing requirement R: Approval of department; application required. Open only to seniors in the Mechanical Engineering major.

Application of design concepts in mechanical engi-neering. Problem definition, design specifications. Modeling and analysis methods. Design optimiza-tion, economics, reliability. Manufacturing considerations in design. Capstone design projects.

Technical Communication for Engineers 489 Spring. 2(2-0) RB: Engineers R: Open to juniors or seniors or graduate students in

the College of Engineering. Investigation of technical communication in the engineering workplace. Drafting, revising, and editing communications directed at a variety of audiences. Includes team writing activities, presentations, style, and flow.

490 Independent Study in Mechanical Engineering

Fall, Spring, Summer. 1 to 4 credits. A student may earn a maximum of 6 credits in all enrollments for this course. R: Open only to juniors or seniors in the Department of Mechanical Engineering. Approval of department.

Independent study in mechanical engineering.

491 Selected Topics in Mechanical Engineering

Fall, Spring. 1 to 4 credits. A student may earn a maximum of 8 credits in all enrollments for this course. R: Open only to juniors or seniors in the Department of Mechanical Engineering. Approval of department.

Topics selected to supplement and enrich existing courses.

494 **Biofluid Mechanics and Heat Transfer**

Fall. 3(3-0) P: (ME 410 or concurrently) or (CHE 311 or concurrently) or (BE 350 or concurrently) R: Open only to juniors or seniors or graduate students in the College of Engineering.

Applications of fluid mechanics, heat transfer, and thermodynamics to biological processes, including blood flow in the circulatory system, heart function, effects of heating and cooling on cells, tissues, and proteins. Pharmaco-kinetics.

495 **Tissue Mechanics**

Spring. 3(3-0) Interdepartmental with Biomedical Engineering. Administered by Mechanical Engineering. P: (ME 222) R: Open only to students in the College of Engineering. SA: MSM 441

Application of solid mechanics to understanding mechanical responses of biological tissues. Microstructure and biological function for soft and hard connective tissues and muscle.

Biomechanical Design in Product 497 Development

Spring. 3(3-0) Interdepartmental with Bio-medical Engineering. Administered by Me-chanical Engineering. P: ME 371 or concurrently R: Open to juniors or seniors in the Department of Mechanical Engineering. SA: BME 491A, MSM 445

Biomechanical product design with application to people or animals. Synthesis, prototyping, and analysis of designs. Project management. Market research.

800 **Engineering Analysis** Fall. 3(3-0)

Use of analytical methods of mathematics in engineering applications. Applications of partial differential equations to thermal-fluid and vibration problems, vector calculus and tensor analysis in fluid and solid mechanics, and analytical function theory in mechanics

Advanced Classical Thermodynamics 802 Fall. 3(3-0) RB: ME 391 and ME 411

Postulational treatment of the laws of thermodynamics. Equilibrium and maximum entropy postulates. Principles for general systems.

804 **Micro-Scale Fluid Mechanics and Heat** Transfer

Spring of odd years. 3(3-0) RB: ME 332 and ME 410

Basic concepts of micro-scale processes. Molecular derivation of the conservation equations of fluid dynamics, Boltzmann equation and Monte-Carlo methods of modern micro-applied science. Theory of micro-scale heat transfer. Applications to fluid mechanics, heat transfer, combustion.

Conductive Heat Transfer 812

Fall. 3(3-0) RB: ME 391 and ME 411 Theory of steady and unsteady heat conduction.

Derivation of describing equations and boundary conditions. Numerical methods. Nonlinear problems.

Convective Heat Transfer 814

Spring. 3(3-0)

Analysis of convective transfer of heat, mass and momentum in boundary layers and ducts. Thermal instability. Free convection.

Continuum Mechanics 820

Fall. 3(3-0) SA: MSM 810 Mathematical tools of continuum mechanics, stress principles, kinematics of deformation and motion, fundamental laws and equations. Applications in linear elasticity and classical fluids.

821

Linear Elasticity Spring. 3(3-0) RB: ME 820 SA: MSM 813 Fundamentals of isotropic linear elasticity. Solution of plane elasticity problems. St. Venant bending and torsion. Singular solutions. Basic three-dimensional solutions.

822 Combustion

Spring of even years. 3(3-1) RB: ME 490 and ME 802

Thermodynamics and chemical kinetics. Multicomponent systems. Premixed and diffusion flames. Flame radiation.

823 Fracture Mechanics and Fatigue Spring of even years. 3(3-0) RB: ME 821

SA: MSM 816 Brittle and ductile fracture. Elastic stress fields near cracks. Elastic-plastic analysis of crack extension. Plastic instability. Cyclic crack propagation. Models of cyclic deformation and fatigue failure. Environmental effects. Case studies.

824 Plasticity

Spring of odd years. 3(3-0) RB: ME 821 SA: MSM 817

Yield conditions, stress-strain relations, plastic potential, hardening theories, torsion, bending. Thick walled shells under internal pressure. Limit analysis. Slip line theory.

825 **Experimental Mechanics**

Spring. 3(2-3) R: Open to graduate students in the College of Engineering. SA: MSM 805 Measurement of strain, displacement, velocity, and acceleration using resistance strain gages, accel-erometers, and related methods. Detailed study of strain gages and accelerometers. Transducer design. Basic modal analysis.

826 Laminated Composite Materials

Fall of even years. 3(3-0) A student may earn a maximum of 6 credits in all enrollments for this course. P: (ME 820) SA: MSM 814

Fundamentals of anisotropic elasticity and their application to laminated composite plates. Unique states of deformation, stress, and failure not encountered in isotropic, homogeneous materials.

Advanced Strength of Materials 828

Spring of odd years. 3(3-0) SA: MSM 815 General theory of torsion, nonsymmetric bending, transverse shear, thin-walled beams, beams on elastic foundations, thick-walled cylinders. Basic contact mechanics. Failure criteria for solids.

830 Fluid Mechanics I

Fall. 3(3-0)

Integral and differential conservation laws, Navier-Stokes' equations, and exact solutions. Laminar boundary layer theory, similarity solutions, and approximate methods. Thermal effects and instability phenomena.

832 Fluid Mechanics II

Spring of even years. 3(3-0) RB: ME 830 and MTH 425

Inviscid flow, vortex motion, flow past bodies. Complex variables and conformal mapping. Onedimensional steady and unsteady compressible flow, shock waves and Prandtl-Meyer expansion. Small perturbations theory and method of characteristics.

834 Fundamentals of Turbulence

Fall of odd years. 3(3-0) Statistical descriptions of turbulent flows: isotropic, free shear and wall bounded. Correlation and spectral descriptions. Conditional probabilities and coherent motions. Experimental methods. Scaling relationships.

835 **Turbulence Modeling and Simulation**

Fall of even years. 3(3-0) RB: (ME 830) and and familiarity with graduate-level fluid mechanics and mathematics.

Basic turbulence theory. Transport equations for calculations of turbulent flows. Current status of modeling and simulation of turbulent flows. Direct numerical simulation. Reynolds-averaged simulations. Large eddy simulation. Probability density function methods in turbulence.

Experimental Methods in Fluid 836 Mechanics

Fall of even years. 3(1-4)

Modern techniques of fluid mechanics measurement and data analysis. Pressure, temperature and velocity measurement techniques. Optical diagnostics.

840 **Computational Fluid Dynamics and Heat** Transfer

Spring. 3(3-0) RB: ((ME 410) and programming experience.) and (ME 830 or ME 814) Theory and application of finite difference and finite volume methods to selected fluid mechanics and heat transfer models including the full potential flow model, the systems of Euler and Navier-Stokes equations, and turbulence. Grid generation techniques.

842 Advanced Turbomachinery

Spring of even years. 3(3-0) RB: ME 442 R: Open only to seniors and graduate students in Mechanical Engineering and Chemical Engineering.

Application of energy, momentum, continuity and heat transfer equations to energy transfer and transformation in turbomachinery.

851 Linear Systems and Control

Fall. 3(3-0) Interdepartmental with Electrical and Computer Engineering. Administered by Electrical and Computer Engineering. RB: Undergraduate coverage of linear algebra, differential equations and control/systems

State models and their stability, controllability, and observability properties. Finding minimal realizations of transfer functions. Design of state and output feedback controllers. Design of state observers. LQ regulator and the Kalman filter. Time-varying systems.

Optimal Control 853

Spring of odd years. 3(3-0) Interdepartmental with Electrical and Computer Engineering. Administered by Electrical and Computer Engineering.

Static optimization. Nonlinear optimal control of discrete and continuous systems, with specialization to the LQ regulator and tracking. Extending the deterministic results to the Kalman filter and the LQG regulator. Dynamic programming and inequality constraints. Convex optimization and LMI's.

854 **Robust Control**

Spring of even years. 3(3-0) Interdepartmental with Electrical and Computer Engineering. Administered by Mechanical Engineering. R: Open to graduate students in the College of Engineering.

Linear systems and norms for signals and systems. Investigation of stability and performance of control systems. Model reduction, uncertainty, and robustness. Parameterization of stabilizing controllers, Ricatti equations and related factorizations. Application to H-2, H-infinity, and L-1 control.

856 Adaptive Control

Fall of even years. 3(3-0) Interdepartmental with Electrical and Computer Engineering. Administered by Electrical and Computer Engineering.

Real-time parameter estimation. Design of selftuning regulators and model reference adaptive controllers. Investigation of robustness and robust adaptive controllers. Extension to nonlinear systems.

859

Nonlinear Systems and Control Spring. 3(3-0) Interdepartmental with Electrical and Computer Engineering. Adminis-tered by Mechanical Engineering. RB: ECE 851 R: Open to students in the College of Engineering. SA: ECE 827

Second-order systems and fundamental properties of solutions. Lyapunov stability, input-output stability, passivity, absolute stability, and linearization. Design of feedback controllers using integral control, feedback linearization, sliding mode control, Lyapunov redesign, passivity-based control, and recursive methods. Applications to electrical and mechanical systems.

860 Theory of Vibrations

Fall. 3(3-0)

Discrete systems and continua. Analytical mechanics. Variational principles. Modal analysis. Function spaces. Eigenfunction expansions. Integral transforms. Stability. Approximations. Perturbations.

Advanced Dynamics 861

Fall. 3(3-0) SA: MSM 801 Dynamics of systems of particles and rigid bodies. Energy and momentum principles. Lagrangian and Hamiltonian methods. Euler angles. Applications in system dynamics and vibrations.

863 **Nonlinear Vibrations**

Spring of even years. 3(3-0) RB: ME 461 Perturbation methods. Weakly nonlinear partial and ordinary differential equations. Modal interactions, internal tuning, saturation, sub/super/combination resonances, jump phenomenon. Nonlinear normal modes.

Finite Element Method 872

Fall, Spring. 3(3-0) Interdepartmental with Civil Engineering. Administered by Mechan-ical Engineering. SA: AE 809, MSM 809 Theory and application of the finite element method

to the solution of continuum type problems in heat transfer, fluid mechanics, and stress analysis.

874 Analysis of Metal Forming and Manufacturing Processes

Fall of odd years. 3(3-0) RB: ME 471 and MSM 809 and MSM 817 and MSM 810 Review of fundamental knowledge in mechanics, materials and numerical analysis. Modeling, simulation and analysis of metal forming and manufacturing processes.

875 **Optimal Design of Mechanical Systems**

Spring of odd years. 3(3-0) RB: ME 461 Optimal design for static and dynamic response of mechanical and structural systems. Necessary and sufficient conditions for optimality. Discrete and continuous parameter problems. Sensitivity of response to design variations. Algorithms.

891 Selected Topics in Mechanical Engineering

Fall, Spring. 1 to 4 credits. A student may earn a maximum of 6 credits in all enrollments for this course. R: Approval of department.

Special topics in mechanical engineering of current importance.

892 **Mechanical Engineering Seminar** Fall, Spring. 1 credit.

Attend and present seminars in order to develop research and presentation skills relevant to mechanical engineering.

898 Master's Project Research

Fall, Spring, Summer. 1 to 3 credits. A student may earn a maximum of 7 credits in all enrollments for this course. R: Open only to masters students in the Mechanical Engineering major. Approval of department.

Master's degree Plan B individual student project: original research, research replication, or survey and reporting on a topic such as system design and development, or system conversion of installation.

899 Master's Thesis Research

Fall, Spring, Summer. 1 to 8 credits. A student may earn a maximum of 24 credits in all enrollments for this course.

Master's thesis research.

Nonlinear Elasticity 921

Fall of odd years. 3(3-0) RB: ME 821 SA: MSM 915

Kinematics and kinetics of large deformations. Incompressible and compressible finite elasticity. Solution of basic problems. Nonuniqueness, stability, and buckling. Singular fields near cracks and flaws

922 Thermoelasticity and Viscoelasticity

Spring of even years. 3(3-0) RB: ME 820 and MTH 443 SA: MSM 918

Thermomechanics of solids. Theory of thermoelasticity. Boundary value problems in thermoelasticity. Linear and nonlinear viscoelasticity. Model repre-sentation. Boltzmann superposition. Correspond-ence principle.

Optical Methods of Measurement 925

Fall of even years. 3(2-3) R: Open to graduate students in the College of Engineering. SA: MSM 905

Measurement of dimension, position, motion, and strain, using optical methods including holography, speckle interferometry, Moire, photoelasticity, laser Doppler, electronic imaging, and model analysis. Relevant optics theory.

940 Selected Topics in Thermal Science

Spring. 1 to 3 credits. A student may earn a maximum of 12 credits in all enrollments for this course. RB: ME 812 and ME 814 and ME 816 R: Open only to Mechanical Engineering majors.

Conduction, convection, radiation, phase change and interactive combined modes of heat transfer. Mass transfer. Irreversible thermodynamics.

960

Selected Topics in Vibrations Fall. 1 to 3 credits. A student may earn a maximum of 6 credits in all enrollments for this course, RB: ME 860

Current topics of interest to the student and faculty.

961 Nonlinear Dynamics and Chaos

Fall of even years. 3(3-0) RB: ME 857 or ME 860 or ECE 826 or MTH 441

Qualitative theory of dynamical systems applied to physical system models. Bifurcation theory for continuous and discrete-time systems, chaos, the Smale horseshoe, Melnikov's method, and nonlinear data analysis.

990 Independent Study in Mechanical Engineering

Fall, Spring, Summer. 1 to 3 credits. A student may earn a maximum of 6 credits in all enrollments for this course.

Individualized study of a current problem in mechanical engineering.

Doctoral Dissertation Research 999

Fall, Spring, Summer. 1 to 24 credits. A student may earn a maximum of 72 credits in all enrollments for this course. Doctoral dissertation research.
