OST—Osteopathic Medicine

College of Osteopathic Medicine

401 Selected Topics in Osteopathic Medicine
Fall, Spring. 1(1-0) RB: Student with academic interest and career focus toward medicine and the health sciences.
Classical, current and innovative osteopathic medical trends in patient treatment and care.

511 Systems Biology: Neuromusculoskeletal I
Summer. 7(5-4) RB: Successful completion of semesters 1, 2 and 3 of the graduate-professional program in the College of Osteopathic Medicine. R: Open to graduate-professional students in the College of Osteopathic Medicine.
Multidisciplinary approach to the peripheral neuromusculoskeletal system. Integration of basic science and clinical information.

512 Systems Biology: Neuromusculoskeletal II
Fall. 5(4-2) RB: Successful completion of semesters 1, 2, 3, 4 and 5 of the graduate-professional program in the College of Osteopathic Medicine R: Open to graduate-professional students in the College of Osteopathic Medicine.
Multidisciplinary approach to the neuromusculoskeletal system. Central nervous system and ophthalmology. Integration of basic science and clinical information.

519 Medical Ethics, Professionalism and Law
Spring. 2(2-0) RB: Successful completion of semesters 1, 2, 3, 4 and 5 of the graduate-professional program in the College of Osteopathic Medicine: R: Open to graduate-professional students in the College of Osteopathic Medicine or approval of department.
Introduction to the legal principles and ethical standards relevant to the practice of medicine. Legal theories include negligence, liability, and fraud. Professional responsibility, privacy, confidentiality, consent, end-of-life issues, and reproductive rights.

521 Systems Biology: Hematopoietic
Spring. 2(2-0) RB: Successful completion of semesters 1, 2, 3, 4 and 5 of the graduate-professional program in the College of Osteopathic Medicine: R: Open to graduate-professional students in the College of Osteopathic Medicine.
Multidisciplinary approach to the hematopoietic system. Hematopoiesis, clotting, and hematopoietic pathologies. Integration of clinical and basic science information.

522 Systems Biology: Gastrointestinal
Fall. 5(5-0) RB: Successful completion of semesters 1, 2, 3 and 4 of the graduate-professional program in the College of Osteopathic Medicine: R: Open to graduate-professional students in the College of Osteopathic Medicine.
Multidisciplinary approach to the gastrointestinal system. Normal structure and function, and pathologies. Integration of basic science and clinical information.

523 Systems Biology: Genitourinary
Spring. 3(3-0) RB: Successful completion of semesters 1, 2, 3, 4 and 5 of the graduate-professional program in the College of Osteopathic Medicine: R: Open to graduate-professional students in the College of Osteopathic Medicine.
Multidisciplinary approach to the urinary system. Normal structure and function and pathologies. Integration of basic science and clinical information.

524 Systems Biology: Cardiovascular
Spring. 8(7-2) RB: Successful completion of semesters 1, 2, 3, 4 and 5 of the graduate-professional program in the College of Osteopathic Medicine: R: Open to graduate-professional students in the College of Osteopathic Medicine.
Multidisciplinary approach to the cardiovascular system. Normal structure and function and pathologies. Integration of basic science and clinical information.

525 Systems Biology: Respiratory
Spring. 6(4-4) RB: Successful completion of semesters 1, 2, 3, 4 and 5 of the graduate-professional program in the College of Osteopathic Medicine: R: Open to graduate-professional students in the College of Osteopathic Medicine.
Multidisciplinary approach to the respiratory system. Normal structure and function and pathologies. Integration of basic science and clinical information.

526 Systems Biology: Integumentary
Summer. 2(2-0) RB: Successful completion of semesters 1, 2, 3, 4, 5 and 6 of the graduate-professional program in the College of Osteopathic Medicine: R: Open to graduate-professional students in the College of Osteopathic Medicine.
Multidisciplinary approach to the integumentary system. Diagnosis and treatment of integumentary pathologies. Integration of basic science and clinical information.

527 Systems Biology: Female Reproductive
Fall. 4(4-0) RB: Successful completion of the graduate-professional program in the College of Osteopathic Medicine: R: Open to graduate-professional students in the College of Osteopathic Medicine.
Multidisciplinary approach to the female reproductive system. Normal structure and function, and pathologies. Integration of basic science and clinical information in obstetrics and gynecology.

528 Systems Biology: Growth and Development
Fall. 2(2-0) RB: Successful completion of semesters 1, 2, 3 and 4 of the graduate-professional program in the College of Osteopathic Medicine: R: Open to graduate-professional students in the College of Osteopathic Medicine.
Multidisciplinary approach to growth and development. Normal structure and function, and pathologies.

529 Systems Biology: Endocrinology
Fall. 2(2-0) RB: Successful completion of semesters 1, 2, 3, 4 and 5 of the graduate-professional program in the College of Osteopathic Medicine: R: Open to graduate-professional students in the College of Osteopathic Medicine.
Multidisciplinary approach to endocrinology. Normal endocrine function and the principles of diagnosis and treatment of endocrine disorders. Integration of basic science and clinical information.

532 Growth and Development: Cases
Summer. 1(0-2) P: OST 528 RB: Successful completion of semesters 1, 2, 3, 4, 5 and 6 of the graduate-professional program in the College of Osteopathic Medicine: R: Open to graduate-professional students in the College of Osteopathic Medicine.
Case studies in growth and development.

536 Behavioral System
Fall. 3 credits. RB: Successful completion of semesters 1, 2, 3 and 4 of graduate-professional program in the College of Osteopathic Medicine: R: Open to graduate-professional students in the College of Osteopathic Medicine.
Health promotion models, health behavior, stress and coping, and human sexuality. Psychopathology and geriatric issues.

538 Chronic Illness
Spring. 1(1-0) RB: Successful completion of semesters 1, 2, 3, 4 and 5 of the graduate-professional program in the College of Osteopathic Medicine: R: Open to graduate-professional students in the College of Osteopathic Medicine.
Psychosocial aspects of chronic illness. Understanding and treating pain.

551 Osteopathic Patient Care I
Fall. 2(1-2) R: Open to graduate-professional students in the College of Osteopathic Medicine.
Integration of components of the doctor patient relationship, clinical assessment skills and evidence based medicine to develop effective critical thinking and assessment skills in the care of patients. Emphasis is on communication in doctor patient relationships.

552 Osteopathic Patient Care II
Spring. 2(1-2) R: Open to graduate-professional students in the College of Osteopathic Medicine.
Integration of components of the doctor patient relationship, clinical assessment skills and evidence based medicine to develop effective critical thinking and assessment skills in the care of patients, as it relates to neurology, orthopedics, psychiatry, endocrinology, female reproduction and genitourinary systems.

553 Osteopathic Patient Care III
Summer. 3(1-4) R: Open to graduate-professional students in the College of Osteopathic Medicine.
Integration of components of the doctor patient relationship, clinical assessment skills and evidence based medicine to develop effective critical thinking and assessment skills in the care of patients. Correlations to concurrent integumentary and gastrointestinal systems courses. Preparation for future role as physician educator.
554 Osteopathic Patient Care IV
Fall. 3(1-4) R: Open to graduate-professional students in the College of Osteopathic Medicine.
Integration of components of the doctor patient relationship, clinical assessment skills and evidence based medicine to develop effective critical thinking and assessment skills in the care of patients. Correlation to concurrent psychopathology, hematopoietic, and cardiovascular systems courses.

555 Osteopathic Patient Care V
Spring. 3(1-4) R: Open to graduate-professional students in the College of Osteopathic Medicine.
Integration of components of the doctor patient relationship, clinical assessment skills and evidence based medicine in the care of patients. Correlation to concurrent respiratory system course. Presentation skills.

561 Basic Principles of Pathology
Spring. 2 credits. Interdepartmental with Human Medicine. Administered by Human Medicine. R: Open only to graduate-professional students in the colleges of Human and Osteopathic Medicine. SA: PTH 542
Fundamental pathologic processes. Clinical applications.

566 Care for the Young and the Aging Adult I
Fall. 1(1-0) R: Open to graduate-professional students in the College of Osteopathic Medicine.
Focus on children birth to 18 years, and the elderly greater than 65. Normal growth, development, and aging.

567 Care for the Young and the Aging Adult II
Spring. 1(1-0) R: Open to graduate-professional students in the College of Osteopathic Medicine.
Focus on children birth to 18 and elderly greater than 65. Normal structure, function and pathologies focusing on the nervous, endocrine, reproductive and genitourinary systems.

568 Care for the Young and the Aging Adult III
Summer. 1(1-0) R: Open to graduate-professional students in the College of Osteopathic Medicine.
Focus on children birth to 18 and elderly greater than 65. Normal structure, function and pathologies focusing on the integumentary and gastrointestinal systems.

569 Care for the Young and the Aging Adult IV
Fall. 1(1-0) R: Open to graduate-professional students in the College of Osteopathic Medicine.
Focus on children birth to 18 and elderly greater than 65. Normal structure, function and pathologies focusing on behavioral, cardiovascular and hematopoietic systems.

570 Care for the Young and the Aging Adult V
Spring. 1(1-0) R: Open to graduate-professional students in the College of Osteopathic Medicine.
Focus on children birth to 18 and elderly greater than 65. Normal structure, function and pathologies focusing on the respiratory system.

571 Neuromusculoskeletal System
Spring. 10(8-4) R: Open to graduate-professional students in the College of Osteopathic Medicine.
Systems Neuromusculoskeletal Medicine from basic science through clinical neurology, orthopedics, rheumatology, physiatry and orthopthalmology. Neuroanatomy, orthopedic anatomy, integration with clinical neurology, orthopedics, physiatry and orthopthalmology.

572 Genitourinary System
Spring. 3(3-0) R: Open to graduate-professional students in the College of Osteopathic Medicine. C: OST 573 concurrently and OST 574 concurrently.
Normal urinary and male reproductive structure and function; principles of diagnosis and management of urinary and male reproductive disorders. Integration of basic science and clinical information related to the urinary and male reproductive systems.

573 Endocrine System
Spring. 3(3-0) R: Open to graduate-professional students in the College of Osteopathic Medicine.
Multidisciplinary approach to endocrinology. Normal endocrine structure and function; principles of diagnosis and management of endocrine disorders. Integration of basic science and clinical information.

574 Female Reproductive System
Spring. 3(3-0) R: Open to graduate-professional students in the College of Osteopathic Medicine.
Normal structure and function and pathologies related to the female reproductive system. Integration of basic science and clinical information in obstetrics and gynecology.

575 Gastrointestinal System
Summer. 6(6-2) R: Open to graduate-professional students in the College of Osteopathic Medicine.
Systems biology approach to the entire digestive tract, including accessory organs of digestion. Normal structure and function and pathologies. Integration of basic science and clinical information.

576 Integumentary System
Summer. 2(2-0) R: Open to graduate-professional students in the College of Osteopathic Medicine.
Systems biology approach to the integumentary system, to include the skin and its epidermal derivatives. Normal structure and function and pathologies. Integration of basic science and clinical information.

577 Psychopathology
Fall. 2(2-0) R: Open to graduate-professional students in the College of Osteopathic Medicine.
Systems biology approach to the behavioral system. Normal structure and function and pathologies of the mind to include integration of basic science and clinical information.

578 Hematopoietic System
Fall. 2(2-0) R: Open to graduate-professional students in the College of Osteopathic Medicine.
Systems biology approach to the hematopoietic system including normal structure and function, hemopoiesis, clotting and hematopoietic pathologies. Integration of basic science and clinical information.

579 Cardiovascular System
Fall. 9(8-2) R: Open to graduate-professional students in the College of Osteopathic Medicine.
Systems biology approach to the cardiovascular system, including the heart and vasculature throughout the body. Normal structure and function and pathologies. Integration of basic science and clinical information.

580 Respiratory System
Spring. 6(4-4) R: Open to graduate-professional students in the College of Osteopathic Medicine.
Systems biology approach to the entire respiratory system, including the ear, nose, throat, sinuses, and related structures of the thorax. Includes certification in Basic and Advanced Cardiac Life Support.

581 Ethics, Professionalism and Law
Spring. 2(2-0) R: Open to graduate-professional students in the College of Osteopathic Medicine.
Introduction to the legal principles and ethical standards relevant to the practice of medicine including a variety of applicable legal theories such as negligence, liability and fraud. Topics of professional responsibility, confidentiality, consent, end-of-life issues, and reproductive rights are also included.

590 Special Problems
Fall, Spring, Summer. 1 to 24 credits. A student may earn a maximum of 60 credits in all enrollments for this course. R: Open only to graduate-professional students in College of Osteopathic Medicine. Approval of college. Individual study directed by a faculty member on an experimental, theoretical, or applied problem.

602 Primary Care Ambulatory Clerkship
Fall, Spring, Summer. 1 to 36 credits. A student may earn a maximum of 36 credits in all enrollments for this course. Interdepartmental with Family and Community Medicine and Internal Medicine and Osteopathic Surgical Specialties and Pediatrics and Psychiatry. Administered by Osteopathic Medicine.
A 24-week ambulatory care continuity experience involving 12 weeks in a multidisciplinary environment (family medicine, pediatrics, and internal medicine), 4 weeks in family medicine and 8 weeks in specialty areas (internal medicine, surgery, pediatrics, and obstetrics and gynecology). Didactic sessions are scheduled concurrently.

609 Laboratory Medicine Clerkship
Fall, Spring, Summer. 1 to 8 credits. A student may earn a maximum of 16 credits in all enrollments for this course. Interdepartmental with Human Medicine. Administered by Human Medicine. R: Open only to graduate-professional students in College of Human Medicine or Osteopathic Medicine. SA: PTH 609
Laboratory procedures. Correlation of laboratory data with morphologic abnormalities in patients with pathophysiology.
### Pathology Clerkship
Fall, Spring, Summer. 1 to 8 credits. A student may earn a maximum of 12 credits in all enrollments for this course. Interdepartmental with Human Medicine. Administered by Human Medicine. R: Open only to graduate-professional students in College of Human Medicine or Osteopathic Medicine. SA: PTH 606

Anatomic and clinical pathology with emphasis on clinical-pathological correlation. Conducted in pathology departments of affiliated hospitals.

### International Clerkship Rotations
Fall, Spring, Summer. 1 to 20 credits. A student may earn a maximum of 30 credits in all enrollments for this course. RB: Fluency with host country language. R: Approval of college; application required.

Faculty supervised international clerkship opportunities to immerse students into global healthcare institutions and communities with various healthcare delivery systems that will include student introduction to common diseases and treatment, and cultural sensitivity outside of the required clerkship experience in our affiliated hospital system.

### Clinical Clerkship in Merida, Mexico
Fall, Spring, Summer. 1 to 20 credits. A student may earn a maximum of 30 credits in all enrollments for this course. P: IM 618 or approval of college RB: Fluency in Spanish to interact with patients R: Open to graduate-professional students in the College of Osteopathic Medicine.

Clerkship experiences in Mexican healthcare institutions and healthcare delivery systems. Includes introduction to common diseases and treatments, as well as cultural aspects of Mexican health care.

### Leadership and Organizational Dynamics/Human Resources Management in the Health Professions
Spring. 3 credits.

Concepts and processes for human resources management (HRM) in the health professions giving attention to principles of leadership and its application in the processes of health care management.

### Operations Analysis and Decision-Making in the Health Professions
Fall. 3 credits.

Concepts of operations analysis, strategic and operational decision making in health care management and regulation, quality assurance and improvement, and quality outcomes research assessment.

### Financial Management and Budgetary Considerations in the Health Professions
Spring. 3 credits.

Concepts of budgeting and finance management in health care.

### Public Health Policy and the Law in the Health Professions
Fall. 3 credits.

Theory and processes of public health policy and its impact on health providers with consideration of the integral relationship between health providers in the public and private sectors, health policy agencies and legislative and ethical decision making processes.
