514 Veterinary Neurosciences
Fall, 2(2-0) R: Open to graduate-professional students in the College of Veterinary Medicine. SA: PTH 515, PDI 517
Introduction to the sensory, motor, and the special sense systems as they relate to domestic animals.

518 Comparative Veterinary Gross Anatomy I
Fall, 4(2-6) R: Open to graduate-professional students in the College of Veterinary Medicine.
Introduction to canine anatomy through lectures and dissection.

519 Comparative Veterinary Gross Anatomy II
Spring, 4(2-6) R: Open to graduate-professional students in the College of Veterinary Medicine.
Introduction to comparative anatomy of all domestic animals through lectures and dissection. Clinically relevant anatomy.

520 Veterinary Tissue Structure and Function
Fall, 4(3-3) R: Open to graduate-professional students in the College of Veterinary Medicine.
Microscopic anatomy and cellular physiology of vertebrate tissues. Introduction to the use of the microscope.

521 Veterinary Organ Microanatomy
Spring, 2(1-3) R: Open to graduate-professional students in the College of Veterinary Medicine.
Microanatomy of organ systems and relationship of structure to function.

553 Systemic Pathology
Spring, 4(3-2) RB: Completion of Year 1 in the graduate professional program in the College of Veterinary Medicine. R: Open to graduate-professional students in the College of Veterinary Medicine. SA: PTH 553
Anatomic pathology of digestive, urinary, respiratory, integumentary, cardiovascular, nervous, reproductive, musculoskeletal, endocrine, and lymphatic systems.

554 Veterinary Clinical Pathology
Spring, 3(2-2) RB: Completion of Year 2 of the graduate-professional program in the College of Veterinary Medicine. R: Open to graduate-professional students in the College of Veterinary Medicine.
Collection and assessment of body fluids and tissue. Interpretation of test results. Pathophysiological basis for test abnormalities. Basic technical laboratory competencies.

555 General Pathology
Fall, 2(1-2) RB: Open to graduate-professional students in the College of Veterinary Medicine.
Principles of sample collection, slide preparation, fluid analysis and interpretation using clinical case material.

560 Introduction to Veterinary Cytology
Fall, 1(0-2) RB: Completion of year 2 of the graduate professional program in the College of Veterinary Medicine. R: Open to graduate-professional students in the College of Veterinary Medicine.
Veterinary sciences and the needs of international countries.

561 International Veterinary Medicine
Fall, 1(1-0) RB: Completion of year 2 of the graduate professional program in the College of Veterinary Medicine. R: Open to graduate-professional students in the College of Veterinary Medicine.
Emerging and exotic animal diseases, their recognition, diagnosis, and proper reporting.

562 Introduction to Emerging and Foreign Animal Diseases
Spring, 1(1-0) RB: Completion of year 1 of the graduate professional program in the College of Veterinary Medicine. R: Open to graduate-professional students in the College of Veterinary Medicine.
Identification of structures and landmarks of clinical significance in live cats and dogs in relation to the structures imaged using endoscopy, ultrasonography, radiology, MRI, and CT scans.

563 Topographic and Applied Anatomy of Live Cats and Cattle
Spring, 1(0-2) RB: Completion of year 1 of the graduate professional program in CVM. R: Open to graduate-professional students in the College of Veterinary Medicine.
Identification of structures and landmarks of clinical significance in live horses and cattle in relation to the structures imaged using endoscopy, ultrasonography, radiology, MRI, and CT scans.

564 Topographic and Applied Anatomy of Live Horses and Cattle
Fall, 1(0-2) RB: Completion of year 2 of the graduate professional program in the College of Veterinary Medicine. R: Open to graduate-professional students in the College of Veterinary Medicine.
Analysis of the cat and dog encountered during common surgical approaches.

565 Surgical Anatomy of Cats and Dogs
Fall, 1(0-2) RB: Completion of year 2 of the graduate professional program in the College of Veterinary Medicine.
Important field of study in Pathobiology and Diagnostic Investigation.

590 Selective Topics in Pathobiology and Diagnostic Investigation
Fall, Spring, 1(1-0) RB: Completion of year 1 of the graduate professional program in the College of Veterinary Medicine. R: Open to graduate-professional students in the College of Veterinary Medicine.
Important field of study in Pathobiology and Diagnostic Investigation.

610 Veterinary Gross Anatomy Dissection
Fall, Spring, Summer. 1 to 3 credits. A student may earn a maximum of 6 credits in all enrollments for this course. RB: Completion of semester 5 of the graduate-professional program in the College of Veterinary Medicine. R: Open to graduate-professional students in the College of Veterinary Medicine. SA: ANTV 611
Dissection and proxection of selected regions of domestic animals.

611 Research Problems in Veterinary Anatomy
Fall, Spring, Summer. 1 to 3 credits. A student may earn a maximum of 6 credits in all enrollments for this course. RB: Completion of semester 5 of the graduate-professional program in the College of Veterinary Medicine. R: Open to graduate-professional students in the College of Veterinary Medicine. SA: ANTV 611
Veterinary gross anatomy, cell biology, histology, or neurobiology.

630 Diagnostic Pathology Clerkship
Fall, Spring. 3 credits. R: Open to graduate-professional students in the College of Veterinary Medicine. R: Open to graduate-professional students in the College of Veterinary Medicine. SA: PTH 630
Necropsy and clinical pathology techniques and interpretation of clinical findings, postmortem findings, and diagnostic laboratory results.

631 Necropsy Clerkship
Spring. 1(1-0) RB: Completion of semester 5 of the graduate professional program in the College of Veterinary Medicine. R: Open to graduate-professional students in the College of Veterinary Medicine. SA: PTH 631
Supervised necropsy. Interpretation and presentation of findings.

632 Problems in Veterinary Pathology
Fall, Spring, Summer. 1 to 3 credits. A student may earn a maximum of 6 credits in all enrollments for this course. RB: Completion of Semester 5 of the graduate professional program in the College of Veterinary Medicine. R: Open to graduate-professional students in the College of Veterinary Medicine. SA: PTH 632
Supervised projects involving gross pathology, histopathology, clinical pathology, or molecular pathology.

633 Special Problems in Veterinary Pathology
Fall, Spring, Summer. 3 credits. A student may earn a maximum of 6 credits in all enrollments for this course. RB: Completion of Semester 5 of the graduate professional program in the College of Veterinary Medicine. R: Open to graduate-professional students in the College of Veterinary Medicine. SA: PTH 633
Supervised off-campus experience or project involving gross pathology, histopathology, ultrastructural pathology, clinical pathology, or molecular pathology. Experience may emphasize diagnostic pathology or research. Settings may include, but are not limited to other colleges of veterinary medicine, private industry, and governmental institutions.
634 Endocrinology Clerkship
Spring. 3 credits. R: Completion of semester 5 of the graduate-professional program in the College of Veterinary Medicine.
R: Open to graduate-professional students in the College of Veterinary Medicine. SA: PTH 634
Principles of endocrinology and diagnosis of endocrinology disorders. Case review and interpretation.

635 Special Problems in Histopathology and Cytology Clerkship
Summer. 3 credits. P: PDI 630 R: Completion of Semester 5 of the professional program in the College of Veterinary Medicine.
R: Open to graduate-professional students in the College of Veterinary Medicine. SA: PTH 635
Study of the histopathology and clinical cytology of various diseases of veterinary importance.

636 Aquatic Animal Medicine Clerkship
Spring. 3 credits. R: Completion of semester 5 of the graduate-professional program in the College of Veterinary Medicine.
R: Open to graduate-professional students in the College of Veterinary Medicine. SA: PTH 636
Clinical, laboratory, and ecological principles of disease of aquatic organisms with special emphasis on impacts and management. Critical analysis and review of selected case studies and disease control regimen.

637 Poultry Medicine Clerkship
Fall. 3 credits. R: Completion of semester 5 of the graduate-professional program in the College of Veterinary Medicine.
R: Open to graduate-professional students in the College of Veterinary Medicine.
Diagnosis, treatment, and prevention of viral, bacterial, parasitic, fungal, and nutritional diseases of commercial poultry. Biosecurity principles, insect and rodent control, and the proper selection and use of disinfectants. Field trips required.

804 Molecular and Developmental Neurobiology
Fall, 3(3-0) Interdepartmental with Neuroscience and Pharmacology and Toxicology and Psychology and Zoology. Administered by Neurosciences. R: Bachelor's degree in a Biological Science or Psychology.
R: Open to graduate students in Neurosciences major.
Nervous system specific gene transcription and translation. Maturation, degeneration, plasticity, and repair in the nervous system.

816 Integrative Toxicology: Mechanisms, Pathology and Regulation
Fall of odd years. 3(3-0) Interdepartmental with Animal Science and Biochemistry and Molecular Biology and Pharmacology and Toxicology. Administered by Pharmacology and Toxicology. P: PTH 819

830 Concepts in Molecular Biology
Fall, Spring. 2(2-0) Interdepartmental with Biomedical Laboratory Diagnostics. Administered by Biomedical Laboratory Diagnostics.
R: One course in biochemistry or concurrently. SA: MT 830
Techniques and theories of molecular biology, nucleic acid synthesis and isolation, enzymatic digestion and modification, electrophoresis, hybridization, amplification, library construction, and cloning.

851 Advanced General Pathology
Fall of even years. 3(0-6) R: Approval of department. SA: PTH 851
Fundamental concepts of cell injury, inflammation, and oncogenesis. Mechanisms of disease.

853 Advanced Systemic Pathology
Spring of odd years. 3(0-6) R: Approval of department. SA: PTH 853
Pathological aspects of the nervous, endocrine, cardiovascular, respiratory, urinary, genital, musculoskeletal, integumentary, and special sense systems.

854 Advanced Clinical Pathology
Fall of odd years. 2(2-0) R: Doctor of Veterinary Medicine degree. R: Approval of department. SA: PTH 854
Hematology, including anemias, leukocyte responses and hemostasis. Evaluation of clinical chemistry, urinalysis, and endocrinology.

855L Advanced Clinical Pathology Laboratory
Fall of odd years. 1(0-2) R: Doctor of Veterinary Medicine degree. R: Approval of department.
Clinical pathology laboratory techniques including sample preparation and examination of blood smears and cytologic preparations.

858 Pathology of Avian Diseases
Spring of even years. 2(2-0) R: Approval of department. SA: PTH 858
Disease and pathology affecting domestic poultry, pet birds, and wild birds.

859 Avian Histopathology Laboratory
Spring of even years. 1(0-2) R: Approval of department. SA: PTH 859
Recognition and description of microscopic lesions of avian diseases.

870 Laboratory Animal Pathology
Summer of odd years. 2(1-2) R: Background in histopathology, veterinary medicine, and systemic pathology. R: Approval of department. SA: PTH 870
Diseases and pathology of laboratory animal species including mice, rats, ferrets, rabbits, primates, and fish, including current use of laboratory animals for toxicological pathology in industry.

890 Problems in Veterinary Pathology
Fall, Spring. Summer. 1 to 12 credits. A student may earn a maximum of 12 credits in all enrollments for this course. R: Approval of department. SA: PTH 890
Faculty supervised work on an experimental, theoretical, or applied problem in veterinary pathology.

891 Problems in Pathobiology
Fall, Spring. Summer. 1 to 12 credits. A student may earn a maximum of 12 credits in all enrollments for this course. R: Approval of department. SA: PTH 891
Faculty supervised work on an experimental, theoretical, or applied problem in pathobiology and diagnostic investigation.

892 Pathology Seminar
Fall, Spring. 1(1-0) A student may earn a maximum of 3 credits in all enrollments for this course. R: Approval of department. SA: PTH 892
Presentation and discussion of current topics in pathology by departmental graduate students, faculty, or outside speakers.

893 Pathology Case Discussion Seminar
Fall, Spring. 1(1-0) A student may earn a maximum of 6 credits in all enrollments for this course. R: Open to graduate students or lifelong graduate students in the Department of Pathobiology and Diagnostic Investigation. Approval of department. SA: PTH 893
Utilization of a group of theme-based veterinary cases to train pathology residents and graduate students in diagnostic pathology.

894 Diagnostic Histopathology of Neoplastic Diseases of Domestic Animals
Spring of even years. 3(2-2) R: Approval of department.
Histologic diagnosis of neoplastic diseases of domestic animals, including prognostic criteria, grading systems, and ancillary techniques to aid in diagnosis and prognosis.

899 Master's Thesis Research
Fall, Spring, Summer. 1 to 10 credits. A student may earn a maximum of 10 credits in all enrollments for this course. R: Open to masters students in the Department of Pathobiology and Diagnostic Investigation. Approval of department. SA: PTH 899
Master's thesis research.

901 Investigating the Lung
Fall of even years. 2(2-0) Interdepartmental with Large Animal Clinical Sciences and Physiology. Administered by Large Animal Clinical Sciences. R: Open to graduate students.

999 Doctoral Dissertation Research
Fall, Spring, Summer. 1 to 24 credits. A student may earn a maximum of 42 credits in all enrollments for this course. R: Open to doctoral students in the Department of Pathobiology and Diagnostic Investigation. Approval of department. SA: PTH 999
Doctoral dissertation research.
