ENVIRONMENTAL ESP SCIENCE AND POLICY

College of Social Science

Principles of Environmental Science and Policy

Fall 3(3-0)

Overview of scholarship and research in environmental science and policy

801 Physical, Chemical, and Biological **Processes of the Environment**

Fall. 3(3-0) RB: Bachelor's or Master's in appropriate discipline for specialization. SA:

Interdisciplinary concepts in the natural sciences related to environmental problems. Ecology and human health.

802 **Human Systems and Environment**

Spring. 3(3-0) RB: Bachelors or Masters in appropriate discipline for specialization. SA: SSC 804

Anthropological, economic, geographical, legal, political, and sociological concepts of human systems and environmental change.

Human and Ecological Health 803 Assessment and Management

Fall. 3(3-0) RB: Familiarity with the basic concepts of physics, chemistry and biology of environmental processes, and the relationships between human systems and the environment. SA: SSC 805

Concepts and techniques used to evaluate human and ecological health impacts from anthropogenic Policy formulation and management strategies to mitigate health effects.

804 **Environmental Applications and Analysis**

Spring. 3(3-0) A student may earn a maximum of 6 credits in all enrollments for this course. P: ESP 801 and (ESP 802 or concurrently) and ESP 803 or approval of department RB: Bachelors or Masters in appropriate discipline for specialization. SA: SSC 806

Global, regional and local environmental issues. Use of systems approach to identify and solve environmental problems.

845 **Environmental Risk Perception and** Decision-Making

Spring of odd years. 3(3-0) Interdepartmental with Criminal Justice and Fisheries and Wildlife. Administered by Criminal Justice. R: Open to masters students or doctoral students in the School of Criminal Justice or in the Department of Fisheries and Wildlife or approval of school.

Theoretical underpinnings of individual decisionmaking and risk perception processes. Case studies of the interplay of risk perception and decisionmaking in an environmental and or criminological context.

846 Corporate Environmental Crime and Risk

Spring of even years. 3(3-0) Interdepartmental with Criminal Justice and Fisheries and Wildlife. Administered by Criminal Justice. R: Open to masters students or doctoral students in the Department of Fisheries and Wildlife or in the School of Criminal Justice or approval of school.

Theoretical accounts and multiple interventions relevant to corporate environmental crime and risk. Use of "Smart Regulation" principles to design interventions to match specific problems.

Global Risks, Conservation, and

Criminology
Fall. 3(3-0) Interdepartmental with Criminal Justice and Fisheries and Wildlife. Administered by Criminal Justice. R: Open to graduate students or approval of school.

Theories, actors, characteristics and legal instruments associated with risk, conservation, and criminology related to globalization. Current case studies in criminological conservation.

Modeling Natural Resource Systems

Spring. 3(3-0) Interdepartmental with Community Sustainability and Fisheries and Wildlife. Administered by Community Sustainability. RB: ecology, statistics, and calculus SA: ACR 851

Introductory quantitative modeling of environmental systems

869 Geosimulation

Spring. 3(3-0) Interdepartmental with Geography. Administered by Geography. RB: Basic understanding of data structures and algorithms covered in an introductory course of any programming language. R: Approval of department.

Theoretical concepts related to simulating dynamic geographic phenomena in the intersection between human and natural systems. Innovative agentbased methodology applied to complex socialenvironmental systems. Hands-on experience of agent-based modeling, with special emphasis on modeling human decision-making and its impact on the natural environment

Multi-Equation Quantitative Models

Spring. 3(3-0) Interdepartmental with Sociology. Administered by Sociology. P: SOC 881 and SOC 882 or approval of department R: Open to graduate students in the Department of Sociology and open to graduate students in the Environmental Science and Policy Specialization or approval of department.

Quantitative methodology: multilevel modeling; structural equation modeling. Applications in sociology and environment.

891 **Selected Topics in Environmental** Science and Policy

Fall, Spring, Summer. 1 to 3 credits. A student may earn a maximum of 6 credits in all enrollments for this course.

In-depth study of selected environmental science and policy issues.
