PHYSIOLOGY

Department of Physiology
College of Natural Science

101  Frontiers in Physiology
Spring. 1(1-0) R: Open to freshmen or sophomores in the College of Natural Science or in the Lyman Briggs College.

Introduction to the field of physiology and recent trends in physiological research, including an overview of biomedical careers. Campus and Internet resources to achieve academic success and career goals.

250  Introductory Physiology
Fall, Spring, Summer. 4(4-0) R: Not open to students in the Physiology major. Not open to students with credit in PSL 310.

Function, regulation and integration of organs and organ systems of higher animals emphasizing human physiology.

310  Physiology for Pre-Health Professionals
Fall, Spring. 4(4-0) P: BS 161 or BS 181H or LB 145 or ANTR 350 Not open to students with credit in PSL 250 or PSL 431 or PSL 432.

Fundamental concepts of human organ system physiology with clinical examples for students entering health care fields.

311L  Physiology Laboratory for Pre-Health Professionals
Fall, Spring. 2(2-0) P: PSL 431 and PSL 432 or concurrent.) R: Not open to freshmen.

Laboratory exercises in human and animal physiology, including neural, sensory, muscle, cardiovascular, and urinary function, with an emphasis on the integration of physiological systems. Laboratory exercises relevant for pre-health students and the development of data analysis and problem solving skills.

421  Adult and Embryonic Stem Cells (W)
Spring, 2(2-0) P: (PSL 431) and completion of Tier I writing requirement RB: PSL 432 R: Open to seniors in the Physiology major.

Topics in the physiology, cell biology, genetics, and developmental potential of adult and embryonic stem cells.

425  Physiological Biophysics
Fall, Spring. 3(3-0) P: PSL 250 or PSL 310 or (PSL 431 and PSL 432) RB: First semester calculus.

The quantitative physical phenomena underlying kinematics and equilibria of physiological processes.

431  Human Physiology I
Fall, 4(4-0) P: (BS 161 or BS 181H or LB 145) and (CEM 142 or CEM 152 or CEM 182H or LB 172) RB: BS 162 or BS 182H or LB 144 R: Open to juniors or seniors.

Molecular basis of physiological control systems, physiology of excitable cells, autonomic nervous system, function and regulation of cardiovascular and respiratory systems.

432  Human Physiology II
Spring. 4(4-0) P: (BS 161 or BS 181H or LB 145) and (CEM 142 or CEM 152 or CEM 182H or LB 172) and PSL 431 RB: BS 162 or BS 182H or LB 144 R: Open to juniors or seniors.

Continuation of PSL 431. Function and regulation of the digestive, endocrine, renal, and reproductive systems. Integration of physiological responses.

438  Topics in the Biology and Cellular Physiology of Cancer (W)
Fall, Spring. 2(2-0) P: (BS 161 or BS 181H or LB 145) and (PSL 431 and completion of Tier I writing requirement) RB: BMB 461 and BMB 462 R: Open to seniors in the Physiology major or in the Lyman Briggs Physiology Coordinate Major.

Topics in the biology and physiology of cancer, selected from areas such as regulation of the cell cycle, oncogenes and tumor suppressors, cancer cell signal transduction, tumor progression and metastasis, and cancer genetics and genomics.

439  Special Topics in Physiology (W)
Spring. 2(2-0) P: Completion of Tier I Writing Requirement RB: PSL 431 and PSL 432 R: Open to seniors in the Lyman Briggs Physiology Coordinate Major or in the Physiology major.

Special topics in physiology, focusing on the process of biomedical discovery, alternative medicine, autoimmunity, or other selected topics of interest related to careers in health care or biomedical research.

440  Topics in Cell Physiology (W)
Spring. 2(2-0) A student may earn a maximum of 4 credits in all enrollments for this course. P: (PSL 431) and completion of Tier I writing requirement RB: PSL 432 R: Open to seniors in the Lyman Briggs Physiology Coordinate Major or in the Physiology major.

Topics in the cell physiology, cell biology, genetics, and developmental potential of adult and embryonic stem cells.

444  Topics in Reproductive Physiology (W)
Spring. 2(2-0) P: PSL 431 and PSL 432 and completion of Tier I writing requirement R: Open to seniors in the Physiology major or in the Lyman Briggs Physiology Coordinate Major.

Selected topics in the physiology and development of the reproductive system.

445  Topics in Environmental Physiology (W)
On Demand. 2(2-0) P: (PSL 431) and completion of Tier I writing requirement RB: PSL 432 R: Open to seniors in the Physiology major or in the Lyman Briggs Physiology Coordinate Major.

Selected topic in environmental physiology with an emphasis on thermoregulation.

446  Topics in Sensory Physiology (W)
On Demand. 2(2-0) P: (PSL 431) and completion of Tier I writing requirement RB: PSL 432 R: Open to seniors in the Physiology major or in the Lyman Briggs Physiology Coordinate Major.

Selected topics on structure and function of the mammalian brain.

448  Topics in Gastrointestinal Physiology (W)
Spring of odd years. 2(2-0) P: (PSL 431 and PSL 432) and completion of Tier I writing requirement R: Open to seniors in the Physiology major or in the Lyman Briggs Physiology Coordinate Major.

Selected topics in the physiology of the digestive system.

450  Physiology in Health and Disease
Fall. 3(3-0) P: (PSL 431 and PSL 432) and completion of Tier I writing requirement R: Open to seniors in the Physiology major or in the Lyman Briggs Physiology Coordinate Major.

Advanced topics in normal and abnormal physiology. Chronic diseases, disease progression, and animal models of disease.

475L  Capstone Laboratory in Physiology
Fall, Spring. Summer. 2(1-3) P: (PSL 431) and completion of Tier I writing requirement RB: (PSL 432) and anatomy and statistics R: Open to juniors or seniors in the Physiology major or in the Lyman Briggs Physiology Coordinate Major.

Laboratory exercises in human and animal physiology, including cardiovascular, respiratory, neural, muscle, sensory, and hormonal function, as well as systems physiology studies in exercise and systemic reflexes.

480  Special Problems in Physiology
Fall, Spring, Summer. 1 to 2 credits. A student may earn a maximum of 8 credits in all enrollments for this course. RB: (PSL 431 and PSL 432) and completion of Tier I writing requirement R: Open to undergraduate students in the Physiology major. Approval of department.

Independent study under the supervision of a faculty member.
490 Independent Research in Physiology  
Fall, Spring, Summer. 1 to 2 credits. A student may earn a maximum of 6 credits in all enrollments for this course. RB: PSL 431 and PSL 432 R: Open to undergraduate students in the Physiology Major. Approval of department. Supervised laboratory research in physiology under the direction of a faculty member.

513 Animal Physiology for Veterinarians  
Spring. 4(4-0) R: Open to graduate-professional students in the College of Veterinary Medicine. Physiology of the neural, cardiovascular, renal, respiratory, digestive, endocrine, and reproductive systems, and thermoregulation.

534 Cell Biology and Physiology I  
Fall. 3 credits. Interdepartmental with Human Anatomy and Biochemistry and Molecular Biology. Administered by Physiology. R: Open only to graduate-professional students in the College of Human Medicine or College of Osteopathic Medicine. Modern concepts of cell biology as a basis for understanding the physiology of human tissues and organ systems in health and disease.

535 Cell Biology and Physiology II  
Spring. 4 credits. Interdepartmental with Human Anatomy and Biochemistry and Molecular Biology. Administered by Physiology. R: Open only to graduate-professional students in the College of Human Medicine or the College of Osteopathic Medicine. Modern concepts of cell biology as a basis for understanding the physiology of human tissues and organ systems in health and disease. Continuation of PSL 534.

536 Basic Principles of Cell Biology and Physiology  
Fall. 3(2-2) Interdepartmental with Human Anatomy and Biochemistry and Molecular Biology. Administered by Physiology. R: Open to graduate-professional students in the College of Osteopathic Medicine. Modern concepts of cell biology as a basis for understanding the structure (histology) and function (physiology) of human tissues in health and disease.

537 Basic Principles of Pathology  
Fall. 1(1-0) R: Open to graduate-professional students in the College of Osteopathic Medicine. Basic principles of general pathology, with emphasis on principles of cellular adaptations, cell injury, inflammation, tissue repair, hemodynamic disorders, and neoplasia.

552 Medical Neuroscience  
Spring. 4(3-2) Interdepartmental with Human Anatomy and Neurology and Ophthalmology and Radiology. Administered by Neurology and Ophthalmology. R: Open only to graduate-professional students in the Colleges of Human Medicine and Osteopathic Medicine. SA: ANT 552 Correlation of normal structure and function of the human nervous system with clinical testing, classical lesions, and common diseases.

611 Research Problems in Physiology Clerkship  
Fall, Spring, Summer. 3 credits. A student may earn a maximum of 6 credits in all enrollments for this course. RB: (PSL 511) and Completion of Semester 5 in the graduate professional program in the College of Veterinary Medicine. Individual work on a research problem.

813 Molecular Mechanism of Human Disease and Targeted Therapies  
Fall. 3(3-0) Mechanisms and pathways underlying human disease and therapeutic strategies.

825 Cell Structure and Function  
Spring. 3(3-0) Interdepartmental with Biochemistry and Molecular Biology and Microbiology and Molecular Genetics. Administered by Biochemistry and Molecular Biology. RB: BMB 401 or BMB 461. SA: BCH 825 Molecular basis of structure and function. Cell properties: reproduction, dynamic organization, integration, programmed and integrative information transfer. Original investigations in all five kingdoms.

827 Physiology and Pharmacology of Excitable Cells  
Fall. 4(4-0) Interdepartmental with Integrative Biology and Neuroscience and Pharmacology and Toxicology. Administered by Pharmacology and Toxicology. R: Open to graduate students in the College of Natural Science or in the Department of Pharmacology and Toxicology or approval of department. Function of neurons and muscle at the cellular level: membrane biophysics and potentials, synaptic transmission, sensory nervous system function.

828 Cellular and Integrative Physiology I  
Fall. 3(3-0) Cellular physiology as basis for understanding integrative functions of various body systems, including nervous, cardiovascular, respiratory, urinary, muscle and kidney.

829 Cellular and Integrative Physiology II  
Fall. 3(3-0) RB: PSL 828 Cellular physiology as basis for understanding functions of various body systems including blood, blood cells, endocrine, reproductive and gastrointestinal.

839 Systems Neuroscience  
Spring. 4(4-0) Interdepartmental with Human Anatomy and Neuroscience and Pharmacology and Toxicology and Psychology and Integrative Biology. Administered by Neuroscience. R: Open only to graduate students in the Colleges of Human Medicine, Osteopathic Medicine, Agriculture and Natural Resources, Natural Science, Social Science, and Veterinary Medicine. SA: ANT 839 Anatomy, pharmacology, and physiology of multicellular neural systems. Sensory, motor, autonomic, and chemo-regulatory systems in vertebrate brains.

899 Master's Thesis Research  
Fall, Spring, Summer. 1 to 6 credits. A student may earn a maximum of 36 credits in all enrollments for this course. R: Open to master's students in the Physiology major. Master's thesis research.
