200 A Multi-disciplinary Approach to Problems in Global Public Health and Epidemiology
Fall. 3(3-0) R: Open to undergraduate students in the Global Public Health and Epidemiology Minor or approval of department.
Overview of global health and the role of epidemiology in studying health problems from a multi-disciplinary perspective.

240 Epidemiological Investigations in Nutrition and Health
Summer. 3(3-0) Interdepartmental with Human Nutrition and Foods. Administered by Epidemiology. P: HNF 150 or concurrently or approval of department.
Integration of epidemiology with human nutrition concepts to understand the role of dietary intake and nutritional status as determinants of health-related issues in populations.

280 Applied Analytic Methods in Health Studies I
Spring. 3(3-0) P: (EPI 200) and (STT 200 or STT 201 or STT 224 or STT 231 or STT 315 or STT 351 or STT 421) R: Open to undergraduate students in the Global Public Health and Epidemiology Minor or approval of department.
Introduction to conceptual and analytical methods used in Public Health and Epidemiology. Programming, statistical techniques, and interpretation of health data.

289 Independent Study
Fall, Spring, Summer. 1 to 8 credits. A student may earn a maximum of 12 credits in all enrollments for this course. R: Approval of department.
Faculty supervised, introductory, planned learning for an individual student in areas supplementing regular course offerings.

290 History of Scientific Reasoning and Critical Thinking in Global Public Health and Epidemiology
Spring. 3(3-0) P: EPI 200 R: Open to undergraduate students in the Global Public Health and Epidemiology Specialization.
Introduction to the historical development of public health and epidemiology and how social and scientific contexts shape scientific theories of disease distribution.

380 Applied Analytic Methods in Health Studies II
Fall. 3(3-0) P: EPI 280 R: Open to undergraduate students in the Global Public Health and Epidemiology Minor or approval of department. Topics in conceptual and analytical methods used in Public Health and Epidemiology. Continuation of EPI 280.

390 Disease in Society: Introduction to Epidemiology and Public Health
Spring. 4(4-0) Interdepartmental with Social Science. Administered by Epidemiology.
Human epidemiology and population health issues facing contemporary society. Developed and less-developed settings. Health-related information in the mass media and scholarly publications.

456 Health and Healthcare in Sub-Saharan Africa
Summer of odd years. 3(3-0) R: Open to juniors or seniors or graduate students. Survey of health and healthcare in Sub-Saharan Africa. Role and effect of geopolitical influences on public health in the region.

465 Bayesian Statistical Methods
Fall. 3(3-0) A student may earn a maximum of 0 credits none Interdepartmental with Statistics and Probability. Administered by Statistics and Probability. P: STT 442

475 Study Abroad in Epidemiology, Biostatistics or Public Health
Fall, Spring, Summer. 1 to 10 credits. A student may earn a maximum of 20 credits in all enrollments for this course. R: Approval of department.
Study abroad under MSU faculty supervision in selected countries. Epidemiology, health and behavior, and social topics in relation to cultural sites, social structures, museums, and institutions.

489 Independent Study
Fall, Spring, Summer. 1 to 8 credits. A student may earn a maximum of 12 credits in all enrollments for this course. R: Approval of department.
Faculty supervised, intermediate-level, planned learning for an individual student in areas supplementing regular course offerings.

490 Advanced Topics/Methods in Global Public Health and Epidemiology
Fall. 3(2-0) P: EPI 390 and EPI 200 and EPI 290 R: Open to undergraduate students in the Global Public Health and Epidemiology Specialization.
Conceptual and analytical methods used in public health and epidemiology.

495 Epidemiology and Behavioral Health in Society
Summer. 3(3-0) A student may earn a maximum of 12 credits in all enrollments for this course. R: Open to juniors or seniors or graduate students.
Introduction to epidemiology as applied to behavioral health issues in contemporary society. Lifespan developmental perspective from preterm births to late life Alzheimer's disease and the dementias. Offered first half of semester.

546 Information Management: Fundamentals of Epidemiology and Biostatistics
Spring. 1(1-0) RB: Undergraduate statistics. R: Open to graduate-professional students in the College of Human Medicine.
Introduction to accessing, analyzing, and applying information to patients and to populations. Offered first ten weeks of the semester.

547 Information Management: Applications of Epidemiology and Biostats
Fall. 1(1-0) P: EPI 546 RB: Undergraduate statistics. R: Open to students in the College of Human Medicine or approval of department.
Basic competency in accessing, analyzing, and applying information to patients and populations. Offered first half of semester.

805 Readings in the Historical Roots of Epidemiological Thought
Fall. 2(0-0) Interdepartmental with History. Administered by Epidemiology. P: EPI 810 or approval of department R: Open to graduate students in the Department of Epidemiology and Biostatistics or approval of department.
Historical evolution of models of disease causation and population perspectives on disease.

808 Biostatistics I
Fall. 3(3-0) Interdepartmental with Statistics and Probability. Administered by Epidemiology. RB: College-level algebra. R: Open to master's students or doctoral students in the Biostatistics Major or in the Epidemiology Major or approval of department. SA: STT 425
Applications of probability and statistics in the applied health sciences. Probability distributions, estimation and tests for one-, two-, and paired samples, linear regression, correlation, and ANOVA. Use of statistical software. Critical appraisal of statistical methods in the biomedical literature.

808B Advanced Biostatistics
Fall. 3(3-0) P: EPI 810 or concurrently or approval of department RB: Linear algebra, calculus. R: Open to graduate students in the Biostatistics Major or in the Epidemiology Major or approval of department.
Fundamental theory of probability and statistical inference related to the practice of public health. Discrete and continuous random variables, sampling distributions, parametric point and interval estimation, hypothesis testing, maximum likelihood estimates, methods of constructing test and estimation procedures. Sample size, power, and efficiency.

809 Biostatistics II
Spring. 3(3-0) Interdepartmental with Statistics and Probability. Administered by Epidemiology. P: EPI 808 RB: MTH 103 or MTH 110 or MTH 116 R: Open to master's students or doctoral students in the Epidemiology Major or approval of department. SA: STT 426
Analysis of categorical data in epidemiologic studies. Contingency tables and logistic regression.
810 Introductory Epidemiology  
Fall. 3(3-0) R: Open to graduate students in the Department of Epidemiology and Biostatistics or approval of department. SA: HM 810  
Disease from a population perspective as the interaction of host, agent, and environment. Case definition, measuring frequency of disease, mortality and morbidity data, and major study designs. Offered first half of semester.

812 Causal Inference in Epidemiology  
Fall. 3(3-0) P: EPI 810 RB: LCS 828 R: Open to graduate students in the Department of Epidemiology and Biostatistics or approval of department. SA: HM 812  
Causality in epidemiology. Application of theoretical concepts to the design, analysis, and assessment of epidemiologic research.

815 Epidemiology of Cardiovascular Disease  
Spring of even years. 3(3-0) RB: EPI 810 R: Open to graduate students in the Department of Epidemiology and Biostatistics or approval of department. SA: HM 815  

816 Perinatal Epidemiology  
Fall. 3(3-0) RB: EPI 810 R: Open to graduate students in the Department of Epidemiology and Biostatistics or approval of department. SA: HM 816  
Epidemiology of adverse health states in pregnancy and the perinatal impact of these health states on subsequent child development.

817 Epidemiology of Communicable Diseases  
Fall. 3(3-0) P: EPI 810 or concurrently R: Open to graduate students in the Department of Epidemiology and Biostatistics or approval of department. SA: HM 817  
Application of principles of epidemiology to research in communicable diseases relevant to public health in the U.S. and other countries.

819 Spatial Epidemiology and Medical Geography  
Spring. 3(3-0) Interdepartmental with Geography, Administered by Epidemiology. P: EPI 810 or GEO 435 R: Open to graduate students in the Department of Epidemiology and Biostatistics or in the Department of Geography or approval of department. SA: HM 819  
Concepts, techniques, and utilization of spatial-epidemiologic analyses for human health.

823 Cancer Epidemiology  
Spring of odd years. 3(3-0) P: (EPI 810) and (EPI 809 or EPI 808B) R: Open to graduate students in the Department of Epidemiology and Biostatistics or approval of department. SA: HM 823  
Basic principles of carcinogenesis, Major etiologic factors, types of malignancies, and biomarkers for susceptibility and exposure. Prevention and early detection of cancer.

826 Research Methods in Epidemiology  
Fall. 3(3-0) P: EPI 809 R: Open to graduate students in the Department of Epidemiology and Biostatistics or approval of department. SA: HM 826  
Analyses of epidemiologic and clinical data applying statistical methods, based on logistic and survival models, using standard software.

826B Categorical Data Analysis  
Spring. 3(3-0) P: EPI 808B and EPI 810 RB: Knowledge of research design and quantitative background. R: Open to graduate students in the Biostatistics Major or in the Epidemiology Major or approval of department. Applications to real data from clinical and epidemiologic studies of categorical outcomes, distributions for categorical responses and contingency tables, logistic regression and related logit models for binary and multicategory response variables, repeated and clustered categorical data, generalized linear mixed models.

828 Seminar in Responsible Conduct of Research  
Fall. 1(1-0) P: EPI 810 SA: EPI 827  
Ethical and regulatory issues in the responsible conduct of epidemiology research. Topics include informed consent; scientific misconduct; human subject protection; responsible data management including electronic medical records, biological samples and genetic data; HIPAA compliance; and other current issues of scientific integrity.

829 Design and Conduct of Epidemiological Studies and Clinical Trials  
Spring. 3(2-2) Interdepartmental with Large Animal Clinical Sciences. Administered by Large Animal Clinical Sciences. P: (VM 533 or EPI 810) and (EPI 808B or EPI 808B)  

830 Epidemiologic Overview of Foodborne Diseases and Food Safety  
Fall. 3(3-0) Interdepartmental with Large Animal Clinical Sciences. Administered by Large Animal Clinical Sciences. RB: Advanced undergraduate courses in biology, microbiology, biological sciences, biochemical sciences, food technology. R: Open to graduate students in the College of Veterinary Medicine or in the Food Safety Specialization or in the Food Safety major.  

835 Neuroepidemiology  
Spring of odd years. 3(3-0) Interdepartmental with Neurology and Ophthalmology. Administered by Epidemiology. P: EPI 810 or approval of department R: Open to graduate students in the Department of Epidemiology and Biostatistics or approval of department. Epidemiology of neurololgic and neuropsychiatric disorders with emphases on neurodegenerative disorders (e.g., Alzheimer’s disease).

836 Practicum in Epidemiological Methods  
Fall. 3(3-0) P: EPI 812 and (EPI 826 or concurrently) R: Open to graduate students in the Department of Epidemiology and Biostatistics or approval of department. Data management, analysis, interpretation and presentations using public data sets.

840 Clinical Epidemiology for Healthcare Practice  
Fall. 3 credits. R: Approval of department. Introduction to clinical epidemiology and evidence-based medicine for clinical practitioners and other healthcare professionals.

847 Analysis of Survival Data  
Spring of odd years. 3(3-0) Interdepartmental with Statistics and Probability. Administered by Statistics and Probability. RB: STT 422 or STT 442 or STT 862  

851 SAS Programming I: Essentials  
Fall. 3(3-0) R: Open to graduate students in the Department of Epidemiology and Biostatistics or approval of department. A programming approach to plan and write simple SAS programs to solve common data management and data analysis problems.

852 SAS Programming II: Data Management and Analysis  
Spring. 1(1-0) P: EPI 851 R: Open to graduate students in the Department of Epidemiology and Biostatistics or approval of department. A programming approach to plan and write SAS programs to solve common data management and data analysis problems.

853B Statistical Computing  
Fall. 3(3-0) P: EPI 808B and EPI 826B R: Open to graduate students in the Biostatistics Major or in the Epidemiology Major or approval of department. Statistical computation and algorithms using programming languages, SAS/IML, R and/or Stata, Newton-Raphson method, Monte Carlo simulation of probability distributions, bootstrap, statistical graphics.

855 Biostatistical Modeling in Genomic Data Analysis  
Fall. 3(3-0) P: (EPI 808B and EPI 826B) or (EPI 826 or concurrently) R: Open to graduate students in the Department of Epidemiology and Biostatistics or approval of department. Introduction to fundamental principles and modeling of genomic genetic data and computational techniques.
Epidemiology—EPI

856 Statistical Consulting in Public Health
Spring. 1(1-0) P: EPI 826B or EPI 826 and (LCS 829 or concurrently) R: Open to graduate students in the Department of Epidemiology and Biostatistics or approval of department.
Critical appraisal of applied epidemiological studies, use of real applications to solve design and data analysis problems, and communication of findings to public health researchers, oral/written reports on intermediate and final results of case studies.

858 Clinical Trials
Spring of even years. 3(3-0) P: (EPI 808B or EPI 809) or (LCS 829 or concurrently) R: Open to graduate students in the Department of Epidemiology and Biostatistics or approval of department.

880 Select Topics in Biostatistics
Summer. 3(3-0) A student may earn a maximum of 9 credits in all enrollments for this course. P: (EPI 808B) or (EPI 808 and EPI 809) or (PH 830 or ST 846) R: Open to graduate students in the Department of Epidemiology and Biostatistics or approval of department.
Select topics in biostatistics including global disease distribution and estimation, causal inference, Bayesian methods in health services research.

889 Applied Epidemiologic Methods for Public Health Practitioners
Fall of even years. 3(3-0) Interdepartmental with Human Medicine. Administered by Human Medicine. P: HM 802 and HM 803 RB: Academic or professional background in public health and/or public health related discipline R: Open to students in the Public Health major or approval of college.
Identification and conceptualization of public health problems. Generation of testable hypotheses and appropriate data sets. Interpretation of appropriate measures of associations. Evaluation of validity and generalizability of results and ethical issues surrounding the use of humans in epidemiological research. Real case studies are used to analyze study design including the role of chance, bias, misclassification, effect measure modification, interaction, and missing data.

890 Independent Study in Epidemiology
Fall, Spring. Summer. 1 to 3 credits. A student may earn a maximum of 12 credits in all enrollments for this course. R: Open to master's students in the Department of Epidemiology and Biostatistics. Approval of department.
Independent study in areas relevant to epidemiology such as population genetics.

899 Master's Thesis Research
Fall, Spring. Summer. 1 to 12 credits. A student may earn a maximum of 36 credits in all enrollments for this course. R: Open to master's students in the Department of Epidemiology and Biostatistics. Approval of department. SA: HM 899
Master's thesis research.

900 Independent Study
Fall, Spring, Summer. 1 to 3 credits. A student may earn a maximum of 12 credits in all enrollments for this course. R: Open to doctoral students in the Department of Epidemiology Major. Approval of department.
Special projects, directed reading, and research arranged by an individual graduate student and a faculty member in areas supplementing regular course offerings.

909 Doctoral Dissertation Research
Fall, Spring, Summer. 1 to 24 credits. A student may earn a maximum of 24 credits in all enrollments for this course. R: Open to doctoral students in the Epidemiology major. Doctoral dissertation research.
