PHARMACOLOGY AND TOXICOLOGY

РНМ

Department of Pharmacology and Toxicology College of Veterinary Medicine

211 Pharmacology and Toxicology in Society Spring. 2(2-0)

Introduction for non-science or science students to the field of pharmacology and toxicology. History of pharmacology and toxicology. Present issues and future possibilities. Society and systems of drug development and delivery. Drug abuse and policies.

321 Common Drugs

Spring. 3(3-0) P: (PSL 250) or (PSL 431 and PSL 432) or PSL 310 R: Open to juniors or seniors or approval of department.

Introduction to commonly used drugs. Emphasis on over-the-counter medications and frequently prescribed prescription drugs. Selected natural products also will be covered. How commonly used drugs affect the body to treat or cure various conditions and how the body handles drugs. Principles of appropriate drug use and consequences of misuse.

350 Introductory Human Pharmacology

Fall, Spring, Summer. 3(3-0) P: (PSL 250 or PSL 310) or (PSL 431 and PSL 432) R: Not open to freshmen. Not open to students with credit in PHM 430 or PHM 440.

General principles of pharmacology. Central nervous system, autonomic nervous system, cardiovascular, renal, cancer, microbial, and endocrine pharmacology.

351 Fundamentals of Drug Safety

Spring. 2(2-0) P: (BS 161 and BS 162) or (LB 144 and LB 145) or (BS 181H and BS 182H) R: Open to juniors or seniors or approval of department.

How and why drugs are tested and monitored for safety. The roles of the FDA, USDA, and EPA to ensure drug safety.

421 Clinical Toxicology

Fall. 3(3-0) P: {(CEM 251 or CEM 351) and PSL 310} or (PSL 431 and PSL 432) R: Open to seniors or approval of department.

Basic methods and procedures commonly employed in clinical toxicology will be introduced and explained. Mechanisms of toxicity, symptoms, diagnostics, and treatment of the most commonly encountered toxins in clinical exposure will be reviewed in detail.

422 Fundamentals of Neuropharmacology

Spring. 2(2-0) Interdepartmental with Neuroscience. Administered by Pharmacology and Toxicology. P: NEU 301 or PSL 250 or PSL 310 or PSL 431 R: Open to juniors or seniors or approval of department.

Mechanisms and uses of action of drugs on neurons and neuron-controlled activities

430 Human Pharmacology

Summer. 3 credits. P: (PSL 250 or PSL 310) or (PSL 431 and PSL 432) RB: Molecular biology, biochemistry, chemistry, physiology, and/or human biology. R: Open to master's students in the Integrative Pharmacology Major or in the Pharmacology and Toxicology Major and open to undergraduate students. Approval of department. Not open to students with credit in PHM 350 or PHM 440.

General principles of pharmacology. Central nervous system and autonomic nervous system, cardiovascular, renal, cancer, microbial, and endocrine pharmacology.

431 Pharmacology of Drug Addiction

Fall. 3(3-0) Interdepartmental with Neuroscience. Administered by Pharmacology and Toxicology. RB: Zoology or Human Biology or Psychology or Biochemistry or Physiology.

Introduction to pharmacology and neuropharmacology. Understanding of the biological basis for drug abuse and addiction.

440 Principles of Drug Action

Summer. 1 credit. RB: Chemistry, molecular biology, biochemistry, physiology, and/or human biology. R: Not open to master's students in the Integrative Pharmacology Major or in the Pharmacology and Toxicology Major. Not open to students with credit in PHM 430 or PHM 350.

Factors influencing drug action. Absorption, distribution, and elimination. Factors controlling intensity, selectivity and nature of drug action. Mismatches of drug presence and drug action including receptor-effector coupling mechanisms and mechanisms of drug tolerance. Offered first half of semester.

450 Introduction to Chemical Toxicology

Fall, Spring, Summer. 3(3-0) P: (BS 161 and BS 162 and CEM 251) or (LB 144 and LB 145 and CEM 251) R: Not open to freshmen or sophomores.

Mammalian toxicology. Disposition of chemicals in the body, detoxication, elimination, and mechanisms of toxicity in major organ systems. Selected toxic agents.

454 Leadership and Teams for Scientists and Health Professionals

Fall, Spring. 3(3-0) R: Open to juniors or seniors or approval of department.

Engage in self-reflection within the context of relating to others within a team setting; carry out appropriate leadership models suited to given contexts; evaluate change options as a leader in an organizational setting; and continue to grow as a lifelong learner. Not open to students who have completed PHM 854.

461 Tropical Medicine Pharmacology

Fall, Spring. 2(2-0) P: PHM 350 or concurrently R: Open to juniors or seniors or master's students. Approval of department.

ter's students. Approval of department.

Tropical diseases, epidemiologic and clinical features, and pharmacologic treatments. Multidisciplinary and interdisciplinary approaches, especially in poverty settings.

480 Special Problems

Fall, Spring, Summer. 1 to 3 credits. A student may earn a maximum of 9 credits in all enrollments for this course. R: Approval of department.

Individual work on selected research problems.

483 Antimicrobial Chemotherapy

Fall, Spring. 3(3-0) P: (PHM 350 or concurrently) and (PHM 461 or concurrently) RB: Biology, microbiology, or biochemistry. R: Approval of department.

Major human bacterial, viral, and fungal infections including disease characteristic, epidemiologic and clinical features, pathology, laboratory diagnosis, case reviews, and pharmacologic treatment including drug kinetics, dynamics, drug interactions and patient considerations.

487 Current Topics in Pharmacology and Toxicology

Fall, Spring. 2(2-0) RB: College level physiology and/or biochemistry
Therapeutic drugs and toxins for human or veteri-

Therapeutic drugs and toxins for human or veterinary clinical medicine have generated significant attention in the non scientific news media. Reasons for societal attention, therapeutic breakthroughs, therapeutic needs, drug marketing, and drug regulatory policies.

552 Veterinary Pharmacology I : Principles and Neuropharmacology

Spring. 2(2-0) R: Open to graduate-professional students in the College of Veterinary Medicine. SA: PHM 556

Basic principles of pharmacology and mechanisms of action of drugs used to affect nervous system function

553 Veterinary Pharmacology II: Systems and Infectious Diseases

Fall. 3(3-0) RB: Completion of Year 1 of the graduate-professional program in the College of Veterinary Medicine. R: Open to graduate-professional students in the College of Veterinary Medicine. SA: PHM 556

Principles of pharmacology of infectious disease and specific organ systems, including mechanisms of action and adverse effects of drugs.

557 Veterinary Toxicology

Fall. 2(2-0) RB: Completion of Year 1 of the graduate-professional program in the College of Veterinary Medicine. R: Open to graduate-professional students in the College of Veterinary Medicine.

Determinants of toxic responses, analytical toxicology, genetic toxicology, and toxin management. Diagnosis, prevention, and treatment of common toxicoses.

563 Medical Pharmacology

Summer. 3(3-0) A student may earn a maximum of 6 credits in all enrollments for this course. R: Open to graduate-professional students in the College of Human Medicine.

General principles of pharmacology and toxicology

General principles of pharmacology and toxicology and selected drugs. Rational drug therapy.

564 Basic Principles of Medical Pharmacology

Fall. 2(2-0) R: Open to graduate-professional students in the College of Osteopathic Medicine.

Basic principles of pharmacology and toxicology and selected drugs.

PHM—Pharmacology and Toxicology

590 Case Studies in Clinical Pharmacology

Spring. 2(2-0) P: PHM 563 RB: Completion of Year 2 in the College of Osteopathic Medicine or College of Human Medicine. R: Open to graduate-professional students in the College of Osteopathic Medicine or in the College of Human Medicine or approval of department.

Selected case studies emphasizing clinical applications of pharmacological principles. Evaluation of new drugs, drug advertising, and adverse drug reactions.

658 Research Problems in Pharmacology or Toxicology

Fall, Spring, Summer. 1 to 3 credits. A student may earn a maximum of 6 credits in all enrollments for this course. RB: Completion of Semester 4 of the graduate-professional program in the College of Veterinary Medicine. R: Approval of department.

Selected research problems in pharmacology or toxicology.

Regulatory Affairs and Project Management in Clinical Research 659

Fall. 3(3-0) RB: Participants are not required but are encouraged to have a basic background in biology, chemistry and mathematics. R: Approval of department. Not open to students with credit in PHM 857 or PHM 858.

Principles and activities involved in drug development, the regulatory process for obtaining marketing authorization, the fundamental aspects of project management including work breakdown structure, scheduling, earned value analysis, and risk management.

801 **Fundamental Principles of Pharmacology** and Toxicology

Fall. 3(3-0) R: Open to graduate students in the College of Natural Science or in the Department of Pharmacology and Toxicology or approval of department.

Core principles of pharmacology and toxicology including pharmacokinetics, toxicokinetics (drug/toxicant absorption, distribution, metabolism, elimination, modeling), pharmacodynamics (drug-receptor and drug-enzyme interactions), and drug discovery.

802 Cellular, Molecular and Integrated Systems Pharmacology

Spring. 3(3-0) P: (BMB 801 or BMB 802) and (PHM 827 or PSL 828 or PSL 829) R: Open to doctoral students or approval of department

Cellular and molecular mechanisms of drug actions on organ systems of humans and other mammals.

Chemical Disposition in Mammals 803

Fall. 1(1-0) R: Open to doctoral students. Approval of department. Not open to students with credit in PHM 801 or PHM 819.

Principles of drug/toxicant absorption, distribution, metabolism, elimination, and kinetics in mammalian systems

804 Molecular and Developmental Neurobiology

Fall. 3(3-0) Interdepartmental with Integrative Biology and Neuroscience and Pathobiology and Diagnostic Investigation and Psychology. Administered by Neuroscience. RB: Bachelor's degree in a Biological Science or Psychology. R: Open to graduate students in Neuroscience major.

Nervous system specific gene transcription and translation. Maturation, degeneration, plasticity, and repair in the nervous system.

Receptor Pharmacology 805

Fall. 1(1-0) R: Not open to doctoral students in the Department of Pharmacology and Tox-

icology. Approval of department.

Fundamental principles and current theories of receptor pharmacology, drug receptor pharmacodynamics and signal transduction mechanisms.

813 Cardiovascular Pharmacology and Toxicology

Summer. 3(3-0) R: Open to graduate students or approval of department.

Cardiovascular signal transduction and control in nor-

mal and pathophysiologic states.

Integrative Toxicology: Mechanisms, Pathology and Regulation

Fall of odd years. 3(3-0) Interdepartmental with Animal Science and Biochemistry and Molecular Biology and Pathobiology and Di-agnostic Investigation. Administered by Pharmacology and Toxicology. P: PHM 819

Biochemical, molecular, and physiological mechanisms of toxicology. Functional and pathological responses of major organ systems to chemical insult. Mechanisms of mutagenesis, carcinogenesis, and reproductive toxicology. Concepts in risk and safety as-

Neurotoxicology 817

Spring. 2(2-0) RB: PHM 819 and PHM 450 or equivalent introductory pharmacology and toxicology courses; undergraduate biochemistry and cell biology R: Open to graduate students. Approval of department.

Biochemical, molecular, physiological mechanisms and assessment of neurotoxicity. Factors predisposing the nervous system to selective toxicants. Pathophysiology and models of toxicant-induced neurodegenerative diseases.

819 **Principles of Drug-Tissue Interactions**

Fall, Summer. 2(2-0) R: Open to graduate students and open to lifelong graduate students. Not open to students with credit in PHM 801

General principles relevant to the interaction of chemicals with biological systems. Topics include pharmacokinetics and/or pharmacodynamics.

822 **Academic and Research Integrity**

Fall, Spring, Summer. 1(1-0)

Guidelines for research and academic integrity focusing on issues pertinent to biomedical graduate students and scientists.

827 Physiology and Pharmacology of **Excitable Cells**

Fall. 4(4-0) Interdepartmental with Integrative Biology and Neuroscience and Physiology. Administered by Pharmacology and Toxicology. R: Open to graduate students in the College of Natural Science or in the Department of Pharmacology and Toxicology or approval of department.

Function of neurons and muscle at the cellular level: membrane biophysics and potentials, synaptic transmission, sensory nervous system function.

828

Concepts in Carcinogenesis
Fall. 2 credits. P: (BLD 830 or BMB 801 or approval of department) and (PHM 819 or approval of department) RB: (BMB 801 or BLD 830) and PHM 819 R: Open to master's students or doctoral students or lifelong graduate students. Approval of department.

Mechanisms underlying malignant transformation of a cell. Carcinogenic potential of chemicals.

829

Neuropharmacology Fall. 2(2-0) P: PHM 819 RB: Some back-ground in physiology. R: Open to master's students or doctoral students or lifelong graduate students

Mechanisms of action of drugs on the central nervous systems, targets, clinical use and side effects.

Experimental Design and Data Analysis 830

Fall, Summer. 3(3-0) RB: Undergraduate degree in biology, chemistry or related field.

Practical application of statistical principles to the design of experiments and analysis of experimental data in pharmacology, toxicology, and related biomedical sciences.

Endocrine Pharmacology and Toxicology 831 Spring. 2(2-0) P: PHM 819

Physiology, pharmacology, and toxicology of the endocrine system. Endocrine diseases, pharmacological intervention, hormone therapy, endocrine disruptors, role of hormones in normal metabolism and metabolic disorders, and animal models of endocrine and metabolic disorders.

832 **Applied Integrative Pharmacology** Laboratory

Summer. 3(3-0) P: (PHM 813 or concurrently) and PHM 819 and PHM 830 RB: Undergrad degree in biology, chemistry or related field. Prior biomedical lab experience helpful. R: Not open to undergraduate students. Approval of department.

Research methods using virtual simulation for studying integrative physiology and pharmacology.

Gastro-Intestinal and Liver 833 Pharmacology and Toxicology

Spring. 2(2-0) RB: (PHM 350 or PHM 819) or

Some pharmacology background.
Specific drugs and their mechanisms of action in the treatment of gastrointestinal and liver diseases. Toxic effects of drugs and other xenobiotics on the gastrointestinal tract, including the liver.

834 **Respiratory Pharmacology**

Spring. 2(2-0) RB: Some prior course work in physiology or pharmacology.

Integrative study of drugs, their mechanism of action, and their side effects in the treatment of major diseases and pathologies of the respiratory system.

835 **Biopharmaceuticals: From Development**

to Manufacturing
Fall. 3(3-0) P: PHM 819 RB: Undergraduate degree in biology, chemistry, or related field is recommended. R: Not open to undergraduate students.

Biopharmaceutical development and manufacturing processes for recombinant proteins, monoclonal antibodies, vaccines and cell-based therapeutics (stem cells). Emphasis on real-world case studies and group projects.

Autonomic Pharmacology 837

Spring. 1 credit. P: PHM 819

Effects of drugs having therapeutic potential and potential for adverse side effects within the autonomic nervous system and organs controlled by this system. Comparison with drugs having therapeutic potential and potential adverse side effects on muscle function.

839 Systems Neuroscience

Spring. 4(4-0) Interdepartmental with Human Anatomy and Integrative Biology and Neuroscience and Physiology and Psychology. Administered by Neuroscience. R: Open to graduate students or human medicine students or osteopathic medicine students in the College of Natural Science or in the College of Agriculture and Natural Resources or in the College of Human Medicine or in the College of Osteopathic Medicine or in the College of Social Science or in the College of Veterinary Medicine. SA: ANT 839

Anatomy, pharmacology, and physiology of multicellular neural systems. Sensory, motor, autonomic, and chemo-regulatory systems in vertebrate brains.

840 Safety Pharmacology

Spring. 2(2-0) RB: Undergraduate degree in biology, chemistry or related area. coursework in physiology useful.

Systems study of current experimental models, risk assessment, and regulatory guidelines for evaluating drug candidates for pharmacologic effects unrelated to therapeutic effects.

841 Cellular and Molecular Toxicology

Fall. 3(3-0) RB: PHM 819 and PHM 450 or equivalent introductory pharmacology and toxicology courses; undergraduate biochemistry and cell biology R: Open to graduate students or approval of department.

Mechanistic concepts and techniques of toxicology at

the cellular and molecular levels. Various molecular events and cellular modifications that result from and/or are associated with chemically/environmentally induced toxicity and disease.

Communications for Scientists 850

Fall, Summer. 2(2-0) R: Open to master's students or lifelong graduate students in the College of Osteopathic Medicine or in the Department of Pharmacology and Toxicology or in the Integrative Pharmacology Major or in the Pharmacology and Toxicology Major.

Effective research and business communication, including written skills for scientific audiences

851 Intellectual Property and Patent Law for **Biomedical Sciences**

Fall. 2(2-0) RB: Strong reading and writing skills helpful.

Fundamentals of intellectual property and patent law encountered by biomedical scientists, including issues of prevention, patent prosecution, and enforcement of patents in a litigation setting.

854 Leadership and Team-Building for Biomedical Research

Spring. 2(2-0) RB: Experience supervising others and/or participation in workplace teams is strongly suggested.

Evaluation of current leadership methods. Models of

leadership. Practice of specific skills and development of a plan to increase their influence and extend learning beyond the class.

855 The Business of Biomedical Research **Organizations**

Spring. 2(2-0)

Theories, methods, terminology, and culture of business as used in biomedical research and development environments.

857 **Project Management**

Summer. 2(2-0)

project management culture, principles, knowledge areas, and terminology. Specific tools and techniques including work breakdown structure, earned value analysis, risk management, and quality control for managing scientific research. first ten weeks of semester.

Drug Development ProcessSpring. 3(3-0) RB: Some experience working with laboratory or clinical research projects.

Project management standards and best practices in drug development process, including clinical trials.

Research Rotation 870

Fall, Spring, Summer. 1 to 4 credits. A student may earn a maximum of 12 credits in all enrollments for this course. RB: Open only to first year graduate students in Pharmacology and Toxicology. R: Approval of department.

Individual work on selected research problems.

Applied Project in Integrative 895 Pharmacology

Fall, Spring, Summer. 1 to 6 credits. A student may earn a maximum of 6 credits in all enrollments for this course. P: PHM 819 and PHM 830 and PHM 832 RB: All coursework for the MS in Integrative Pharmacology should be completed prior to beginning the Applied Project unless there is Departmental approval to complete final courses concurrently with the Applied Project. R: Open to master's students in the Department of Pharmacology and Toxicology. Approval of department.

An on-site project that addresses a research, theoretical, or applied problem in whole-animal or organ level pharmacology, in cooperation with the students' employer or laboratory partner.

Master's Thesis Research 899

Fall, Spring, Summer. 1 to 8 credits. A student may earn a maximum of 12 credits in all enrollments for this course. R: Open only to graduate students in the Department of Pharmacology and Toxicology. Approval of department.

Master's thesis research.

910 Seminar

Fall, Spring. 1(1-0) A student may earn a maximum of 3 credits in all enrollments for this course. R: Open only to graduate students. Approval of department.

Discussion of recent topics in pharmacology and toxicology by faculty or invited outside speakers. Students research reports.

980 **Problems**

Fall, Spring, Summer. 1 to 5 credits. A student may earn a maximum of 20 credits in all enrollments for this course. R: Open to doctoral students. Approval of department. Limited work in selected research projects.

Master of Science Capstone Literature 982 Review

Fall, Spring, Summer. 1 to 2 credits. A student may earn a maximum of 2 credits in all enrollments for this course. P: PHM 850 RB: Completion of at least 24 credits of MS program R: Open to master's students in the Integrative Pharmacology Major or in the Pharmacology and Toxicology Major. Approval of department.

Advisor-supervised literature research and writing of a 15-20 page fully-referenced critical review paper on a relevant topic in pharmacology and toxicology.

Doctoral Dissertation Research 999

Fall, Spring, Summer. 1 to 24 credits. A student may earn a maximum of 36 credits in all enrollments for this course. R: Open to doctoral students in the Department of Pharmacology and Toxicology or in the Pharmacology and Toxicology-Environmental Toxicology major. Approval of department.

Doctoral dissertation research.
