

GEOGRAPHY

GEO

**Department of Geography,
Environment, and Spatial
Sciences**

College of Social Science

**113 Introduction to Economic
Geography**

Fall, Spring. 3(3-0)

Spatial distribution of resources, population, enterprise, trade, consumption, and production. Interaction of those distributions at local to global scales.

151 Introduction to Human Geography

Fall, Spring. 3(3-0)

Systematic study of spatial patterns and processes that have shaped human use and alteration of the world.

201 Introduction to Plant Geography

Fall of even years. 3(3-0) R: Not open to graduate students.

Geographic distribution and characteristics of plants throughout the world; relationships between biomes and aspects of the physical environment (climate, soils, landforms, disturbance); plant ecology; human impacts on vegetation; optional field trip on campus.

203 Introduction to Meteorology

Fall. 3(3-0)

Fundamentals of meteorology. Energy balance, adiabatic processes, horizontal motion, cyclogenesis, and severe weather.

204 World Regional Geography

Fall. 3(3-0)

Economic, political, cultural, environmental, and technological processes and conditions that explain the diversity of world regions.

206 Physical Geography

Fall, Spring. 3(3-0)

Geographic and functional interrelationships within the physical environment: Earth-sun relationships, weather, climate, soils, vegetation and landforms (terrain characteristics).

206L Physical Geography Laboratory

Fall, Spring. 1(0-2) P: GEO 113 or GEO 151 or GEO 203 or GEO 204 or (GEO 206 or concurrently) or GEO 208 or GEO 211 or GEO 215 or GEO 221

Geographic aspects of weather, climate, soil, vegetation, and terrain. Interpretation and application of maps and remotely sensed imagery.

**208 Physical Geography of the National
Parks**

Fall of odd years. 2(2-0)

Physical features such as geology, landforms, biota, and waters of United States and Canadian national parks, forests, seashores and lakeshores. Emphasis on formation and distribution.

211 Environmental Policy and Practice

Fall. 3(3-0)

Systematic study of environmental policy and resource management practices in the United States and the broader global context, emphasizing geographical and other social sciences perspectives.

214 Geography of Drugs

Fall of even years. 3(3-0)

Physical, ecological, and human geographies of drugs, drug crops, pharmaceuticals, alcohol, and their diffusions. Cultural geographies and geopolitical implications of drugs' consumption, trade, and regulation and prohibition.

215 Sports Geography

Fall of odd years. 3(3-0)

Geographical variables that influence the location, character, and spread of sports at the national and global scale. Human cultures and diffusion. Themes associated with the geography of sports. Origin and spread of collegiate, professional, international, and Olympic sports

**221 Introduction to Geographic
Information**

Fall, Spring. 3(3-0)

Principles and methods of spatial data collection, handling, analysis, and display. Introduction to remote sensing, geographic information systems, and cartography.

**221L Introduction to Geographic
Information Laboratory**

Fall, Spring, Summer. 1(0-2) P: GEO 221 or concurrently RB: Basic computer and math skills

Basic skills for working with Geographic Information Systems, remotely sensed imagery, design of maps, geospatial tools and technologies for data analysis and problem-solving.

**235 Geography of Environment and
Health**

Spring. 3(3-0)

Geographic patterns of global health and environmental inequalities; the built, physical and social environment; urban design; infectious and chronic diseases.

**259 Geography of Recreation and
Tourism**

Fall of even years. 3(3-0)

Cultural, physical, and biotic factors affecting the distribution of recreation and tourism resources and participation. U.S. and international examples and case studies.

**286 Undergraduate Research in
Geography**

Fall of even years. 3(3-0)

Supervised research on a topic or topics determined by the instructor. Applications of geographic tools and theory.

302 Climates of the World

Fall of odd years. 3(3-0) RB: GEO 206 or GEO 203 R: Not open to freshmen.

Regional climates and underlying atmospheric circulation patterns. Climate classification, physical climatic processes, spatial and temporal aspects of climate, climate changes. Sources and use of climate data.

303 Severe and Hazardous Weather

Spring of even years. 3(3-0) P: GEO 203 or approval of department

Extratropical cyclones, freezing precipitation and ice storms, lake effect snowstorms, cold waves, blizzards, thunderstorms, tornadoes, downbursts, tropical cyclones, floods, drought, and heat waves.

306 Environmental Geomorphology

Fall of even years. 3(3-0) Interdepartmental with Geological Sciences. Administered by Geography. P: CSS 210 or GEO 206 or GEO 333 or GLG 201 or GLG 304 or ISP 203A

Relationships of running water, weathering, gravity, ice, waves, wind, and biota (including humans) to terrain and soils. Evolution of landscapes. Classical and modern interpretations.

**314 Methods for Investigation of Urban
Systems**

Spring. 4(3-2) Interdepartmental with Urban Planning. Administered by Urban Planning.

Models, approaches, and techniques for urban and regional problem analysis, research, program evaluation, and project management. Application of related computer software.

324 Remote Sensing of the Environment

Fall. 4(2-4) P: GEO 221 SA: GEO 224

Features and interpretation methods of remotely-sensed imagery, especially black-and-white and color infrared airphotos. Basic features of radar, thermal, and multispectral imagery. Interpretation for agriculture, archaeology, fisheries, forestry, geography, landscape architecture, planning, and wildlife management.

325 Geographic Information Systems

Fall. 3(2-2) P: GEO 221 and GEO 221L

Technical and theoretical issues in the design, implementation, and use of geographic information systems for research and applications.

326 Cartographic Design and Production

Fall. 4(2-4) P: GEO 221 and GEO 221L SA: GEO 423

Map design, layout, and usability. Typography and color theory. Techniques of map production, print and digital display.

330 Geography of the United States

Fall, Spring, Summer. 3(3-0) SA: GEO 230

Geographic examination of United States landscapes, cultures, and economies. Investigation of interactions between human, economic, and physical geographies in U.S. regions.

331 Geography of Canada

Spring. 3(3-0)

Geographic examination of Canadian landscapes, cultures, government structure, health care system, and economies. Interactions of human, economic, and physical geographies in Canada's regions and sub-regions.

**333 Geography of Michigan and the Great
Lakes Region**

Spring. 3(3-0) SA: GEO 233

Michigan's physical, historical, and economic geography. Interrelationships between the physical environment (rocks, landforms, soils, climate, vegetation, hydrology) and historical and contemporary land uses. Demographic and agricultural patterns. Human history and settlement patterns. Contemporary recreational opportunities.

335 Geography of Latin America

Fall of odd years. 3(3-0)

Physical and human geography of Latin America. Current development issues, especially people-environment interaction in urban and rural areas. Topics include migration, urbanization, and industrialization.

Geography—GEO

- 336 Geography of Europe**
Fall of even years. 3(3-0)
Major regions and nations, including their physical resources, peoples, political structures, and economies.
- 337 Geography of Asia-Pacific**
Spring of odd years. 3(3-0)
Spatial patterns and processes of economic, urban, human and physical geography in eastern Asia, including China, Korea, Japan, Australia, New Zealand, the Indian subcontinent and other Asian countries. Contemporary regional development.
- 338 Geography of Africa**
Fall. 3(3-0)
Physical and human geography of Africa. Current development issues, especially people-environment interaction in urban and rural areas. Topics include drought, agricultural patterns, hunger, rural development, migration, and urbanization.
- 339 Geography of the Middle East and North Africa**
Spring of odd years. 3(3-0)
Physical and human geographies of the Middle East and North Africa. Historical and contemporary topics of ethno-nationalism, religion, state-building, and peace and conflict. Current issues of environment, development, urbanization, and global interactions.
- 340 Geography of Eurasia**
Spring of even years. 3(3-0)
Physical, ecological, and human geographies of the lands and peoples of the former Russian and Soviet empires and of neighboring regions.
- 363 Introduction to Quantitative Methods for Geographers**
Fall. 3(3-0) RB: Completion of University mathematics requirement. SA: GEO 463
Quantitative techniques in the analysis and classification of spatial data.
- 370 Introduction to Zoogeography**
Fall. 3(3-0) Interdepartmental with Fisheries and Wildlife and Integrative Biology. Administered by Integrative Biology. P: IBIO 355 SA: ZOL 370
Patterns of geographical distribution of animals and the ecological and historical processes leading to these patterns.
- 372 Ecological Monitoring and Data Analysis**
Spring. 3(2-2) Interdepartmental with Forestry. Administered by Forestry. P: ((MTH 124 or MTH 132) and completion of Tier I writing requirement) and (STT 201 or STT 224 or STT 231 or STT 421) SA: FOR 472
Design of ecological monitoring systems and analysis of resulting ecological data sets. Monitoring system design, model specification and implementation, and computational considerations from both a design- and model-based perspective. Hands-on introduction to statistical software.
- 401 Global Plant Geography**
Fall of odd years. 3(3-0) P: GEO 201 or FOR 101 or FOR 204 or PLB 218 or IBIO 355 or approval of department R: Not open to freshmen.
Patterns of global plant distributions. Plant-atmosphere interactions, ecological processes, biogeographic patterns and predictive models of plant distributions.
- 402 Agricultural Climatology**
Fall of even years. 3(3-0) Interdepartmental with Biosystems Engineering. Administered by Geography. P: MTH 110 or MTH 116 R: Not open to freshmen or sophomores.
Relationships between climate and agriculture in resource assessment, water budget analysis, meteorological hazards, pests, crop-yield modeling, and impacts of global climate change.
- 403 Dynamic Meteorology (W)**
Spring of odd years. 3(3-0) P: (MTH 234 and GEO 203) and completion of Tier I writing requirement RB: GEO 405 R: Open to juniors or seniors or master's students or doctoral students.
Principles of fluid dynamics and their application to the atmosphere.
- 405 Weather Analysis and Forecasting**
Spring of even years. 4(3-2) P: GEO 203 and (MTH 110 or MTH 116)
Dynamic and thermodynamic principles of atmospheric science applied to the development and evolution of extratropical cyclones. Laboratory sessions include analysis of current observations and satellite imagery.
- 407 Regional Geomorphology of the United States**
Spring of odd years. 3(3-0) RB: GEO 306 or GLG 201 or GLG 412 or ISP 203A or ISP 203B
Geomorphic characteristics of physiographic regions of the United States.
- 408 Soil Geomorphology**
Fall of odd years. 4(3-2) P: CSS 210 or GEO 306 or GLG 201 or GEO 206 or ISP 203A or ISP 203B or ISP 203L or approval of department R: Not open to freshmen.
Soil formation and its relationship to landforms and landscapes. Common geographic relationships among soils, landforms, and vegetation. Description, analysis, and genesis of soils, surficial processes and landscapes.
- 409 Global Climate Change and Variability**
Fall of odd years. 3(3-0) P: GEO 203 or GEO 206
Analysis of climate change and variability at various time and space scales. Climate systems, paleoclimatology, global warming, climate models, and climate impact assessment.
- 410 Geography of Food and Agriculture**
Fall of even years. 3(3-0) RB: GEO 113 or GEO 151 or GEO 204 or GEO 206 R: Not open to freshmen or sophomores.
Spatial patterns of contemporary global agriculture and food systems. Human-environment geography of select agricultural practices and food systems. Effects of agricultural practices on natural and human resources.
- 411 Stream Systems and Landforms**
Spring of even years. 3(3-0) RB: GEO 206 or GEO 306 or GLG 201 or GLG 431 R: Not open to freshmen or sophomores.
Themes associated with stream systems. Evolution of drainage basins and channel hydrology. The nature of flowing water, stream discharge, and flooding. Controls of stream behavior. Channel patterns and landform development. Character of Michigan stream systems. Field project.
- 412 Glacial Geology and the Record of Climate Change**
Spring. 4(3-2) Interdepartmental with Geological Sciences. Administered by Geological Sciences. RB: GLG 201 or GEO 306 or GEO 408 or GLG 301 R: Not open to freshmen or sophomores.
In-depth analysis of glacial geology and the record of climate change, with emphasis on North America and Europe. Field trip required.
- 413 Urban Geography**
Spring. 3(3-0) Interdepartmental with Urban Planning. Administered by Geography. R: Not open to freshmen or sophomores.
Theories and models of urban spatial form. Underlying structures and processes. Socio-spatial dimensions of modern urbanism. Differentiation and locational conflict in residential, commercial, and industrial space.
- 414 Geography of Transportation**
Fall of odd years. 3(3-0) Interdepartmental with Urban Planning. Administered by Geography. P: GEO 113 R: Not open to freshmen.
Spatial principles of transportation. Theories of interaction, network structures, and location-allocation models. Role of transport and transport planning.
- 415 Location Theory and Land Use Analysis**
Fall of even years. 3(3-0) Interdepartmental with Urban Planning. Administered by Geography. P: GEO 113 or UP 201 RB: EC 201 or EC 202 R: Not open to freshmen or sophomores.
Classical and neoclassical, static and dynamic models of industrial location and spatial organization. Land rent theory. Central place theory. Multi-location organization. Growth transmission.
- 418 The Ghetto**
Fall of odd years. 3(3-0) Interdepartmental with Urban Planning. Administered by Geography. R: Not open to freshmen or sophomores.
Analysis of the ghetto including its spatial organization and structure. Distribution of racial and ethnic populations. Emphasis on U.S. cities.
- 419 Applications of Geographic Information Systems to Natural Resources Management**
Spring. 4(2-4) Interdepartmental with Biosystems Engineering and Forestry and Fisheries and Wildlife. Administered by Forestry. RB: GEO 221
Application of geographic information systems, remote sensing, and global positioning systems to integrated planning and management for fish, wildlife, and related resources.
- 424 Advanced Remote Sensing**
Spring. 4(3-2) P: GEO 324
Interaction of solar radiation with the atmosphere, lithosphere, hydrosphere, and biosphere. Introductory digital image processing. Earth-resources satellite sensors, data products, and applications. Radar and thermal remote sensing.

- 425 Problems in Geographic Information Science (W)**
 Spring. 3(2-2) Interdepartmental with Urban Planning. Administered by Geography. P: (GEO 325 or GEO 802) and completion of Tier I writing requirement
 Advanced theoretical and technical issues in geographic information science utilizing a problems oriented approach. Development and implementation of geographic information science solutions and formal documentation of work.
- 426 Thematic Cartography**
 Spring. 4(3-2) P: GEO 221 and GEO 221L and GEO 326 or approval of department
 Principles, theories, decision making, and techniques in thematic map production. Graphic and Geographic Information Systems applications. Print and digital display.
- 428 Digital Terrain Analysis**
 Fall of odd years. 3(2-2) P: GEO 325
 Theoretical and technical issues of collection, management, analysis, and display of terrain data. Application of photogrammetry, geographic information systems, and cartography.
- 429 Geoprocessing**
 Spring. 3(3-0) P: GEO 325 or GEO 802 or approval of department
 Applications of computer programming to address geographic information problems. Integration of digital spatial data, geographic information systems, spatial analysis, and expert systems.
- 432 Environmental Ethics (W)**
 Fall of even years. 3(3-0) P: Completion of Tier I writing requirement. R: Not open to freshmen or sophomores.
 Ethical dimensions of environmental and spatial issues and associated public policies
- 435 Geography of Health and Disease**
 Fall. 3(3-0) R: Not open to freshmen or sophomores.
 Spatio-environmental concepts and techniques applied to health problems. Disease transmission cycles, community nutrition, and health-care planning.
- 436 Spatial Analysis of Populations**
 Spring of odd years. 3(3-0) R: Not open to freshmen or sophomores.
 Concepts and methods to measure and evaluate geo-spatial and temporal trends in populations and their components, such as natality, mortality, migration, and characteristics at different geographic scales. Sources of spatial population data. Visualization and analysis of data in a geographical information system.
- 440 Critical Geopolitics**
 Spring of even years. 3(3-0) R: Not open to freshmen.
 Political geographies of origins and conduct of nation-states. Identity-place dynamics. Colonialism and imperialism. Geopolitics and geopolitical ideas. Resource and environmental politics. Resistance and terrorism.
- 441 Cultural Geography**
 Spring of odd years. 3(3-0) RB: GEO 151 R: Not open to freshmen.
 Survey of the geographic study of world cultures, cultural ecologies, cultural landscapes, and cultural influences on societies' patterns of spatial organization.
- 442 Social Science Data Analytics Applications**
 Fall, Spring. 3(3-0) Interdepartmental with Political Science and Social Science. Administered by Social Science. P: PLS 202
 Application of computational tools for data collection and visualization to various topics in social science research.
- 453 Metropolitan Environments: Urban Forms and Land Uses**
 Spring. 3(2-2) P: GEO 221
 Land use change, the physical fabric of the city, and the growth of regional centers in the American urban landscape. Issues associated with urban developments, practices and patterns in the 20th century and the resulting metropolitan form and function. Extensive use of geographic information software in spatial analysis.
- 459 Tourism in Regional Development**
 Fall of odd years. 3(3-0) RB: GEO 259
 The role of tourism in regional development. Examples from Michigan, the United States and other nations. Environmental considerations.
- 460 Green Roofs and Walls**
 Fall. 2(2-0) Interdepartmental with Fisheries and Wildlife and Horticulture and Planning, Design and Construction. Administered by Horticulture. P: HRT 203 or FW 101 or GEO 206 or PDC 120 or EGR 100 R: Open to juniors or seniors or graduate students.
 Green roof and wall design and installation practices including plant species and substrates. Environmental impact, ecosystem services, integration with other environmental practices. Influence of economics, public policy, and industry organizations on the implementation of green roofs on a wide scale. Multidisciplinary nature of planning and implementation of successful green roof and wall projects.
- 478 Urban Transportation Planning**
 Fall. 3(3-0) Interdepartmental with Urban Planning. Administered by Urban Planning. R: Open to juniors or seniors in the Geography Major or in the Urban and Regional Planning Major or approval of school.
 Principles of decision-making in urban transportation planning. Demand and supply analysis, social and environmental impacts, implementation programs. Use of computer models.
- 480 Senior Seminar (W)**
 Fall. 3(3-0) P: Completion of Tier I Writing Requirement R: Open to seniors in the Geography Major or in the Geography Minor.
 History, philosophy, and methodology of the geographic discipline as it has evolved within academic and social contexts.
- 490 Independent Study**
 Fall, Spring, Summer. 1 to 4 credits. A student may earn a maximum of 12 credits in all enrollments for this course. R: Approval of department.
 Supervised individual study in an area supplementary to regular courses.
- 492 Geographic Research Problems**
 Fall, Spring, Summer. 1 to 4 credits. A student may earn a maximum of 12 credits in all enrollments for this course. R: Not open to freshmen or sophomores. Approval of department.
 Supervised original research on selected aspects of geography.
- 495 Field Study**
 Fall, Spring, Summer. 1 to 4 credits. A student may earn a maximum of 8 credits in all enrollments for this course.
 Supervised field study in geography.
- 498 Internship in Geography**
 Fall, Spring, Summer. 1 to 4 credits. A student may earn a maximum of 8 credits in all enrollments for this course.
 Individual experience in geography in an approved organization.
- 802 Geospatial Technology**
 Fall. 3(3-0) RB: Familiarity with coordinate systems.
 Comprehensive introduction to geotechnologies. Concepts and theories of remote sensing to include image interpretation and processing, Global Positioning Systems, spatial data structures, and geographic information systems.
- 813 Seminar in Urban and Economic Geography**
 Spring. 3(3-0) A student may earn a maximum of 9 credits in all enrollments for this course. RB: Two of GEO 413, GEO 414, GEO 415, GEO 418.
 Review of research on selected topics in urban and economic geography.
- 816 The World System of Cities**
 Fall. 3(3-0) Interdepartmental with Global Urban Studies Program. Administered by Geography. R: Open to graduate students.
 Modern global economic restructuring. Social, economic, and political impacts on world system of cities.
- 817 China and Globalization**
 Fall of even years. 3(3-0) Interdepartmental with Global Urban Studies Program. Administered by Geography. RB: GEO 113 or GEO 204 or GEO 337 or GEO 413 R: Open to graduate students.
 Theoretical debates and empirical discussions on current social, economic, environmental, and spatial challenges facing contemporary urban China in an era of globalization. Comparative and thematic approach.
- 819 Spatial Epidemiology and Medical Geography**
 Spring. 3(3-0) Interdepartmental with Epidemiology. Administered by Epidemiology. P: EPI 810 or GEO 865 R: Open to graduate students in the Department of Epidemiology and Biostatistics or in the Department of Geography or approval of department. SA: HM 819
 Concepts, techniques, and utilization of spatio-epidemiologic analyses for human health.

Geography—GEO

- 826 Geographic Object-Based Image Analysis**
Spring. 3(3-0) P: GEO 221 or GEO 324 or approval of department RB: GEO 424
Remote sensing data acquisition, analytical workflow design, and outcome communication. Vegetation, urban, and agricultural applications. Mathematical and visual approaches to data extraction.
- 827 Theory and Practice of Terrestrial Remote Sensing**
Fall. 3(3-0) RB: GEO 324 or GEO 424
Theory, algorithms, and computational approaches to generate and assess derived satellite products for long-term Earth system monitoring, with an emphasis on estimating biophysical and geophysical land surface variables.
- 829 Collection and Analysis of Drone Imagery**
Spring of odd years. 4(2-4) P: GEO 324 or approval of department RB: Advanced level remote sensing coursework.
Multi-platform, sensor data collection, pre-processing and analysis across differing subfields; fieldwork and analysis.
- 837 Applications of Terrestrial Remote Sensing**
Spring of odd years. 3(3-0) P: GEO 424 or approval of department
Remote sensing for environmental and regional land cover change research. Advanced image interpretation; applications with emphasis on independent research projects.
- 858 Gender, Justice and Environmental Change : Issues and Concepts**
Fall. 3(3-0) Interdepartmental with Anthropology and Criminal Justice and Community Sustainability and Forestry and Fisheries and Wildlife and Sociology and Women's Studies. Administered by Community Sustainability. RB: Background in social science, environmental science, or natural resources.
Issues and concepts related to gender, ecology, and environmental studies. Key debates and theoretical approaches to addressing environmental issues from a gender and social justice perspective. Gender and environment issues and processes from a global perspective.
- 859 Gender, Justice, and Environmental Change: Methods and Application**
Spring. 3(3-0) Interdepartmental with Anthropology and Community Sustainability and Forestry and Fisheries and Wildlife and Sociology and Women's Studies. Administered by Anthropology. RB: Background in social science, environmental science, or natural resources.
Methods and case studies related to gender, ecology, and environmental studies. Methodological and fieldwork issues from a feminist perspective in international and intercultural contexts. Qualitative and quantitative methods for integrating social and environmental data.
- 865 Advanced Quantitative Methods in Geography**
Spring. 4(4-0) RB: GEO 363
Statistical and mathematical approaches. Multiple regression, principal components and factor analysis, discriminant analysis. Related taxonomic methods.
- 866 Spatial Data Analysis**
Fall. 4(3-2) Interdepartmental with Statistics and Probability. Administered by Geography. RB: (GEO 363 or STT 421 or STT 430) or equivalent quantitative methods courses. SA: GEO 466
Theory and techniques for statistical analysis of point patterns, spatially continuous data, and data in spatial zones.
- 869 Agent-Based Modeling**
Spring. 3(3-0) Interdepartmental with Environmental Science and Policy. Administered by Geography. RB: Basic understanding of data structures and algorithms covered in an introductory course of any programming language. R: Approval of department.
Theoretical concepts related to simulating dynamic geographic phenomena in the intersection between human and natural systems. Innovative agent-based methodology applied to complex social-environmental systems. Hands-on experience of agent-based modeling, with special emphasis on modeling human decision-making and its impact on the natural environment.
- 871 Seminar in Physical Geography**
Fall. 3(3-0) A student may earn a maximum of 12 credits in all enrollments for this course. RB: at least one course in physical geography R: Approval of department.
Research on topics in physical geography.
- 872 Seminar in Human Geography**
Fall. 3(3-0) A student may earn a maximum of 12 credits in all enrollments for this course. RB: at least one course in human geography R: Approval of department.
Research on topics in human geography.
- 873 Seminar in Human-Environment Geography**
Spring. 3(3-0) A student may earn a maximum of 12 credits in all enrollments for this course. RB: at least one course in human geography and one course in physical geography. R: Approval of department.
Research on topics in human-environment geography.
- 874 Seminar in Geographic Information Science**
Spring. 3(3-0) A student may earn a maximum of 12 credits in all enrollments for this course. RB: at least one course in geographic information science, cartography or remote sensing R: Approval of department.
Geographic information science (GIS) applications to social and environmental problems. Theory and related issues.
- 886 Research Design in Geography**
Spring. 3(3-0) R: Approval of department.
Research and writing in geography. Identification of geographic problems and their relative importance. Structuring and stating hypotheses. Data acquisition and tests for validity.
- 890 Advanced Readings in Geography**
Fall, Spring, Summer. 1 to 8 credits. A student may earn a maximum of 12 credits in all enrollments for this course. R: Approval of department.
Advanced independent readings.
- 892 Advanced Research in Geography**
Fall, Spring, Summer. 1 to 4 credits. A student may earn a maximum of 12 credits in all enrollments for this course.
Advanced independent research.
- 899 Master's Thesis Research**
Fall, Spring, Summer. 1 to 12 credits. A student may earn a maximum of 99 credits in all enrollments for this course. R: Open to graduate students.
Master's thesis research.
- 986 Theories and Philosophies in Geography**
Fall of even years. 3(3-0) R: Open to doctoral students in the Geography Major.
Historical development of the discipline within social and intellectual contexts. Philosophical approaches behind geographic research and theory.
- 999 Doctoral Dissertation Research**
Fall, Spring, Summer. 1 to 36 credits. A student may earn a maximum of 36 credits in all enrollments for this course. R: Open to doctoral students in the Department of Geography.
Doctoral dissertation research.
