University College, the College of Social Science, and the College of Arts & Letters were responsible for 52% of the total credit hours offered on the campus during the Spring term. The same colleges offered only 44% of the total number of sections, but serviced 52% of the total campus class enrollments. Each of these colleges were heavily weighted with undergraduate students.

Enrollments for the current term continued to reflect a steady increase over the spring terms of previous years setting a new high for the term on the East Lansing Campus of 24,860 students.

New students included in these totals have also increased in number, but have remained relatively constant in proportion to the total number of students on the campus. The following summary shows a brief comparison of these proportions.

The above percentage relationships of undergraduates to the total campus student body indicate that increases in enrollments have been primarily the result of growth at the undergraduate level.

Since the Fall of 1962, there also appears to be a tendency toward a consistent rate of decrease between the terms of a year.

This graph illustrates that the relationship of non-Michigan students to the total East Lansing campus student body has remained constant during a period of steadily increasing enrollments. The slight increase during 1963-64 at the graduate level has been offset by a corresponding decrease in the number of undergraduate students.

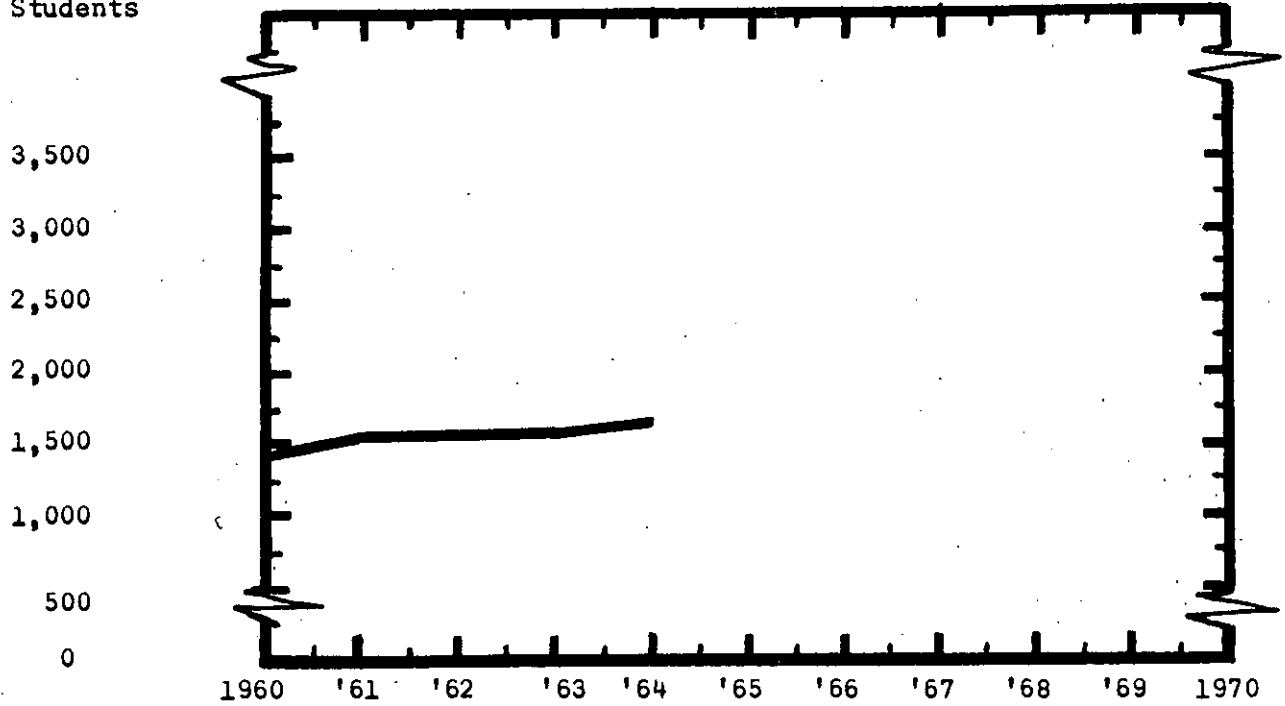

The proportion of foreign students included in these totals represent 2 to 5% of the total campus student body or 10 to 15% of the total non-Michigan student enrollments.

The U.S. Department of Health, Education, and Welfare Report on College Student Migration for Fall, 1963 indicated that 15% of the students attending institutions of higher education in the State of Michigan were non-Michigan students.

Twelve sections ranging from 4 to 12 credit hours each in the Nursing curriculum, and approximately 100 sections of 4 and 5 credit-hour courses in the Departments of Mathematics, and Mathematics and Physical Science significantly added to the number of credit hours offered by the College of Natural Science. However, this was partially offset by a substantial number of small-sized sections.
