The effective date for new programs subject to Statewide Academic Program review is implemented in accordance with the Statewide Academic Program Review calendar.
TO: Faculty Senate

This report is prepared and distributed for the following purposes:

1. To report new academic programs, changes in academic programs, discontinuations of academic programs, new courses, permanent changes in courses, and deletions of courses.
2. To notify the initiating colleges, schools, and departments of approval by the University Committee on Curriculum of their requests for new academic programs, changes in academic programs, discontinuations of academic programs, new courses, permanent changes in courses, and deletions of courses. Any items not approved by the Faculty Senate will be reported to the appropriate college and department or school.
3. To provide information to members of the faculty in each department about academic programs and courses in all colleges, departments, and schools of the University.

Reports of the University Committee on Curriculum to the Faculty Senate are organized as follows:

PART I - NEW ACADEMIC PROGRAMS AND PROGRAM CHANGES:
Organized by colleges in alphabetical order. For a given college, academic units are organized in alphabetical order. For a given academic unit, degrees, majors, and specializations are organized in alphabetical order.

PART II - NEW COURSES:
Organized by academic units in alphabetical order; All-University courses appear last. For a given academic unit, courses are organized according to the names associated with course subject codes, in alphabetical order. Courses with the same subject code are in numerical order.

PART III - COURSE CHANGES:
Organized by academic units in alphabetical order; All-University courses appear last. For a given academic unit, courses are organized according to the names associated with course subject codes, in alphabetical order. Courses with the same subject code are in numerical order.

Not all of the above categories, and not all of the colleges and academic units, will necessarily appear in any given Senate Report.

One or more of the abbreviations that follow may be included in a course entry:
P: = Prerequisite monitored in SIS
C: = Corequisite
R: = Restriction
RB: = Recommended background
SA: = Semester Alias

Effective Summer 2020.

COLLEGE OF COMMUNICATION ARTS AND SCIENCES

1. Change the requirements for the Linked Bachelor of Arts Degree in Journalism and Master of Arts Degree in Journalism in the School of Journalism. The University Committee on Graduate Studies (UCGS) approved this request at its March 9, 2020 meeting.

   Per University policy:

   A candidate for a Linked Bachelor's-Master's Degree from Michigan State University may request the application of up to 9 credits toward the master's program for qualifying 400-level and above course work taken at the undergraduate level at Michigan State University or an external accredited institution. The number of approved credits, not to exceed 9, are applied toward the credit requirement of the master's degree. Credits applied to the Linked Bachelor's-Master's Program are not eligible to be applied to any other graduate degree program.

   a. Under the heading LINKED BACHELOR’S-MASTER’S DEGREE IN JOURNALISM Bachelor of Arts Degree in Journalism, Master of Arts Degree in Journalism replace the entire entry with the following:

   The department welcomes applications from Michigan State University undergraduates majoring in Journalism with at least 70 credits. Application for admission must be made prior to the final semester as a Journalism undergraduate major. Admission to the program requires the following: a minimum cumulative grade-point average of 3.5 based on all courses taken at MSU, a statement of goals for the master’s degree, a statement of the applicant's background, at least two letters of recommendation from MSU faculty, and an approved program of study for the master’s degree at the time of admission. Applicants must have already completed JRN 108, 200, 203, 300, 325, and 430 with a cumulative grade-point average of 3.0 in these courses. Admission to the Linked Bachelor's-Master's program allows the application of up to 9 credits toward the master’s program for qualifying 400-level and above course work taken at Michigan State University. No 400-level courses with a grade lower than 3.0 will count toward the master's degree. Credit obtained from 400-level pass/fail courses and internships will not count toward the degree. Students admitted to the program must complete all of the requirements for either Plan A (with thesis) or Plan B (without thesis) in the master’s degree.

   Effective Fall 2020.
2. Change the requirements for the Master of Arts degree in Journalism in the School of Journalism. The University Committee on Graduate Studies (UCGS) approved this request on March 9, 2020.

**COLLEGE OF HUMAN MEDICINE**

1. Establish a *Graduate Certificate* in *Human Medicine Research* in the College of Human Medicine. The University Committee on Graduate Studies (UCGS) recommended approval of this request at its January 13, 2020 meeting.

   *The Graduate Certificate in Human Medicine Research is a Type 2 graduate certificate and will appear on the transcript as "Graduate Certificate Program in Human Medicine Research".*

   a. **Background Information:**

      The Human Medicine Research certificate program idea was conceived from internal observations that certain College of Human Medicine students had a high-level of interest in research and warranted an intensive, longitudinal research experience that delivered high impact research outcomes. At the same time, the college was hearing from faculty who were looking for medical students who had a true interest in research for long-term collaboration on their projects.

      A large number of medical schools in the United States have formal research training programs akin to the proposed certificate. Many of these programs are transcriptable as an M.D. degree with Research “Distinction” (University of Iowa, Robert Wood Johnson, UT Southwestern, Rosalind Franklin and others are some examples), or are organized as a Research “Track” (Emory, UC Denver). Others require a year off (University of Rochester, UCSF), are limited to certain years only (4th year students at the University of Arizona) or have specific areas of focus (medical education scholars at Georgetown). Each of the programs have similarities and differences to the Human Medicine Research certificate.

      The College of Human Medicine at Michigan State University has a vibrant research climate with students involved in research in almost all clinical areas as well as basic sciences, public health, epidemiology, bioinformatics/computational and medical education research. Students are involved in research in each of our seven campuses working with multiple community partners, forming a uniquely diverse and collaborative research environment. What is lacking is a formal, research-intensive program targeted to students with a true interest in research, and who are likely to continue research beyond medical school. This program is designed to identify students who are genuinely interested in research and to train and inspire them to become independent researchers.

      The College of Human Medicine Office of Research currently provides support to medical students seeking research or conducting research. The office provides numerous services, including helping students find research projects, miscellaneous research tasks, and research funding. It also fosters collaboration between MSU and our community partners, including health systems, hospitals and medical clinics.

      Students will obtain knowledge in research ethics, research oversight and regulatory aspects, scientific background of individual projects, biostatistics, and funding resources while obtaining skills in the development of a research question, conducting a literature search, designing and
preparation of a study protocol, study-specific research methodology, data collection, data analysis, interpreting and discussing results, dissemination of research findings, and finding and applying for research funding.

b. Academic Programs Catalog Text:

The Graduate Certificate in Human Medicine Research trains students to possess a special set of knowledge, skills and abilities enabling them to become productive researchers during medical school. Students will engage in rigorous, long-term research experience resulting in high-impact outcomes, positioning them for admittance to research-intensive residency programs and competitiveness for future research funding. The graduate certificate is available to students currently enrolled in the Professional Program in Human Medicine leading to the Doctor of Medicine degree.

Admission

To be considered for admission to the Graduate Certificate in Human Medicine Research, an applicant must:
1. Be enrolled in the Professional Program in Human Medicine leading to the Doctor of Medicine degree.
2. Submit a university application.

Students will be chosen for the certificate program through a process outlined and managed by the Research Certificate Selection Committee.

Requirements for the Graduate Certificate in Human Medicine Research

CREDITS

The student must:
1. Complete 20 hours of Research Online Modules/Quizzes
2. Complete 80 hours of Introduction to Biostatistics Intersession through enrollment in HM 553, HM 554, or HM 556 during their professional program requirements.
3. Attend five enrichment activities as directed by the program director.
4. Complete 6 to 10 weeks of full-time research activities or its equivalent.
   a. Presentation at a regional or national conference is required.
