The effective date for new programs subject to Statewide Academic Program review is implemented in accordance with the Statewide Academic Program Review calendar.
TO: Faculty Senate

This report is prepared and distributed for the following purposes:

1. To report new academic programs, changes in academic programs, discontinuations of academic programs, new courses, permanent changes in courses, and deletions of courses.
2. To notify the initiating colleges, schools, and departments of approval by the University Committee on Curriculum of their requests for new academic programs, changes in academic programs, discontinuations of academic programs, new courses, permanent changes in courses, and deletions of courses. Any items not approved by the Faculty Senate will be reported to the appropriate college and department or school.
3. To provide information to members of the faculty in each department about academic programs and courses in all colleges, departments, and schools of the University.

Reports of the University Committee on Curriculum to the Faculty Senate are organized as follows:

PART I - NEW ACADEMIC PROGRAMS AND PROGRAM CHANGES:

Organized by colleges in alphabetical order. For a given college, academic units are organized in alphabetical order. For a given academic unit, degrees, majors, and specializations are organized in alphabetical order.

PART II - NEW COURSES:

Organized by academic units in alphabetical order; All-University courses appear last. For a given academic unit, courses are organized according to the names associated with course subject codes, in alphabetical order. Courses with the same subject code are in numerical order.

PART III - COURSE CHANGES:

Organized by academic units in alphabetical order; All-University courses appear last. For a given academic unit, courses are organized according to the names associated with course subject codes, in alphabetical order. Courses with the same subject code are in numerical order.

Not all of the above categories, and not all of the colleges and academic units, will necessarily appear in any given Senate Report.

COLLEGE OF AGRICULTURE AND NATURAL RESOURCES

1. Change the requirements for the Master of Science degree in Agricultural, Food and Resource Economics in the Department of Agricultural, Food, and Resource Economics. The University Committee on Graduate Studies (UCGS) approved this request at its March 15, 2021 meeting.

   a. Add the following Guidance Committee section:

   New students are assigned a temporary major professor by the Graduate Program Director, in consultation with the student and faculty member. The student is responsible for assembling a long-term major professor and guidance committee via consultation with faculty and, if desired, the Graduate Program Director. Students must have a major professor and guidance committee by the end of their second semester. The guidance committee consists of three or more Michigan State University regular faculty members. A majority of the guidance committee members must have appointments in the Department of Agricultural, Food, and Resource Economics.

   Effective Fall 2021.

2. Change the requirements for the Doctor of Philosophy degree in Agricultural, Food and Resource Economics in the Department of Agricultural, Food, and Resource Economics. The University Committee on Graduate Studies (UCGS) approved this request at its March 15, 2021 meeting.

   a. Replace the Guidance Committee section with the following:

   New students are assigned a temporary major professor by the Graduate Program Director, in consultation with the student and faculty member. The student is responsible for assembling a long-term major professor and guidance committee via consultation with faculty and, if desired, the Graduate Program Director. Students must have a major professor and guidance committee by the end of their third semester. The guidance committee consists of four or more Michigan State University regular faculty members. A majority of the guidance committee members must have appointments in the Department of Agricultural, Food, and Resource Economics.

   Effective Fall 2021.
3. Change the requirements for the **Bachelor of Science** degree in **Dietetics** in the Department of Food Science and Human Nutrition.

   a. Under the heading **Requirements for the Bachelor of Science Degree in Dietetics** make the following changes:

      (1) In item 1., replace paragraph two with the following:

      The University's Tier II writing requirement for the Dietetics major is met by completing Human Nutrition and Foods 472. That course is referenced in item 3. a. below.

   Effective Fall 2021.

4. Change the requirements for the **Bachelor of Science** degree in **Construction Management** in the School of Planning, Design and Construction to the following. The University Committee on Undergraduate Education (UCUE) approved this request at its March 25, 2021 meeting.

   a. Under the heading **Admission as a Junior** make the following changes:

      (1) Replace the first paragraph with the following:

      Construction management builds upon a basic understanding of mathematics, physics, statistics, and economics to develop the skills necessary to manage construction projects. Prior to enrollment in the major, students must have demonstrated this basic understanding by a minimum performance in the courses listed and a minimum grade point average of 3.00 in CMP courses listed in item 2. below.

      (2) Delete item 3.

      (3) Replace paragraph three with the following:

      While meeting all of the criteria above is necessary to be considered for admission to the Bachelor of Science Degree in Construction Management, it does not guarantee admission. Other factors such as MSU grade-point average, construction management grade-point average, work experience, personal experience, and diversity may also be considered.

   b. Under the heading **Requirements for the Bachelor of Science Degree in Construction Management** make the following changes:

      (1) In item 1., replace paragraphs three and four with the following:

      Students who are enrolled in the Construction Management major leading to the Bachelor of Science degree may complete an alternative track to Integrative Studies in Physical Sciences that consists of Physics 231. The completion of Physics 251 satisfies one credit towards the laboratory requirement. With advisor approval, the second required laboratory credit may be satisfied if the student completes a chemistry laboratory course or a physics laboratory course beyond Physics 251.

      Physics 231 and 251 may be counted toward both the alternative track and the requirements for the major referenced in item 3. below.

      (2) In item 2., delete the first sentence of paragraph two:

      Certain courses referenced in requirement 3. below may be counted toward College requirements as appropriate.

      (3) In item 3. a. change the total credits from ‘61’ to ‘64’ and add the following course:
PART I – NEW ACADEMIC PROGRAMS AND PROGRAM CHANGES

MGT 325 Management Skills and Processes 3

(4) In item 3. c. add the following courses:
   CMP 445 Green and Energy Efficient Building Construction 3
   CMP 493 Professional Internship in Construction Management 3

(5) In item 3. c. change the note to the following:
   Students must have a minimum grade-point of 2.0 in each of the following courses: CMP 401, 415, and 423.

(6) In item 3. c. delete the following courses:
   LA 230 Site Construction Materials and Methods 3
   PDC 431 Special Topics in Planning, Design and Construction 3

Add the following course:
   LA 230 Site Construction Materials and Methods 4

(7) In item 3. d., change the requirement to ‘One of the following courses with a minimum grade-point of 2.0’.

(8) Delete item 3. i.

Effective Fall 2021.

ELI BROAD COLLEGE OF BUSINESS

1. Change the Admission to the College requirements in The Eli Broad College of Business. The University Committee on Undergraduate Education (UCUE) approved this request at its February 4, 2021 meeting.

a. Delete the section title Freshmen.

b. Insert the following section:

Direct Admission for First-Year Students

Direct admission to the Broad College of Business is only offered to first-year students who are entering MSU in the fall semester. Students who matriculate in the spring semester and transfer students are not eligible for direct admission.

High school seniors are offered the opportunity to enter the Broad College of Business as first-year students or as a first-year student accepted into the Broad College. To be considered for Direct Admission, applicants must:

1. Be admitted to Michigan State University as a first-year student matriculating in the fall semester.
2. List one of the following business majors (accounting, finance, management, human resource management, marketing, supply chain management) as the intended major when applying to MSU.
3. Complete and submit the Broad Direct Admission supplemental application.

To be considered for acceptance into the Broad College, applicants must:

1. Be admitted to Michigan State University as a first-year student matriculating in the fall semester.
2. Select one of the following business majors (accounting, finance, management, hospitality business, human resource management, marketing, supply chain management) as the intended major when applying to MSU.
3. Complete and submit the Broad Direct Admission supplemental application.

To maintain admission to the Broad College, a direct admit student must meet the following requirements no later than the end of a student’s 3rd semester at MSU:

1. Achieve a 3.0 minimum cumulative grade-point average.
2. Achieve a 3.0 minimum grade-point average in specific Broad College pre-core courses. Pre-core requirements are Tier 1 Writing (WRA 101 or equivalent), EC 201 and/or EC 202, STT 200 or approved substitution.

3. Earn credit in CSE 102.

4. Students directly admitted to the college must also earn the RBC Leadership Certificate.

c. Under the heading Admission to the College make the following changes:

(1) Replace paragraphs two and three with the following:

Current MSU students and transfer students must apply for Broad College admission by April 1 for a fall semester admission. When needed, an off-cycle admission process can be added.

Admission is a holistic process that is based primarily on the cumulative grade-point average and grades in the pre-core courses listed below. Non-academic factors and experiences will also be considered.

(2) Change the introduction sentence of item 3. to the following:

Completion of the following pre-core courses which will be used to calculate a student's pre-core grade-point average:

Effective Fall 2022.

3. Establish a Minor in Financial Planning and Wealth Management in the Department of Finance. The University Committee on Undergraduate Education (UCUE) recommended approval of this request at its February 4, 2021 meeting.

a. Background Information:

Companies and individuals in the financial planning and wealth management industry have approached the Department of Finance in recent years. They have pointed out that the industry employs approximately 300,000 financial planners and wealth managers in the United States, and approximately one-third of these are approaching retirement age. Such a pronounced demand for qualified individuals in this industry suggests an opportunity to respond to it by creating a quality program that would increase the number of our graduates with academic training in the substantive issues of direct relevance to the industry.

A career as a financial advisor is one of the most rewarding careers for those who enjoy enabling others to reach their goals and live better lives. This career path involves a lot more than setting asset allocations or picking the right stocks, bonds and mutual funds. Its integral part is building lasting and meaningful relationships to help diverse groups of individuals meet their financial goals.
The title “financial advisor” is a broad description of many other types of careers in this field. Other jobs include chief investment officer, portfolio manager, relationship manager, financial planner, investment analyst, trust officer, retirement plan specialist, and account executive.

The Certified Financial Planner (CFP) designation is highly recommended for this career track. This designation is a key goal for students in the program. The CFP designation is the most prominent certification in the industry and is required for many jobs in the industry.

The Department of Finance has a strong presence in this field through its undergraduate Finance curriculum. Also, in an effort to develop the financial services market, the Department has entered into a partnership with the Certified Financial Planner Board of Standards Inc. (CFP Board), the entity overseeing its Certified Financial Planner (CFP) designation.

CFP Board is a Washington, D.C.-based independent 501(c)(3) non-profit organization whose mission is to benefit the public by granting, upholding, and promoting the Certified Financial Planner (CFP®) certification. Those who earn the certification are distinguishing themselves among their peers by meeting the CFP Board’s education, examination, experience, and ethics requirements. Students completing the financial planning program at Michigan State University will have met the education requirement for CFP® certification examination administered by the CFP Board.

The CFP Board currently oversees more than 300 programs at more than 200 institutions. CFP Board-registered programs are financial planning education programs at the college or university level that meet specific criteria for educating individuals who wish to fulfill the education component for obtaining the CFP® certification.

b. Academic Programs Catalog Text:

The Minor in Financial Planning and Wealth Management, which is administered by the Department of Finance, is designed to develop the knowledge and skills necessary to thrive in the field of financial planning and wealth management. The program develops knowledge of the industry’s financial, accounting, taxation, and regulatory environments, as well as the art of relationship management and the importance of a thorough appreciation of individual client differences and diversity. The program should be of interest to students whose undergraduate major is not in business or finance.

The minor is available as an elective to students who are enrolled in bachelor’s degree programs at Michigan State University. With the approval of the department and college that administer the student's degree program, the courses that are used to satisfy the requirements for the minor may also be used to satisfy the requirements for the bachelor’s degree. At least 9 credits counted towards the requirements for this minor must be unique. Unique credits must not be used to fulfill another university, college, or major requirement in the student’s program.

Students who plan to complete the requirements of the minor should consult an academic advisor in the Undergraduate Academic Services unit in the Eli Broad College of Business. Finance majors pursuing the minor should consult with their academic advisor to ensure that both their major and minor requirements are satisfied.

Admission

To be considered for admission to the Minor, a student must have completed one course from item a. and one course from item b. with a grade of at least 3.0 in each course:

Students must provide a completed online application, including a statement of purpose and a resume. This online application must be received by the Department of Finance by March 15 for the fall or summer semester admission, and by October 1 for the spring semester admission. By applying to the Minor, a student would agree to allow the selection committee to review the student’s grades.

Admission to the Minor is competitive and, therefore, not guaranteed. Meeting the minimum standards listed above does not guarantee admission. The applicant’s overall record is considered, including the student’s statement of objectives, and extra-curricular activities. Admission is subject to space availability.

Academic Standards

Students enrolled in the minor are expected to maintain a minimum grade-point average of 3.0 each semester, as well as a minimum cumulative grade-point average of 3.0. A student who does not maintain a 3.0 cumulative grade-point average will be placed on probation. Such a student will be given the next semester of enrollment to achieve a 3.0 cumulative grade-point average; otherwise, the student will be dismissed from the minor.

The Program Director is responsible for monitoring the progress of students enrolled in the program. A policy statement containing additional information relative to academic standards is available from the Director.

e. Complete one additional 3 credit Kinesiology course approved by the student’s academic advisor.

4. Completion of a final examination or evaluation.

Effective Fall 2022.

3. Change the name of the **Graduate Certificate in Sport Coaching and Leadership** in the Department of Kinesiology to **Sport Coaching**. The University Committee on Graduate Studies (UCGS) approved this request at its March 15, 2021 meeting.

Students admitted to the graduate certificate prior to Fall 2022 will be awarded a Graduate Certificate in Sport Coaching and Leadership.

Students admitted to the graduate certificate Fall 2022 and forward will be awarded a Graduate Certificate in Sport Coaching.

Effective Fall 2022.

4. Change the requirements for the **Graduate Certificate in Sport Coaching** in the Department of Kinesiology. The University Committee on Graduate Studies (UCGS) approved this request at its March 15, 2021 meeting.

a. Under the heading **Graduate Certificate in Sport Coaching and Leadership** replace the entire entry with the following:

   Students must complete 10 credits from the following:

   1. The following course (1 credit):

COLLEGE OF ENGINEERING

1. Change the requirements in the Bachelor of Science degree in Electrical Engineering in the Department of Electrical and Computer Engineering.

   The optional concentrations in the Bachelor of Science degree in Electrical Engineering are noted on the student’s academic record when the requirements for the degree have been completed.

   a. Under the heading Requirements for the Bachelor of Science Degree in Electrical Engineering make the following changes:

   (1) In item 3. b. change the total credits from ‘41’ to ‘38’.

   (2) In item 3. b. delete the following course:

       CSE 231 Introduction to Programming I 4

   (3) Replace item 3. d. with the following:

       Complete a minimum of 18 credits including at least 12 credits from the focus areas below. The 12 credits must include at least one laboratory course (ECE 402, 404, 405, 407, 410, 415, 417, 420, 430, 431, 445, 458, 476, 477) and at least one 3 or 4 credit course from two different focus areas. Additional credits to meet the 18 credit requirement may be taken from MTH 314, any 400-level engineering course or by completing an approved 3 or 4 credit experiential education experience obtained in a minimum of three out-of-classroom experiences through engineering cooperative education or independent study. Students interested in the experiential education experience must contact the department for approval. Courses at the 400-level outside of Electrical and Computer Engineering may have restrictions or require additional prerequisites not included within this degree program.

   (4) In item 3. d. Computing and Electronics delete the following course:

       ECE 402 Applications of Analog Integrated Circuits 4

       Add the following course:

       ECE 434 Autonomous Vehicles 3

   (5) In item 3. d. Systems add the following course:

       ECE 424 Electrical Drives 3

   (6) Add the following Concentrations:

       Digital Systems and Internet of Things

       This concentration is for students interested in graduate work or employment in the world of digital hardware, software and systems within the internet of things (IoT) industry. To earn a Bachelor of Science degree in Electrical Engineering with a Digital Systems and IoT concentration, students must complete requirements 1., 2., and 3. above and the following:

       CREDITS

       1. Complete at least four courses from the following:

       CSE 231 Introduction to Programming I 4
       ECE 411 Electronic Design Automation 4
       ECE 430 Embedded Cyber-Physical Systems 4
       ECE 431 Smart Sensors Systems 3
       ECE 442 Introduction to Communication Networks 3
       ECE 456 Introduction to Communication and Network Security 3
       ECE 466 Digital Signal Processing 3
Electromagnetics, Acoustics and Optics
This concentration is for students interested in graduate work or employment in areas related to electromagnetics, acoustics and optics. To earn a Bachelor of Science degree in Electrical Engineering with an EM, Acoustics and Optics concentration, students must complete requirements 1., 2., and 3. above and the following:

CREDITS

1. Complete at least four courses from the following:
   - ECE 405 Electromagnetic Fields and Waves II 4
   - ECE 407 Electromagnetic Compatibility 4
   - ECE 447 Introduction to Biomedical Imaging 3
   - ECE 449 Fundamentals of Acoustics 3
   - ECE 476 Electro-Optics 4

Radio Frequency and Wireless Technologies
This concentration is for students interested in radio frequency technologies and the theories and principles of electronic communication and networking for graduate work or employment in areas related to wireless communication. To earn a Bachelor of Science degree in Electrical Engineering with an RF and Wireless concentration, students must complete requirements 1., 2., and 3. above and the following:

CREDITS

1. Completion at least four courses from the following:
   - ECE 404 Radio Frequency Electronic Circuits 4
   - ECE 405 Electromagnetic Fields and Waves II 4
   - ECE 407 Electromagnetic Compatibility 4
   - ECE 442 Introduction to Communication Networks 3
   - ECE 457 Communication Systems 3

Robotics and Automation
This concentration is for students interested in graduate work or employment in robotics or automation areas. To earn a Bachelor of Science degree in Electrical Engineering with a robotics and automation concentration, students must complete requirements 1., 2., and 3. above and the following:

1. The following course:
   - ECE 417 Robotics 4

2. Complete 9 credits from the following:
   - ECE 415 Computer Aided Manufacturing 3
   - ECE 416 Digital Control 3
   - ECE 430 Embedded Cyber-Physical Systems 4
   - ECE 431 Smart Sensors Systems 3
   - ECE 434 Autonomous Vehicles 3
   - ECE 466 Digital Signal Processing 3

Microelectronics
This concentration is for students interested in graduate work in electronic materials, devices or circuits or employment in the semiconductor industry. To earn a Bachelor of Science degree in Electrical Engineering with a Microelectronics concentration, students must complete requirements 1., 2., and 3. above and the following:

CREDITS

1. Complete at least four courses from the following:
   - ECE 404 Radio Frequency Electronic Circuits 4
   - ECE 410 VLSI Design 4
   - ECE 425 Solid State Power Conversion 3
   - ECE 476 Electro-Optics 4
   - ECE 477 Microelectronic Fabrication 3
PART I – NEW ACADEMIC PROGRAMS AND PROGRAM CHANGES

**Smart Devices**
This concentration is for students interested in the design and implementation of smart devices and systems for graduate work or employment in consumer electronics and wearables fields. To earn a Bachelor of Science degree in Electrical Engineering with a Smart Devices concentration, students must complete requirements 1., 2., and 3. above and the following:

3. In item 3. d. **Hardware** delete the following course:
   - ECE 402 Applications of Analog Integrated Circuits 4
4. In item 3. d. **Software Systems** add the following courses:
   - CSE 431 Algorithm Engineering 3
   - CSE 480 Database Systems 3
5. In item 3. d. **Intelligent Systems** add the following courses:
   - CSE 404 Introduction to Machine Learning 3
   - CSE 482 Big Data Analysis 3
   - ECE 434 Autonomous Vehicles 3
   - MTH 314 Matrix Algebra with Computational Applications 3
   - STT 351 Probability and Statistics for Engineering 3
6. Add the following **Concentrations**:

**Cybersecurity**
This concentration is for students interested in the theory and practice of communication networks and security. To earn a Bachelor of Science degree in Computer Engineering with a cybersecurity concentration, students must complete requirements 1., 2., and 3. above and the following:

   - ECE 431 Smart Sensors Systems 3
   - ECE 445 Biomedical Instrumentation 3
   - ECE 466 Digital Signal Processing 3

Software Systems

This concentration is for students wishing to focus on software development for graduate work or employment in embedded systems, cloud services and other software intensive fields. To earn a Bachelor of Science degree in Computer Engineering with a software systems concentration, students must complete requirements 1., 2., and 3. above and the following:

1. Complete at least 13 credits from the following:
   
   - CSE 410 Operating Systems 3
   - CSE 415 Introduction to Parallel Programming 3
   - CSE 435 Software Engineering 3
   - CSE 450 Translation of Programming Languages 3

LYMAN BRIGGS COLLEGE

1. Change the name of the Biological Science-Interdepartmental coordinate major leading to the Bachelor of Science Degree in Lyman Briggs College to Biological Science-Secondary Education.

   Effective Fall 2021.

2. Change the name of the Physical Science-Interdepartmental coordinate major leading to the Bachelor of Science Degree in Lyman Briggs College to Physical Science-Secondary Education.

   Effective Fall 2021.

COLLEGE OF SOCIAL SCIENCE

1. Change the requirements for the Bachelor of Science degree in Anthropology Department of Anthropology.

   a. Under the heading Requirements for the Bachelor of Science Degree in Anthropology make the following changes:

      (1) In item 3., change the total credits from ‘30’ to ‘33’.

      (2) Delete items 3. b. through 3. g. and replace with the following:

      b. One of the following area courses (3 credits):
         - ANP 410 Anthropology of Latin America
         - ANP 411 North American Indian Ethnography
         - ANP 415 China: Culture and Society
         - ANP 417 Introduction to Islam in Africa
         - ANP 419 Anthropology of the Middle East
         - ANP 432 American Indian Women
         - ANP 433 Contemporary American Indian Communities
         - ANP 437 Asian Emigrant Communities: A Global Perspective
         - ANP 452 North American Archaeology
         - ANP 455 Archaeology of Ancient Egypt

      c. One of the following topical/analytical courses (3 credits):
         - ANP 310 Archeology of Human Migrations
         - ANP 320 Social and Cultural Theory
         - ANP 321 Anthropology of Social Movements
         - ANP 325 Anthropology of the Environment and Development

   ANP 412 Method and Practice in Digital Heritage 3
   ANP 429 Ethnographic Field Methods 4
   ANP 441 Osteology and Forensic Anthropology 4
   ANP 463 Laboratory Methods in Archaeology 3
   ANP 464 Field Methods in Archaeology 2 to 6

e. Complete 12 credits of Anthropology courses, at least 9 credits
   of which must at the 300-level or above. ANP 101 or 200 may
   not be used to fulfill this requirement.

(3) Add the following item 4.:

Other Required Courses (12 credits):
Complete a 12 credits in Science, Technology, Engineering, and Mathematics (STEM)
courses from the following list of courses: Fulfillment of this requirement also meets the
College of Social Science STEM Graduation Requirement for the Bachelor of Science
degree and may not concurrently satisfy a University requirement.

a. One of the following courses (3 or 4 credits):

2. Establish a **Master of Science** degree in **Cybercrime and Digital Investigation** in the School of Criminal Justice. The University Committee on Graduate Studies (UCGS) recommended approval of this request at its February 8, 2021 meeting.

   a. **Background Information:**

   During the 2019/2020 academic year, the School of Criminal Justice submitted a certificate program request that could be taken by students in their online law enforcement and intelligence analysis and masters criminal justice degrees. The School argued that it wanted to expand that certificate into a full degree within one year, all of which would fall under the category of RBI based on the complete online format and nesting within the existing online degree platform.

   Cybercrime is a form of transnational crime and is currently the top national security threat. According to the United Nations, cybercrime affects more than 431 million adult victims globally. Specific types of crime include computer hacking, digital piracy, electronic fraud and theft, and sexual victimization. Identity-related offenses are both the most common and fastest growing forms of consumer fraud on the Internet, especially through the misuse of credit card information. While teaching citizens techniques for safe online behavior and digital privacy can curb some cybercrime, the immediate need for professionals trained to address the threats posed by cybercrime through enhanced cyber security investigations is quite evident. Additionally, terrorists, extremists, and ideologically motivated actors of all stripes utilize the Internet and associated technologies to affect nations and citizens alike. Nation-states have also harnessed the power of technology to attack their rivals, whether through the theft of intellectual property via hacking to gain economic advantage or harm their power grids. Cyber security related job postings grew 114% between 2011 to 2015, according to Burning Glass Technologies. A 2012 Bureau of Labor Statistics report also projected the field to grow by 22% over the next ten years, with as many as 120,000 new jobs created in this sector. Most entry-level positions require a bachelor’s degree at a minimum, and colleges are only meeting 24 percent of the entry-level demand. The certificate program has already begun as of Fall 2020, and the initial course offering is filled to capacity.

   Cybercrime is a major area of focus for the School of Criminal Justice (SCJ) and peer institutions in the Big 10, with 5 of the Big 10 institutions (e.g., Illinois, Maryland, Indiana, Ohio State, and Minnesota) having associated institutes or regularly holding summits on cybercrime. The SCJ is one of two (University of Maryland) top 10 Ph.D. granting programs in criminology/criminal justice within the United States that offers courses for graduate students to specialize in cybercrime research through innovative course content and the ability to structure cognate courses across the campus. No criminal justice programs at AAU institutions offer a cybersecurity specialization. Within the Computer Science and Engineering degree programs, a few offer a specialization in e-crime, but it is largely focused on digital forensic training (e.g. University of Albany, USF). SCJ can differentiate itself through a focused certificate on cybercrime/cybersecurity with five specialized courses at the graduate (master’s) degree level and launch a Master of Science degree in Cybercrime and Digital Investigation.

   b. **Academic Programs Catalog Text:**

   The Master of Science degree in Cybercrime and Digital Investigation prepares students for successful careers related to the investigation of or response to cybercrime in both the public sector (law enforcement, government) and private industry. Students gain an understanding of the diverse nature of cybercrime threats that affect individuals and organizations’ economic and physical safety. They also will recognize the risks posed by nation-states and terrorist organizations in online spaces, whether to intellectual property, economic operations, or national security and be
capable of assessing these threats, understanding their impact to various individual and organization targets, the limits of current legal and cybersecurity policy and practice, and clearly communicate these concerns to diverse audiences.

In addition to meeting the requirements of the university and the College of Social Science, students must meet the requirements specified below.

**Admission**

To be considered for admission to the Master of Science degree in Cybercrime and Digital Investigation students must:

1. have a bachelor’s degree from a recognized educational institution, including a background of education, occupational experience appropriate to the successful pursuit of graduate study, and evidence of personal traits and characteristics considered important for scholarly performance.
2. have at least 12 credits of undergraduate course work in political science, economics, sociology, psychology, anthropology, history, social work, or any combination thereof. At least 6 of these credits must be in sociology, psychology, social work, or any combination of such courses.
3. have a cumulative undergraduate grade-point average of at least 3.20 or higher.
4. have satisfactory scores on the Graduate Record Examination General Test. The GRE exam is waived for candidates with a cumulative undergraduate grade-point average of 3.2 or higher from an accredited and recognized institution, and for applicants with a completed graduate degree.

Students who have deficiencies for regular admission to the program may be admitted provisionally. These deficiencies may require additional course work to make up the deficiencies. This course work will not count towards the requirements for the degree. Occupational experience is highly desirable before pursuing graduate study in some fields of criminal justice.

**Requirements for the Master of Science Degree in Cybercrime and Digital Investigation**

At least 30 credits are required for the degree under Plan B (without thesis). The students program of study is planned and approved in consultation with their advisor. The program is available only online.
